Maps and diagrams (list) xiv
Letter of transmittal of Chief Statistician for Population to the Director of the Census xv

STATISTICS OF POPULATION.

INTRODUCTION ..... xvii, xviii
Areas of enumeration and division into districts xvii
Enumeration of certain elements of the population xvii
Special provision for the enumeration of the population of cities xvii
Receipt of completed returns and settlement of enumerators' accounts xvii
Announcements of population ..... xvii, xviii
POPULATION OF STATES AND TERRITORIES ..... xviii–xxxi
Population of the United States, by states and territories, in 1900 xviii
Indians not taxed, in 1900 xviii
Persons enumerated at military and naval stations abroad, in 1900 xix
Censuses of Porto Rico and Cuba taken in 1899 under the direction of the War Department xix
Census of the Philippines, Guam, and Tutuila not taken since their possession by the United States xix
Census of Indian Territory or Indian reservations not taken prior to 1890 xix
Census of Alaska not taken prior to 1880 xix
Censuses of the Hawaiian Islands xix
Comparison of population for equivalent areas, in 1890 and 1900 xix
Population of the United States at each census, from 1790 to 1900 xix
Deficiency in the population of the Southern states in 1870 xx
Increase in population of the United States at each census, from 1790 to 1900 xx
Population of states and territories, arranged geographically, in 1890 and 1900 ..... xx, xxi
Increase in population of states and territories, arranged geographically, from 1890 to 1900 xxi
Population of states and territories, arranged geographically, from 1790 to 1900 ..... xxii, xxiii
Increase in population of states and territories, arranged geographically, from 1790 to 1900 ..... xxiv, xxv
Population of certain states, according to the state census of 1895, as compared with their population in 1890 and 1900 xxvi
Discussion of the growth of population of the several states and territories, from 1790 to 1900 ..... xxvii–xxxi
DENSITY OF POPULATION ..... xxxi–xxxv
Accessions of territory by the United States xxxi
Gross area of the United States, exclusive of Alaska and Hawaii, at each census, from 1790 to 1900 xxxii
Area of the United States in square miles, by states and territories, in 1900 xxxii
Density of population of the United States, by states and territories arranged geographically, from 1790 to 1900 xxxiii
Explanation of maps and diagrams relating to density of population ..... xxxiv, xxxv
CENTER OF POPULATION AND ITS MEDIAN POINT ..... xxxv–xxxvii
The location of the center of population in 1900 xxxv
Method of determining the center of population xxxv
The location of the center of population at each census, from 1790 to 1900 ..... xxxv, xxxvi
The location of the center of area of the United States in 1900 xxxvi
The location of the median point of population at the censuses of 1880, 1890, and 1900 xxxvii
POPULATION OF COUNTIES ..... xxxvii–lvii
Number of counties or equivalent subdivisions, by states and territories, in 1890 and 1900 xxxvii
Increase in population of counties or equivalent subdivisions, from 1890 to 1900, with areas for 1900 ..... xxxviii–lvii
POPULATION OF INCORPORATED PLACES ..... lviii–lxxxi
Number of incorporated places in the United States in 1890 and 1900, and how determined lviii
Number of incorporated places in the United States, classified by size, in 1890 and 1900 ..... lviii, lix
Number of incorporated places, classified by size, by states and territories, in 1890 and 1900 ..... lx, lxi
Percentage of population of incorporated places of total population, by states and territories arranged geographically, in 1890 and 1900 ..... lxii, lxiii
Percentage of population of incorporated places, by classified sizes, of total population of the United States, in 1890 and 1900 ..... lxiii, lxiv
Number and population of incorporated places, classified by size, by states and territories arranged geographically, in 1890 and 1900 ..... lxv, lxvi
Number and population of incorporated places classified by size, in the United States and each geographical division, with percentages, in 1890 and 1900 ..... lxvii, lxviii

POPULATION OF INCORPORATED PLACES—Continued. Page.
Population of cities having 25,000 inhabitants or more in 1900, arranged according to population, from 1880 to 1900 ..... lxix, lxx
Changes in the relative rank of the principal cities, from 1880 to 1900 lxxi
Population of cities having 25,000 inhabitants or more in 1900, arranged according to classified sizes, from 1880 to 1900 .. lxxi, lxxii
Population of cities having 200,000 inhabitants or more in 1900, arranged according to classified sizes, from 1880 to 1900 ... lxxii
Combined population of the 161 cities having 25,000 inhabitants or more in 1900, distributed by states and territories arranged geographically, from 1880 to 1900 ..... lxxiii, lxxiv
Population of wards (or equivalent subdivisions) of cities having 25,000 inhabitants or more in 1900, arranged alphabetically, by states and territories ..... lxxiv–lxxx
Changes in the organization and population of the city of New York since 1890 lxxx
Estimated population of New York city and its boroughs, as now constituted, from 1790 to 1900 ..... lxxx, lxxxi
URBAN POPULATION ..... lxxxi–lxxxviii
Discussion of urban population in 1890 limited to places of 8,000 inhabitants or more lxxxi
Total and urban population, on the basis of places of 8,000 inhabitants or more, by states and territories arranged geographically, in 1890 and 1900 ..... lxxxii, lxxxiii
Total and urban population, on the basis of places of 8,000 inhabitants or more, at each census, from 1790 to 1900 lxxxiii
Total and urban population, on the basis of places of 4,000 inhabitants or more, by states and territories arranged geographically, in 1880, 1890, and 1900 ..... lxxxiv–lxxxvi
The influence of the concentration of population in the large cities upon the urban population of certain states ..... lxxxvi, lxxxvii
Distribution of urban population by geographical divisions, in 1890 and 1900 lxxxvii
Increase in total and urban population, by geographical divisions, from 1890 to 1900 lxxxvii
Increase in total and urban population, by states and territories arranged geographically, from 1890 to 1900 lxxxviii
RURAL POPULATION ..... lxxxix, xc
Semi-urban and rural population defined lxxxix
Increase in urban, semi-urban, and rural population, by states and territories arranged geographically, from 1890 to 1900 .. lxxxix, xc
SEX ..... xci–xcviii
Number of Indians and other persons returned on Indian reservations, etc., in certain states and territories, in 1890 and 1900 .. xci
Male and female population, by states and territories arranged geographically, in 1890 and 1900, with increase since 1890 .. xcii, xciii
Percentage of males and females of total population, by states and territories arranged geographically, in 1890 and 1900 .. xciii, xciv
Percentage of males and females of total population of the United States, from 1850 to 1900 xciv
Excess of males over females, distributed by general nativity and color, by states and territories arranged geographically, in 1900 ..... xciv–xcvi
Relative proportions of females to males, by states and territories arranged geographically, in 1890 and 1900 xcvii
Relative increase or decrease in females, by states and territories arranged geographically, from 1880 to 1900 ..... xcvii, xcviii
GENERAL NATIVITY ..... xcviii–cx
Native and foreign born population, by states and territories arranged geographically, in 1880, 1890, and 1900, with increase from 1890 to 1900 ..... xcviii, xcix
Increase in foreign born, by states and territories arranged geographically, from 1880 to 1900 ..... c, ci
Increase in foreign born, by geographical divisions, from 1880 to 1900 ci
Concentration in the northeasterly states of the increase in the foreign born, from 1880 to 1900 ..... ci, cii
Number of immigrants to the United States, from 1821 to 1900 ..... cii, ciii
Percentage of native and foreign born of total population, from 1850 to 1900 ciii
Percentage of native and foreign born of total population, by states and territories arranged geographically, in 1890 and 1900 .. ciii, civ
Distribution of the foreign born population, by geographical divisions, from 1850 to 1900 civ
Foreign born population in 1900, distributed numerically by states and territories cv
Relative proportions of foreign to native born, by states and territories arranged geographically, in 1890 and 1900 cv
Relative increase or decrease in foreign born, by states and territories arranged geographically, from 1880 to 1900 cvi
Proportion of foreign born in the principal cities as compared with the remainder of the country, by states and territories arranged geographically, in 1900 ..... cvii, cviii
Native and foreign born population of the principal cities and of the states in which they are situated, in 1900 ..... cix, cx
COLOR ..... cxi–cxxiv
Composition of the white and colored population, in 1890 and 1900 cxi
White and negro population, by states and territories arranged geographically, from 1880 to 1900, with increase since 1890 .. cxii
Increase in native white persons of native parentage and in persons of negro descent, for the South Atlantic and South Central divisions, by states and territories, from 1890 to 1900 cxiii
Percentage of white and colored of total population, by states and territories arranged geographically, in 1890 and 1900 cxiv
Percentage of white and negro of total population, from 1790 to 1900 cxv
Persons of negro descent in 1900, distributed numerically by states and territories cxv
Relative proportions of negroes to whites, by states and territories arranged geographically, in 1890 and 1900 cxvi
Relative increase or decrease of negro population, by states and territories arranged geographically, from 1880 to 1900 ... cxvi, cxvii
Percentage of native and foreign white of total population, by states and territories arranged geographically, in 1890 and 1900 cxviii
Population by general nativity and color, for cities having 25,000 inhabitants or more, in 1900 ..... cxix–cxxi
Percentage of native and foreign white and colored of total population, for cities having 100,000 inhabitants or more, in 1900 .. cxxii
Proportion of negroes to total population in each of 56 cities containing at least 2,500 persons of negro descent, in 1900 cxxii
Chinese and Japanese population, by states and territories arranged geographically, in 1890 and 1900 cxxiii
Indian population, by states and territories arranged geographically, in 1890 and 1900 cxxiv

Page.

STATE OR TERRITORY OF BIRTH ..... cxxv–clxix
Number and percentage of persons living in state or territory of birth, from 1850 to 1900 cxxv
Native population, distributed according to state or territory of birth, by states and territories arranged geographically, in 1900 ..... cxxvi–cxxx
Number and percentage of native born persons, classified as persons born and living in specified state or territory of birth and other native born, by states and territories arranged geographically, in 1890 and 1900 ..... cxxxi, cxxxv
Number and percentage of native white and native negro persons, classified as persons born and living in specified state or territory of birth and other native born, by states and territories arranged geographically, in 1900 ..... cxxxii, cxxxv
Number and percentage of native white persons of native and foreign parentage, classified as persons born and living in specified state or territory of birth and other native born, by states and territories arranged geographically, in 1900 .. cxxxiii, cxxxv
Distribution of "other native born", by states and territories arranged geographically, in 1900 cxxxiv
Distribution of persons living in each specified state or territory who were born in other states and territories, in 1900 .. cxxxvi–cxlvi
Total population classified according to the number and percentage of persons born and living in state or territory, other native born persons living in state or territory, and foreign born persons, by states and territories arranged geographically, in 1900 ..... cxlvi–cxlviii
Total number of persons born in each state or territory, distributed according to the number and percentage living in state or territory of birth or in other states or territories, by states and territories arranged geographically, in 1890 and 1900 .. cxlviii, cxlix
Total number of persons living outside of state or territory of birth, distributed according to the number living in other parts of the same division or in other divisions, by states and territories arranged geographically, in 1890 and 1900 ..... cl–clii
Number and percentage of persons living in the state or territory of birth, and living outside the state or territory of birth, distributed according to the number living in other parts of the same division or in other divisions, arranged by geographical divisions, in 1890 and 1900 ..... clii, cliii
Distribution of persons born in each specified state or territory who were living in other states and territories, in 1900 ..... cliii–clxii
Number and percentage of persons of negro descent in the Southern states, from 1850 to 1900 ..... clxii, clxiii
Northward and southward movement of the negro population since 1850 clxiii
Number of native negroes given by the upper Southern states to other groups of states, contrasted with the number of native negroes received by the upper Southern group from the other groups of states, in 1900 ..... clxiii–clxv
Number of native negroes given by the lower Southern states to other groups of states, contrasted with the number of native negroes received by the lower Southern group from the other groups of states, in 1900 ..... clxiv, clxv
Number of native negroes given by each state comprising the upper Southern group to each state comprising the lower Southern group, contrasted with the number received by each state in each group, respectively, in 1900 clxv
Number of native negroes given by each state comprising the upper and lower Southern groups of states to each state comprising the Northern border group, contrasted with the number received by each state in each Southern group from each state in the Northern border group, respectively, in 1900 ..... clxv, clxvi
Total population of each of the 161 principal cities, classified according to the number and percentage of persons born in the state or territory in which each city is situated, of other native born persons, and of foreign born persons, in 1900 ..... clxvi–clxix

COUNTRY OF BIRTH ..... clxx–clxxx
Foreign born population, distributed according to country of birth, in 1900 ..... clxx, clxxi
Foreign born population, distributed according to principal countries of birth, from 1850 to 1900 ..... clxxi, clxxii
Increase in foreign born population, distributed according to principal countries of birth, from 1890 to 1900 clxxii
Foreign born population, distributed according to principal countries of birth, by states and territories arranged geographically, in 1900 ..... clxxiii, clxxiv
Proportion of each of the principal nationalities found in each geographical division of the country, in 1900 clxxv
Proportion of natives of each of the principal foreign countries of the total number of foreign born in each geographical division, in 1900 clxxv
Proportion of foreign born persons of the different nationalities found in 160 principal cities of the country, in 1900 ... clxxv, clxxvi
Foreign born population of certain cities, distributed by principal countries of birth, in 1900 ..... clxxvi–clxxx

FOREIGN PARENTAGE ..... clxxxi–cxcvii
Number and percentage of total population of foreign parentage, in 1870, 1890, and 1900 ..... clxxxi–clxxxiii
Number and proportion of persons of native and foreign parentage, classified by general nativity and color, in 1900 .. clxxxiii, clxxxiv
Persons of foreign parentage, distributed according to the number having either both parents foreign born or one parent foreign born and one parent native born, in 1900 clxxxiv
Persons of foreign parentage, distributed according to the number and proportion having both parents born in the same country or of mixed foreign parentage, in 1900 clxxxiv
Number and percentage of white and colored population of foreign parentage, by states and territories arranged geographically, in 1900 clxxxv
Number of native and foreign white persons of foreign parentage, and percentage of total population, by states and territories arranged geographically, in 1900 clxxxvi
Number of persons of foreign parentage, and percentage of total population, for cities having 25,000 inhabitants or more, in 1900 ..... clxxxvii–cxc
Number of persons of foreign parentage, distributed according to the number having one or both parents born in specified countries, in 1900 cxc
Percentage of persons of foreign parentage, distributed according to the number having one or both parents born in specified countries, in 1900 cxci
Percentage of white persons having either both parents born in specified country, or one parent so born and one parent native born, in 1900 cxci
Number of white persons having fathers and mothers born in specified countries, in 1900 cxcii

FOREIGN PARENTAGE—Continued. Page.
Number of persons of mixed foreign parentage represented by the principal combinations of parentage, in 1900 cxciii
Number and percentage of white persons of foreign parentage having either one or both parents born in specified countries, by states and territories arranged geographically, in 1900 ..... cxciv–cxcvii
CITIZENSHIP, AND YEARS IN THE UNITED STATES ..... cxcviii–ccxxi
Increase in males of voting age, by general nativity and color, from 1890 to 1900 cxcviii
Males of voting age, by general nativity and color, by states and territories arranged geographically, in 1900 cxcix
Percentage of native and foreign born of total males of voting age, by states and territories arranged geographically, in 1890 and 1900 cc
Percentage of native and foreign white and colored of total males of voting age, by states and territories arranged geographically, in 1890 and 1900 ..... cci, ccii
Ratio of potential voters to total population, by states and territories arranged geographically, in 1900 ..... ccii, cciii
Number and percentage of illiterate native and foreign born males of voting age, by states and territories arranged geographically, in 1900 ..... cciii, cciv
Number and percentage of illiterate native and foreign white and colored males of voting age, by states and territories arranged geographically, in 1900 ccv
Number and percentage of illiterate colored males of voting age, in detail, by states and territories arranged geographically, in 1900 ccvi
Number and percentage of illiterate native and foreign born males of voting age, for cities having 100,000 inhabitants or more, in 1900 ccvii
Number and percentage of native and foreign white and colored males of voting age, for cities having 100,000 inhabitants or more, in 1900 ccviii
Foreign born males of voting age, distributed according to citizenship, by geographical divisions, in 1890 and 1900 ..... ccix, ccx
Foreign born males of voting age, classified according to citizenship and literacy, by states and territories arranged geographically, in 1900 ccxi
Percentage of foreign born males of voting age, distributed according to citizenship, by states and territories arranged geographically, in 1890 and 1900 ..... ccx–ccxii
Percentage of foreign born males of voting age, distributed according to citizenship, for cities having 100,000 inhabitants or more, in 1900 ..... ccxii, ccxiii
Number and percentage of illiterate foreign born males of voting age, in detail according to citizenship, for cities having 100,000 inhabitants or more, in 1900 ccxiii
Percentage of literate and illiterate foreign born males of voting age, in detail according to citizenship, by states and territories arranged geographically, in 1900 ccxiv
Number and percentage of foreign born males of voting age, classified according to citizenship and inability to speak English, for cities having 100,000 inhabitants or more, in 1900 ccxv
Number and percentage of foreign born males of voting age, classified according to citizenship and inability to speak English, by states and territories arranged geographically, in 1900 ..... ccxv, ccxvi
Percentage of aliens to the total number of males of voting age born in specified countries, in 1900 ccxvii
Number and percentage of males of voting age, distributed according to parentage, in 1900 ccxvii
Distribution of the foreign born population of the United States in 1900 according to the number and percentage of persons who have either arrived in this country since 1890, who were residents in 1890, or were residents in 1880, by states and territories arranged geographically ..... ccxviii, ccxix
Alien population, distributed according to number of years in the United States, by number and percentage, in 1890 and 1900 ccxx
Alien population, distributed according to number of years in the United States, for cities having 100,000 inhabitants or more, in 1900 ccxx
Alien population, distributed according to number of years in the United States, by states and territories arranged geographically, in 1900 ccxxi
APPENDIX A.—REPORT ON BOUNDARIES OF TERRITORIAL ACQUISITIONS ..... ccxxiii–ccxxvi
APPENDIX B.—APPORTIONMENTS ..... ccxxvii–ccxxix
Apportionment of Representatives under the Twelfth Census, by states ccxxvii
Number of Representatives assigned to each of the states in the House of Representatives of Congress prior to the first census, and under the several enumerations ..... ccxxviii, ccxxix

MAPS AND DIAGRAMS—PART I.

[The maps and diagrams are bound together at the end of the analytical text and immediately preceding the general tables.]

AGGREGATE POPULATION:

Accessions of territory from the Treaty of Peace to the Gadsden purchase ..... Map. Plate 1.
Total and urban population at each census ..... Diagram. Plate 2.
Total and urban population by states and territories: 1900 ..... Diagram. Plate 3.
Total population of each state and territory at each census ..... Diagram. Plate 4.

DENSITY OF POPULATION:

Density of population at each census, excluding Alaska and Hawaii ..... Diagram. Plate 2.
Density of population by states and territories: 1900 ..... Diagram. Plate 3.
Density of increase of population of the United States: 1890 to 1900 ..... Map. Plate 5.
Distribution of the population of the United States: 1900 ..... Map. Plate 8.

CENTER OF POPULATION:

Sketch of the center of population: 1900 ..... Map. Plate 6.
Center of population at each census: 1790 to 1900 ..... Map. Plate 7.

URBAN POPULATION:

Total and urban population at each census ..... Diagram. Plate 2.
Proportion of urban to total population at each census ..... Diagram. Plate 2.
Total and urban population, by states and territories: 1900 ..... Diagram. Plate 3.
Total population of cities of more than 100,000 inhabitants: 1900 ..... Diagram. Plate 3.
Proportion of urban to total population, by states and territories, at each census ..... Diagram. Plate 9.
Total population of great cities at each census ..... Diagram. Plate 10.

SEX, GENERAL NATIVITY, AND COLOR:

The predominating sex: 1900 ..... Map. Plate 11.
Foreign born population, by states and territories: 1900 ..... Diagram. Plate 12.
Negro population, by states and territories: 1900 ..... Diagram. Plate 13.
Constituents of the population of states and territories: 1900 ..... Diagram. Plate 14.
The constituents of the population of cities of more than 100,000 inhabitants: 1900 ..... Diagram. Plate 15.

STATE OR TERRITORY OF BIRTH:

Composition of the population of states and territories, including resident natives, native immigrants, and foreign born, with per cent of native emigrants: 1900 ..... Diagram. Plate 16.

COUNTRY OF BIRTH:

Foreign born of each leading nationality at each census: 1850 to 1900 ..... Diagram. Plate 17.

FOREIGN PARENTAGE:

White population of foreign parentage, including foreign born whites, by states and territories: 1900 ..... Diagram. Plate 18.

CITIZENSHIP, AND YEARS IN THE UNITED STATES:

Proportion of aliens to total foreign born males of voting age in each specified nativity: 1900 ..... Diagram. Plate 18.

STATISTICS OF POPULATION.

INTRODUCTION.

By the terms of the census act, approved March 3, 1899, the Census Office was charged with the duty of enumerating the population of each of the states and organized territories, including the District of Columbia, and, in addition, the population of Alaska, Hawaii, and Indian Territory. For the purposes of this enumeration 300 supervisors' districts were established, and in 297 of these districts, comprehending all the area to be canvassed, with the exception of Alaska and Hawaii, the conduct of the work was vested in officers termed by the census act supervisors of census, appointed by the President and confirmed by the Senate. In the remaining 3 districts, namely, 2 in Alaska and 1 in Hawaii, the enumeration was placed in charge of special agents, appointed by the Director of the Census, under the discretion given him by the census act. The area comprising the 297 supervisors' districts was in turn divided into 52,726 enumeration districts, and, similarly, that comprising the 3 districts in Alaska and Hawaii into 145 districts. The census was taken as of June 1, 1900, and was to be completed in two weeks in places of 8,000 inhabitants or more at the census of 1890, and in one month in rural districts.

By special arrangement with the Secretary of War and the Secretary of the Navy, the enumeration of persons in the military and naval service, either at stations in this country or abroad, was made in behalf of this office through the agencies of the War and Navy Departments. Similarly, the enumeration of the population of the Indian reservations was made in cooperation with the Commissioner of Indian Affairs, while the enumeration of the population of the larger institutions of the country was provided for through the appointment of special "institution" enumerators.

Special provision was also made for securing a much closer supervision than heretofore of the work of the enumerators in many of the cities of considerable size by the appointment of special agents to assist the supervisors in these cities, and, for the further purpose of insuring a thorough canvass, (1) by the use of the "street-book", in which a record of each enumerator's work was made by him daily; (2) by the use of the individual census slip for obtaining a correct return for any person (particularly a lodger or boarder) absent at the time of the enumerator's call; and (3) by the use of the "absent family" schedule for securing a complete record of any family resident within the enumeration district but temporarily absent for the whole or a part of the summer season.

The first completed returns were received from the census enumerators on June 13, 1900, and a few days later the work of examining the schedules was begun for the twofold purpose of verifying the statements made on the enumerators' pay vouchers, so that they could be passed forward for settlement with as little delay as possible, and of preparing the population returns for the processes of detailed tabulation. The receipt and examination of the schedules, so far as that work affected the settlement of the enumerators' accounts (exclusive of the returns for Alaska and Hawaii and for the military and naval population enumerated at stations abroad), were substantially completed on August 31, when 45,300, out of a total of 53,400 accounts (not necessarily equivalent to that number of enumeration districts), had been passed forward for payment, the remaining accounts being temporarily withheld for certain corrections in the returns relating to agriculture or manufactures; but practically all these accounts were released for payment by the close of the month of September, or within three months from the date (July 1) set for the legal termination of the actual work of enumeration.

The first announcement of population was made to the newspaper press on July 14, 1900, being the population of the city of Washington, coextensive for the purposes of the census with the District of Columbia, and similar announcements followed soon thereafter almost daily until October 6, 1900, when the announcement of the population of the principal cities of the country was completed, representing, in the aggregate, very nearly 20,000,000 persons.

A preliminary statement of the population of the United States, in detail by states and territories, was given to the newspaper press on October 30, 1900, and was followed in less than a month, or on November 27, 1900, by a verified statement of the population of the entire country, including an estimate of 14,400 persons in the military and naval service of the United States

stationed abroad, principally in the Philippines, for which no returns had at that time been received. Since the latter announcement a few minor changes in the population have been made, arising from complaints of faulty enumeration which, upon investigation, were sufficiently substantiated to warrant making the necessary corrections.

The first statement of population in printed bulletin form was made on October 3, 1900, this being the first of a series of bulletins giving the population of the several states and territories in detail by counties and minor civil divisions. The publication of these state and territory bulletins was completed on March 6, 1901, and was followed on May 29, 1901, by an advance edition of a portion of the final report on population, comprising tables 1 to 8 of the general tables contained in this volume (Part I, pages 1 to 480).

The alphabetical arrangement of the states and territories is maintained throughout the general tables, for convenience of consultation, but in the analytical presentations which follow, the states and territories, with few exceptions, are arranged, for convenience of discussion, in their geographical order under each of the five grand divisions into which the country is divided for census purposes.

The maps and diagrams used in this volume to illustrate certain features of the discussion of the statistics of population are contained on 18 plates, bound together, for convenience, at the end of the analytical text and immediately preceding the general tables.

POPULATION OF STATES AND TERRITORIES.

The population of the United States, including that of Alaska, Hawaii, Indian Territory, and Indian reservations, according to the official count of the returns of the Twelfth Census, taken as of June 1, 1900, is 76,303,387, distributed by states and territories as follows:

TABLE I.—*Population of the United States by states and territories: 1900.*

STATES AND TERRITORIES.	Population in 1900.	Indians not taxed in 1900.
The United States	76,303,387	129,518

Total for 45 states	74,607,225	44,617
Territories.		
Alaska	63,592	.....
Arizona	122,931	24,644
District of Columbia	278,718	.....
Hawaii	154,001	.....
Indian Territory	392,060	51,393
New Mexico	195,310	2,937
Oklahoma	398,331	5,927
Total for 7 territories	1,604,943	84,901
Persons in the military and naval service of the United States (including civilian employees, etc.) stationed abroad, not credited to any state or territory.	91,219	.....

As shown by table 1, 129,518 Indians not taxed were enumerated at the census of 1900, and are included in the statement of the aggregate population of the country and of the several states and territories in which they are found; but, under the provisions of the Constitution, the number of Indians not taxed living in the 45 states (44,617) should be deducted from the total population of the states and from that of each state affected thereby, for the purpose of determining the population required for the apportionment of representatives.

The 91,219 persons enumerated at military and naval stations abroad, including naval vessels, are distributed as follows:

TABLE II.—*Persons enumerated at military and naval stations abroad: 1900.*

LOCATION OF STATIONS.	Total.	Officers and enlisted men.	Civilian employees, etc.
Aggregate	91,219	87,538	3,681
Naval vessels	14,701	14,305	396
Cuba	11,048	9,666	1,382
Guam	147	147	.....
Philippines	62,095	60,883	1,212
Porto Rico	3,201	2,537	664
Tutuila	27	.....	27

The 396 persons reported under the heading "civilian employees, etc.", as being on naval vessels include boys and other persons (not officers or enlisted men) on vessels loaned to certain states for use as school ships, and on vessels under the control of other departments of the Government but operated by officers and enlisted men detailed by the Navy Department. The remaining 3,285 persons classed under the same heading include not only civilian employees, but also officers' servants and members of the families of certain of the officers and enlisted men and of civilian employees.

No provision was made by the census act for the enumeration of the inhabitants of Porto Rico, but a census for that island, taken as of November 10, 1899, under the direction of the War Department, showed a population of 953,243. A similar enumeration, under the direction of the War Department, was made of the island of Cuba, and this census, taken as of October 16, 1899, showed a population of 1,572,797. No official census of the Philippines, or of the islands of Guam and Tutuila, has been taken since they have been in the possession of the United States.

There was no enumeration made, as a part of the United States census, prior to 1890 of the Indians and other persons living in Indian Territory and on the Indian reservations, or prior to 1880 of the population of Alaska. Hawaii was annexed August 12, 1898, and the census of 1900 is, therefore, the first census of the islands taken under the supervision of the United States. The Hawaiian Government, however, took a census every six years from 1866 to 1896, inclusive, and the figures derived from the census taken as of December 28, 1890, are used for comparison with similar results for 1900.

The total population in 1890, with which the aggregate population at the present census should be compared, is 63,069,756, comprising 62,622,250 persons enumerated in the states and organized territories at that census; 32,052 persons in Alaska; 180,182 Indians and other persons in Indian Territory; 145,282 Indians and other persons on the Indian reservations, etc.; and 89,990 persons in Hawaii, this last named figure being taken from the census of December 28, 1890, as explained in the preceding paragraph. These figures for 1890 are compared with similar figures for 1900 as follows:

AREAS.	1900	1890
States and organized territories	75,568,686	62,622,250
Alaska	63,592	32,052
Hawaii	154,001	89,990
Indian Territory	392,060	180,182
Indian reservations, etc	125,048	145,282
Total population	76,303,387	63,069,756

On the basis of the above figures, the aggregate population of the entire area of enumeration in 1900 is 76,303,387, which, compared with the population of equivalent areas in 1890, namely, 63,069,756, shows an increase during the decade of 13,233,631, or 21 per cent.

In order to make a direct comparison of the population in 1890 and 1900 with that comprehended by preceding censuses, it is necessary to exclude from the statements of population in 1890 and 1900 the population of those areas which have been included only recently in the Federal census, as indicated by table III.

TABLE III.—*Population of the United States at each census: 1790 to 1900.*

CENSUS YEARS.	States and organized territories.	Indian Territory, Indian reservations, etc.	Alaska.	Hawaii.
1900	75,568,686	517,108	63,592	154,001
1890	62,622,250	325,464	32,052	89,990
1880	50,155,783	.....	33,426	.....
1870	38,558,371	.....	.....	.....
1860	31,443,321	.....	.....	.....
1850	23,191,876	.....	.....	.....
1840	17,069,453	.....	.....	.....
1830	12,866,020	.....	.....	.....
1820	9,638,453	.....	.....	.....
1810	7,239,881	.....	.....	.....
1800	5,308,483	.....	.....	.....
1790	3,929,214	.....	.....	.....

Eliminating the population of Alaska, Hawaii, Indian Territory, and the Indian reservations in 1900, there remains, as shown by table III, 75,568,686, which figure can be compared with the population obtained in 1890 as a part of the general enumeration (62,622,250) and with the population returned at each census from 1790 to 1880, inclusive.

The population given for 1900 in table III includes 91,219 persons enumerated at military and naval stations abroad, who, except for conditions arising out of the Spanish-American War, would have been found residing largely within the limits of the United States proper, and they are, therefore, included properly in the total

for 1900 for purposes of comparison with the population returned at preceding censuses.

As stated in the census report of 1890[1], there was a deficiency in the enumeration of the population in the Southern states in 1870, which not only gave an exaggerated rate of increase between 1870 and 1880 in the population of those states, but affected materially the rate of increase in the country at large. There is no means of ascertaining accurately the extent of these omissions, but an approximate correction in the population for 1870 was made in the census report of 1890, by which the population in 1870 was said to be 39,818,449 instead of 38,558,371. Using the corrected population for 1870, the percentages of increase from 1860 to 1870 and from 1870 to 1880, respectively, would be as follows:

CENSUS YEARS.	Population.	INCREASE.	
		Number.	Per cent.
1880	50,155,783	10,337,334	26.0
1870	[1] 39,818,449	8,375,128	26.6
1860	31,443,321	.....	.....

[1] Corrected population.

These figures show an increase of 26 per cent for the decade from 1870 to 1880, or practically the same rate of increase that was attained during the preceding ten years. There was an increase in the population of the states and organized territories from 1880 to 1890 of not quite 25 per cent, and from 1890 to 1900 of not quite 21 per cent, as shown by table IV.

TABLE IV.—*Increase in population of the United States at each census: 1790 to 1900.*

CENSUS YEARS.	Population, excluding Alaska, Hawaii, Indian Territory, Indian reservations, etc.	INCREASE.	
		Number.	Per cent.
1900	75,568,686	12,946,436	20.7
1890	62,622,250	12,466,467	24.9
1880	50,155,783	11,597,412	30.1
1870	38,558,371	7,115,050	22.6
1860	31,443,321	8,251,445	35.6
1850	23,191,876	6,122,423	35.9
1840	17,069,453	4,203,433	32.7
1830	12,866,020	3,227,567	33.5
1820	9,638,453	2,398,572	33.1
1810	7,239,881	1,931,398	36.4
1800	5,308,483	1,379,269	35.1
1790	3,929,214	.....	.....

The progress of the country in point of population during the period of one hundred and ten years, from the First to the Twelfth Census, is very well summarized in table IV, and is also presented graphically in the first diagram on plate 2, showing that the population of the United States proper has grown in a little more than a century from less than 4,000,000 to between 75,000,000 and 76,000,000; or, in other words, its population at the twelfth decennial enumeration is more than nineteen times as large as it was when the first census was taken in 1790.

In order that the aggregate population returned at the census of 1900 may be compared with the population of equivalent areas in 1890, as stated in table III, it is necessary to add 447,506 persons, specially enumerated, to the population of the states and organized territories in 1890, giving a total population of 63,069,756, distributed by states and territories, arranged geographically, in table V.

TABLE V.—*Population of states and territories, arranged geographically: 1890 and 1900.*

[1] Decrease.

As shown by table VI (columns 1 and 2), there has been an increase of 21 per cent in the population of the entire area of enumeration in 1900 as compared with the population of the same area in 1890, representing a total numerical increase of 13,233,631. Excluding the population of Alaska, Hawaii, Indian Territory, and Indian reservations in 1890 and 1900, there has been an increase in the population of the states and organized territories during the decade, as shown by table VI (columns 3 and 4), of 12,946,436, or 20.7 per cent, as compared with an increase of 12,466,467, or 24.9 per cent, for the equivalent area from 1880 to 1890.

The population of the states and territories at each census from 1790 to 1900, inclusive, together with their increase in population during each decade, is presented in tables VII and VIII.

TABLE VII.—*Population of states and*

[The first column under each census year shows the order of the

	STATES AND TERRITORIES.	1900		1890		1880		1870		1860

[3] Decrease.
[4] Less than one-tenth of 1 per cent.
[5] Exclusive of persons on Indian reservations.
[6] Decrease; due to loss of territory, West Virginia having been set off from Virginia December 31, 1862.
[7] North and South Dakota combined. Apportioning the population of Dakota territory in 1880, North Dakota (36,909 in 1880) increased 145,810, or 395.1 per cent, and South Dakota (98,268 in 1880) increased 230,540, or 234.6 per cent.
[8] Dakota territory.
[9] Decrease; exclusive of persons on Indian reservations.

Among the several states and territories (see table VI, page xxi), Oklahoma shows the largest percentage of increase since 1890. Oklahoma was organized as a territory in May, 1890, and at the census taken one month later had a population of 78,475, including 16,641 Indians and other persons specially enumerated but not included in the general report on population at that census. At the census of 1900 it had a population of 398,331, or an increase since 1890 of 407.6 per cent; in other words, its population in 1900 is more than five times as large as the entire population returned in 1890.

The second largest percentage of increase in population since 1890 is found in Indian Territory, being somewhat more than 100 per cent. The population of Indian Territory was specially enumerated in 1890, but no part of the population thus enumerated was included in the general report on population. There were 51,279 Indians and 128,903 other persons (principally whites) enumerated in Indian Territory ten years ago, giving a total population for the territory in 1890 of 180,182; but this number has been increased to 392,060 in 1900, which is a gain in ten years of 211,878, or 117.6 per cent, made up almost wholly of white persons.

The population of Idaho has increased 82.7 per cent since 1890, while the population of Montana has increased 70.3 per cent, and that of North Dakota 67.1 per cent. The 5 states and territories named are the only ones in which the population has increased more than 50 per cent during the ten years from 1890 to 1900, but Wyoming has increased its population during the same period by 47.9 per cent and Washington its population by 45 per cent.

Nevada is the only state that shows an actual decrease in its population since 1890, but for this state there was a much larger decrease reported for the preceding decade, or 26.5 per cent from 1880 to 1890 as against 10.6 per cent from 1890 to 1900. The smallest percentage of increase during the ten years is that shown by Nebraska, being less than one-half of 1 per cent, while for the same period there has been an increase of only 3 per cent in the population of Kansas, 3.4 per cent in that of Vermont, and 5 per cent in that of Maine.

There has been a gain during the decade of not quite 10 per cent in the population of Delaware and New Hampshire, respectively, and of between 10 and 40 per cent in the population of each of the remaining states and territories, the largest percentage among this class being that for Arizona, or 39.3 per cent, and the smallest percentage that for Virginia, or 12 per cent.

There were 11 states which took a state census in 1895, the mean year between the Federal censuses of 1890 and 1900, and 1 state, namely, Michigan, which took a census in 1894. The results of these state censuses are brought into comparison with the results of the last two United States censuses for the states named in table IX. In using these intermediate figures it should be remembered, however, that in each case the enumeration was controlled wholly by the state government, and that in all probability the methods adopted differ somewhat from those governing the Federal enumerations.

TABLE IX.—*Population of certain states according to the state censuses of 1895, as compared with their population at the Federal censuses of 1890 and 1900.*

STATES.	POPULATION.			INCREASE FROM 1890 TO 1900.		INCREASE FROM 1890 TO 1895.		INCREASE FROM 1895 TO 1900.	
	1900	1895	1890	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.
Florida	528,542	464,689	391,422	137,120	35.0	73,217	18.7	63,903	13.8

[1] Decrease.

[2] 1894.

The total population of the several states and territories in 1900 is expressed graphically by the total length of the bars in the first diagram on plate 3, while the comparative population of each state and territory at each census since its organization is shown in a series of diagrams on plate 4.

Tables VII and VIII present for each census the changes in population for the several states and territories arranged geographically, and from them can be traced the growth of population during the different periods of our country's settlement, not alone for the individual states and territories, but also for the five grand divisions into which the country is divided for purposes of discussion.

The first Federal census was taken as of the first Monday in August, 1790, under the provisions of the second section of the first article of the Constitution. At that time the United States, under the Treaty of Peace, comprised only the territory between the Atlantic Ocean and the Mississippi River. Maine was then a district of Massachusetts; Vermont still formed a part of New York; Kentucky and West Virginia formed parts of Virginia, and Georgia extended to the Mississippi River. The territory now comprised by the state of Tennessee was then known as the "territory south of the river Ohio", while that now represented by the states of Ohio, Indiana, Illinois, Michigan, and Wisconsin, and a part of the state of Minnesota, was then known as the "territory northwest of the river Ohio." Florida, and a strip along the southern border of what was then Georgia, were claimed by Spain, as well as all the region west of the Mississippi River.

The results of the First Census showed that the United States then had 3,929,214 inhabitants, this population, with the exception of 109,368 persons credited to Kentucky and Tennessee, being contained within the territory represented by the original 13 states, and now comprising practically what are known as the North Atlantic and South Atlantic divisions of states. The population in 1790 was confined almost entirely to the Atlantic seaboard, and the average depth of settlement, in a direction at right angles to the coast, was only 255 miles, not more than 5 per cent of the population living at that time west of the Appalachian Mountains.

The population in 1790 was quite evenly divided between the northern and southern sections of the country, the territory bordering on the North Atlantic coast containing an aggregate of 1,968,040 persons and, similarly, that on the South Atlantic coast, 1,851,806 persons.

The states comprising the North Atlantic division now contain 21,046,695 inhabitants, and those comprising the South Atlantic division 10,443,480 inhabitants; that is, the population of the states bordering on the North Atlantic seaboard has increased more than tenfold since 1790, while that of the states bordering on the South Atlantic seaboard has increased fully fivefold. The great increase in population in the North Atlantic division has been due both to natural increase and to the introduction, particularly during the last half century, of a large foreign element, which has been attracted by the great expansion of manufactures and commerce and the development, as a consequence, of a large body of urban population. The growth of population in the South Atlantic division, on the contrary, has not been influenced to any great extent by immigration, owing to the presence in that section from the beginning of a large colored population and, also, somewhat to climatic conditions, and its increase is largely due, therefore, to natural increase.

All of the states in these two divisions had a fairly good representation of population at the First Census, and no abnormal rates of increase are shown for any of them during the one hundred and ten years covered by the census enumerations. Of the North Atlantic states, Maine, New Hampshire, Vermont, New York, and Pennsylvania experienced their largest rates of increase during the earlier decades, but in the case of Massachusetts and Rhode Island the maximum rates of increase were not reached until the decade from 1840 to 1850, and in the case of Connecticut and New Jersey not until the decade from 1850 to 1860. During the last half of the century the increase in the population of Maine, New Hampshire, and Vermont has been very slight, but all the other states in this division have steadily increased in population, and, in fact, with the exception of Pennsylvania, the rates of increase from 1890 to 1900 are as large, or even larger, than those from 1880 to 1890. In 3 of the states of this division, namely, Massachusetts, Rhode Island, and New Jersey, a census was taken in 1895, and an inspection of the figures given in table IX (page xxvi) shows that the increase is quite evenly divided between the two five-year periods.

In the South Atlantic states, in which agricultural interests have always been paramount, and to which there has been but little immigration, population has not increased at so rapid a rate as in the more northerly states, and, furthermore, the rates of increase from decade to decade have fluctuated greatly. In Delaware and Maryland the same conditions are apparent as have been observed in several of the states to the north of them, namely, comparatively small rates of increase for the earlier decades up to 1850, followed by materially larger rates of increase thereafter. The District of Columbia, organized in 1791, had a population of 14,093 in 1800, and, with the exception of the decade from 1800 to 1810, showed its largest increase from 1850 to 1860 and from 1860 to 1870, preceding and following the Civil War.

For Virginia and the two Carolinas the census of 1790 showed a relatively large amount of population, and there are no large rates of increase reported for these states at any decennial period. The deficiency in the enumeration of the population of the Southern states at the census of 1870 is made very apparent in these 3 states by the very small rates of increase from

1860 to 1870 as compared with the relatively large rates of increase from 1870 to 1880. Some of the differences were due to the ravages of the Civil War, but they were caused mainly by the deficient census of 1870, as explained in the census report for 1890.[1] Georgia had only a small population in 1790, and although the rates of increase for the first three decades thereafter were large, settlement was retarded by the Creek and Cherokee Indians, and it was not until 1830 that substantial increases were made to its population. The returns of population for this state in 1870 and 1880 show the effects of the war and of the faulty enumeration in 1870, but this is not so marked as in Virginia and the Carolinas. Florida was organized as a territory in 1822, and first appears in the census in 1830, when it had a population of 34,730. It has since gained steadily in population, and now has over half a million inhabitants. The state census taken in 1895 (see table IX, page xxvi) shows that the larger part of the increase occurred in the earlier years of the decade.

In the North Central division there was a small amount of population returned at the census of 1800, in that part of the "territory northwest of the river Ohio" now occupied by Ohio and Indiana, resulting from a slight spreading westward into Ohio of the settlements in southwestern Pennsylvania and northward across the Ohio River from northern Kentucky, and from a small settlement in what was then Indiana territory, newly organized from the western portion of the "territory northwest of the river Ohio." Ohio was made a state in 1802, and from the small beginnings in 1800 settlement proceeded rapidly, so that at the next census, in 1810, it had a population of 230,760, which was increased to considerably more than half a million in 1820 and to very nearly two millions in 1850; but since that date it has increased at a much less rapid rate, and now has a population of over four millions.

Indiana, starting with a population in 1800 of only 5,641, had a less rapid growth than Ohio in the number of its inhabitants in the earlier decades, but it more than doubled its population from 1820 to 1830, about doubled it from 1830 to 1840, and had very nearly a million inhabitants in 1850; but its population increased thereafter at a constantly diminishing rate to 1890, and at a slightly increased rate during the past ten years, giving it a population in 1900 of upward of 2,500,000.

Illinois was organized as a territory in 1809 from a part of Indiana territory and became a state in 1818. At the census taken in 1810 it had a population of 12,282, which had increased in 1820 to 55,211, in 1830 to 157,445, and thereafter at a very rapid rate until in 1870 it had become 2,539,891, and thence at a less rapid rate to 4,821,550 in 1900.

Michigan was made a territory in 1805, and the small amount of population returned in 1810 and in 1820 was due to the beginning of a settlement about Detroit; but the population began to increase decidedly after 1830, so that it had in 1840, three years after its admission as a state, 212,267 inhabitants. Since 1840 Michigan has increased in population at a constantly diminishing rate, and it has a population, according to the present census, of 2,420,982. The census taken by state authority in 1894 (see table IX, page xxvi) showed a population of 2,241,641, from which it is apparent that the increase in the population of Michigan since 1890 has been very evenly divided over the decade.

A part of Michigan territory was taken in 1836 to form the territory of Wisconsin, for which the census of 1840 showed a population of 30,945. Wisconsin was admitted as a state in 1848, and had a population of 305,391 in 1850, and of 775,881 in 1860, after which its population increased at very much lessened rates, until it now has a little more than 2,000,000 inhabitants. The state census (see table IX, page xxvi) gave a population in 1895 of 1,937,915, showing that much the larger increase came in the first half of the decade.

The Louisiana Purchase, in 1803, added a vast area to our territory, and was drawn upon to supply at a much later date the territory needed for the remaining states and territories of the North Central division. A portion of it was taken in 1849, together with the remainder of what was originally the "territory northwest of the river Ohio", to form the territory of Minnesota. The census of 1850 showed only a very small population, at and about St. Paul, but in 1858 the territory became a state and had in 1860 a population of 172,023, which was in turn increased to 439,706 in 1870, to 780,773 in 1880, and to 1,751,394 in 1900. The state census of 1895 (see table IX, page xxvi) gave to Minnesota a population of 1,574,619, showing, as in the case of Wisconsin, that the greater part of its increase was in the earlier years of the decade.

Missouri was organized as a territory in 1812, from a portion of the old Louisiana territory, but for that portion which became the state of Missouri in 1821 a population of 20,845 was reported as early as 1810, concentrated in and about St. Louis. The population of Missouri had increased to 66,586 in 1820, to 140,455 in 1830, and then by material additions to 1,182,012 in 1860, since which date it has added from 400,000 to 500,000 inhabitants decennially, giving it a population in 1900 of 3,106,665.

Iowa was organized as a territory in 1838, from part of Wisconsin territory, and was admitted as a state in 1845. It had a population in 1840 of 43,112, which was increased to 192,214 in 1850. Its population was largely augmented during the next three decades, until in 1890 it had a population of 1,911,896, which was further increased in 1900 to 2,231,853. Iowa took a state census in 1895 (see table IX, page xxvi), giving a population for the mean year of 2,058,069, and showing a very even rate of increase during the ten-year period.

In 1854 the territories of Nebraska and Kansas were formed from parts of Missouri territory and a few

[1] Report on Population, Census of 1890, Part I, pages xi, xii, and xvi.

years later both were admitted as states, Kansas in 1861 and Nebraska in 1867. Kansas had over 100,000 inhabitants at the census of 1860, which by 1870 had been more than trebled and during the next decade was again almost trebled, giving the state a population of very nearly a million in 1880. This was still further increased to 1,427,096 in 1890, but during the past ten years there has been only a slight increase. A census of Kansas taken in 1895 (see table IX, page xxvi) showed a loss in population as compared with 1890, of very nearly 100,000, the total population given in 1895 being 1,334,734; but during the last five years the figures show a gain of more than 135,000, thus more than offsetting the loss in the first half of the decade.

The census of 1860 gave Nebraska a population of 28,841, which was rapidly increased to 122,993 in 1870, to 452,402 in 1880, and to somewhat more than a million in 1890; but for the decade just closed the census shows practically no increase in its population.

Dakota territory, organized in 1861, had a population in 1860 of 4,837, which was increased to 14,181 in 1870. From this as a starting point the territory increased in population rapidly until in 1890 the states of North and South Dakota, into which the territory was divided in 1889, had a combined population of more than half a million, which has been further increased to over 720,000 in 1900. South Dakota took a census in 1895 (see table IX, page xxvi), giving a population for that state of 330,975, as compared with a population of 348,600 in 1890 and of 401,570 in 1900, the United States figures including in both cases the population of the Indian reservations. For purposes of comparison with the figures of the state census the reservation population, amounting to 19,792 in 1890 and 17,683 in 1900, should properly be excluded. On this basis, there was only a very slight increase (2,167) in the population of South Dakota from 1890 to 1895 as compared with a gain of 52,912 from 1895 to 1900.

In the South Central division, as already noted, there was a population of a little more than 100,000 returned in 1790 for the territory now comprised by Kentucky and Tennessee, the former as the "district of Kentucky" being a part of Virginia and the latter, formerly claimed by North Carolina, constituting in 1790 the "territory south of the river Ohio", organized by act of Congress the same year. Kentucky was admitted into the Union of States in 1792 and was followed by Tennessee in 1796. The census of 1800 showed a population for Kentucky of 220,955, which had grown to 406,511 in 1810, and has been increased since by moderate rates to 2,147,174 in 1900. Tennessee, starting in 1790 with about half as much population as Kentucky, contained 105,602 inhabitants in 1800, and this number was increased to 422,823 in 1820 and to 829,210 in 1840, since which time it has progressed by easy stages to a population in 1900 of 2,020,616, or very nearly equal to that of Kentucky.

Mississippi was organized as a territory in 1798, mostly from territory belonging to Georgia but subsequently ceded to the United States, and from territory ceded by South Carolina in 1787, and had a population in 1800 of less than 10,000. It was admitted as a state in 1817, and its population increased quite slowly to 1830, but from that date material accessions were made during each decade until it now has a little more than 1,500,000 inhabitants.

Alabama was organized as a territory in 1817 from a part of Mississippi territory, was admitted as a state in 1819, and at the census taken the following year had a population of 127,901. This was more than doubled during the next ten years, and its population has grown steadily since, so that the state now contains 1,828,697 inhabitants within its borders. In the earlier decades settlement was greatly retarded in Alabama and Mississippi, and also in Georgia, by the presence of hostile Indian tribes; but they were later removed to Indian Territory, which had been set apart for them, and the former Indian country was thus made available for settlement.

The Louisiana Purchase, in 1803, added more than a million square miles to our possessions and gave to the United States absolute control of the Mississippi River and its navigable branches. This vast territory was divided the following year and the territory of Orleans established, which, with somewhat enlarged boundaries, was admitted as the state of Louisiana in 1812. The present area of Louisiana had a population in 1810 of 76,556, which had practically doubled in 1820, and which has since been augmented by good rates of increase to its present population of 1,381,625.

Arkansas, organized as a territory in 1819 and admitted as a state in 1836, had a population of 14,273 in 1820, but did not increase materially in population until 1850, when it had very nearly 210,000 inhabitants. This was more than doubled during the next ten years, and its population has grown since then to be a little more than 1,300,000 in 1900.

Texas was admitted as a state in 1845, and the census of 1850 revealed a population of 212,592. This was nearly trebled during the next ten years and has since gained rapidly in population, until in 1900 it has more than 3,000,000 inhabitants.

The deficient enumeration in this section of the country in 1870 is very noticeable in the percentages of increase reported for Alabama, Mississippi, Louisiana, Arkansas, and Texas from 1860 to 1870 as compared with the rates shown for the succeeding decade, as previously noted for the more southerly states in the South Atlantic division.

Oklahoma was made a territory in 1890, just before the census was taken, and during the ten years which have elapsed has acquired a population of very nearly 400,000; it now has a larger population than Indian

Territory, from a part of which it was organized, and which showed a population in 1890 of 180,182 and in 1900 of a little more than 392,000.

The census of 1850 showed a population in the extreme Western section of the country of not quite 180,000, more than half of which was in California. This settlement in California, which was admitted as a state in 1850, was due to the discovery of gold there, which led to its population being more than quadrupled during the next decade, so that it had in 1860 very nearly 380,000 inhabitants. Since that date the population has been increased to very nearly 1,500,000 in 1900, due both to the importance of its mining industry and the greater development of its agricultural interests.

New Mexico, which became a part of the United States under the cession of territory by Mexico in 1848, was organized as a territory in 1850, and the census of that year showed a population of 61,547, mostly natives of Spanish origin. This was increased to 93,516 in 1860, and, after suffering a slight decrease in 1870, has been increased gradually to not quite 200,000 in 1900.

Utah, which was first settled by the Mormons in 1847 and organized soon after as a territory, had a population of 11,380 in 1850, which has steadily increased, mainly on account of its agricultural interests, until it now has a population of 276,749. A census of Utah taken in 1895 (see table IX, page xxvi) gave a population of 247,324, indicating that the population increased more rapidly during the first half than it did during the second half of the decade.

The remaining group of population in 1850, numbering 13,294 persons, was in Oregon, which was organized as a territory in 1848. The census of 1860 showed that its population had grown to be very nearly four times as large in ten years, and from that date until 1890 it showed comparatively high rates of increase. It had a population in 1890 of 313,767, and since that date it has been increased to 413,536. The state census taken in 1895 (see table IX, page xxvi) gave a population of 362,513, showing that in this state the population has increased very uniformly during the past ten years.

Washington, formerly a part of the original territory of Oregon, was made a separate territory in 1853, and at the census of 1860 had substantially 11,600 inhabitants. It did not show any material increase in population, however, until 1890, when it had very nearly 350,000 inhabitants as compared with a little more than 75,000 ten years earlier, and this has been increased to a little more than half a million in 1900, this great increase being due mainly to the development in recent years of its agricultural resources.

The census of 1860 gave a population of 34,277 to Colorado, organized as a territory in 1861, and this was not increased particularly until the census of 1880, when it had very nearly 195,000 inhabitants, this largely increased population following close upon the discovery of its rich mineral deposits. During the next ten years its population was more than doubled, so that in 1890 it had over 400,000 inhabitants, and now has a population of 539,700.

Nevada, organized as a territory in 1861, had a population in 1860 of 6,857, which was increased to more than 40,000 in 1870 and to more than 60,000 in 1880. It has since lost heavily in population, and has in 1900 practically the same population that it had in 1870, owing to the great decline in the mining industry.

At the census of 1860 Arizona constituted the county of that name in the territory of New Mexico, with a population of 6,482. It was organized as a territory in 1863 and had in 1880 a population of 40,440, exclusive of Indians and other persons on Indian reservations. In 1890 its population was 88,243, including 28,623 persons (Indians and others) specially enumerated, as compared with a population in 1900 of 122,931, comprehending the entire area of the territory.

Idaho was originally a part of Oregon, but was made a separate territory in 1863, and in 1870 had practically 15,000 inhabitants. During the last thirty years its population has increased materially, and in 1900 is more than ten times as large, comprising in all 161,772 inhabitants.

Montana was organized as a territory in 1864 and, starting with about 20,000 inhabitants in 1870, has increased its population to more than 240,000 in 1900, including in this number 11,770 persons (chiefly Indians) on Indian reservations.

Wyoming was not organized as a territory until 1868. It had a population in 1870 of 9,118, but this has been increased to upward of 60,000 in 1890 and to considerably more than 90,000 in 1900.

The growth of population in the states and territories comprising the Western and two Central divisions, as thus summarized, is well-nigh phenomenal in its magnitude and in the rapidity with which it has been accomplished. At the First Census practically all of the vast area which has since been brought under the dominion of man was unsettled, but each census thereafter showed constantly increasing areas of settlement as well as a greatly increased density of population for those areas already covered. At the earlier censuses the settlements followed the water courses principally, but as better and increased facilities for transportation were afforded it spread out in every direction, and now it may be said that practically our entire country has been brought under settlement.

Summarizing the growth of population in the Central and Western divisions in their entirety, it appears, first, that the census of 1900 shows a combined population of twenty-six and one-third millions for the states and territories comprising the North Central division as against a little more than 50,000 inhabitants one hundred years ago and something less than 5,500,000 fifty years ago;

second, that the territory now occupied by the states and territories comprising the South Central division had at the beginning of the century a population of a little less than 350,000, which had been increased fifty years later to upward of 4,000,000, and is now, a hundred years later, a little more than 14,000,000; and third, that fifty years ago there were less than 200,000 inhabitants in the territory now represented by the Western division, but at the close of the century the census reveals a population comprising very nearly 4,100,000 inhabitants.

This great development of population in the Central and Western sections of our country has been made possible partly through the agency of a heavy foreign immigration, which practically began between 1840 and 1850, and has been steadily maintained, especially since 1880; but to this must be added a constantly westward migration of a large body of native population from the more easterly states of our Union. The presence of the foreign element in the North Central and Western states can be easily established, but the extent to which the migration of the native element has been carried on can only be inferred from the number of native born persons now living in the Central and Western states and territories who were natives of the more easterly states.

The native born element living in the North Central division in 1900 represents a total of more than 22,000,000 persons, and of this number very nearly 1,700,000 are natives of the Atlantic states, while in the South Central division, out of a native population in 1900 of more than 13,700,000 there are found very nearly 730,000 natives of the Atlantic states. Similar figures for 1890 show slightly increased proportions of natives of the Atlantic states living in these two divisions, and from present conditions may be inferred the magnitude of this westward movement of the native population in the earlier periods of settlement. It may be said, as would naturally be the case, that the bulk of the natives of the Atlantic states in the North Central division have come from the North Atlantic states and, similarly, much the larger proportion of those in the South Central division have come from the South Atlantic states. There has been, also, a migration north and south between the two central divisions, which in 1890 showed a large balance against the South Central division, but which in 1900 has been changed to a somewhat smaller margin in favor of that division.

If the native element of the Western division is considered in the same way, much more striking results are shown. This division has a native born population in 1900 of not quite 3,250,000, and of this number very nearly 1,370,000 are natives of states situated wholly beyond the limits of that division. Much the largest contribution to this number of natives of other states living in the Western division, representing more than three-fifths of the whole, has come from the North Central states, and the next largest contribution from the North Atlantic states.

DENSITY OF POPULATION.

The gross area (land and water surface) of the United States, exclusive of Alaska and Hawaii, is 3,025,600 square miles. The United States at the First Census, in 1790, comprised only the territory between the Atlantic Ocean and the Mississippi River, representing a gross area of 827,844 square miles. There was no change in the gross area of the country at the census of 1800, but in 1803 there were added by the Louisiana Purchase more than a million square miles, making the gross area of the country 1,999,775 square miles. In 1819 our territory was increased, by the purchase of the Floridas from Spain, to 2,059,043 square miles, which represented the gross area of the country at the censuses of 1820, 1830, and 1840. Between 1840 and 1850 there was a large acquisition of territory from Mexico, so that at the census of 1850 the gross area of the United States comprised 2,980,959 square miles. By the Gadsden Purchase, in 1853, our territory was further increased to 3,025,600 square miles, which constitutes the present area of the country, exclusive of the areas of Alaska and Hawaii. The territory of Alaska, comprising 590,884 square miles, was purchased from Russia in 1867, and the territory of Hawaii, comprising 6,449 square miles, was acquired by annexation in 1898. Including Alaska and Hawaii, the entire area of enumeration at the present census comprises 3,622,933 square miles.

The boundaries of the territorial acquisitions from the Treaty of Peace (1783) to the Gadsden Purchase (1853) are shown by the map on plate 1. This map is the result of a conference of representatives of the Department of State, the Coast and Geodetic Survey, the Geological Survey, the Census Office, and the Library of Congress, appointed at the request of the Census Office to act as an advisory committee to that office on certain controverted subjects. The conclusions reached by this conference are fully set forth in Census Bulletin No. 74, which is reproduced in Appendix A to this volume.

The gross area (land and water surface) which the country, exclusive of Alaska and Hawaii, had at the date of each census, from 1790 to 1900, inclusive, is summarized in table x.

TABLE X.—*Gross area of the United States, exclusive of Alaska and Hawaii, at each census: 1790 to 1900.*

CENSUS YEARS.	Gross area in square miles.	CENSUS YEARS.	Gross area in square miles.
1900	3,025,600	1840	2,059,043
1890	3,025,600	1830	2,059,043
1880	3,025,600	1820	2,059,043
1870	3,025,600	1810	1,999,775
1860	3,025,600	1800	827,844
1850	2,980,959	1790	827,844

The area in square miles, including land and water surface, of the several states and territories at the census of 1900 is presented in table XI.

TABLE XI.—*Area of the United States in square miles, by states and territories: 1900.*

[1] Exclusive of Alaska and Hawaii.

The density of population of the several states and territories at each census is shown in detail in table XII. In computing the density of population for the United States, the areas and population of Alaska and Hawaii in 1900, of Alaska in 1890, and of Indian Territory in 1860, 1870, and 1880 are not considered. The area of Indian reservations, outside of Indian Territory, is included in the area of the states and territories in which they are severally situated, and in that of the United States, prior to 1890, although the population of these Indian reservations was not ascertained and, for this reason, is not considered in figuring density of population at the censuses prior to 1890.

TABLE XII.—*Density of population of states and territories, arranged geographically: 1790 to 1900.*

[1] 0.02. [2] 0.03. [3] Dakota territory. [4] Dakota territory, 0.03. [5] 0.04.

From table XII it appears that the density of population of the United States, exclusive of Alaska and Hawaii, according to the census of 1900, is 25.6, that is, there are in the United States in 1900, on the average, 25.6 inhabitants to the square mile, using land surface only. At the census of 1790 there were less than 5 inhabitants to the square mile, so that the density of the population of the country has increased in one hundred and ten years more than fivefold, although the land area of the country in 1900, exclusive of Alaska and Hawaii, is more than three and one-half times what it was in 1790.

Excluding the District of Columbia, which is in effect a municipality, Rhode Island, with 407 inhabitants to the square mile in 1900, is the most densely settled state in the Union, while Massachusetts comes next, with not quite 349 inhabitants to the square mile. New Jersey, with a little more than 250 inhabitants to the square mile in 1900, is the third state in point of density of population, while Connecticut, with somewhat more than 187 inhabitants to the square mile, occupies the fourth place. Four other states have more than 100 inhabitants to the square mile in 1900, namely, New York, with 152.6 inhabitants; Pennsylvania, with 140.1 inhabitants; Maryland, with 120.5 inhabitants; and Ohio, with 102 inhabitants to the square mile.

It will be noticed that, with the exception of Maryland and Ohio, these states are situated in the North Atlantic division, in which manufactures is the predominating interest. This division, taken in its entirety, contains on the average considerably more than 100 inhabitants to the square mile in 1900, although the density of population in Maine, New Hampshire, and Vermont is less than one-half of the average density of settlement for the division as a whole.

In the North Central division the number of inhabitants to the square mile in 1900 ranges from as low as about 5 in the Dakotas to as high as 70.1 in Indiana, 86.1 in Illinois, and 102 in Ohio, the average for the division itself being 34.9.

Of the states and territories comprising the South Atlantic and South Central divisions (excluding the District of Columbia), Maryland has the greatest density of population, or 120.5 persons to the square mile, and Delaware is next, with 94.3 persons. Of the remaining states in these two divisions Kentucky alone has more than 50 inhabitants to the square mile in 1900, the range being from 53.7 persons in that state to 9.7 persons in Florida. The territory of Oklahoma now has 10.3 persons and Indian Territory 12.6 persons to the square mile.

In the Western division there is no state or territory which has as high as 10 inhabitants to the square mile in 1900, although California comes very close to this limit, with 9.5 persons; but, on the other hand, more than half of the states and territories in this division have an average of less than 2 inhabitants to the square mile, namely, Nevada, 0.4; Wyoming, 0.9; Arizona, 1.1; New Mexico, 1.6; Montana, 1.7; and Idaho, 1.9 inhabitants.

Alaska has, on the average, but one-tenth of 1 person to the square mile in 1900, using the gross area of the territory, while the newly acquired territory of Hawaii shows, on the same basis, a density of population in 1900 of not quite 24 persons, or about the density of Maine and Arkansas.

The density of population of the United States, exclusive of Alaska and Hawaii, at each census from 1790 to 1900, inclusive, is shown graphically in a diagram on plate 2, while a similar diagram on plate 3 gives a graphic presentation of the density of population of the several states and territories in 1900.

The map on plate 8 presents in detail a picture of the distribution of the population of the United States in 1900, according to its relative density. This map is one of a series of 12 maps (1 for each census period) contained in the Statistical Atlas, by means of which are exhibited graphically the increase and movement of population throughout the country, covering a period of one hundred and ten years, and showing at each successive census period the extent of settled area, distributed according to the varying degrees of density, and, as well, the steady westward movement of the frontier line of settlement. In the preparation of this map the county has in general been taken as a unit, and from its population there was first subtracted that part found in cities of 8,000 inhabitants or more. The remainder was then assumed to be, with a few exceptions, distributed uniformly over the county, and was divided by the area (in square miles) of the county in order to determine its average density of settlement. But in certain large counties, particularly in the West, where the density of population is known to differ considerably in different parts, the population has been subdivided into as many groups as the varying conditions warranted. With these county groups or subgroups as units, the population of the country was then divided into large or small groups, according to certain established degrees of density, as follows:

(I) Less than 2 inhabitants to a square mile.
(II) 2 to 6 inhabitants to a square mile.
(III) 6 to 18 inhabitants to a square mile.
(IV) 18 to 45 inhabitants to a square mile.
(V) 45 to 90 inhabitants to a square mile.
(VI) 90 inhabitants or more to a square mile.

The first group, that containing less than 2 inhabitants to the square mile, is regarded as unsettled area, and represents a petty population made up of hunters, trappers, fishermen, lumbermen, and miners scattered over wide stretches of country. The second and third groups represent a population engaged mainly in agricultural pursuits, while the fourth group represents a community essentially devoted to agriculture, but in which manufactures and commerce have commenced to make

some progress. The fifth and sixth groups represent a population which, relatively to agriculture, is largely engaged in manufactures and commerce, and in both of which groups a goodly proportion of the people live in small towns or in cities.

With this explanation of the method of constructing the map and the meaning of the several density groups, it is easy to locate on the map the different areas of settlement throughout the country, particularly in the West, where the scattered character of the population is graphically illustrated by the low density of population prevailing in all the states and territories of that section of the country.

The map on plate 5 indicates, in a similar manner, the density of increase of population during the ten years from 1890 to 1900, that is, it shows those sections of the country in which there was either a positive loss in population or in which the increase ranged from less than 1 to 25 inhabitants or more to the square mile, the varying degrees of increase being expressed on the map by five shades of the same color as opposed to a distinctive color denoting a loss in population.

THE CENTER OF POPULATION AND ITS MEDIAN POINT.

By the Twelfth Census the center of population in 1900 is in the following position:

Latitude	39° 9′ 36″
Longitude	85° 48′ 54″

In ten years the center of population has moved westward 16′ 1″, or about fourteen miles, and southward 2′ 20″, or about two and one-half miles. It rests now in southern Indiana, at a point about six miles southeast of Columbus, the county seat of Bartholomew county, Indiana. The surroundings of its location are shown upon the sketch map on plate 6.

The center of population is the center of gravity of the population of the country, each individual being assumed to have the same weight. In order that the result might be comparable with those obtained in 1880 and 1890, the population of Alaska and Hawaii, although included in the Twelfth Census, has not been considered. The method used was in brief as follows:

The population of the country was first distributed by "square degrees", as the area included between consecutive parallels and meridians has been designated. A point was then assumed, tentatively, as the center, and corrections in latitude and longitude to this tentative position were computed. In this case the center was assumed to be at the intersection of the parallel of 39° north with the meridian of 86° west of Greenwich. The population of each square degree was assumed to be located at the center of that square degree, except in cases where it was manifest that this assumption would be untrue, as, for instance, where a part of the square degree was occupied by the sea or other large body of water, or where it contained a city of considerable magnitude which was situated "off center." In these cases the position of the center of the population of the square degree was estimated as nearly as possible. The shortest distances between each such center of population of a square degree (whether assumed to be at, or at a distance from, the center of the square degree) and the assumed parallel and meridian were obtained. The population of each square degree was then multiplied by the shortest distance of its center of population from the assumed parallel of latitude, and the sums of the products, or moments, north and south of that parallel were obtained. Their difference, divided by the total population of the country, gave a correction to the latitude of the assumed center of population. In a similar manner the east and west moments were obtained, and from them a correction to the longitude of the assumed center was obtained.

In 1790 the center of population was at 39° 16.5′ north latitude and 76° 11.2′ west longitude, which a comparison of the best maps available would seem to place about twenty-three miles east of Baltimore.

During the decade from 1790 to 1800 it appears to have moved almost due west to a point about eighteen miles west of the same city, being in latitude 39° 16.1′ and longitude 76° 56.5′.

From 1800 to 1810 it moved westward and slightly southward to a point about forty miles northwest by west of Washington, D. C., being in latitude 39° 11.5′ and longitude 77° 37.2′. The southward movement during this decade appears to have been due to the annexation of the territory of Louisiana, which contained quite extensive settlements.

From 1810 to 1820 it moved westward and again slightly southward to a point about sixteen miles north of Woodstock, Va., being in latitude 39° 5.7′ and longitude 78° 33′. This second southward movement appears to have been due to the extension of settlements in Mississippi, Alabama, and eastern Georgia.

From 1820 to 1830 it moved still westward and southward to a point about nineteen miles southwest of Moorefield, in the present state of West Virginia, being in latitude 38° 57.9′ and longitude 79° 16.9′. This is the most decided southward movement that it has made during any decade. It appears to have been due in part to the addition of Florida to our territory, and in part to the great extension of settlements in Alabama, Louisiana, Mississippi, and Arkansas, or generally, it may be said, in the southwest.

From 1830 to 1840 it moved still farther westward, but slightly changed its direction northward, reaching a point 16 miles south of Clarksburg, in the present state of West Virginia, being in latitude 39° 2′ and longitude 80° 18′. During this decade settlement had made decided advances in the prairie states and in the south-

ern portions of Michigan and Wisconsin, the balance of increased settlement evidently being in favor of the northwest.

From 1840 to 1850 it moved westward and slightly southward again, reaching a point about twenty-three miles southeast of Parkersburg, in the present state of West Virginia, in latitude 38° 59′ and longitude 81° 19′, the change of direction southward being largely due to the annexation of Texas.

From 1850 to 1860 it moved westward and slightly northward, reaching a point 20 miles south of Chillicothe, Ohio, this being in latitude 39° 0.4′ and longitude 82° 48.8′.

From 1860 to 1870 it moved westward and sharply northward, reaching a point about forty-eight miles east by north of Cincinnati, Ohio, in latitude 39° 12′ and longitude 83° 35.7′. This northward movement was due in part to waste and destruction in the South, consequent upon the Civil War, and in part, probably, to the fact that the census of 1870 was defective in its enumeration of the Southern people, especially of the newly enfranchised negro population.

In 1880 the center of population had returned southward to nearly the same latitude which it had in 1860, being in latitude 39° 4.1′ and longitude 84° 39.7′. This southward movement was due only in part to an imperfect enumeration at the South in 1870. During the decade from 1870 to 1880 the Southern states made a large positive increase, both from natural growth and from migration southward.

In 1890 the center of population had moved northward into practically the same latitude it occupied in 1870. This northward movement was largely due to the great development in the cities of the northwest and in the state of Washington, and also to the increase of population in New England. Its position in 1890 was in latitude 39° 11′ 56″ and longitude 85° 32′ 53″.

During the past decade the center of population has moved westward 16′ 1″, a little over fourteen miles, and southward 2′ 20″, a little less than three miles, being in 1900 in latitude 39° 9′ 36″ and longitude 85° 48′ 54″. This is the smallest movement that has ever been noted. The slight southward movement is due largely to the great increase in population of Indian Territory, Oklahoma, and Texas, while the great decrease in the westward movement of the center is undoubtedly due to the large increase in the population of the North Atlantic states. It also shows that the population of the Western states has not increased as rapidly as in former decades.

The closeness with which the center of population, through its rapid westward movement, has clung to the parallel of 39° of latitude can not fail to be noticed. The most northern point reached was at the start, in 1790; the most southern point was in 1830, the preceding decade having witnessed a rapid development of population in the southwest—Alabama, Arkansas, Mississippi, and Louisiana having been admitted as states, and Florida annexed and organized as a territory. The extreme variation in latitude has been less than 19 minutes, while the one hundred and ten years of record have accomplished a movement in longitude of a little over 9.5 degrees. Assuming the westward movement to have been uniformly along the parallel of 39° of latitude, the westward movement of the several decades has been as follows: 1790–1800, 41 miles; 1800–1810, 36 miles; 1810–1820, 50 miles; 1820–1830, 39 miles; 1830–1840, 55 miles; 1840–1850, 55 miles; 1850–1860, 81 miles; 1860–1870, 42 miles; 1870–1880, 58 miles; 1880–1890, 48 miles; 1890–1900, 14 miles. This is a total westward movement of 519 miles since 1790. The sudden acceleration of movement between 1850 and 1860 was due to the transfer of a considerable body of population from the Atlantic to the Pacific coast, twelve individuals in San Francisco exerting as much pressure at the then pivotal point, namely, the crossing of the 83d meridian and the 39th parallel, as forty individuals in Boston.

Table XIII and the map on plate 7 show the movement of the center of population since 1790.

TABLE XIII.—*Position of the center of population: 1790 to 1900.*

CENSUS YEARS.	North latitude.	West longitude.	Approximate location by important towns.	Westward movement in miles during preceding decade.
1790....	39° 16.5′	76° 11.2′	23 miles east of Baltimore, Md	.....
1800....	39 16.1	76 56.5	18 miles west of Baltimore, Md.....	41
1810....	39 11.5	77 37.2	40 miles northwest by west of Washington, D. C.	36
1820....	39 5.7	78 33.0	16 miles north of Woodstock, Va....	50
1830....	38 57.9	79 16.9	19 miles west-southwest of Moorefield, in the present state of West Virginia.	39
1840....	39 2.0	80 18.0	16 miles south of Clarksburg, in the present state of West Virginia.	55
1850....	38 59.0	81 19.0	23 miles southeast of Parkersburg, in the present state of West Virginia.	55
1860....	39 0.4	82 48.8	20 miles south of Chillicothe, Ohio..	81
1870....	39 12.0	83 35.7	48 miles east by north of Cincinnati, Ohio.	42
1880....	39 4.1	84 39.7	8 miles west by south of Cincinnati, Ohio.	58
1890....	39 11.9	85 32.9	20 miles east of Columbus, Ind	48
1900....	39 9.6	85 48.9	6 miles southeast of Columbus, Ind..	14

The center of area of the United States, excluding Alaska and Hawaii and other recent accessions, is in northern Kansas, in approximate latitude 39° 55′ and approximate longitude 98° 50′. The center of population is, therefore, about three-fourths of a degree south and more than thirteen degrees east of the center of area.

The median point is the point of intersection of the line dividing the population equally north and south with the line dividing it equally east and west. In

short, it is the central point of the population. It differs from the center of population in the fact that distance from the center is not considered. Its movements from census to census bear no relation to the movements of the population, since only movements by which bodies of population are transferred across its parallel or its meridian have any influence upon its position. To illustrate this, a million people may move from Minnesota to Washington state without affecting its position, while the movement of a hundred persons from Michigan to Wisconsin might affect it appreciably. In 1900 the meridian of 84° 51′ 29″ equally divides the population of the United States east and west, and the parallel of 40° 04′ 22″ equally divides it north and south. The median point, therefore, is located at Spartanburg, Indiana.

In order to make a comparison with the movement of the center of population, computations were also made for the Tenth and Eleventh censuses. The following table and the map on plate 7 show the location of the median point at each of these censuses:

YEARS.	Longitude.	Latitude.	Location.
1880	84° 07′ 12″	39° 57′ 00″	16.2 miles nearly due west of Springfield, Ohio.
1890	84 40 01	40 02 51	4.8 miles southwest of Greenville, Ohio.
1900	84 51 29	40 04 22	In Spartanburg, Indiana.

The movement of the median point from 1880 to 1890 was north 5′ 51″ and west 32′ 49″. From 1890 to 1900 it moved north 1′ 31″ and west 11′ 28″. The comparison of the movements of the center of population and the median point shows that they do not move in parallel lines, as from 1880 to 1890 the median point moved west 27 miles and north 6.6 miles, while the center of population moved west 48 miles and north 9 miles. From 1890 to 1900 the median point moved west 10.8 miles and north 2.4 miles, while the center of population moved west 14 miles and south 2.5 miles.

POPULATION OF COUNTIES.

The population of states and territories by counties is shown for each census in table 4 (page 9) of the general tables. The states and territories included in the census of 1900 are divided into 2,867 counties or equivalent subdivisions, as compared with 2,818 similar divisions in 1890, as shown by table XIV.

TABLE XIV.—*Number of counties or equivalent subdivisions, by states and territories: 1890 and 1900.*

STATES AND TERRITORIES.	1900	1890	Gain.	Loss.
Alabama	66	66

Wyoming	14	13	1	
Totals	2,867	2,818	83	34

[1] Alaska was divided in 1890 for census purposes into 7 districts, which have been made to conform for purposes of comparison to the 2 districts used in 1900.
[2] No county organization.

The number and description of subdivisions other than counties in 1900 are shown by states and territories, as follows: Alaska, 2 districts (arbitrary divisions for census purposes); Arizona, 1 Indian reservation; Hawaii, 7 islands; Indian Territory, 5 nations and 7 reservations; Louisiana, 59 parishes; Maryland, 1 city (Baltimore) independent of the county organization; Minnesota, 1 Indian reservation; Missouri, 1 city (St. Louis) independent of the county organization; Montana, 1 Indian reservation; North Dakota, 1 Indian reservation; Oklahoma, 4 Indian reservations; South Dakota, 4 Indian reservations; Virginia, 18 cities independent of the county organization; Wyoming, 1 national park.

2867 9 / 2 8 18

The increase or decrease in the population of counties or equivalent subdivisions from 1890 to 1900 is presented in detail in table xv. In order to make a proper comparison of the population in 1900 with that in 1890, for a little less than 100 counties, it has been necessary to subtract the population returned in 1900 for Indian reservations situated within them, as these Indian reservations were not located by counties at the census of 1890. The increase in the counties for which the population of Indian reservations in 1900 is stated has been determined, therefore, by reducing the total population in 1900 by that number and then comparing the remainder with the population for 1890. For instance, the total population of Apache county, Arizona, in 1900, is 8,297, from which is deducted the population credited to Indian reservations in 1900 (5,341), in order to ascertain that there has been a decrease since 1890 of 1,325, or 31 per cent, in the population of the county exclusive of that of Indian reservations. Similarly, Maricopa county, Arizona, shows, after deducting the population (2,451) credited to Indian reservations in 1900, an increase in population during the decade of 7,020, or 63.9 per cent. These two illustrations will suffice to explain the use of table xv, but it should be remembered that many of the increases or decreases shown by the table are due in whole or in part to a loss or gain in territory since 1890, as explained by the footnotes to table 4 (page 9) of the general tables.

[1] Decrease.
[2] Decrease; county abolished since 1890.
[3] Indian reservation; for remainder of reservation see South Dakota.
[4] The area of that part of Standing Rock Indian reservation in North Dakota included in that of Morton county.
[5] Exclusive of reservation Indians.

[2] The area of Yellowstone National Park included in that of Uinta county.

POPULATION OF INCORPORATED PLACES.

In accordance with the provisions of section 12 of the census act, approved March 3, 1899, by which a separate enumeration of all incorporated places was required, every effort was made by the Census Office to insure a complete return of the population of each incorporated city, town, village, and borough in the United States, and it is believed that the list given in table 8 (page 438) of the general tables, comprising, in all, 10,602 places, includes practically every incorporated place in the several states and territories comprehended by the Federal census taken as of June 1, 1900.

The population of the several states and territories by minor civil divisions, meaning thereby the principal divisions into which the counties are divided for governmental purposes, is given in detail in table 5 (page 54) of the general tables. The cities, towns, villages, and boroughs, for which the population is stated separately in table 8, as above mentioned, either form parts of or are independent of the principal divisions of the counties, as explained on page 51.

At the census of 1890, in presenting the population of states and territories by minor civil divisions (Report on Population, Part I, page 47), an attempt was made to state separately the population of all places, incorporated and unincorporated, having a certain number of inhabitants, the limit of population ranging higher or lower according to the conditions of settlement in the various sections of the country; in other words, an arbitrary limit of population was fixed for each state and territory, being as low as 200 in some cases, and a separate statement was made for every place, whether incorporated or not, having upward of the amount of population fixed upon for the state or territory in which it was situated, but ignoring all places having a less amount of population, so far as this could be determined from the returns of the census enumerators. No complete summary of the population of these incorporated and unincorporated places is given in the Report on Population for 1890, but a table (Part I, page 378) is presented giving the population of places having 1,000 inhabitants or more, including towns of like population in the New England states, except Connecticut, where a slightly different plan was pursued. There were in 1890, including the New England towns, 3,715 such places, and a brief analysis of the aggregate population represented by these places was presented in Census Bulletin No. 165, published February 19, 1892. In order that the statements contained in said bulletin for 1890 may be made comparable, even approximately, with similar results for 1900, it is necessary to exclude New England towns and, as far as possible, all unincorporated places in 1890, inasmuch as the tables of population for 1900 relate to incorporated places only, no attempt having been made in the present census to secure a separate enumeration of unincorporated places. For the purposes of this comparison, therefore, after excluding the New England towns, it has been assumed, for want of more definite information, that if a place for which the population was given separately in 1890 is included in the list of incorporated places returned in 1900 it was similarly incorporated in 1890, the inclusion under this plan of certain places not in reality incorporated offsetting in great measure the omission of places which were in fact incorporated at the time of the census enumeration in 1890, but for which the population was not separately returned by the census enumerators. By this plan the number of places having a population of 1,000 or more in 1890 is reduced to 2,835, representing, approximately, that number of incorporated places, and if by the same process the number of incorporated places having under 1,000 inhabitants in 1890 is determined, it is found that there were, approximately, 4,743 incorporated places having a population of less than 1,000 in 1890, making a total of 7,578 incorporated places in 1890 as against 10,602 such places in 1900. The number of incorporated places at the two censuses are classified by size in table XVI, that is, according to the respective amounts of population represented by them.

TABLE XVI.—*Number of incorporated places in the United States, classified by size: 1890 and 1900.*

CLASSIFIED SIZES.	NUMBER OF PLACES.	
	1900	1890
Aggregate	10,602	7,578
Places of 1,000,000 and over	3	3
Places of 500,000 and under 1,000,000	3	1
Places of 400,000 and under 500,000		3
Places of 300,000 and under 400,000	5	
Places of 200,000 and under 300,000	8	9
Places of 100,000 and under 200,000	19	12
Places of 50,000 and under 100,000	40	30
Places of 25,000 and under 50,000	83	66
Places of 20,000 and under 25,000	52	41
Places of 15,000 and under 20,000	72	46
Places of 12,000 and under 15,000	75	55
Places of 10,000 and under 12,000	62	71
Places of 9,000 and under 10,000	50	30
Places of 8,000 and under 9,000	45	49
Places of 7,000 and under 8,000	75	57
Places of 6,000 and under 7,000	98	63
Places of 5,000 and under 6,000	147	88
Places of 4,000 and under 5,000	212	150
Places of 3,000 and under 4,000	347	267
Places of 2,500 and under 3,000	257	203
Places of 2,000 and under 2,500	413	304
Places of 1,500 and under 2,000	601	478
Places of 1,000 and under 1,500	1,116	809
Places of 500 and under 1,000	2,501	1,909
Places under 500	4,318	2,834

If cities with a population of 100,000 or more are taken to represent the large cities of the country, there are, as shown by table XVI, 38 such cities in 1900 as compared

with 28 in 1890. Of the 38 large cities in 1900, 3 contain upward of a million inhabitants, the same as in 1890, while for cities having between 500,000 and 1,000,000 inhabitants those in 1900 number 3 as against 1 only in 1890. There are no cities in 1900 containing between 400,000 and 500,000 inhabitants, but at the census of 1890 there were 3 cities of this class. On the other hand, there are 5 cities in 1900 with a population of between 300,000 and 400,000, but in 1890 there were no cities within these limits of population. The cities having between 200,000 and 300,000 inhabitants number 8 in 1900 as against 9 in 1890, while for cities of from 100,000 to 200,000 inhabitants there are 19 in 1900 as compared with 12 in 1890.

From table XVI it is also seen that somewhat more than three-fifths of all the incorporated places at each of the two censuses named constitute places having less than 1,000 inhabitants; that is to say, of places of 500 and under 1,000 inhabitants there are 2,501 in 1900 and 1,909 in 1890, and of places of under 500 inhabitants there are 4,318 in 1900 and 2,834 in 1890, representing, when combined, 6,819 out of a total of 10,602 places in 1900 and 4,743 out of a total of 7,578 in 1890.

The number of incorporated places in 1890 and 1900 is presented in detail for certain classified sizes by states and territories in table XVII (pages lx and lxi).

There are no incorporated places in Alaska, and no mention of that territory is made, therefore, in table XVII.

In Indian Territory 90 towns, incorporated under the act of June 28, 1898, have been separately enumerated in 1900 and are numbered among the incorporated places at the present census. The population of Indian Territory was taken in 1890, apart from the general enumeration, under a special provision of the census act, but there were no incorporated places in Indian Territory at that census.

Honolulu city, so called, is coextensive with Honolulu district, Hawaii, but is not in reality incorporated. It is to all intents and purposes a municipality, however, and is included, therefore, in table XVII as one of the incorporated places in 1890 and 1900.

The 10,602 incorporated places in 1900 contain, in the aggregate, 35,849,516 inhabitants as compared with a total of 26,079,828 persons living in incorporated places in 1890. These figures are presented in table XVIII (page lxii), in detail by states and territories arranged geographically, together with the percentage of the total population of the several states and territories living in incorporated places at each of the two censuses named.

TABLE XVII.—*Number of incorporated places, classified by size, by states and territories: 1890 and 1900.*

[1] Exclusive of 63,592 persons in Alaska and 91,219 persons in the military and naval service of the United States (including civilian employees, etc.) stationed abroad, not credited to any state or territory.

[2] Including, in addition to the general population of the states and organized territories (62,622,250), 180,182 Indians and other persons in Indian Territory and 145,282 Indians and other persons on Indian reservations, etc., specially enumerated, and 89,990 persons in Hawaii, enumerated under the direction of the Hawaiian Government, but excluding 32,052 persons in Alaska. The 145,282 Indians and other persons on Indian reservations are credited to the several states and territories in which the reservations are situated.

The combined population of the 10,602 incorporated places in 1900 constitutes very nearly one-half (47.1 per cent) of the entire population comprehended by the present Federal census, exclusive of the population of Alaska and of persons in the military and naval service of the United States stationed abroad, representing an aggregate population of 76,148,576. In equivalent areas, the whole number of persons living in the 7,578 incorporated places at the census of 1890 constituted a little more than two-fifths (41.4 per cent) of the total population at that census, representing, in the aggregate, 63,037,704 persons.

Aside from the District of Columbia, which is considered for census purposes to be coextensive with the city of Washington, New York has the largest percentage of its population living in incorporated places; that is to say, out of a total population in 1900 of 7,268,894 in that state 5,642,999, or 77.6 per cent, live in incorporated places as compared with 69.4 per cent in 1890. More than three-fifths of the population of incorporated places in New York in 1900 is found in the city of New York, which alone contains 3,437,202 inhabitants, and constitutes 47.3 per cent of the present population of that state. New Jersey has very nearly the same proportion (76.2 per cent) of its population in 1900 living in incorporated places as in New York state, equivalent in these 2 states to more than three-fourths of their entire population. In 6 other states, namely, Massachusetts, Illinois, Rhode Island, Pennsylvania, Colorado, and Connecticut, from three-fifths to somewhat more than two-thirds of the total population live in incorporated places, while in 7 states, namely, Utah, Delaware, California, Ohio, Maryland, Washington, and Michigan, there is between 50 and 60 per cent of the population in 1900 living in incorporated places.

Mississippi has the smallest percentage of population living in incorporated places in 1900, 14.7, and is closely followed by New Mexico with 15.2. Seven other states and territories have less than one-fifth of their total population in incorporated places, namely, Arkansas, 17 per cent; Oklahoma, 17.1 per cent; Alabama, 17.7 per cent; North Carolina, 17.9 per cent; Indian Territory, 19.1 per cent; South Carolina, 19.5 per cent; and Tennessee, 19.8 per cent.

Analyzing the results for the United States according to the proportion of the entire population found in incorporated places of various sizes, it appears that the 161 cities having 25,000 inhabitants or more in 1900 contain an aggregate of 19,757,618 persons, and that this number of persons constitutes 25.9 per cent of the total population considered. In 1890 there were 124 cities which had a population of 25,000 or more, including Brooklyn and Long Island City, which now form a part of New York city, and these 124 cities had a combined population in 1890 of 13,989,568, or 22.2 per cent of the total population considered at that census.

Incorporated places having between 8,000 and 25,000 inhabitants in 1900 number 356 and comprise, in the aggregate, a population of 4,946,091, equivalent to 6.5 per cent of the entire population. Places of similar character and size in 1890 numbered 292 and contained 3,947,233 persons, or 6.3 per cent of the total population.

There are 532 incorporated places in 1900 with a population of more than 4,000 but less than 8,000, comprising a total of 2,937,327, or 3.9 per cent of the whole population, as against 358 such places in 1890 with a combined population of 1,970,752 and constituting 3.1 per cent of the total population.

The 604 incorporated places returned in 1900 with a population ranging from 2,500 to 4,000 contain, in all, 1,896,705 persons and represent 2.5 per cent of the total population as compared with a total of 1,473,999 persons living in 470 incorporated places of similar size in 1890, representing 2.3 per cent of the entire population ten years ago.

The incorporated places containing between 1,000 and 2,500 inhabitants in 1900 number 2,130 and represent a combined total of 3,304,700 persons, constituting 4.3 per cent of the country's present population, while those incorporated places having under 1,000 inhabitants in 1900 number 6,819 and contain 3,007,075 persons, or 4 per cent of the total population. There was in 1890 a total of 1,591 incorporated places with a population of more than 1,000 but less than 2,500, representing 2,489,194 persons in all and constituting 4 per cent of the total population, while the incorporated places having a population of less than 1,000 numbered 4,743, with a combined population of 2,209,082, or 3.5 per cent of the total population in 1890.

The results just presented for the United States as a whole are summarized in table XIX.

TABLE XIX.—*Percentage of population of incorporated places, by classified sizes, of total population of the United States: 1890 and 1900.*

CLASSIFIED SIZES.	1900			1890		
	Number of places.	Population.	Per cent of total population.	Number of places.	Population.	Per cent of total population.
The United States.	10,602	35,849,516	47.1	7,578	26,079,828	41.4
Places of 25,000 and over.	161	19,757,618	25.9	124	13,989,568	22.2
Places of 8,000 and under 25,000.	356	4,946,091	6.5	292	3,947,233	6.3
Places of 4,000 and under 8,000.	532	2,937,327	3.9	358	1,970,752	3.1
Places of 2,500 and under 4,000.	604	1,896,705	2.5	470	1,473,999	2.3
Places of 1,000 and under 2,500.	2,130	3,304,700	4.3	1,591	2,489,194	4.0
Places under 1,000.....	6,819	3,007,075	4.0	4,743	2,209,082	3.5

If the results as shown in table XIX are still further summarized, it appears that the incorporated places containing 8,000 inhabitants or more in 1900 are 517 in num-

ber, representing an aggregate of 24,703,709 persons, and constituting not quite one-third of all the persons in the United States. In 1890 there were 17,936,801 persons living in 416 incorporated places of similar size and they constituted not quite three-tenths of the entire population at that census. Considering in the same way all incorporated places having upward of 4,000 inhabitants, it appears that there are 1,049 such places in 1900 having a combined population of 27,641,036 and representing more than seven-twentieths of the whole population. There were 774 places with 4,000 inhabitants or more in 1890 containing an aggregate population of 19,907,553 and constituting somewhat more than three-tenths of the total population.

These statements of population are limited to incorporated places having upward of 4,000 and 8,000 inhabitants, respectively, and do not agree with the statements made in connection with the discussion relating to "Urban population" (see pages lxxxi–lxxxviii), in which the population of certain towns in the New England states containing no incorporated places is used, in order that the urban population of the New England states may be made more nearly comparable with that for other sections of the country, as therein fully explained.

In order to make the figures herein presented comparable with those used to show the urban population of the country, it is necessary to add the population of 109 towns in New England having 4,000 inhabitants or more in 1900, but containing no incorporated city, village, or borough. The aggregate population represented by these 109 New England towns is 770,662, which, added to the population of incorporated places of similar size (27,641,036), gives a combined population of 28,411,698 for all places of upward of 4,000 inhabitants in 1900, equivalent to 37.3 per cent of the total population. Increasing the figures for 1890 on a similar basis, the population of incorporated places of 4,000 inhabitants or more (19,907,553) is raised to 20,768,881 by the addition of 861,328 persons living in 125 New England towns, making a population equivalent to 32.9 per cent of the total population in 1890.

The number and population of incorporated places in the several states and territories in 1890 and 1900 are classified according to certain ranges of population in table XX.

TABLE XX.—*Number and population of incorporated places, classified by size, by states and territories arranged geographically: 1890 and 1900.*

[1] Includes Honolulu, Hawaii.

From table XXI it appears that the 161 places having upward of 25,000 inhabitants in 1900 contain 55.1 per cent of the entire population of incorporated places, although they constitute but 1.5 per cent of the whole number of such places. At the census of 1890 the 124 cities with a population of 25,000 or more constituted

1.6 per cent of all the incorporated places, and contained 53.6 per cent of the total population living in incorporated places.

Places having less than 1,000 persons, on the other hand, constitute very nearly two-thirds (64.3 per cent) of all the incorporated places in 1900, but contain considerably less than one-tenth (8.4 per cent) of the entire population resident in incorporated places. Similar results for 1890 do not show material differences, although the percentage of such places in 1890 (62.6) is slightly smaller than that for 1900.

Considering the results shown for the several geographical divisions of the country, the very much smaller proportion of places under 1,000 in the North Atlantic division as compared with the other divisions is noticeable, the percentages for 1900 being 45.2 for the North Atlantic division as opposed to 74.6 for the South Atlantic division, 67.5 for the North Central division, 67 for the South Central division, and 58.5 for the Western division. There is a corresponding difference in the amount of population represented by such places in the several divisions, the percentages being 2.7 for the North Atlantic division as compared with 13.8, 12.2, 13.3, and 8.6 for the other 4 divisions, in the order as first named. On the other hand, seven-tenths of all the persons living in incorporated places in the North Atlantic division in 1900 are found in cities of 25,000 and upward, contrasted with 43.8 per cent living under similar conditions in the South Atlantic division, 45.6 per cent in the North Central division, 38.7 per cent in the South Central division, and 49.9 per cent in the Western division.

Table 6 (page 430) of the general tables gives the population at each census of all cities having 25,000 inhabitants or more in 1900, while table 7 (page 434) shows the increase in the population of these cities during each decade.

There are, in all, 161 cities which have a population of 25,000 or more in 1900, and table XXII shows the population of these 161 principal cities, arranged according to their relative rank in 1900, at each of the last three censuses, together with the increase by number and per cent during the two decades ending in 1890 and 1900, respectively.

TABLE XXII.—*Population of cities having 25,000 inhabitants or more in 1900, arranged according to population: 1880 to 1900.*

[The first column under each census year shows the order of the cities named when arranged according to population.]

[1] Decrease.

[2] No census taken of Honolulu, Hawaii, in 1880.

As shown by table XXII, New York has grown to be a city of very nearly 3,500,000 inhabitants in 1900 under the act of consolidation which became effective January 1, 1898, as compared with a population for what was formerly New York city of a little more than 1,500,000 in 1890 and of substantially 1,200,000 in 1880. The population of the territory now comprised within the present limits of New York was, approximately, 2,500,000 in 1890 and 1,900,000 in 1880.[1] It is the premier city of the country in point of population, a position which it has uniformly held at each decennial census since and including 1790. It, furthermore, represents the second largest city in the world, London alone exceeding it in population.

Chicago, with practically 1,700,000 inhabitants, and Philadelphia, with not quite 1,300,000 inhabitants, hold the second and third places in 1900, the same as in 1890, although at the census of 1880 their positions were reversed, Philadelphia then having very nearly 850,000 inhabitants as compared with not much more than 500,000 for Chicago.

St. Louis, Boston, and Baltimore, the next largest cities, have not changed their rank in 1900 as compared with 1890, and each of these 3 cities now has a population somewhat in excess of a half million. Boston was the fourth city in rank in 1880, but was passed by St. Louis in 1890, while Baltimore has occupied the sixth place at each of the three census periods considered.

Cleveland and Buffalo have both increased materially in population during the last ten years, and now take precedence over San Francisco and Cincinnati, which in 1890 were the seventh and eighth places in point of population. Pittsburg also shows a large increase in population since 1890, and is now the eleventh largest city in the country, having exchanged places with New Orleans.

[1] For a fuller consideration of the population of New York city as now constituted, see page lxxx.

Among the most notable changes in the rank of cities which have taken place in 1900 as compared with 1880 may be mentioned that of Seattle, which has advanced from the 151st to the 48th place; that of Los Angeles, from the 135th to the 36th place; that of Duluth, from the 152d to the 72d place; that of Kansas City, Kans., from the 155th to the 76th place; and that of Portland, Oreg., from the 106th to the 42d place. Other noticeable changes in rank from 1880 to 1900 are Birmingham, from the 156th to the 100th place; Tacoma, from the 157th to the 104th place; Spokane, from the 158th to the 106th place; Dallas, from the 137th to the 88th place; and Saginaw, from the 136th to the 89th place.

The 161 cities combined have a population in 1900 of 19,757,618 as compared with a population for the same cities of 14,903,162 in 1890, giving an increase in the population of these cities from 1890 to 1900 of 4,854,456, or 32.6 per cent. No similar comparison can be made for the preceding ten years, 1880 to 1890, as no census was taken in 1880 for one city, namely, Honolulu, Hawaii.

Exclusive of Honolulu, the cities having 25,000 inhabitants or more had a combined population of 19,718,312 in 1900 as compared with a population for the same cities of 14,880,255 in 1890 and of 9,951,318 in 1880.

The absolute increase in the population of these 160 cities from 1890 to 1900 was, therefore, 4,838,057, or 90,880 less than the absolute increase from 1880 to 1890, when it was 4,928,937.

The percentage of increase in population of the same 160 cities from 1890 to 1900 was 32.5 as against 49.5 from 1880 to 1890.

The combined population of the 161 cities at each of the three census periods is distributed in table XXIII by classified sizes, giving, in addition, the number of cities included under each class.

TABLE XXIII.—*Population of cities having 25,000 inhabitants or more in 1900, according to classified sizes: 1880 to 1900.*

CLASSIFIED SIZES.	Number of cities.	POPULATION.			INCREASE FROM 1890 TO 1900.		INCREASE FROM 1880 TO 1890.	
		1900	1890	1880	Number.	Per cent.	Number.	Per cent.

[1] Exclusive of population of Honolulu, Hawaii, for which no census was taken in 1880.

As shown by table XXIII, there are 19 cities which have 200,000 inhabitants or more in 1900, 19 cities which have between 100,000 and 200,000 inhabitants, 40 cities which have between 50,000 and 100,000 inhabitants, and 83 cities which have between 25,000 and 50,000 inhabitants. There were 124 cities in 1890 which had a population of 25,000 or more, but of these cities Brooklyn, with a population in 1890 of 806,343, and Long Island City, with a population in 1890 of 30,506, now form a part of New York city, showing a net gain of 39 cities in 1900 as compared with 1890. Of the 124 cities in 1890, 16 had 200,000 inhabitants or more, 12 had between 100,000 and 200,000 inhabitants, 30 had between 50,000 and 100,000 inhabitants, and 66 had between 25,000 and 50,000 inhabitants.

In 1880 there were but 20 cities which contained more than 100,000 inhabitants, but in 1890 this number had increased to 28, and in 1900 to 38.

In 1900 there are 78 cities of 50,000 inhabitants or more as compared with 58 in 1890 and 35 in 1880.

The combined population in 1900 of the 19 cities of the first class is 11,795,809 as against a population in 1890 of 8,893,928, representing an increase during the ten years of 2,901,881, or 32.6 per cent. The same cities showed an increase from 1880 to 1890 of 2,571,922, or 40.7 per cent.

The 19 cities of the first class comprise New York, which, with more than 3,000,000 inhabitants, properly stands by itself; 2 cities, Chicago and Philadelphia, each of which has a population in excess of a million; 3 cities, St. Louis, Boston, and Baltimore, each of which has a population of more than half a million; 5 cities, Cleveland, Buffalo, San Francisco, Cincinnati, and Pittsburg, which have a population of between 300,000 and 400,000 each; and 8 cities, New Orleans, Detroit, Milwaukee, Washington, Newark, Jersey City, Louisville, and Minneapolis, each of which has a population of between 200,000 and 300,000. The aggregate population represented by each of these 5 subgroups is summarized in table XXIV.

TABLE XXIV.—*Population of cities having 200,000 inhabitants or more in 1900, according to classified sizes: 1880 to 1900.*

CLASSIFIED SIZES.	Number of cities.	POPULATION.			INCREASE FROM 1890 TO 1900.		INCREASE FROM 1880 TO 1890.	
		1900	1890	1880	Number.	Per cent.	Number.	Per cent.
Aggregate	19	11,795,809	8,893,928	6,322,006	2,901,881	32.6	2,571,922	40.7
Cities of 3,000,000 and over	1	3,437,202	2,507,414	1,911,698	929,788	37.1	595,716	31.2
Cities of 1,000,000 and under 2,000,000	2	2,992,272	2,146,814	1,350,355	845,458	39.4	796,459	59.0
Cities of 500,000 and under 1,000,000	3	1,645,087	1,334,686	1,045,670	310,401	23.3	289,016	27.6
Cities of 300,000 and under 500,000	5	1,724,455	1,351,539	960,767	372,916	27.6	390,772	40.7
Cities of 200,000 and under 300,000	8	1,996,793	1,553,475	1,053,516	443,318	28.5	499,959	47.5

The 19 cities of the second class (see table XXIII), have a combined population in 1900 of 2,412,538, and show an increase of 33.4 per cent from 1890 to 1900 as against an increase of 79.2 per cent from 1880 to 1890.

The 40 cities of the third class have a combined population in 1900 of 2,709,338 as against a population in 1890 of 2,067,169, which is equivalent to an increase during the decade of 31.1 per cent as compared with an increase of 51.1 per cent during the preceding ten years.

The 83 cities of the fourth class have a combined population in 1900 of 2,839,933, having gained since 1890, 706,524 in number, or 33.1 per cent, as against an increase of 68.6 per cent from 1880 to 1890.

The 19 cities of the first class are the only group of cities which show a larger numerical increase during the past decade than during the ten years from 1880 to 1890, although the 4 groups show very even percentages of increase from 1890 to 1900, varying from 31.1 to 33.4, the percentage of increase for the 161 cities combined being 32.6.

The comparative size, in point of population, of the 38 cities which contain more than 100,000 inhabitants in 1900 is shown graphically in the third diagram on plate 3, while a similar presentation of the population of each of these cities at each census is made in a series of diagrams on plate 10.

The total population represented by the 161 principal cities is distributed by states and territories in table XXV.

TABLE XXV.—*Combined population of the 161 cities having 25,000 inhabitants or more in 1900, distributed by states and territories arranged geographically: 1880 to 1900.*

STATES AND TERRITORIES.	Number of cities.	POPULATION.			INCREASE FROM 1890 TO 1900.		INCREASE FROM 1880 TO 1890.

[1] Exclusive of population of Honolulu, Hawaii, for which no census was taken in 1880.

[2] Decrease.

The following named states and territories in 1900 do not contain any city with a population of 25,000 or more: Arizona, Idaho, Indian Territory, Mississippi, Nevada, New Mexico, North Carolina, North Dakota, Oklahoma, South Dakota, Vermont, and Wyoming.

Of the whole number of cities having 25,000 inhabitants or more in 1900, 70 are found in the North Atlantic division, 49 in the North Central division, 18 in the South Central division, 12 in the Western division, 11 in the South Atlantic division, and 1 in Hawaii. Massachusetts has the largest number of such cities, namely, 20, and is followed by Pennsylvania with 18, and New York with 12.

The most significant growth of cities, shown by table XXV, is that for the 3 cities in the state of Washington, namely, Seattle, Spokane, and Tacoma. These 3 cities combined had only 4,981 inhabitants in 1880, but their population had increased to 98,765 in 1890, and to 155,233 in 1900, the increase during the past decade being equivalent to 57.2 per cent.

Nebraska is the only state in which the combined population of the cities contained therein shows a decrease from 1890 to 1900.

The population by wards or equivalent subdivisions is presented in table XXVI, for each city having 25,000 inhabitants or more in 1900, arranged alphabetically by states and territories.

The population of each of the 5 boroughs of the city of New York in 1900 is given on page lxxvii in detail by wards or assembly districts, but for a proper understanding of the changes which have taken place in its organization and population since 1890 the following explanation seems necessary:

The city of New York, as constituted prior to the act of consolidation which became effective January 1, 1898, had a population in 1890 of 1,515,301 as compared with a population in 1900 of 3,437,202, showing an apparent increase of 1,921,901, or 126.8 per cent.

In 1890 the city comprised all of what is now the borough of Manhattan and the greater part of what is now the borough of Bronx, but under the act of consolidation above referred to, Kings county, Richmond county, the larger part of Queens county, and a small part of Westchester county, became a part of the city.

Manhattan borough comprises all that part of the old city of New York lying to the south of the Harlem River, this area being known formerly as Manhattan Island.

Bronx borough was formed from that part of the old city of New York lying to the north of the Harlem River and the small part of Westchester county annexed under the act of consolidation. All of this area was at one time a part of Westchester county, but in 1873 the towns of Morrisania, West Farms, and Kings Bridge were annexed to New York, and under the act which took effect January 1, 1898, all of the town of Westchester and parts of the towns of Eastchester and Pelham became a part of the city.

Under an act of the legislature the towns of Flatbush, Flatlands, Gravesend, and New Utrecht were absorbed by the city of Brooklyn in 1894, the town of Flatbush becoming the twenty-ninth ward, the town of New Utrecht the thirtieth ward, the town of Gravesend the thirty-first ward, and the town of Flatlands the thirty-second ward of the city. The city thus became coextensive with Kings county, and on January 1, 1898, the city of Brooklyn became the borough of Brooklyn, 1 of the 5 boroughs of what is now the city of New York.

Richmond county, or what is commonly known as Staten Island, under the provisions of the same act became the borough of Richmond.

Queens borough was organized at the same time from what was Long Island City, the towns of Flushing, Jamaica, and Newtown, and a small portion of the town of Hempstead, all of which were civil divisions of Queens county. The remaining towns of the county, Oyster Bay and North Hempstead, together with the greater part of the town of Hempstead, were taken to form the new county of Nassau. The first ward of Queens borough comprises what was formerly Long Island City, the second ward what was formerly Newtown town, the third ward what was formerly Flushing town, the fourth ward what was formerly Jamaica town, and the fifth ward that part of the town of Hempstead now within the limits of the borough of Queens.

It is impossible to state definitely the population in 1890 of that part of the town of Hempstead, Queens county, which became a part of Queens borough, and of the parts of the towns of Eastchester and Pelham, Westchester county, which became a part of Bronx borough, but table XXVII shows the estimated population for the city of New York, and for each borough of the city, as now constituted, from 1790 to 1900.

TABLE XXVII.—*Estimated population of New York city and its boroughs, as now constituted: 1790 to 1900.*

BOROUGHS.	1900	1890	1880	1870	1860	1850	1840	1830	1820	1810	1800	1790
New York city	3,437,202	2,507,414	1,911,698	1,478,103	1,174,779	696,115	391,114	242,278	152,056	119,734	79,216	49,401
Manhattan borough	1,850,093	1,441,216	1,164,673	942,292	813,669	515,547	312,710	202,589	123,706	96,373	60,515	33,131
Bronx borough	200,507	88,908	51,980	37,393	23,593	8,032	5,346	3,023	2,782	2,267	1,755	1,781
Brooklyn borough	1,166,582	838,547	599,495	419,921	279,122	138,882	47,613	20,535	11,187	8,303	5,740	4,495
Richmond borough	67,021	51,693	38,991	33,029	25,492	15,061	10,965	7,082	6,135	5,347	4,564	3,835
Queens borough	152,999	87,050	56,559	45,468	32,903	18,593	14,480	9,049	8,246	7,444	6,642	6,159

Table XXVII shows that the area comprised within the present limits of the city of New York had an estimated population of 49,401 in 1790, which had grown to 696,115 in 1850, representing an increase of 646,714, or 1,309.1 per cent. The population of the present city of New York had grown to 2,507,414 in 1890, or an increase since 1850 of 1,811,299, or 260.2 per cent. Since 1890 there has been an increase of 929,788, or 37.1 per cent, the population in 1900 being 3,437,202.

URBAN POPULATION.

At the census of 1890 the discussion of urban population was limited to places of 8,000 inhabitants or more, in order that the results of that census could be brought into direct comparison with the published results of former censuses. That this limit of population was a somewhat arbitrary one was not questioned then, and the discussion of urban population at that census could have been extended to advantage to include all places having at least 4,000 inhabitants. This was done, tentatively, at least, at the census of 1880, and while the higher limit of population is used at the present census for purposes of comparison, the discussion is made to comprehend as well the lower limit of population.

In every section of the country, outside of certain of the New England states, there is not much difficulty in distinguishing between the urban and rural elements of the population, as only dense bodies of population are chartered, and their limits are sharply defined by the acts of incorporation. In most of the New England states, however, a town, which is the usual division of the county, is chartered bodily as a city when certain conditions of population are fulfilled, and so a city may contain a considerable proportion of rural population, and, conversely, a town may contain a compact body of population of magnitude sufficient to be classed as urban. In these states, therefore, an arbitrary rule concerning urban population is made to include, in addition to the population of cities and other incorporations of the proper size, that of all towns having the requisite number of inhabitants but containing no incorporated city, village, or borough.

Considering, first, the higher limit of population, there are, approximately, 25,000,000 persons living in incorporated places and New England towns of 8,000 inhabitants or more in 1900 as compared with a population of very nearly 18,300,000 in incorporations and towns of similar size in 1890, as set forth in detail by states and territories in table XXVIII.

TABLE XXVIII.—*Total and urban population, on the basis of places of 8,000 inhabitants or more, by states and territories arranged geographically: 1890 and 1900.*

[1] Exclusive of 63,592 persons in Alaska and 91,219 persons in the military and naval service of the United States (including civilian employees, etc.) stationed abroad, not credited to any state or territory.

[2] Including, in addition to the general population of the states and organized territories (62,622,250), 180,182 Indians and other persons in Indian Territory and 145,282 Indians and other persons on Indian reservations, etc., specially enumerated, and 89,990 persons in Hawaii, enumerated under the direction of the Hawaiian Government, but excluding 32,052 persons in Alaska. The 145,282 Indians and other persons on Indian reservations are credited to the several states and territories in which the reservations are situated.

As shown by table XXVIII, there are 546 places in 1900 which conform to the conditions of this discussion, considered with respect to the higher limit of population, and these places contain an aggregate of 25,031,505 persons, constituting 32.9 per cent of the total population considered; that is, the total population of the entire area of enumeration in 1900, exclusive of Alaska and of persons enumerated at military and naval stations abroad. At the census of 1890 there were 448 such places, having an aggregate population of 18,295,410 and constituting 29 per cent of the total population considered at that census. If the population of Indian Territory, Indian reservations,[1] and Hawaii is excluded from the statements of population from which these percentages are derived, there remains in 1900 a total of 24,992,199 persons living in places of 8,000 inhabitants or more, out of a total population of 75,477,467, equivalent to 33.1 per cent, and in 1890 a total of 18,272,503 persons living in similar places, out of a total population of 62,622,250, equivalent to 29.2 per cent. These latter figures are comparable with the published results concerning urban population at preceding censuses, as shown by table XXIX.

TABLE XXIX.—*Total and urban population at each census: 1790 to 1900.*

CENSUS YEARS.	Total population.	Urban population.[1]	Number of places.	Per cent of urban of total population.
1900	75,477,467	24,992,199	545	33.1
1890	62,622,250	18,272,503	447	29.2
1880	50,155,783	11,318,547	286	22.6
1870	38,558,371	8,071,875	226	20.9
1860	31,443,321	5,072,256	141	16.1
1850	23,191,876	2,897,586	85	12.5
1840	17,069,453	1,453,994	44	8.5
1830	12,866,020	864,509	26	6.7
1820	9,638,453	475,135	13	4.9
1810	7,239,881	356,920	11	4.9
1800	5,308,483	210,873	6	4.0
1790	3,929,214	131,472	6	3.4

[1] Population of places of 8,000 inhabitants or more at each census.

According to these figures, there were in 1790 but 6 places having 8,000 inhabitants or more, containing, in all, but 131,472 persons, or only 3.4 per cent of the total population at that census. At the census of 1830, the proportion of the total population living in places of like size had been increased to 6.7 per cent, representing 864,509 persons living in 26 places, out of a total population for the entire country of 12,866,020. At the census of 1850, there were 2,897,586 persons living in 85 places of upward of 8,000 inhabitants, equivalent to 12.5 per cent of the entire population, which comprised then 23,191,876 persons. In 1880 the proportion, as compared with 1850, had nearly doubled, there being, out of a total population of 50,155,783 at that census, 11,318,547 persons, or 22.6 per cent, living in 286 such places. During the succeeding decade there was a very large increase in urban population, so that at the census of 1890 very nearly 30 per cent of the population was found living in 447 cities or equivalent incorporations of 8,000 inhabitants or more, comprising, as before stated, 18,272,503 persons out of a total population of 62,622,250. The proportion of urban population has increased during the past ten years at a less rapid rate, there being, according to the figures of the present census, not quite one-third (33.1 per cent) of the population now living in places of 8,000 inhabitants or more, exclusive of Alaska, Indian Territory, Indian reservations, Hawaii, and persons enumerated at military and naval stations abroad.

The urban population in 1890, as stated in tables XXVIII and XXIX, differs slightly from that given in the census report for 1890, owing to minor changes made in the totals for Connecticut, Nebraska, and Vermont, and to the inclusion in table XXVIII of a certain amount of urban population in Hawaii.

There has been a notable increase since 1890 in the proportion of urban population in the North Atlantic division of states, considered as a whole, and this statement is true, in a somewhat less degree, of the North Central division. As shown by table XXVIII, 58.6 per cent of the total population of the North Atlantic division and 30.6 per cent of that of the North Central division in 1900 live in places of 8,000 inhabitants or more as compared with 51.7 per cent for the former and 25.9 per cent for the latter division at the census of 1890. In Rhode Island 81.2 per cent of the population in 1900 live in cities or towns of 8,000 inhabitants or more, while this element also constitutes 76 per cent of the population in Massachusetts, 68.5 per cent in New York, 61.2 per cent in New Jersey, and 53.2 per cent in Connecticut. These are the only states, except the District of Columbia, in which the proportion of urban population, measured on this basis, is greater than one-half of the total population in 1900, but in Pennsylvania, Delaware, Maryland, Illinois, and California between 40 and 50 per cent of the total population live in places of this size.

As before stated, it has been decided, for the purposes of the discussion of urban population at the present census, to lower the limit of population to include all incorporated places with a population of 4,000 or more, and all New England towns of like population which do not contain any incorporated places within their limits. It is assumed that, under this definition of urban population, a somewhat closer approximation to true conditions can be obtained than has been the case under the practice of preceding censuses, and on this basis the percentage of urban population in 1900 is raised to 37.3, as shown by table XXX.

[1] Population of Indian reservations in 1900, 125,048.

TABLE XXX.—*Total and urban population, on the basis of places of 4,000 inhabitants or more, by states and territories arranged geographically: 1890 and 1900.*

Nevada	42,335	47,355	4,500	8,511	1	1	10.6	18.0
Idaho	161,772	88,548	10,003	----------	2	----------	6.2	----------
Washington	518,103	357,232	188,750	120,865	8	8	36.4	33.8
Oregon	413,536	317,704	114,134	68,230	5	4	27.6	21.5
California	1,485,053	1,213,398	726,655	546,040	24	19	48.9	45.0
Hawaii	154,001	89,990	39,306	22,907	1	1	25.5	25.5

[1] Exclusive of 63,592 persons in Alaska and 91,219 persons in the military and naval service of the United States (including civilian employees, etc.) stationed abroad, not credited to any state or territory.

[2] Including, in addition to the general population of the states and organized territories (62,622,250), 180,182 Indians and other persons in Indian Territory and 145,282 Indians and other persons on Indian reservations, etc., specially enumerated, and 89,990 persons in Hawaii, enumerated under the direction of the Hawaiian Government, but excluding 32,052 persons in Alaska. The 145,282 Indians and other persons on Indian reservations are credited to the several states and territories in which the reservations are situated.

Under the definition of urban population, as just stated, it appears from table xxx that there are 28,411,698 persons living in 1,158 incorporated places and New England towns of 4,000 inhabitants or more, and that this number of persons constitutes 37.3 per cent of the total population in 1900, exclusive of that of Alaska and of persons enumerated at military and naval stations abroad. At the census of 1890 there were 20,768,881 persons living in 899 similar places and New England towns, representing 32.9 per cent of the entire population considered in 1890. As previously stated, a table was presented in the census report for 1880, giving the number and population of places, including towns in New England having 4,000 inhabitants or more, for each state and territory comprehended by that census. In determining the amount of population to be included as urban in the New England states, discretion was exercised, and, as stated in the report, "after what seemed a reasonable deduction for the rural parts of the town or township, the remainder has been treated as city population"—a somewhat different process from that adopted at the present census. The results, shown by said table for 1880, are probably sufficiently approximate to warrant their use for purposes of comparison, and the figures showing the amount of urban population in the several states and territories in 1880 are, therefore, reproduced in table xxxi.

TABLE XXXI.—*Total and urban population, on the basis of places of 4,000 inhabitants or more, by states and territories arranged geographically: 1880.*

[1] Dakota territory.

On the basis of the figures presented in table xxxi, there were 12,936,110 persons living in places with a population of 4,000 or more in 1880, representing 25.8 per cent of the total population at that census as compared with 32.9 per cent in 1890 and 37.3 per cent in 1900. The population upon which the percentages for 1890 and 1900 are based includes, however, that of Indian Territory, Indian reservations, and Hawaii, which, if excluded, would give slightly larger percentages for those two censuses, namely, 33.1 for 1890 and 37.6 for 1900.

As shown by table xxx, there are 21,046,695 persons living in the North Atlantic division of states in 1900, and of this number 13,613,736, or 64.7 per cent, live in incorporated places and towns containing upward of 4,000 inhabitants, as previously explained. In 1890 there was 57.9 per cent, and in 1880 there was 48 per cent, of the population of the states comprising this division, living under, approximately, similar conditions.

The proportion of urban population in 1900 in the Western and North Central divisions, respectively, is not much more than one-half of what it is in the North Atlantic division, the exact percentages being 35.9 for

the Western and 35.5 for the North Central division. Of the total population of the Western division in 1890 those living in places of 4,000 inhabitants and upward constituted 33.4 per cent as against 27.5 per cent in 1880, while of the total population of the North Central division this element in 1890 constituted 30.1 per cent as against 21.1 per cent in 1880.

The urban element in 1900 constitutes somewhat more than one-eighth (13.5 per cent) of the total population of the South Central division and not quite one-fifth (19.6 per cent) of that of the South Atlantic division. At the two preceding censuses the proportion of urban population in these two divisions was slightly less than in 1900, the percentages being 12 in 1890 and 8.8 in 1880 for the former and 17.5 in 1890 and 13.7 in 1880 for the latter division.

Considering the urban element with respect to individual states, it appears from table XXX that, aside from the District of Columbia, there are 9 states in which the proportion of urban population ranges from not quite one-half to more than nine-tenths of their total population in 1900, while, on the other hand, there are 19 states and territories in which the urban element in 1900 constitutes less than one-sixth of their entire population, as shown by the following summary, in which the percentages of urban population in the several states and territories in 1900 are presented in their order, beginning with the highest:

Rhode Island	91.6	Louisiana	25.1
Massachusetts	86.9	Vermont	21.0
New York	71.2	Nebraska	20.8
New Jersey	67.5	Iowa	20.5
Connecticut	65.5	Kentucky	19.7
Pennsylvania	51.1	Kansas	19.2
Illinois	51.0	Florida	16.5
California	48.9	Virginia	16.5
Maryland	48.2	Texas	14.9
New Hampshire	46.7	Tennessee	14.1
Ohio	44.8	Georgia	13.9
Delaware	41.4	South Carolina	11.7
Colorado	41.2	West Virginia	11.6
Michigan	37.2	Arizona	10.6
Washington	36.4	Nevada	10.6
Maine	36.2	Alabama	10.0
Missouri	34.9	North Carolina	8.0
Wisconsin	34.5	South Dakota	7.2
Minnesota	31.0	Arkansas	6.9
Indiana	30.6	Idaho	6.2
Utah	29.4	New Mexico	6.1
Montana	28.8	North Dakota	5.4
Wyoming	28.8	Mississippi	5.3
Oregon	27.6	Oklahoma	5.0
Hawaii	25.5	Indian Territory	2.5

There are 38 cities in 1900 in each of which the population exceeds 100,000, and these cities have a combined population of 14,208,347, or practically one-half of the entire urban element of the country, considered on the basis of places of 4,000 inhabitants or more. This concentration of population has a very material influence on the percentage of urban population in the states affected, as shown by table XXXII.

TABLE XXXII.—*Total and urban population, exclusive of cities of 100,000 and over, for certain states arranged geographically: 1900.*

STATES.	Total population of state.	CITIES OF 100,000 AND OVER.		POPULATION, EXCLUSIVE OF CITIES OF 100,000 AND OVER.				Per cent of total urban of total population of state.
		Number.	Population.	Total population.	Urban population.	Number of places.	Per cent of urban of total population.	
North Atlantic division:								
Massachusetts	2,805,346	3	784,176	2,021,170	1,653,818	107	81.8	86.9

Western division:								
Colorado	539,700	1	133,859	405,841	88,325	7	21.8	41.2
California	1,485,053	2	445,261	1,039,792	281,394	22	27.1	48.9

By the exclusion of the population of the large cities from the consideration of urban population in certain states, as shown by table XXXII, the proportion of the urban element to the total population is very much lowered, particularly in Maryland, Louisiana, Missouri, New York, and Illinois. For example, if the population of Baltimore is excluded from the consideration of urban population in Maryland in 1900, there is only 9.4 per cent of the population living in places of at least 4,000 inhabitants as against 48.2 per cent when the total urban element of the state, including that city, is considered. Substantially these same conditions are also observable in Louisiana when the population of New Orleans is excluded, while in Illinois the percentage of urban population, exclusive of Chicago, is reduced to 24.4, or less than one-half of the percentage for the state considered in its entirety. Similarly, the exclusion of the population of the large cities reduces the percentage of urban population from 71.2 to 34.8 in the state of New York, from 34.9 to 10.7 in Missouri, from 31 to 12.7 in Minnesota, from 41.2 to 21.8 in Colorado, from 48.9 to 27.1 in California, and from 51.1 to 30.9 in Pennsylvania.

Over four-fifths of the entire urban element of the country in 1900 is found in the North Atlantic and North Central divisions, the first named division containing 47.9 per cent, and the second 32.9 per cent, of the total. This was also the case in 1890, when these two divisions combined contained substantially the same proportion of the total urban element at that census.

There is a very great disproportion in the amount of urban population contained in each of the great geographical divisions of the country, as shown by table XXXIII.

TABLE XXXIII.—*Distribution of urban population by geographical divisions: 1890 and 1900.*

GEOGRAPHICAL DIVISIONS.	URBAN POPULATION IN 1900.		URBAN POPULATION IN 1890.	
	Number.	Per cent.	Number.	Per cent.
The United States	28,411,698	100.0	20,768,881	100.0
North Atlantic division	13,613,736	47.9	10,071,957	48.5
South Atlantic division	2,049,520	7.2	1,554,190	7.5
North Central division	9,343,213	32.9	6,744,936	32.5
South Central division	1,896,655	6.7	1,339,232	6.4
Western division	1,469,268	5.2	1,035,659	5.0
Hawaii	39,306	0.1	22,907	0.1

The percentage of increase in urban population since 1890 is greater than that of the total population, the increase in the two classes of population being presented by geographical divisions in table XXXIV.

TABLE XXXIV.—*Increase in total and urban population, by geographical divisions: 1890 to 1900.*

GEOGRAPHICAL DIVISIONS.	TOTAL POPULATION.		URBAN POPULATION.		INCREASE IN TOTAL POPULATION.		INCREASE IN URBAN POPULATION.	
	1900	1890	1900	1890	Number.	Per cent.	Number.	Per cent.
The United States	[1]76,148,576	[2]63,037,704	28,411,698	20,768,881	13,110,872	20.8	7,642,817	36.8
North Atlantic division	21,046,695	17,406,969	13,613,736	10,071,957	3,639,726	20.9	3,541,779	35.2
South Atlantic division	10,443,480	8,857,922	2,049,520	1,554,190	1,585,558	17.9	495,330	31.9
North Central division	26,333,004	22,410,417	9,343,213	6,744,936	3,922,587	17.5	2,598,277	38.5
South Central division	14,080,047	11,170,137	1,896,655	1,339,232	2,909,910	26.1	557,423	41.6
Western division	4,091,349	3,102,269	1,469,268	1,035,659	989,080	31.9	433,609	41.9
Hawaii	154,001	89,990	39,306	22,907	64,011	71.1	16,399	71.6

[1] Exclusive of 63,592 persons in Alaska and 91,219 persons in the military and naval service of the United States (including civilian employees, etc.) stationed abroad, not credited to any state or territory.

[2] Including, in addition to the general population of the states and organized territories (62,622,250), 180,182 Indians and other persons in Indian Territory and 145,282 Indians and other persons on Indian reservations, etc., specially enumerated, and 89,990 persons in Hawaii, enumerated under the direction of the Hawaiian Government, but excluding 32,052 persons in Alaska.

There has been an increase since 1890 in urban population, for the country as a whole, of 7,642,817, or very nearly 37 per cent, as compared with an increase in total population during the same period of not quite 21 per cent. In the South Central and Western divisions there has been an increase in urban population in ten years of very nearly 42 per cent as against an increase in total population of practically 26 per cent and 32 per cent, respectively. The urban element has increased during the decade about 38 per cent in the North Central division as against 17 per cent in total population, 35 per cent in the North Atlantic division as against substantially 21 per cent in total population, and not quite 32 per cent in the South Atlantic division as against very nearly 18 per cent in total population.

Graphic presentation is made of the proportion of urban to total population by the diagrams shown on plates 2, 3, and 9, the urban population, for purposes of comparison, being limited in each case to that element living in places of 8,000 inhabitants or more.

The first diagram on plate 2 shows the total and urban population at each census, the total population of the country being represented by the total length of the bar and the urban population by the black portion. The third diagram on plate 2 shows by the length of its bars the proportion which the urban element bore to the total population of the country at each census.

A similar presentation of the total and urban population of the several states and territories in 1900 is made in the first diagram on plate 3, while the proportion of urban to total population at each census is presented for each state and territory in the diagram on plate 9.

The relative increase in total and urban population from 1890 to 1900 is presented in detail by states and territories in table XXXV.

TABLE XXXV.—*Increase in total and urban population, by states and territories arranged geographically: 1890 to 1900.*

Hawaii	154,001	89,990	39,306	22,907	64,011	71.1	16,399	71.6

[1] Exclusive of 63,592 persons in Alaska and 91,219 persons in the military and naval service of the United States (including civilian employees, etc.) stationed abroad, not credited to any state or territory.

[2] Including, in addition to the general population of the states and organized territories (62,622,250), 180,182 Indians and other persons in Indian Territory and 145,282 Indians and other persons on Indian reservations, etc., specially enumerated, and 89,990 persons in Hawaii, enumerated under the direction of the Hawaiian Government, but excluding 32,052 persons in Alaska. The 145,282 Indians and other persons on Indian reservations are credited to the several states and territories in which the reservations are situated.

[3] Decrease.

RURAL POPULATION.

While the whole body of population found in incorporated places, without limit as to the amount of population, may be said to be living more or less under urban conditions, it has been determined for the purposes of the present census, as already explained, to confine the purely urban element to that increment of the population contained in cities or other incorporations having at least 4,000 inhabitants, including certain New England towns of like population which do not contain any incorporated places within their limits. It has been also shown that the urban population of the country, as thus defined, numbers at the present census 28,411,698, and constitutes 37.3 per cent of the total population considered. This leaves more than three-fifths of the population to be accounted for, but it is clear that all of this remainder can not be considered as representing strictly rural population. There are in 1900, besides the 1,158 incorporations and New England towns which have been taken to represent the urban element, 9,444 incorporations having less than 4,000 inhabitants, which may be said to comprise partly urban and partly rural population. In order, therefore, to reach a fair approximation of the proportion which the strictly rural population bears to the total population in 1900, it seems necessary to assign to an intermediate class this semi-urban element, comprising, in the aggregate, 8,208,480 persons, and constituting 10.8 per cent of the whole population under consideration. After subtracting, then, the urban and semi-urban classes of population, the remainder may be assumed to represent the rural population of the country, equivalent to 39,528,398, or 51.9 per cent of the entire population involved. The figures representing these three classes of the population in 1900 can be compared with similar figures for 1890, as follows:

CLASSES OF POPULATION.	1900		1890	
	Number.	Per cent of total.	Number.	Per cent of total.
Totals	76,148,576	100.0	63,037,704	100.0
Urban	28,411,698	37.3	20,768,881	32.9
Semi-urban	8,208,480	10.8	6,172,275	9.8
Rural	39,528,398	51.9	36,096,548	57.3

As shown by this summary, there has been a relative loss of 5.4 per cent in the proportion of rural to total population in 1900 as compared with 1890, which is offset by a relative gain of 4.4 per cent in the proportion of urban and of 1 per cent in that of semi-urban population.

Table XXXVI (page xc) presents a statement of the semi-urban and rural elements of the population for each state and territory in 1890 and 1900, and shows, in addition, the numerical increase (or decrease) in the urban, semi-urban, and rural elements since 1890, and the proportion of the total increase in population represented by each element, respectively.

A comparative statement of the total and urban population at the last two censuses is contained in table XXXV (page lxxxviii), and an examination of the figures contained in tables XXXV and XXXVI shows that, for the entire area considered, the total increase in population since 1890 of 13,110,872 is made up of an increase of 7,642,817 in urban, of 2,036,205 in semi-urban, and of 3,431,850 in rural population, and, furthermore, that the increase in the rural element represents somewhat more than one-fourth (26.2 per cent) of the total increase during the decade, while the increase in the semi-urban element constitutes between one-sixth and one-seventh (15.5 per cent) of the entire increase.

In the North Atlantic division practically all the increase in population since 1890 is confined to the urban element, and so far as the rural element is concerned there has been a loss in all but 3 states, namely, Rhode Island, Connecticut, and Pennsylvania. The absence of semi-urban population in New Hampshire, Massachusetts, and Rhode Island is due to the fact that in these states there are no incorporations other than cities, which in effect are merely towns with a different form of government, and that the population of these cities in 1890 and 1900 is classed as urban, as they all come within the limit of population previously established for that element.

In the South Atlantic division, Delaware is the only state which shows a loss in rural population since 1890, the gain in this element representing, for the division as a whole, more than one-half of the total increase in population for the decade.

There has been a very substantial gain in rural population in all of the states and territories comprising the South Central division, the increase in the rural element for the entire division constituting more than two-thirds of the total increase since 1890.

There has been a loss in rural population in Ohio, Indiana, Illinois, Nebraska, and Kansas, but in all the remaining states of the North Central division there has been a considerable increase in the rural element during the ten years, particularly in Minnesota, Wisconsin, and the Dakotas.

The rural population has increased since 1890 in every state and territory of the Western division, and the increase in this element in Wyoming, New Mexico, Arizona, and Idaho is particularly noticeable, consituting, as it does, by far the major portion of the entire increase in population in the states and territories named.

TABLE XXXVI.—*Increase in urban, semi-urban, and rural population, and percentage of the total increase in population, by states and territories arranged geographically: 1890 to 1900.*

[1] Excludes Alaska and persons in the military and naval service of the United States (including civilian employees, etc.) stationed abroad, not credited to any state or territory.

[2] Decrease.

SEX.

The total population of the entire area of enumeration in 1900, as stated on page xviii, is 76,303,387, and of this number 39,059,242 are males and 37,244,145 are females. These figures are to be compared with a total for 1890 of 32,315,063 males and 30,754,693 females, made up as follows:

AREAS.	Males.	Females.
States and territories (general enumeration)	32,067,880	30,554,370
Alaska (specially enumerated)	19,248	12,804
Hawaii (census of December 28, 1890)	58,714	31,276
Indian Territory (specially enumerated)	96,586	83,596
Indian reservations (specially enumerated)	72,635	72,647
Totals	32,315,063	30,754,693

No comparisons can be made with similar totals for 1880, as there are no figures available at that census for the additional areas of enumeration comprehended by the census of 1900; that is to say, the number of males and females in 1880, as given in table 10 (page 484) of the general tables, are not strictly comparable with those for 1890 and 1900, as shown by the same table, for the reason that the figures for the last two censuses named include, in addition to those for Alaska, Hawaii, and Indian Territory, a considerable number of persons reported for Indian reservations, etc., in certain states and territories, as shown by table XXXVII, but for which the corresponding numbers in 1880 were not ascertained.

TABLE XXXVII.—*Number of Indians and other persons returned on Indian reservations, etc., in certain states and territories: 1890 and 1900.*

STATES AND TERRITORIES.	1900	1890
Alabama		384

Minnesota	9,408	8,457
Missouri		1
Montana	11,770	10,765
Nebraska		3,746
Nevada	1,673	1,594
New Mexico	3,863	6,689
New York	5,784	5,321
North Carolina		2
North Dakota	6,907	8,264
Ohio		13
Oklahoma	16,090	16,641
Oregon	3,772	3,987
Pennsylvania	81	99
South Dakota	17,683	19,792
Texas		4
Utah	1,797	2,874
Washington	6,317	7,842
Wisconsin	6,126	6,450
Wyoming	1,961	1,850
Totals	125,048	145,282

The small number of persons shown in table XXXVII for certain of the states in 1890, for which no corresponding figures appear in 1900, is due to the enumeration in 1890 of a few hundred Indians in prison, but credited in the table to the states and territories to which they severally belonged, although they were not actually present therein at the time the census was taken. In all cases, too, where Indian lands have been allotted since 1890 and become a part of the counties in which they are situated, their population in 1900 is not included in that of Indian reservations as given in table XXXVII. For this reason, there is no population given for Nebraska in 1900 as an offset to the 3,746 persons on Indian reservations in 1890, and similar omissions have been made in the case of other states and territories in 1900; but not to the extent of doing away entirely with the population credited to Indian reservations, as in the case of Nebraska.

In the ten years from 1890 to 1900 the males have increased 6,744,179, or 20.9 per cent, while the females have increased 6,489,452, or 21.1 per cent, as shown by table XXXVIII.

TABLE XXXVIII.—*Male and female population, by states and territories arranged geographically, in 1890 and 1900, with increase since 1890.*

[1] Includes persons in the military and naval service of the United States (including civilian employees, etc.) stationed abroad, not credited to any state or territory.

[2] Decrease.

From table XXXVIII it appears that, as a whole, the females have increased during the past decade at a slightly greater rate than the males, and that this greater rate of increase is due to an increase in the proportion of females in the North Central and Western sections of the country. The males predominate in these sections, especially in the Western states and territories, but owing to the change in the character of the immigration since 1890 and the presence in these sections of a greater proportion of the older classes of immigrants (see page cii), there has been a much greater increase in females than in males, so that in these states the females represent a considerably larger proportion of the total population in 1900 than they did in 1890. In all the states comprising the North Atlantic section of the country, and in most of the states in the South Atlantic section, the males show a slightly increased proportion in 1900 as compared with 1890, these being the older states of the Union in which the conditions with respect to sex are much more nearly normal than in the other sections of the country. The distribution of the population of the several states and territories in 1890 and 1900 according to sex is expressed in percentages in table XXXIX.

TABLE XXXIX.—*Percentage of males and females of total population, by states and territories arranged geographically: 1890 and 1900.*

California	55.3	44.7	57.9	42.1
Alaska	72.1	27.9	60.1	39.9
Hawaii	69.1	30.9	65.2	34.8

For the entire area of enumeration in 1900 the males constitute 51.2 per cent and the females 48.8 per cent of the total population, or substantially the same proportions shown for the equivalent areas in 1890; but, as a matter of fact, there is a slightly larger proportion of females now than there was ten years ago, the percentage decimals if extended to the hundredths place showing for females 48.81 per cent in 1900 as compared with 48.76 per cent in 1890, and for males 51.18 in 1900 as against 51.23 in 1890.

In the North Atlantic and South Atlantic divisions, considered as a whole, there is an equal proportion of males and females in 1900, but at the census of 1890 there was, in each case, a slightly larger proportion of females. The largest proportion of females is found in the District of Columbia, where they constitute 52.6 per cent of the population in 1900 as compared with 52.4 per cent in 1890. Massachusetts has the next largest proportion of females, the same as ten years ago, the percentages being 51.3 in 1900 and 51.4 in 1890. Rhode Island comes next with 50.9 per cent of females, which is a considerably less proportion than in 1890, when it had practically the same proportion of females as Massachusetts. Females in Maryland, North Carolina, and South Carolina represent substantially the same proportion of the total population in 1900, or 50.4

per cent, while in New York the proportion is represented by 50.3, in Georgia by 50.2, and in Virginia and New Hampshire by 50.1. In Connecticut and New Jersey there is in 1900 substantially the same proportion of males as of females, although ten years ago females in Connecticut constituted 50.5 per cent of the total population. There is a slightly less proportion of females in 1900 as compared with 1890 in all the states named, with the exception of the District of Columbia, Georgia, and South Carolina, in which the percentages have increased during the decade from 52.4 to 52.6, from 49.9 to 50.2, and from 50.3 to 50.4, respectively.

In each of the 3 remaining divisions of states and territories the males represent a larger proportion of the total population than the females, and in the Western division the percentage in favor of the males is very large, or 56.2 for males as against 43.8 for females. In all the states and territories of this division the males constitute a large proportion of the total population, and this is particularly the case in Wyoming, Montana, and Nevada, where they represent 62.9, 61.6, and 60.5 per cent, respectively, of the entire population. Of the states and territories comprising the North Central division the largest proportions of males in 1900 are found in North and South Dakota and Minnesota, while of those in the South Central division Indian Territory and Oklahoma have the largest proportions.

There is a very large proportion of males in both Alaska and Hawaii in 1900, the percentage of males in the former territory being 72.1 and in the latter, 69.1.

The percentages for 1890 and 1900 may be compared with similar percentages for other census years, as follows:

CENSUS YEARS.	Total population considered.	Males.	Females.	PER CENT OF TOTAL POPULATION.	
				Males.	Females.
1900	76,303,387	39,059,242	37,244,145	51.2	48.8
1890	63,069,756	32,315,063	30,754,693	51.2	48.8
1880	50,155,783	25,518,820	24,636,963	50.9	49.1
1870	38,558,371	19,493,565	19,064,806	50.6	49.4
1860	31,443,321	16,085,204	15,358,117	51.2	48.8
1850	23,191,876	11,837,660	11,354,216	51.0	49.0

In this summary the population given for the census years prior to 1890 is exclusive of the areas specially enumerated in 1890, for which the corresponding figures at the earlier census periods are not available.

From the above summary it appears that at each census there has been a larger proportion of males than of females, and that, although a somewhat increased proportion was shown in 1860 as compared with 1850, it was reduced appreciably in 1870, arising principally from the great loss of life among the males due to the Civil War. At the census of 1880 this loss in the proportion had been made good in part, and at the last two censuses has again reached the proportion shown for 1860.

The females, under normal conditions of natural increase, are slightly in excess, but the immense number of immigrants who have come to this country, particularly since 1850, has affected conditions here materially. There have been to date over 19,000,000 immigrants, and, as fully three-fifths of all the immigrants are males, it has resulted in not only a large excess of males in the country at large but also in a very disproportionate distribution of the sexes among the several states and territories, the latter being affected also by the greater migration of native born males than of females between the different parts of the country.

The difference in favor of males at the present census is 1,815,097 as compared with an excess of males for the equivalent area in 1890 of 1,560,370. At the census of 1850 the males exceeded the females by 483,444, this excess of males constituting 2.1 per cent of the total population. The excess of males in 1860 amounted to 727,087, equivalent to 2.3 per cent of the total population, but this was reduced in 1870, for the reason already mentioned, to 428,759, or an excess equivalent to 1.1 per cent of the total population returned at that census. In 1880 there were 881,857 more males than females, representing 1.8 per cent of the total population, but in 1890 there was very nearly double the number of males in excess at the census of 1880, or an excess of 1,513,510 males for the same areas of enumeration as in 1880, and an excess of 1,560,370 males for the areas corresponding to those comprehended by the census of 1900. The excess of 1,815,097 males in 1900 is equivalent to 2.4 per cent of the entire population enumerated, and this percentage compared with the corresponding percentage (2.5) for 1890 shows, also, that the females have gained relatively with regard to the males since 1890.

For the United States in its entirety, the excess of males over females in 1900 is distributed by general nativity and color as follows:

GENERAL NATIVITY AND COLOR.	Total.	Males.	Females.	EXCESS OF MALES.	
				Number.	Per cent.
Aggregate	76,303,387	39,059,242	37,244,145	1,815,097	100.0
Native white — native parents.	41,053,417	20,934,099	20,119,318	814,781	44.9
Native white — foreign parents.	15,687,322	7,869,089	7,818,233	50,856	2.8
Foreign white	10,250,049	5,545,819	4,704,230	841,589	46.4
Negro	8,840,789	4,393,221	4,447,568	[1]54,347	[1]3.0
Chinese	119,050	111,054	7,996	103,058	5.7
Japanese	86,000	71,400	14,600	56,800	3.1
Indian	266,760	134,560	132,200	2,360	0.1

[1] Excess of females.

Of the 1,815,097 males in excess, the foreign whites number 841,589, or 46.4 per cent, and the native whites of native parentage 814,781, or 44.9 per cent,

these two elements combined representing more than nine-tenths of the entire excess. The only element of the population in which there is not a preponderance of males is that of persons of negro descent, which shows, for the entire country, an excess of 54,347 females.

The designation "native white—native parents," as used in this discussion, comprehends all native white persons having either both parents native born, one parent native born and one parent unknown, or both parents unknown, while the designation "native white—foreign parents" comprehends all native white persons having either one or both parents foreign born.

Considering the excess of males (or females) with reference to the proportion which it bears to the whole number of persons comprising each element of the population, the following percentages are obtained:

GENERAL NATIVITY AND COLOR.	Total number.	EXCESS OF MALES.	
		Number.	Per cent of total number.
Aggregate	76,303,387	1,815,097	2.4
Native white—native parents	41,053,417	814,781	2.0
Native white—foreign parents	15,687,322	50,856	0.3
Foreign white	10,250,049	841,589	8.2
Negro	8,840,789	[1]54,347	[1]0.6
Chinese	119,050	103,058	86.6
Japanese	86,000	56,800	66.0
Indian	266,760	2,360	0.9

[1] Excess of females.

This summary shows that the excess of males constitutes 2 per cent of all the native whites of native parentage, 8.2 per cent of all the foreign whites, 86.6 per cent of all the Chinese, and 66 per cent of all the Japanese, while for the other elements the excess of males (or females) is less than 1 per cent in each case.

The sexes are distributed very unevenly throughout the country, as indicated by table XL (page xcvi), which shows the excess of males (or females) in each state and territory, and also by the map on plate 11.

In all but 11 of the states and territories in 1900, as shown by table XL, the males exceed the females. The 11 states (including the District of Columbia) in which there is an excess of females are all situated on the Atlantic coast, the numerical excess of females in each case being as follows: New Hampshire, 830; Massachusetts, 70,398; Rhode Island, 7,524; New York, 39,334; New Jersey, 149; Maryland, 9,494; District of Columbia, 14,710; Virginia, 2,390; North Carolina, 16,456; South Carolina, 10,526; and Georgia, 9,929.

The largest numerical excess of females in 1900 is that for Massachusetts, where, out of a total population of 2,805,346, there are 70,398 more females than males. This excess of females in Massachusetts is common to each element of the population, with the exception of the Chinese, Japanese, and Indians, in which there is an excess of males. The next largest excess of females is found in New York, or an excess of 39,334 females in a total population in 1900 of 7,268,894. The excess in this state is confined to native whites of native and foreign parentage and to negroes, the foreign whites, Chinese, Japanese, and Indians showing in each case an excess of males. The excess of females in New Jersey is nominal only, being but 149 out of a total population of 1,883,669.

In the North Atlantic division there is an excess of males in 4 states only, namely, Maine, Vermont, Connecticut, and Pennsylvania. The total excess of males in these 4 states is 121,294, which is offset by an excess of 118,235 females in the other 5 states of this division, making a net excess of males for the division of 3,059. There is an excess of 106,967 males in Pennsylvania, out of a population for the state of 6,302,115, due principally to a large preponderance of foreign white males.

In the South Atlantic division the males exceed the females in 3 states only, making an aggregate excess of 65,215 males as against an excess of 63,505 females in the remainder of the division, or a net excess of males for the division of 1,710. There is a large excess of males in both West Virginia and Florida, distributed over the several elements of the population in each case.

In the states and territories comprising the 3 remaining divisions there is uniformly an excess of males over females, the total excess of males in each of these divisions being as follows: North Central, 845,640; South Central, 283,797; and Western, 504,115. In the North Central and Western divisions the excess of males is composed largely of native whites of native parentage and of foreign whites in very nearly equal proportions, but in the South Central division it is mainly composed of native whites of native parentage. In this division there is also an excess of females among persons of negro descent and among the Indians.

There is a large excess of males in Alaska and Hawaii, due, in the first case, to an excess principally of native white males of native parentage and of foreign white males, and in the latter largely to an excess of males among the Chinese and Japanese.

The excess of females in so many of the Atlantic states is due to the migration westward, as previously noted, of a large body of native population, comprising always a fair proportion of males. The effects of this migration would be more noticeable in many of these states if it were not that they have in turn received large accessions to their population from foreign immigration; and in some of the more important manufacturing states of this section the excess of females has been increased by the immigration of females, particularly from Canada, who have found employment as factory operatives and as domestic servants. The proportion of the sexes in the Central and Western states have, on the other hand, been disturbed by the constant introduction of considerable bodies of native immigrants to which has been added a large proportion of foreign male immigrants.

TABLE XL.—*Excess of males distributed by general nativity and color, by states and territories arranged geographically: 1900.*

[1] Includes persons in the military and naval service of the United States (including civilian employees, etc.) stationed abroad, not credited to any state or territory.

According to the figures contained in table XLI, the females have increased relatively to males since 1890, there being to each 100,000 males, for the country as a whole, 95,353 females in 1900 as compared with 95,171 females in 1890. The figures upon which these proportions are based include those for Alaska and Hawaii, but, excluding these two territories, the proportions are 95,558 females to each 100,000 males in 1900 as against 95,265 females in 1890.

The relative increase or decrease in the proportion of females to males in 1890 and 1900, as compared with the preceding census, is summarized by states and territories in table XLII.

TABLE XLII.—*Relative increase or decrease in females, by states and territories arranged geographically: 1880 to 1900.*

[1] Dakota territory.

The females have decreased relatively to males since 1890 in all the states comprising the North Atlantic division and in all but Georgia, South Carolina, and the District of Columbia in the South Atlantic division. There has been a relative decrease, also, of females in Ohio, Indiana, and North Dakota, in the North Central division; in Kentucky, Tennessee, Alabama, and Louisiana, in the South Central division; and in Arizona, in the Western division.

In the remaining states and territories there has been an increase in the relative proportions of females to males in 1900 as compared with 1890, particularly in the far Western states and territories and in Oklahoma.

GENERAL NATIVITY.

The native and foreign born population as reported at the censuses of 1880, 1890, and 1900, together with the increase in each element since 1890, is distributed by states and territories in table XLIII (page xcix), while the increase in the foreign born element from 1890 to 1900 is brought into comparison with similar figures for the preceding decade, by states and territories, in table XLIV (page c).

TABLE XLIII.—*Native and foreign born population, by states and territories arranged geographically, in 1880, 1890, and 1900, with increase since 1890.*

[1] Inclusive in 1900 of 15,368 foreign born persons in the military and naval service of the United States (including civilian employees, etc.) stationed abroad, not credited to any state or territory.
[2] Decrease.

The whole number of persons of native birth in 1900, as shown by table XLIII, is 65,843,302 as compared with a total in 1890 of 53,761,652, the figures in each case comprehending the entire area of enumeration in 1900. The foreign born, on the same basis, now number 10,460,085 as against a total for the same area in 1890 of 9,308,104.

The figures representing the native and foreign born elements in 1890 are made up as follows:

AREAS.	Native born.	Foreign born.
States and territories (general enumeration)	53,372,703	9,249,547
Alaska (specially enumerated)	15,381	16,671
Hawaii (census of December 28, 1890)	48,117	41,873
Indian Territory (specially enumerated)	180,169	13
Indian reservations (specially enumerated)	145,282	.....
Totals	53,761,652	9,308,104

All natives of Alaska born previous to its acquisition in 1867 were classed in 1890 as foreign born, but at the census of 1900 all natives of Alaska, irrespective of age, are classed as native born.

The number of native and foreign born in Hawaii in 1890 was determined from the Hawaiian census report for that year as follows: Native born—natives, 34,436; half-castes, 6,186; Hawaiian-born foreigners, 7,495; total, 48,117. Foreign born—Americans, 1,928; British, 1,344; Germans, 1,034; French, 70; Portuguese, 8,602; Norwegians, 227; Chinese, 15,301; Japanese, 12,360; Polynesians, 588; other nationalities, 419; total, 41,873.

The 325,464 Indians and other persons reported as living in Indian Territory and on Indian reservations in 1890 were not classified at that census according to whether they were native or foreign born, but as they were undoubtedly very nearly all of native birth, they have been considered, for the purposes of this discussion, to be native born, with the exception of 13 Chinese who are classed as foreign born.

Comparing the general results presented in table XLIII, there has been an increase during the decade in native born of 12,081,650, or 22.5 per cent, and in foreign born of 1,151,981, or 12.4 per cent. The population as a whole increased during the same period 21 per cent. The increase in foreign born since 1890 has been small as compared with the increase in the native element, and a glance at the figures presented in table XLIII for the several states and territories makes it apparent that, aside from the increases shown by a few of the North Central and Western states and territories, practically all the increase in the foreign born element is confined to the North Atlantic states. The full purport of this change in the distribution of this element of our population throughout the country is not seen until the results are compared with the conditions which prevailed during the preceding decade, as indicated by table XLIV.

Leaving out of consideration the foreign born in Alaska and Hawaii in 1890 and 1900, and those enumerated in 1900 at military and naval stations abroad, and

therefore not credited to any state or territory, there remains a total of 10,341,276 foreign born persons in 1900 as compared with 9,249,560 in 1890 and 6,679,943 in 1880. The distribution of the foreign born element by geographical divisions at the last three census periods was as follows:

GEOGRAPHICAL DIVISIONS.	1900	1890	1880	INCREASE FROM 1890 TO 1900.		INCREASE FROM 1880 TO 1890.	
				Number.	Per cent.	Number.	Per cent.
The United States	10,341,276	9,249,560	6,679,943	1,091,716	11.8	2,569,617	38.5
North Atlantic division	4,762,796	3,888,177	2,814,520	874,619	22.5	1,073,657	38.1
South Atlantic division	216,030	208,525	174,258	7,505	3.6	34,267	19.7
North Central division	4,158,474	4,060,114	2,916,829	98,360	2.4	1,143,285	39.2
South Central division	357,655	321,834	274,274	35,821	11.1	47,560	17.3
Western division	846,321	770,910	500,062	75,411	9.8	270,848	54.2

According to this summary, the foreign born element in the United States proper has increased during the last ten years only 1,091,716, or 11.8 per cent, as against an increase from 1880 to 1890 of 2,569,617, or 38.5 per cent.

The proportional loss in the increase of the foreign born is even more apparent when the results for the several geographical divisions during the past two decades are compared. The figures of increase for the last ten years show that the North Atlantic division is the only section of the country in which the foreign born have the same proportional increase as the native element of the population, the percentages of increase in this division during the decade being 22.5 for the foreign born and 20.5 for the native born. There was an increase, however, in the foreign born in this division from 1880 to 1890 of 38.1 per cent, showing that in this division also there has been, relatively, a considerable falling off in the persons of foreign birth.

Of the whole number of foreign born in the United States proper in 1890, considerably more than two-fifths were found in the North Central division, the foreign born in this division having increased from 2,916,829 in 1880 to 4,060,114 in 1890, representing an increase in ten years of 1,143,285, or 39.2 per cent. There has been an increase in foreign born during the last ten years in this division of only 98,360, or 2.4 per cent, and if the increase for this division is considered by states (see table XLIV) it is seen that there has been an increase in 3 states only, namely, Illinois, 124,400; Minnesota, 37,962; and North Dakota, 31,630. The total increase of the foreign born in these 3 states since 1890 amounts to 193,992, against which there was a decrease in foreign born in the remaining states of this division of 95,632, making the net increase for the division as a whole 98,360.

There has been an increase of not quite 10 per cent in persons of foreign birth in the Western division during the past ten years as against an increase of more than 50 per cent during the preceding decade. In 1880 there were practically half a million (500,062) foreign born persons in this division, and this had been increased in 1890 to 770,910, representing an increase in ten years of 270,848, or 54.2 per cent. During the past ten years, however, there has been an increase in foreign born in this division of only 75,411, equivalent to 9.8 per cent, making a total for 1900 of 846,321. With the exception of Nevada, which has decreased in both native and foreign born, there has been a gain since 1890 in foreign born in each state and territory comprising the Western division, but the proportional increases for Utah and California are nominal only, being 1.3 per cent for the former and three-tenths of 1 per cent for the latter. The largest numerical increases in the foreign born in this division during the past ten years are 23,971 for Montana, equivalent to an increase of 55.6 per cent, and 21,359 for Washington, equivalent to an increase of 23.7 per cent.

In the South Atlantic division the foreign born increased 7,505, or 3.6 per cent, from 1890 to 1900 as against an increase from 1880 to 1890 of 34,267, or 19.7 per cent. In Maryland and South Carolina there has been a positive loss in foreign born since 1890, the loss in Maryland representing 362 persons as compared with an increase for the preceding decade of 11,490. There was also an increase in foreign born in Florida from 1880 to 1890 of 13,023, but during the past ten years this element in that state has been increased by 900 only, making the foreign born now number 23,832 as against 22,932 in 1890.

In the South Central division the foreign born have increased 11.1 per cent since 1890 as compared with an increase during the preceding ten years of 17.3 per cent. There has been a large numerical increase in the foreign born during the last ten years in Texas and Oklahoma, and a considerable decline in their number in Kentucky and Tennessee during the same period. The foreign born in Texas now number 179,357 as against 152,956 in 1890, and those in Oklahoma 15,680 as against 2,740 ten years ago, the latter having been made a territory in May, 1890, just prior to the census enumeration.

The concentration in the northeasterly states of the increase in the foreign born during the last decade is

emphasized when its distribution by geographical divisions is expressed in percentages, as follows:

GEOGRAPHICAL DIVISIONS.	1890 to 1900	1880 to 1890
	Per cent.	*Per cent.*
The United States	100.0	100.0
North Atlantic division	80.1	41.8
South Atlantic division	0.7	1.3
North Central division	9.0	44.5
South Central division	3.3	1.9
Western division	6.9	10.5

From this table of percentages it appears that of the total increase in foreign born from 1880 to 1890, 44.5 per cent was in the North Central division and 41.8 per cent in the North Atlantic division, whereas for the decade ending in 1900 only 9 per cent of the increase in the foreign born is found to be in the North Central division as compared with 80.1 per cent in the North Atlantic division. This concentration in the latter division of four-fifths of the increase in the foreign born element since 1890 is due to a very decided change in the character of the immigration in recent years, a change which began to be apparent at the census of 1890, but which has progressed since at a very rapid rate, as shown by table XLV, in which the immigration figures from 1821 to the present time are summarized.

TABLE XLV.—*Number of immigrants to the United States: 1821 to 1900.*

COUNTRIES.	NUMBER OF IMMIGRANTS.						
	Total.	1891-1900	1881-1890	1871-1880	1861-1870	1851-1860	1821-1850

[1] Estimated for year ending June 30, 1899.

Table XLV shows, first of all, that even up to 1890 the natives of Germany, Ireland, Great Britain, Canada and Newfoundland, Norway, Sweden, and Denmark practically dominated the immigration to this country, these five classes combined having contributed very nearly 13,000,000 (12,853,828) out of a total of 15,427,657 immigrants to June 30, 1890. From 1891 to 1900, however, they have contributed out of a total of 3,687,564 immigrants only 1,539,926, or a little more than two-fifths as against three-fourths for the ten-year

period ending in 1890, more than four-fifths for that ending in 1880, and fully nine-tenths for those ending in 1870 and 1860, respectively.

It also shows that this decline in the proportion represented by the heretofore dominant factors of our immigration has been in part offset by a very material increase during the past ten years in the proportion of immigrants arriving from Austria-Hungary (including Bohemia), Italy, Russia, and what was formerly Poland, countries from which, prior to 1880, no considerable amount of immigration had been received. Since 1880 they have come into the country very rapidly, so that, although they constituted only about 1 per cent of all the immigrants during the ten years ending in 1870 and only 6.4 per cent of those who arrived during the decennial period ending in 1880, they represented more than one-sixth of the total number of immigrants from 1881 to 1890 and fully one-half of all from 1891 to 1900. In fact, for the decade just closed, each of these three classes of immigrants constitutes a larger proportion of all the immigrants than is shown for any of the countries from which the bulk of the immigration formerly came. Germany, which contributed more than one-third of all the immigrants for the ten-year periods ending in 1860 and 1870 and more than one-fourth of all the arrivals during the next two periods, has furnished barely one-seventh of the immigrants during the past ten years, while Ireland, which contributed more than two-fifths of all the immigrants from 1821 to 1850, more than one-third of those from 1851 to 1860, and very nearly one-fifth of those from 1861 to 1870, has furnished but a little more than one-tenth of the total number for the decade ending in 1900. Besides the change in the character of the more recent immigration, there has been a considerable diminution in the number of immigrants to this country since 1890, and, furthermore, of the whole number of immigrants who came during the decade very nearly one-third were not present when the census was taken in June, 1900. That is to say, there were 3,687,564 immigrants from 1891 to 1900 as against a total of 5,246,613 from 1881 to 1890, and of those who came during the last ten years only 2,608,798[1], or 70.8 per cent, were living in the United States at the time of the census enumeration. These two reasons will account mainly for the large proportion of the increase in the foreign born shown since 1890 for the Northeastern states as compared with the relatively small increases shown for the other sections of the country, sections in which the decline in the older foreign elements has not been offset to any great extent by the introduction of the newer classes of immigrants.

Since 1850 the population has been classified according to the number of native and of foreign birth, and the statistics relating to these two elements for each census from 1850 to 1900, inclusive, are summarized for the entire country as follows:

CENSUS YEARS.	Total population considered.	Native born.	Foreign born.	PER CENT OF TOTAL POPULATION.	
				Native born.	Foreign born.
1900	76,303,387	65,843,302	10,460,085	86.3	13.7
1890	63,069,756	53,761,652	9,308,104	85.2	14.8
1880	50,155,783	43,475,840	6,679,943	86.7	13.3
1870	38,558,371	32,991,142	5,567,229	85.6	14.4
1860	31,443,321	27,304,624	4,138,697	86.8	13.2
1850	23,191,876	20,947,274	2,244,602	90.3	9.7

Of the entire population in 1900, as shown by the above summary, the native born constitute 86.3 per cent and the foreign born 13.7 per cent. This is not so large a proportion of foreign born as in 1890, when this element constituted 14.8 per cent of the total population, nor so large as in 1870, when it constituted 14.4 per cent. The proportion for 1870, which is very much larger than that reported for either 1860 or 1880, is based, however, upon incomplete data, owing to the deficiency in the enumeration of the population of the Southern states, where it is largely of native birth.

The varying percentages of foreign born in the several states and territories in 1890 and 1900 are given in table XLVI.

TABLE XLVI.—*Percentage of native and foreign born of total population, by states and territories arranged geographically: 1890 and 1900.*

Indian Territory	98.8	1.2	100.0	.....
Oklahoma	96.1	3.9	96.5	3.5
Arkansas	98.9	1.1	98.7	1.3
Western division	79.3	20.7	75.2	24.8
Montana	72.4	27.6	69.8	30.2
Wyoming	81.2	18.8	76.2	23.8
Colorado	83.1	16.9	79.7	20.3
New Mexico	93.0	7.0	93.0	7.0
Arizona	80.3	19.7	78.7	21.3
Utah	80.6	19.4	74.8	25.2
Nevada	76.2	23.8	68.9	31.1
Idaho	84.8	15.2	80.3	19.7
Washington	78.5	21.5	74.8	25.2
Oregon	84.1	15.9	82.0	18.0
California	75.3	24.7	69.8	30.2
Alaska	80.1	19.9	48.0	52.0
Hawaii	41.1	58.9	53.5	46.5

In the United States proper the largest proportion of foreign born is found in North Dakota, this element constituting 35.4 per cent of the entire population of that state in 1900 as compared with 42.7 per cent in 1890, the total population at the latter census including Indians and other persons specially enumerated. The next largest percentages of foreign born in 1900 are 31.4 for Rhode Island, 30.2 for Massachusetts, 28.9 for Minnesota, 27.6 for Montana, 26.2 for Connecticut, and 26.1 for New York. These are all the states that have, approximately, one-fourth at least of their population of foreign birth; but there are, also, 9 other states which have between 20 and 25 per cent of foreign born, namely, Wisconsin, California, Nevada, New Jersey, Michigan, South Dakota, Washington, New Hampshire, and Illinois.

The other extreme is found in the South, where the proportions of foreign born vary from two-tenths of 1 per cent in North Carolina to 7.9 per cent in Maryland, but very nearly all the states in this section have considerably less than 5 per cent of foreign born within their borders.

In Hawaii there is a very large foreign element, representing very nearly three-fifths (58.9 per cent) of the total population in 1900; but in Alaska not quite one-fifth (19.9 per cent) of the population in 1900 is of foreign birth.

There is a very great difference in the proportions of foreign born in 1900 in the several geographical divisions of the country, and this has been the case at each census since and including 1850, as shown by the following summary, in which the foreign element in the United States proper at each census is distributed according to the proportion in each of these five divisions:

GEOGRAPHICAL DIVISIONS.	1900	1890	1880	1870	1860	1850
	Per cent.	*Per cent.*	*Per cent.*	*Per cent.*	*Per cent.*	*Per cent.*
The United States	100.0	100.0	100.0	100.0	100.0	100.0
North Atlantic division	46.0	42.0	42.1	45.3	48.9	59.0
South Atlantic division	2.1	2.3	2.6	3.0	3.9	4.7
North Central division	40.2	43.9	43.7	41.9	37.3	29.0
South Central division	3.5	3.5	4.1	4.2	5.6	6.1
Western division	8.2	8.3	7.5	5.6	4.3	1.2

The foreign born element at each census has been largely concentrated in the North Atlantic and North Central divisions, as shown by the above summary, and while much the larger proportion at the earlier censuses was contained in the North Atlantic division, the proportions in these two divisions were very nearly equal in 1880 and 1890. Since 1890 the proportion in the North Central division has fallen off somewhat, and it now contains only 40.2 per cent of the foreign born as compared with 46 per cent in the North Atlantic division. The proportion of foreign born in the Southern states has always been small, and in 1900 the two Southern divisions combined contain only a little more than 5 per cent of the entire foreign element.

As shown by table XLVI, North Dakota has (aside from Hawaii) the largest proportion of foreign born, considered with respect to its total population, but the largest foreign born population in 1900, numerically considered, is found in New York, which contains 1,900,425 foreign born persons, or very nearly twice as many as there are in either Pennsylvania or Illinois. The distribution of the total foreign born element on this basis is

illustrated graphically by the diagram on plate 12, the states and territories being arranged according to the number of foreign born contained in them, as follows:

STATES AND TERRITORIES.	Total foreign born in 1900.	STATES AND TERRITORIES.	Total foreign born in 1900.
The United States	[1]10,460,085	New Hampshire	88,107

California	32,853	43,243
Alaska	24,859	108,387
Hawaii	143,592	87,023

At the census of 1890 there were, according to table XLVII, 17,314 foreign born to each 100,000 native born, but this proportion has been reduced in 1900 to 15,886. These figures apply to the entire area of enumeration in 1900, but, if Alaska and Hawaii are excluded, the relative proportions are 15,757 in 1900 and 17,225 in 1890. There has been a relative increase in the proportion of foreign born in all the New England states, except Vermont, and also in New Jersey, North Carolina, Oklahoma, and Hawaii. In all the other states and territories the proportion has decreased since 1890, as shown by table XLVIII, in which the relative increase or decrease in the proportion of foreign born from 1890 to 1900 is brought into comparison, by states and territories, with similar results for the decade from 1880 to 1890.

Washington		6,301	7,038	
Oregon		3,107	868	
California		10,390		7,975
Alaska		83,528		
Hawaii	56,569			

There has been a relative decrease in foreign born in every state and territory comprising the North Central and Western divisions, and this decrease is especially noticeable in Michigan, Wisconsin, Minnesota, North Dakota, and South Dakota, in the North Central division, and in Wyoming, Utah, Nevada, and California, in the Western division.

The large decrease in the proportion of foreign to native born in Alaska since 1890 is due to the inclusion as foreign born in 1890 of all natives born prior to 1867, as previously explained.

The principal cities of the country, including in this designation all cities having upward of 25,000 inhabitants in 1900, contain, when taken collectively, a population (see table XIX, page lxiii) of 19,757,618, comprising 14,609,902 native born and 5,147,716 foreign born persons. The remainder of the country, after excluding the cities, has a population of 56,545,769, made up of 51,233,400 native born and 5,312,369 foreign born persons. The 161 principal cities contain, therefore, more than one-fourth, or 25.9 per cent, of the total population in 1900, and very nearly one-half, or 49.2 per cent, of all the foreign born.

These figures show that the foreign born are largely concentrated in cities, but this concentration is more clearly expressed by the proportion which this element in the cities bears to their combined population as compared with the proportion which the foreign born in the remainder of the country bears to its total population, namely, 26.1 per cent for the cities as against only 9.4 per cent for the remainder of the country; or, in other words, the proportion of foreign born in the principal cities is very nearly three times the proportion found in the remainder of the country outside of these cities.

The extent to which the several states and territories are affected by this concentration of the foreign born element in cities is shown very clearly by table XLIX.

TABLE XLIX.—*Proportion of foreign born in the principal cities as compared with the remainder of the country, by states and territories arranged geographically: 1900.*

STATES AND TERRITORIES.	Number of principal cities.	TOTAL POPULATION.		TOTAL FOREIGN BORN.		PER CENT OF TOTAL POPULATION.		PER CENT OF TOTAL FOREIGN BORN.		PER CENT OF FOREIGN BORN OF TOTAL POPULATION.	
		In principal cities.	In remainder of country.	In principal cities.	In remainder of country.	In principal cities.	In remainder of country.	In principal cities.	In remainder of country.	Of principal cities.	Of remainder of country.

[1] Includes persons in the military and naval service of the United States (including civilian employees, etc.) stationed abroad, not credited to any state or territory.

The North Atlantic division contains 70 of the principal cities in 1900, and the combined population of these cities constitutes 48 per cent of the entire population of the division, while their foreign born population represents 64.7 per cent of all the foreign born in the division. The proportion of foreign born to total population in the cities of this division is very large, being 30.5 per cent, or practically twice the proportion (15.4 per cent) shown for the remainder of the division.

The 12 principal cities in the state of New York contain more than three-fifths of the total population of the state and fully four-fifths of its foreign born population. The principal cities in Massachusetts and Rhode Island represent very nearly as large a proportion of the total population, or 58.4 per cent and 56.7 per cent, respectively; but the cities in Massachusetts contain only two-thirds of its foreign element, while those in Rhode Island contain only three-fifths of all the foreign born in that state. New Hampshire, of all the states in this division, has the largest proportion of foreign born to total population in its principal cities, or 42.6 per cent as compared with 34.6 per cent for Massachusetts, 34.1 per cent for New York, and 33.5 per cent for Rhode Island.

The North Central division has the next largest number of principal cities in 1900, but their population, taken collectively, constitutes only 23.2 per cent of the population of the division, or less than one-half the proportion shown for the cities in the North Atlantic division. These cities also contain a very much smaller proportion of the entire foreign born element in the division as compared with the cities in the North Atlantic division, or 37.2 per cent for the cities in the North Central division as against 64.7 per cent for those in the North Atlantic division. The foreign born population of the cities in this division constitutes 25.4 per cent of their total population, while in the remainder of the division the foreign born represent only 12.9 per cent of the total population.

Very nearly two-thirds of all the foreign born in Illinois and Missouri, and considerably more than one-half of all in Ohio, are found in the principal cities, but in the other states of this division much the larger proportion of the foreign born is found in that part of the state outside of the larger cities. More than three-tenths of the population of the principal cities in Illinois, Michigan, Wisconsin, and Minnesota is of foreign birth, but in Minnesota the proportion of foreign born to total population in the principal cities is not much larger than that shown for the remainder of the state, or 30.8 per cent for the cities as against 28.3 per cent for the remainder of the state.

The principal cities of the South Atlantic division, although representing but one-eighth (12.5 per cent) of the total population of the division, contain considerably more than one-half of all the foreign born, but this is due principally to the very large proportion shown for Delaware, Maryland, and the District of Columbia. The proportion of foreign born to the total population of the principal cities is not large in any case, being for the division as a whole only 9.2 per cent as compared with 1.1 per cent for the remainder of the division.

The 18 principal cities of the South Central division contain but one-twelfth of the total population and not quite three-tenths of all the foreign born in the division, these proportions being much less than those shown for the South Atlantic division. The two divisions differ but little, however, with respect to the proportion of foreign born to total population, the percentages for the South Central division being 8.8 for the principal cities and 2 for the division exclusive of the cities.

In the Western division substantially one-fourth of its total population and one-third of its foreign born element are found in the 12 principal cities of the division, but 5 of the 11 states and territories comprising this division contain no city with a population of 25,000 or more. The foreign born in the cities constitute, for the division as a whole, 27.2 per cent of their total population, while the same element in the remainder of the division constitutes 18.5 per cent of the entire population outside of the cities.

There were 124 cities which had upward of 25,000 inhabitants in 1890, and these cities had a combined population of 13,989,568, or 22.2 per cent of the entire population at that census. The total foreign born population of these cities then was 4,081,927, or 43.9 per cent of all the foreign born enumerated in 1890. The foreign born element in the principal cities in 1890 constituted 29.2 per cent of the combined population of these cities, while the foreign born in the remainder of the country constituted 10.6 per cent of the entire population living outside of the principal cities. These percentages show, when compared with similar percentages for 1900, that there is a larger proportion of the total population and also of the entire foreign born element in the principal cities of the country now than there was ten years ago, but that the proportion of foreign born to total population is less, both in the principal cities and in the remainder of the country, as well; and this is due to the decrease in the proportion of foreign born since 1890, with few exceptions, throughout the country.

The number and proportion of native and foreign born persons in each of the 161 principal cities in 1900 are presented in table L, in conjunction with a similar statement for each state or territory containing one or more of these cities.

TABLE L.—*Native and foreign born population of the principal cities and of the states or territories in which they are situated: 1900.*

In 9 of the 161 principal cities in 1900 the foreign born constitute more than 40 per cent of the total population, namely, Fall River, Holyoke, Lawrence, Lowell, and New Bedford, in Massachusetts; Manchester, in New Hampshire; Passaic, in New Jersey; Woonsocket, in Rhode Island; and Honolulu, in Hawaii. Of these cities, Fall River has the largest proportion, or 47.7 per cent, and Passaic has the next largest, or 46.4 per cent.

Of the 6 great cities of the country, New York has the largest proportion of foreign born, or 37 per cent. Boston, with 35.1 per cent, is second; Chicago, with 34.6 per cent, is third; Philadelphia, with 22.8 per cent, is fourth; St. Louis, with 19.4 per cent, is fifth; and Baltimore, with 13.5 per cent, is sixth.

There are 86 cities, or more than one-half of all the cities, in which the foreign born constitute at least one-fifth of the total population, and in 24 of these cities this element constitutes more than one-third of their population.

COLOR.

A detailed presentation of the white and negro population at the last three census periods is made by states and territories in table 12 (page 486) of the general tables, while similar presentations follow immediately thereafter for the Chinese and Japanese population in table 13, for the Indian population in table 14, and for the native and foreign white population in table 15.

From these tables it appears that the population of the entire area of enumeration in 1900 is composed of 66,990,788 white persons and 9,312,599 colored persons, the latter figure comprising 8,840,789 persons of negro descent, 119,050 Chinese, 86,000 Japanese, and 266,760 Indians, representing in the aggregate 76,303,387 persons. The 63,069,756 persons reported for the equivalent area in 1890 comprised 55,166,184 white persons, 7,488,788 persons of negro descent, 126,778 Chinese, 14,399 Japanese, and 273,607 Indians, made up as follows:

AREAS.	Total white.	NATIVE WHITE.		Foreign white.	COLORED.				
		Native parents.	Foreign parents.		Total.	Negro.[1]	Chinese.	Japanese.	Indian.
States and territories (general enumeration)	54,983,890	34,358,348	11,503,675	9,121,867	7,638,360	7,470,040	107,475	2,039	58,806
Alaska (specially enumerated)	4,298	[2]4,298	.....	.....	27,754	[3]112	[4]2,288	.....	25,354
Hawaii (census of December 28, 1890)	60,628	[5]34,436	[6]11,980	[7]14,212	29,362	.....	[8]17,002	12,360	.....
Indian Territory (specially enumerated)	[9]110,254	[2]110,254	.....	.....	69,928	18,636	13	.....	51,279
Indian reservations (specially enumerated)	7,114	[2]7,114	.....	.....	138,168	.....	.....	.....	138,168
Totals	55,166,184	34,514,450	11,515,655	9,136,079	7,903,572	7,488,788	126,778	14,399	273,607

[1] Includes all persons of negro descent.
[2] Called native whites of native parentage.
[3] Negroes, mulattoes, Hawaiians, Malays, and Portuguese mulattoes from the Cape Verde islands.
[4] Given in 1890 report as Mongolians; chiefly Chinese, with a few Japanese.
[5] Natives.
[6] Comprises 5,794 Hawaiian-born, both parents being foreigners, and 6,186 half-castes.
[7] Comprises 1,928 Americans, 1,344 British, 1,034 Germans, 70 French, 8,602 Portuguese, 227 Norwegians, 588 Polynesians, and 419 persons of other nationalities.
[8] Includes 1,701 Hawaiian-born Mongolians, very nearly all of whom are probably Chinese.
[9] Includes 861 persons not classified by color.

In 1890 the census act required that persons of negro descent should be classified according to the number of negroes, mulattoes, quadroons, and octoroons, but the figures obtained by the census enumerators were, as stated in the report for 1890,[1] of little value, and as an indication of the extent to which the races have mingled were misleading. No provision was made by the census act for a similar subdivision of persons of negro descent in 1900, and accordingly there was no effort made to so classify them at the present census.

[1] Report on Population, Census of 1890, Part I, page xciii.

WHITE AND NEGRO POPULATION.

The white and negro population as returned in 1880, 1890, and 1900, together with the increase in each element since 1890, is shown by states and territories in table LI.

TABLE LI.—*White and negro population, by states and territories arranged geographically, in 1880, 1890, and 1900, with increase since 1890.*

[1] Includes all persons of negro descent.
[2] Includes persons in the military and naval service of the United States (including civilian employees, etc.) stationed abroad, not credited to any state or territory.
[3] Decrease.
[4] Includes 861 persons not classified by color.
[5] Negroes, mulattoes, Hawaiians, Malays, and Portuguese mulattoes from the Cape Verde islands.

The whole number of persons of negro descent in 1890 was 7,488,788 as against a total in 1900, for the entire area of enumeration, of 8,840,789. This is an increase during the decade of 1,352,001, or 18.1 per cent. The whites have increased during the same period 11,824,604, or 21.4 per cent.

These figures show that persons of negro descent have not increased since 1890 relatively as fast as the whites, when the entire area of enumeration in 1900 is considered. If an examination is made of the relative increases of these two elements in the South Atlantic and South Central divisions, in which nearly nine-tenths of all the persons of negro descent are found, the same conditions are apparent. In the South Atlantic division there has been an increase in the white population since 1890 of 19.9 per cent as compared with an increase in the negro population of 14.3 per cent, while in the South Central division the whites have increased during the same period 29.1 per cent and the negro element 19.9 per cent. If the comparison in these two divisions is extended to the several elements of the white population, it is seen that among the foreign whites there has not been so rapid a rate of increase as among persons of negro descent, but that among the native whites, both of native and foreign parentage, the relative increase during the decade has been much greater. The percentages of increase in each element since 1890 in each of these two divisions are as follows:

SOUTH ATLANTIC DIVISION.—Native whites of native parentage, 20.5; native whites of foreign parentage, 20.9; foreign whites, 3.2; persons of negro descent, 14.3.

SOUTH CENTRAL DIVISION.—Native whites of native parentage, 29.2; native whites of foreign parentage, 39.5; foreign whites, 11; persons of negro descent, 19.9.

The combined population of these two divisions in 1900 represents a total of 24,523,527 persons, of whom the native whites of native parentage constitute 14,862,032, or 60.6 per cent, and persons of negro descent 7,922,969, or 32.3 per cent, leaving only 1,738,526, or 7.1 per cent, for the remaining elements of the population, as shown by the following summary:

GENERAL NATIVITY AND COLOR.	SOUTH ATLANTIC DIVISION.		SOUTH CENTRAL DIVISION.		TWO DIVISIONS COMBINED.	
	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.

Other colored[1]	8,405	0.1	70,183	0.5	78,588	0.3

[1] Principally Indians, with a few Chinese and Japanese.

The increase in persons of negro descent should be compared more properly, therefore, with that for native whites of native parentage, and this is done for the states and territories comprising these two divisions in table LII.

TABLE LII.—*Increase in native white persons of native parentage and in persons of negro descent, for the South Atlantic and South Central divisions, by states and territories: 1890 to 1900.*

Indian Territory	287,647	110,254	36,853	18,636	177,393	160.9	18,217	97.7
Oklahoma	313,905	55,028	18,831	2,973	258,877	470.4	15,858	533.4
Arkansas	897,668	780,950	366,856	309,117	116,718	14.9	57,739	18.7

As shown by table LII, there has been an increase in native white persons of native parentage since 1890, for the entire area of enumeration in 1900, of 18.9 per cent as against an increase of 18.1 per cent for persons of negro descent. In the South Atlantic division as a whole, native white persons of native parentage have increased during the past ten years 20.5 per cent and persons of negro descent 14.3 per cent. The latter element has increased at a more rapid rate than the first named element in West Virginia and Florida and at substantially the same rate in Delaware, but in the remainder of this division the native white persons of native parentage show the larger percentages of increase. In West Virginia there has been an increase since 1890 of 33.1 per cent in the negro element as against an increase of 25.9 per cent in the native whites of native parentage, while in Florida the percentages of increase are 38.8 for the former and 33 for the latter. In Delaware and Georgia the two elements have increased at very nearly the same rate, but in the remaining states and in the District of Columbia the percentages of increase are largely in favor of the white element of native parentage.

In the South Central division the native white persons of native parentage have increased 29.2 per cent and persons of negro descent 19.9 per cent, when the division is considered in its entirety, but in Alabama, Mississippi, Oklahoma, and Arkansas the percentages of increase for the negro element are slightly larger than those for the native whites of native parentage, or 21.9 as against 20.1 for Alabama, 22.2 as against 18 for Mississippi, 18.7 as against 14.9 for Arkansas, and 533.4 as against 470.4 for Oklahoma. The native white element of native parentage has increased since 1890 relatively three times as fast as the negro element in Kentucky, more than twice as fast in Louisiana, and not quite one and one-half times as fast in Texas.

As a result of the changes which have taken place since 1890 in the relative growth in these two principal elements of the population, persons of negro descent constitute a slightly smaller percentage of the total population in 1900 as compared with 1890, as shown in detail by states and territories in table LIII.

TABLE LIII.—*Percentage of white, colored, and negro of total population, by states and territories arranged geographically: 1890 and 1900.*

Of the entire population returned in 1900, the white element constitutes 87.8 per cent and the colored element 12.2 per cent, the negro element by itself constituting 11.6 per cent. Ten years ago the negro element repre-

sented a slightly larger proportion of the population, or 11.9 per cent. In the two divisions comprising the Southern states and territories, considered as a whole, persons of negro descent now constitute a somewhat smaller proportion of the total population than in 1890, but in certain of these states and territories in which this element has increased during the decade at a more rapid rate than the whites, they constitute a slightly larger percentage of the population in 1900 than they did in 1890, namely, West Virginia and Florida, in the South Atlantic division, and Alabama, Mississippi, Oklahoma, and Arkansas, in the South Central division.

In South Carolina and Mississippi the negro element predominates, there being in 1900 in South Carolina 782,321 persons of negro descent and 557,807 white persons, and in Mississippi 907,630 of the former and 641,200 of the latter element. The negro element constitutes 58.4 per cent of the entire population of South Carolina in 1900 as against 59.8 per cent in 1890, and 58.5 per cent of that of Mississippi in 1900 as against 57.6 per cent in 1890. Ten years ago the negroes were in the majority in Louisiana, when they represented a little more than one-half of the population, but at the present census they number 650,804 and constitute only 47.1 per cent of the population of that state. There are now 729,612 white persons in Louisiana and they constitute 52.8 per cent of the whole population as against 49.9 per cent in 1890.

The negro race may be said to have represented, in effect, a steadily decreasing proportion of the total population since the first census was taken in 1790, the only real exception being in 1810, when the proportion was slightly larger than that shown for 1800, owing to large accessions of slaves prior to 1808, when the slave trade ceased by constitutional prohibition. There was an apparent increase in their proportion in 1880, but this was due to the small proportion revealed by the census of 1870, at which the enumeration of the negro element in the South was particularly deficient. The following summary shows the number of whites and negroes reported at each census from 1790 to the present time, and in each case the proportion which each element bore to the total population:

CENSUS YEARS.	Total population considered.	White.	Negro.[1]	PER CENT OF TOTAL POPULATION.	
				White.	Negro.[1]
1900	76,303,387	66,990,788	8,840,789	87.8	11.6
1890	63,069,756	55,166,184	7,488,788	87.5	11.9
1880	50,155,783	43,403,400	6,580,793	86.5	13.1
1870	38,558,371	33,589,377	4,880,009	87.1	12.7
1860	31,443,321	26,922,537	4,441,830	85.6	14.1
1850	23,191,876	19,553,068	3,638,808	84.3	15.7
1840	17,069,453	14,195,805	2,873,648	83.2	16.8
1830	12,866,020	10,537,378	2,328,642	81.9	18.1
1820	9,638,453	7,866,797	1,771,656	81.6	18.4
1810	7,239,881	5,862,073	1,377,808	81.0	19.0
1800	5,308,483	4,306,446	1,002,037	81.1	18.9
1790	3,929,214	3,172,006	757,208	80.7	19.3

[1] Includes all persons of negro descent.

The population was classified at the censuses from 1790 to 1850, inclusive, as white, free colored (negro), and slave only, but at each census since 1850 there has been included in the population, besides the white and negro elements, a small number of Chinese, Japanese, and Indians. This insignificant proportion of the total population is not considered in the above summary, and so the number and percentage of whites and negroes given for 1860, 1870, 1880, 1890, and 1900 do not represent the entire population reported for those census periods.

From this summary it is seen that the negro element constituted in 1790 very nearly one-fifth of the population of the country, but that this proportion, with the exceptions noted, has steadily diminished until it now represents barely one-ninth of the total population.

The largest proportions of negroes to total population in 1900 (see table LIII) are shown for Mississippi, South Carolina, Louisiana, and Georgia, in the order named; but considered with respect to the absolute number of negroes in the several states and territories in 1900, Georgia has the largest negro population, or 1,034,813, this total exceeding by more than 100,000 that of Mississippi, which stands second in this respect. This is illustrated graphically by the diagram on plate 13, the states and territories being arranged according to their respective numbers of persons of negro descent, as follows:

STATES AND TERRITORIES.	Persons of negro descent in 1900.	STATES AND TERRITORIES.	Persons of negro descent in 1900.

[1] Includes all persons of negro descent.
[2] Includes persons in the military and naval service of the United States (including civilian employees, etc.) stationed abroad, not credited to any state or territory.

For the entire area of enumeration in 1900 there are 13,197 negroes to each 100,000 whites as compared with 13,575 in 1890. The North Atlantic division is the only one of the five grand divisions which shows a larger proportion of negroes relatively to the whites in 1900 as compared with ten years ago, but in this division the relative proportion is small at each census, or 1,866 in 1900 and 1,576 in 1890.

In the South Atlantic division there are 55,607 negroes to each 100,000 whites in 1900 as against 58,344 in 1890, and in the South Central division 42,726 in 1900 as against 46,017 in 1890.

The largest proportions of negroes to whites in 1900 are found in Mississippi and South Carolina, or a little more than 140,000 negroes to each 100,000 whites in each case. The relative proportion has fallen in South Carolina from 149,117 in 1890 to 140,249 in 1900, but in Mississippi it has increased in ten years from 136,287 to 141,552, this being the largest proportion shown by any state or territory in 1900. In Louisiana there were ten years ago 100,143 negroes to each 100,000 whites, but the census of 1900 shows a decrease in the relative proportion to 89,199. Alabama has increased its relative proportion in ten years from 81,381 to 82,636, and there has been a similar increase from 73,875 to 77,600 in Florida, from 37,755 to 38,838 in Arkansas, from 4,772 to 5,124 in Oklahoma, and from 4,478 to 4,753 in West Virginia.

The relative increase or decrease of negro population since 1890 is compared with similar figures for the preceding decade, by states and territories, in table LV.

TABLE LV.—*Relative increase or decrease in negroes, by states and territories arranged geographically: 1880 to 1900.*

[1] Dakota territory.

Table LV shows that in 6 of the Southern states the proportion of negroes to whites has increased since 1890, the largest relative increase being 5,265 for Mississippi and the next largest 3,725 for Florida. The proportion of negroes to whites in 1900, as compared with conditions ten years ago, is also larger by 1,255 in Alabama, by 1,083 in Arkansas, by 352 in Oklahoma, and by 275 in West Virginia. In all the other Southern states the proportion has decreased since 1890, and the relative decrease is especially noticeable in Louisiana, South Carolina, and Virginia.

The proportion of the total population represented by each element of the white population at the last two census periods is presented in detail by states and territories in table LVI (page cxviii), the absolute numbers upon which this table is based being contained in table 15 (page 489) of the general tables.

The aggregate of 66,990,788 white persons in 1900 (see page 489) is made up of 56,740,739 native white persons, constituting 74.4 per cent of the total population, and 10,250,049 foreign white persons, constituting 13.4 per cent of the total population. Native white persons in 1900 are in turn subdivided into 41,053,417 persons of native parentage and 15,687,322 persons of foreign parentage, constituting, respectively, 53.8 per cent and 20.6 per cent of the total population. Comparing the percentages for these same elements in 1890 and 1900 it appears that native white persons constitute a somewhat larger proportion of the total population in 1900 than in 1890, due to a relative increase of 2.3 per cent in the proportion for native white persons of foreign parentage, which is offset in part by a relative decrease of nine-tenths of 1 per cent in the proportion for native white persons of native parentage.

The combined white element of foreign birth or parentage represents a little more than one-third of the population for the entire area of enumeration in 1900, but in the North Atlantic division these two elements represent somewhat more than one-half of the total population of the division, or 28.4 per cent for native white persons of foreign parentage and 22.5 per cent for foreign white persons, representing together 50.9 per cent. In the North Central and Western divisions these same two elements, when combined, constitute very nearly as large a proportion of the total population, or 44.2 per cent for the first named and 45.3 per cent for the last named division. In the South Atlantic division the proportion of the total population represented by these two elements of the white population is very small, or only 5.7 per cent, and this is also the case in the South Central division, where they constitute only 7.5 per cent.

This white element of foreign birth or parentage is very large in certain of the states in the Northern and Western sections of the country. It constitutes 77.1 per cent of the total population of North Dakota in 1900, 74.9 per cent of that of Minnesota, and 71.2 per cent of that of Wisconsin, while in Rhode Island it represents 64 per cent; in Massachusetts, 61.9 per cent; in South Dakota and in Utah, 60.9 per cent; and in New York, 59.3 per cent, or from nearly three-fifths to more than three-fourths of the respective populations of these states.

In Hawaii the white population includes, for the purposes of the census, Hawaiians and part Hawaiians, Caucasians, and South Sea Islanders, and these combined represent 43.4 per cent of the total population in 1900, or a little more than the proportions shown for South Carolina and Mississippi.

The constituents of the population, based upon general nativity and color, are shown graphically, for each state and territory, by the diagram on plate 14.

A presentation of the population by sex, general nativity, and color is made for all places having at least 2,500 inhabitants in 1900 in tables 23 (page 609) and 24 (page 647) of the general tables, and from these tables is abstracted table LVII (page cxix), giving a distribution according to color of the population of each of the 161 principal cities of the country.

[1] Includes all persons of negro descent.

From table LVII is derived table LVIII, which shows the proportion which each element bears to the total population in each of the 38 cities having more than 100,000 inhabitants. The proportionate share of the population represented by each element in these cities is also expressed graphically by the diagram on plate 15.

TABLE LVIII.—*Percentage of native and foreign white and colored of total population, for cities having 100,000 inhabitants or more: 1900.*

[1] Chinese, Japanese, and Indians.
[2] Less than one-tenth of 1 per cent.

Of the 161 principal cities there are 56 which contain among their population at least 2,500 persons of negro descent, as shown by table LIX, which gives not only the negro population of each of these 56 cities, but also the proportion which this element, in each case, bears to the total population.

TABLE LIX.—*Proportion of negro to total population in each of 56 cities containing at least 2,500 persons of negro descent: 1900.*

Table LIX shows that the largest proportion of negroes to total population in the principal cities of the country is found in Jacksonville, Fla., where the negro

element constitutes 57.1 per cent of its total population. Montgomery, Ala., and Charleston, S. C., each has very nearly as large a proportion as Jacksonville, while in Savannah, Ga., persons of negro descent constitute somewhat more than one-half of the whole population.

The largest number of negroes is found in Washington, D. C., namely, 86,702, but this number constitutes only 31.1 per cent of the population of that city. Baltimore, Md., with 79,258 persons of negro descent, comes next, numerically, and New Orleans, La., with 77,714, ranks third. The proportion of negroes to total population in New Orleans is very nearly as large as that for Washington, but the proportion for Baltimore is not much more than one-half as great. Philadelphia has a negro population of 62,613 and New York a similar population of 60,666, but the total population of these cities is so large that the proportion of negroes in them is very small, or 4.8 per cent for the former and only 1.8 per cent for the latter city. St. Louis contains 35,516 persons of negro descent, constituting 6.2 per cent of its total population, while Chicago has 30,150, and Boston only 11,591, or in each case about 2 per cent of the entire population of the city.

CHINESE AND JAPANESE POPULATION.

The returns of the Twelfth Census show a total of 119,050 Chinese, including 3,116 in Alaska, 25,767 in Hawaii, and 304 at military and naval stations abroad. In the United States proper there are, therefore, 89,863 Chinese as against 107,488 in 1890, including in the latter number 13 specially enumerated in Indian Territory ten years ago.

The whole number of Japanese, for the entire area of enumeration in 1900, is 86,000, including 61,111 in Hawaii, 279 in Alaska, and 284 enumerated at military and naval stations abroad. In the United States proper there are 24,326 Japanese in 1900 as against only 2,039 in 1890.

The Chinese and Japanese population as returned in 1890 and 1900 is presented by states and territories in table LX.

TABLE LX.—*Chinese and Japanese population, by states and territories arranged geographically: 1890 and 1900.*

California	45,753	72,472	10,151	1,147
Alaska	3,116	[3]2,288	279	([3])
Hawaii	25,767	[4]17,002	61,111	12,360

[1] Includes persons in the military and naval service of the United States (including civilian employees, etc.) stationed abroad, not credited to any state or territory.

[2] Includes 31,663 persons (19,303 Chinese and 12,360 Japanese) specially enumerated in 1890 in Alaska, Hawaii, and Indian Territory.

[3] 2,288 given in 1890 report as Mongolians, but comprising chiefly Chinese with a few Japanese.

[4] Includes 1,701 Hawaiian-born Mongolians, very nearly all of whom are probably Chinese.

Of the 89,863 Chinese in the United States proper, 67,729, or 75.4 per cent, are contained in the Western division as against 96,844, or 90.1 per cent in 1890. This is a loss in this division since 1890 of 29,115 Chinese, or 30.1 per cent, the number in California alone having been reduced from 72,472 in 1890 to 45,753 in 1900. There has been a slight gain since 1890, however, in the number of Chinese in Arizona, Oregon, and Washington.

The states and territories outside of the Western division show as a whole a gain since 1890 of 11,490 Chinese, making a net loss for the United States proper of 17,625, or 16.4 per cent.

The Japanese in the United States proper are concentrated in the Western division of states and territories, this division containing 23,376 out of a total in this country in 1900 of 24,326.

Of the 23,376 Japanese in the Western division in 1900, 10,151 are in California, 5,617 in Washington, 2,501 in Oregon, 2,441 in Montana, and 1,291 in Idaho, leaving only 1,375 for the remaining states and territories in this division.

INDIAN POPULATION.

The whole number of Indians, taxed and not taxed, in the United States in 1900, including those enumerated in Alaska and at military and naval stations abroad, is 266,760, of whom 137,242 are taxed and 129,518 are not taxed. For the same area in 1890 there were returned 273,607 Indians, comprising 84,160 Indians taxed and 189,447 Indians not taxed.

The figures showing the number of Indians taxed and not taxed in 1890 and 1900 are presented in detail by states and territories in table 14 (page 488) of the general tables, and from this table is derived table LXI, giving the total number of Indians at the last two census periods by states and territories arranged geographically.

TABLE LXI.—*Indian population, by states and territories arranged geographically: 1890 and 1900.*

Utah	2,623	3,456
Nevada	5,216	5,156
Idaho	4,226	4,223
Washington	10,039	11,181
Oregon	4,951	4,971
California	15,377	16,624
Alaska	29,536	25,354
Hawaii	.....	.....

The native Indian tribes of Alaska number 29,536 in 1900 as against a return of 25,354 in 1890, showing a gain during the ten years of 4,182, or 16.5 per cent. In the United States proper the Indians number 237,196 as compared with a total in 1890 of 248,253, representing a loss during the decade of 11,057, or 4.5 per cent.

With the exception of the South Atlantic division there has been a loss in the number of Indians in each geographical division since 1890. The apparent gain in the South Atlantic division is due to the inclusion as Indians in 1900 of the Croatans in North Carolina, who were largely enumerated in 1890 as whites.

STATE OR TERRITORY OF BIRTH.

A detailed comparison of the native and foreign born elements of the population has been made under the heading "General Nativity", showing that the entire population enumerated at the Twelfth Census is made up of 65,843,302 persons of native birth and 10,460,085 persons of foreign birth, constituting 86.3 per cent and 13.7 per cent, respectively, of the whole population.

The native born population in 1900 includes 75,851 native born persons who were enumerated at military and naval stations abroad, and who were, therefore, not living within the limits of the United States when the census was taken in June, 1900. For this reason this number of persons can not be considered in the discussion relating to the nativity of the native born element of the population. After eliminating this number of persons there remains a native born population in 1900 of 65,767,451, and of this number 51,979,651, or 79 per cent, were born in the state or territory where enumerated. The remaining 13,787,800 persons, constituting 21 per cent of the entire native born element considered, although of native birth, were born elsewhere than in the state or territory in which they were living at the time of the census enumeration.

The proportion of persons living in the state or territory of their birth is slightly larger in 1900 than it was ten years ago, when they represented 78.5 per cent of all the native born, as shown by the following summary:

CENSUS YEARS.	Total native born.	LIVING IN STATE OR TERRITORY OF BIRTH.		OTHER NATIVE BORN.	
		Number.	Per cent.	Number.	Per cent.
1900	65,767,451	51,979,651	79.0	13,787,800	21.0
1890	53,372,703	41,871,611	78.5	11,501,092	21.5
1880	43,475,840	33,882,734	77.9	9,593,106	22.1
1870	32,991,142	25,321,340	76.8	7,669,802	23.2
1860	[1]23,353,386	17,527,069	75.1	5,826,317	24.9
1850	[1]17,742,987	13,457,049	75.8	4,285,938	24.2

[1] Native white and free colored population only.

This summary shows that, with the exception of 1860, the proportion of natives living in the state or territory of their birth has increased at each succeeding census since 1850, inquiry being made for the first time at that census concerning the nativity of each person enumerated. The figures given for 1900 include a small number of native born persons living in Alaska, Hawaii, and Indian Territory for which no corresponding figures are available at the preceding censuses. It will be noticed also that the figures given for 1850 and 1860 related to native white and free colored persons only, no tabulation having been made at those censuses for the slaves of native birth according to the state or territory in which they were born.

The native born population and each of its elements are distributed according to state or territory of birth, by states and territories, in tables 25 to 29 (pages 686–705) of the general tables, and the figures contained in the first of these tables are reproduced in table LXII (page cxxvi).

The number and proportion of natives of the several states and territories in 1900 as compared with 1890, are presented in table LXIII (page cxxxi). A similar presentation is made for the native white and native negro population in 1900 in table LXIV (page cxxxii) and for the native white population of native and foreign parentage, respectively, in table LXV (page cxxxiii).

The native element in 1900, which has been classed in tables LXIII, LXIV, and LXV as "Other native born", and numbering 13,787,800, is composed of 13,528,095 persons born in other states and territories; 191,421 persons born in the United States, but for whom the state or territory of birth was not specified by the census enumerators; 2,263 persons born at sea under the United States flag; 343 persons born in the Philippine Islands; 678 persons born in Porto Rico; and 65,000 American citizens born abroad. This element of the native population is distributed in detail by states and territories in table LXVI (page cxxxiv).

TABLE LXII.—*Native population, distributed according to state or territory of birth, by states and territories arranged geographically: 1900.*

[1] Exclusive of persons in the military and naval service of the United States (including civilian employees, etc.) stationed abroad, not credited to any state or territory.

[2] Less than one-tenth of 1 per cent.

In the North Atlantic and South Atlantic divisions, as shown by table LXIII (page cxxxi), a very large percentage of persons of native birth are living in 1900 in the state where they were born, and this is especially the case in Maine, New York, and Pennsylvania, in the North Atlantic division, and in Virginia, North Carolina, South Carolina, and Georgia, in the South Atlantic division. Natives of the District of Columbia constitute in 1900 less than one-half (46.4 per cent) of its native born, due to the large number of natives of other states and territories who are resident there, either on account of their own employment, or that of other members of their families, in the Government service. All of the states in these two divisions show a somewhat smaller proportion of natives now, as compared with ten years ago, with the single exception of West Virginia. The proportion of natives of West Virginia living in that state is very much larger in 1900 than it was in 1890, or 81.8 per cent in 1900 as against 76.6 per cent in 1890. At the census of 1880 natives of West Virginia constituted only 66.2 per cent of all the native born in that state, and the greatly increased proportion in 1900, as compared with the two preceding censuses, is due in part to the fact that it was not set off from Virginia until 1863, and many of its older inhabitants were either literally born in the mother state or were so represented at the censuses immediately following its separation, even though they were actually born in that portion of Virginia now comprising the state of West Virginia. In making this statement it is understood, of course, that the proportion of natives living in the state would naturally increase unless it should receive, for any reason, a sufficiently large number of native immigrants to offset the decennial increase in persons born and living in the state itself.

In the South Central division, considered as a whole, there is about the same proportion of natives living in the states and territories of that division as has been shown for the whole country, and in none of the states and territories of this division is there so large a proportion of natives as found in some of the states of the South Atlantic division, on account of the larger proportion of native immigrants from other states. There has been, generally speaking, an increase since 1890 in the proportion of natives in these states and territories, but for the division as a whole the figures show a slightly decreased proportion. This is due, however, to the inclusion in 1900 of the native born element living in Indian Territory, but for which the corresponding figures in 1890 are not available. Excluding the native born population of Indian Territory from that of the South Central division, the figures then show that this division now contains a larger proportion of natives than it did ten years ago, or 79.8 per cent in 1900 as compared with 79 per cent in 1890. Of the native born population of Indian Territory in 1900 not much more than one-third is represented by natives of that territory, as the great increase in its total population is made up mostly of white persons who are natives of other states and territories.

The states comprising the North Central division, with the exception of Ohio, show an increased proportion of natives living in them in 1900 as compared with 1890, and in some of them the increase in the proportion is very large, particularly in the Dakotas and in Nebraska and Kansas. Less than one-half of all the native born persons living in Kansas in 1900 are natives of that state, while in Nebraska and the Dakotas the natives constitute but a little more than one-half of all persons of native birth living in those states.

New Mexico is the only one of the states and territories of the Western division which shows a decreased proportion since 1890 in the number of persons living in the state or territory of their birth, this decreased proportion being due to an increase in the native immigrants from 26,080 in 1890 to 38,469 in 1900. The largest proportion of natives in this division in 1900 is found in Utah, or 81.6 per cent, and the next largest proportion in New Mexico, or 78.8 per cent; but in the other states and territories of this division the proportion of natives is comparatively small, ranging from 26 per cent in Wyoming to 59.2 per cent in California. The Western division contains by far the smallest proportion of natives born and living in the state or territory of their birth, or not much more than one-half of its native born, and this small proportion is strongly indicative of the large amount of native immigration as well as of foreign immigration which it has received.

The proportions of natives among the white and negro elements of native birth, as shown by table LXIV (page cxxxii), do not differ materially from those presented for the entire native born population in table LXIII, except for native negro persons in the Northern and Western sections of the country. These conditions are due, of course, to the comparatively small number of negroes in these sections as compared with their large native white population.

Of the whole number of native negro persons living in the North Atlantic division in 1900, considerably more than one-half are not natives of the states in which they are now living. Practically the reverse of this condition is found in the North Central division, where considerably more than one-half of this class of persons are found to be living in 1900 in the state or territory in which they were born.

The Western division contains 29,452 native negro persons, and of this number only 7,017, or 23.8 per cent, are natives of the state or territory in which they were living when the census was taken in 1900.

Comparing the proportion of natives among the native white persons of native and foreign parentage, respectively, as shown by table LXV (page cxxxiii), it appears for the United States as a whole that there is a larger proportion among those of foreign parentage than there is among those of native parentage. This statement is also true for the North Atlantic, North Central, and Western divisions, and in the two latter divisions the disparity is especially large. In the South Atlantic and South Central divisions, particularly in the first-named division, there is a much smaller proportion of

natives among those of foreign parentage than among those of native parentage, but this is due in part to the relatively small number of native white persons of foreign parentage in these two divisions as compared with their large native white population of native parentage, and in part to the fact that this element of foreign parentage has come into these divisions from the more northerly states where their parents, who are themselves of foreign birth, were living when they were born.

From table LXVI (page cxxxiv) it appears that there are 13,528,095 persons living in the several states and territories in 1900 who were born in some other state or territory, and a distribution of this number of persons is made in detail by states and territories in table LXVII, showing, for each state and territory, the number of residents who were born in the different states and territories and the proportion which this number, in each case, bears to the total native born population of the state or territory under consideration. In brief, this table shows the states which have contributed to any extent to the native born population of any state or territory, and is easily understood. For illustration, there are 37,094 persons living in Maine who were born elsewhere in the United States, and constituting 6.2 per cent of the entire native born population of that state in 1900. Of this number Massachusetts has contributed 15,145 persons, equivalent to 2.5 per cent of all the native born in Maine, and, similarly, New Hampshire has contributed 8,902 persons, New York 3,170 persons, and Vermont 1,969 persons, in addition to the contributions from other states specified in the table.

The native born element has been considered thus far only with respect to the proportion living in the several states and territories who were born either in the state or territory where they were enumerated or in some other part of the United States or its possessions. Table LXVIII shows the constitution of the population of each state and territory in 1900 according to the number and proportion it contains, in each case, of natives of the state or territory in which they are living, of natives of the United States who were born outside of the state or territory where enumerated, or of persons of foreign birth.

TABLE LXVIII.—*Total population, classified according to the number and percentage of persons born and living in state or territory, of other native born persons living in state or territory, and of foreign born persons, by states and territories arranged geographically: 1900.*

STATES AND TERRITORIES.	Total population.	NATIVE BORN.			Foreign born.	PER CENT OF TOTAL POPULATION.		
		Total.	Born and living in state or territory.	Other native born living in state or territory.		Born and living in state or territory.	Other native born living in state or territory.	Foreign born.

[1] Exclusive of 91,219 persons in the military and naval service of the United States (including civilian employees, etc.) stationed abroad, not credited to any state or territory.

Table LXVIII shows that the entire population considered in 1900 is made up of 68.2 per cent of native born persons who are now living in the state or territory of their birth, 18.1 per cent of native born persons who are living outside of the state or territory where they were born, and 13.7 per cent of foreign born persons.

The constitution of the population varies so widely in the several states and territories comprising the five geographical divisions of the country that the average conditions shown for the divisions, considered each in its entirety, do not warrant any extended consideration. The table furnishes abundant evidence, however, of the extent to which the native immigrants, in comparison with the foreign immigrants, have contributed to the population of the different states and territories. In the North Central division, for instance, a very good illustration is afforded in the case of North Dakota, in which the population in 1900 is made up, in very nearly equal proportions, of the three elements covered by table LXVIII, namely, natives of state living in state, 34.1 per cent; natives of other states living in state, 30.5 per cent; foreign born persons living in state, 35.4 per cent. A reference to the table shows for Kansas, however, that the constitution of its population in 1900 is somewhat different from that of North Dakota. This state has a very small proportion of foreign born, but has a considerably larger proportion of natives of other states living in it than of native born persons who were themselves born in Kansas. Referring again to the table, it appears that in many of the states and territories comprising the Western division there is a very large proportion of native immigrants, the largest percentages being 60.1 for Wyoming, 55 for Colorado, 54.9 for Idaho, and 52.8 for Washington. New Mexico and Utah, on the other hand, have received only a small amount of native immigration, this element constituting in 1900 only 19.7 per cent of the total population of New Mexico and 14.9 per cent of that of Utah.

The preceding analysis of the figures relating to the nativity of the native born population has been confined to the element living in the state or territory where enumerated, but in order to show, approximately, the amount of interstate migration which has taken place, so far as it can be determined from conditions as they now exist in the several states and territories, it is necessary to deal with the native born population from the standpoint of place of birth rather than the place of residence at the time the census was taken. Table LXIX (page cxlix) shows, therefore, the total number of native born persons living within the limits of the United States in 1890 and 1900, distributed according to the number born in each state or territory, without regard to where they were living at the time of the census enumeration, and this number is in turn subdivided, for the United States and for each state and territory in detail, according to the number and percentage either born and living in each state or territory or born in each state or territory but living in other states and territories.

As already stated, the total number of persons considered in table LXIX is confined to persons returned in the census as born and living in some state or territory within the limits of the United States. It excludes for 1900, therefore, 30,287 persons born in Alaska; 60,248 persons born in Hawaii; 65,193 American citizens born abroad; 3,301 persons born at sea under the United States flag or in Porto Rico or the Philippines; 192,893 persons who were born in the United States, but for whom the state or territory of birth was not specified, and 88,613 persons born in the United States, but living at the time of the census enumeration in either Alaska, Hawaii, or at military and naval stations abroad. A corresponding exclusion is made for 1890, wherever necessary, in order that the figures for the two censuses may be made entirely comparable. Table LXIX shows, therefore, on this basis, that of the 65,402,767 persons enumerated in 1900 who were born and living within the limits of the United States, 51,891,039, or 79.3 per cent, are living in the state or territory of their birth and 13,511,728, or 20.7 per cent, are now living in some other state or territory. The corresponding figures for 1890 are 41,871,611 persons living in the state or territory of their birth and 11,085,167 persons living outside of the state or territory in which they were born, constituting, respectively, 79.1 per cent and 20.9 per cent of the whole number of natives of the United States who were living within its limits in 1890, and for whom the state or territory of birth was specified.

These figures do not show any material change since 1890 in the proportions of native emigrants, when the entire United States is considered, but in many of the states and territories there has been a very decided increase in the proportion of their native element which has gone to other parts of the United States, and this is particularly the case in South Dakota, Nebraska, and Kansas, in the North Central division; in Texas and Arkansas, in the South Central division; and in Wyoming, Colorado, Nevada, and Washington, in the Western division. In all of these states the proportion of persons who are natives of them, but who are now living in other states and territories, is very much larger in 1900 than it was in 1890, showing that even from the states which have in the past profited largely from native immigration a constant migration of the native element is going on, either to states in their immediate vicinity or to sections of the country somewhat more remote. This is clearly brought out by the figures showing the distribution of the "native emigrant" element for each state and territory in detail, as set forth in tables LXX (page cl) and LXXI (page cli).

TABLE LXIX.—*Total number of persons born in each state or territory, distributed according to the number and percentage living in state or territory of birth or in other states and territories, by states and territories arranged geographically: 1890 and 1900.*

Tables LXX and LXXI afford a very good idea, so far as it is shown by the figures derived from the two censuses considered, of the extent to which each state or territory has contributed to the population of the different sections of the country. For instance, table LXX shows for the state of New York that, according to the census of 1900, there are 1,289,866 natives of that state living in other states and territories; that of this number 483,313 are living in other states of the same division in which New York is situated, namely, the North Atlantic division; and that 806,553 are living in the other geographical divisions of the country; and, finally, that of those living in other divisions much the largest contribution has been made to the North Central division, and a considerable, but much smaller, contribution to the Western division. In other words, the state of New York has contributed to the present population of other states and territories upward of 1,200,000 persons, of which fully one-half have gone to the states and territories comprising the North Central division. This will suffice to illustrate the uses to which the tables may be put, with respect to specific states, but considering the figures by geographical divisions only, the following summaries are obtained:

1900.

The summary for 1900 shows that of the 65,402,767 persons who were born and are now living in the United States, 13,511,728, or 20.7 per cent, are living outside of the state or territory of their birth, this number representing the entire "native emigrant" element of the country. The migration of this element is divided in the summary into two classes, first, those living in other parts of the same division in which their native state is situated, and second, those living in other divisions of the country. The first-named class numbers 7,346,631 and constitutes 11.3 per cent of all the persons born and living in the United States, while the second class comprises 6,165,097 persons, or 9.4 per cent of the whole number considered. Considering the last-named number in detail, according to divisions, it appears that the North Central division contains the largest number of natives of other states and territories outside of its own division, representing a total of 2,337,726 persons. The South Central division contains 1,404,811 and the Western

division 1,368,957 such persons, leaving a little more than a million to be divided between the two Atlantic divisions.

Leaving out of consideration the native migration which has taken place within each geographical division, it appears that the North Atlantic division has 1,938,890 natives living in the other divisions of the country and that 1,354,636 of these are living in the North Central division and 325,527 in the Western division.

The South Atlantic division, also, has a large number of natives living beyond its limits, comprising, in all, 1,372,186 persons. The South Central division has received much the largest contribution, namely, 651,259, while the Western division has received only 62,288, leaving the remainder to be very nearly evenly divided between the North Atlantic and North Central divisions.

Although the North Central division has received large contributions from the other divisions, it has also made a large contribution to the native population of the other divisions, but principally to the Western and South Central divisions. The total number of natives of the North Central division living in other divisions in 1900 is 1,864,559, and of this number 858,420 are in the Western division and 661,684 in the South Central division.

This large contribution to the South Central division is very nearly balanced by the contribution made by that division to the North Central division, representing a total of 602,168, and constituting more than two-thirds of its entire contribution to the other divisions.

The Western division has contributed only a small number of its natives to the other divisions, and this has been made principally to the North Central division.

A comparison of the figures for 1900 with similar figures contained in the summary for 1890 shows that the divisions to which the bulk of the natives of the several divisions have gone contained usually larger proportions in 1890 than in 1900, and so it is undoubtedly true that if a similar analysis were made for some of the earlier censuses the figures would be even more strongly indicative of the great volume of native migration to the different sections of the country which occurred during the earlier periods of settlement.

The varying proportions of resident natives, native immigrants, and foreign born in the several states and territories in 1900, together with the proportion of native emigrants in each case, are shown graphically by the diagram on plate 16.

Table LXXII shows the states and territories to which each state or territory has contributed of its numbers most largely, and is, in effect, a detailed presentation for each state and territory of the present location of its "native emigrants" who are still living within the limits of the United States. In this table the whole number of natives of the state or territory who are living in other states and territories is taken as 100 per cent, so that a casual inspection of the table will show for any state or territory the respective proportions which it has contributed to the states and territories in which its natives are principally found. For illustration, the table shows for Maine that there are 216,551 natives of that state living in other states and territories in 1900, and that of this number 98,375, or very nearly one-half of all its native emigrants, are living in Massachusetts. It also shows the other states which contain considerable numbers of natives of Maine, as, for instance, 16,650 in New Hampshire, 14,732 in California, 10,654 in Minnesota, and so on.

TABLE LXXII.—*Distribution of persons born in each specified state or territory who are living in other states and territories: 1900.*

STATES AND TERRITORIES.	BORN IN STATE OR TERRITORY BUT LIVING IN OTHER STATES AND TERRITORIES.

Other South Central states	2,099	3.0
Total	70,068	100.0

The tide of native and foreign immigration which has set steadily toward the North Central and Western sections of the country from the earliest period of their settlement has been composed almost wholly of white persons, but concurrently with this great movement, particularly in recent years, a perceptible change in the distribution of the negro population of the Southern states is apparent. But in order to show definitely the course which the migration of this element has taken during the past fifty years, it is necessary to treat the subject somewhat differently from that employed in considering the migration of the entire native born element of the country.

The total negro population living within the limits of the United States in 1900 numbers 8,833,994, and of this population 3,729,017, or 42.2 per cent, are found in the South Atlantic division and 4,193,952, or 47.5 per cent, in the South Central division. At the census of 1850 there were 3,638,808 persons of negro descent, of which number 1,860,871, or 51.1 per cent, were living in the South Atlantic division of states, and 1,491,327, or 41 per cent, in the South Central division of states. These figures show that there has been a loss since 1850 of 8.9 per cent in the proportion of the negro population contained in the South Atlantic division and a gain of 6.5 per cent in the proportion contained in the South Central division.

The decrease in the proportion of the negro element in the South Atlantic division is not common to all the states comprising that division, nor is the increase in the proportion shown for the South Central division common to all the states comprising that division; but the full effect of the change which has taken place in the distribution of the negro element throughout the South, and to a certain extent throughout the country, is not seen, however, until the states comprising the two Southern divisions are arranged according to whether they have lost or gained since 1850 in the proportion of the negro population contained in them, as shown by table LXXIII.

TABLE LXXIII.—*Number and percentage of persons of negro descent in the Southern states: 1850 to 1900.*

In table LXXIII the distribution of the negro population is made without reference to geographical divisions, the states considered being arranged in 2 groups. The first group comprises the upper Southern states, which show a proportionate loss in negro population in 1900 as compared with 1850, while the second group comprises the lower Southern states, which show either a proportionate gain or practically no change since 1850 in their proportion of negro population. For purposes of this discussion Missouri is classed as an upper Southern state, and the District of Columbia, Indian Territory, and Oklahoma are excluded from both groups.

Considering the upper Southern states in their entirety, it appears that there has been a proportionate loss in their negro population since 1850 of 17 per cent; that is to say, this group of states contained 54.4 per cent of the entire negro population in 1850 as against only 37.4 per cent in 1900. There is, on the other hand, at present a very much larger proportion of the negro population in the lower Southern states combined, or 52.5 per cent of the whole, than there was fifty years ago, when they contained only 39.8 per cent of all the negroes in the country. Alabama is the only state in this group in which the proportion of the negro element has not increased materially since 1850, the proportion being substantially the same in 1900 as it was in 1850, although it has fluctuated somewhat during the intervening years.

It will be noticed also that these 2 groups of states, when combined, contain not quite nine-tenths of the whole number of persons of negro descent in 1900 as compared with 94.2 per cent in 1850. The remainder of the country, outside of the 2 Southern groups of states, therefore, now contains very nearly twice the proportion of negro population that it contained in 1850, or 10.1 per cent in 1900 as against 5.8 per cent in 1850.

These changes in the relative proportions of the negro population contained in the 2 groups of states, and in the remainder of the country, show that there has been not only a decided southward movement of the negro population, but, in addition, a very considerable northward movement of the same element.

In order to show the trend of these two opposite movements, it is necessary to arrange the states and territories, outside of the 2 Southern groups, into 4 groups, as follows:

NORTHEASTERN GROUP.—Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, and New York.

NORTHERN BORDER GROUP.—New Jersey, Pennsylvania, District of Columbia, Ohio, Indiana, Illinois, Indian Territory, Oklahoma, and Kansas.

UPPER CENTRAL GROUP.—Michigan, Wisconsin, Minnesota, Iowa, North Dakota, South Dakota, and Nebraska.

WESTERN GROUP.—Montana, Wyoming, Colorado, New Mexico, Arizona, Utah, Nevada, Idaho, Washington, Oregon, and California.

With the states arranged in these groups, it is possible to show, for each Southern group and in detail for each Southern state, the number of native negroes given to other Southern states of the same group and to each of the other 5 groups of states, in conjunction with an offsetting statement of the number of negroes born in other groups of states which in turn have been received by the states comprising the 2 Southern groups, as shown by tables LXXIV and LXXV.

TABLE LXXIV.—*Number of native negroes given by the upper Southern states to other groups of states, contrasted with the number of native negroes received by the upper Southern group from other groups of states: 1900.*

Table LXXIV shows, first, for the upper Southern states that this group as a whole has 800,586 of its native negroes living outside of their state of birth, of which 176,371 have been given to other states of the same group and 624,215 to other groups of states. The Northern border states have received 273,050 native negroes from the upper Southern states and the lower Southern states 269,162 such persons, these 2 groups combined having received very nearly 87 per cent of all the native negroes contributed by the upper Southern group to states outside of that group itself.

Of the individual states comprising the upper Southern group, Virginia has given the largest proportion of the whole number contributed by this group, and Virginia's contribution to the other groups of states, aside from the upper Southern group, is more than twice as large as that of any other state in the same group. It has contributed very nearly three-fifths of the whole number of native negroes of this group who have gone to the Northeastern group, and very nearly 40 per cent of all those who have gone to the Northern border group. The largest contributions to the lower Southern group have come from South Carolina, North Carolina, Tennessee, and Virginia, in the order named.

Table LXXIV shows, second, that the upper Southern group of states contains 266,415 native negroes, born in other states, which it has received as an offset in part to the number of native negroes which it has given to other states, but of these 176,371, or very nearly two-thirds of the whole number received, have come from states within the same group, leaving only 90,044, which have been contributed by the other groups of states. Of the

latter number 69,960 have been received from the lower Southern states and 16,995 from the Northern border states, leaving only 3,089 to be received from the 3 other groups.

Summarizing the results shown by table LXXIV it appears that the upper Southern group of states has given 269,162 of its native negroes to the lower Southern states, and has received in return from that group only 69,960. It will be noticed, also, that of the whole number of native negroes which have been received from the lower Southern states a very large proportion has come from Tennessee and a somewhat smaller proportion from Missouri; and, furthermore, that the number received by these two states very nearly offsets the number of native negroes which they have given to the lower Southern group of states. Similarly, it appears that the upper Southern states have given 273,050 native negroes to the Northern border states, and have received from that group only 16,995 persons of native negro descent.

The lower Southern group of states, as shown by table LXXV, has given 128,007 native negroes to the other groups of states, and of this number 69,960 have gone to the upper Southern group and 44,870 to the Northern border group. The lower Southern group has received from the five other groups of states in return, however, 276,812 negroes of native birth, and all but 3 per cent of this number have come from the upper Southern group.

These figures show very conclusively that there has been a perceptible southward movement of negroes from the upper to the lower group of Southern states, and a northward movement as well, particularly from the upper Southern group to the Northern border group. A considerable proportion of this migration of native negroes has been made, of course, to states contiguous, in whole or in part, to the states in which they were born, and this is very clearly brought out in tables LXXVI and LXXVII.

Table LXXVI shows the number of native negroes which each state in the upper Southern group has given to each state in the lower Southern group and, in addition, the number which each of the upper Southern states has received in return from each of the lower Southern states. Table LXXVII contrasts, on the other hand, the respective numbers which each state in the two Southern groups has given to, or received from, each of the Northern border states. In both of these tables the contributions made to or by contiguous states are indicated by the use of italic figures.

The exact extent of the movement from a portion of one state contiguous to a portion of another state can not be determined, as the tabulation of the figures relating to state or territory of birth was not made for areas less than states and principal cities.

No detailed presentations, similar to that contained in table LXXVII, are made for the Northeastern, upper Central, and Western groups of states, as the contributions to and from these states are not numerically of sufficient importance to warrant them.

The largest proportions of native residents are found, naturally, in the more Eastern and Southern cities; for example, fully nine-tenths of the population of Charleston in 1900 is composed of natives of South Carolina, while in Pennsylvania many of the smaller cities also contain a large proportion of natives of that state, being in some cases very nearly as large as that for Charleston. Table LXXVIII also shows that the Western cities, as a rule, contain only a small proportion of natives of the states in which they are severally situated, the larger part of their population consisting either of natives of other states and territories or of persons of foreign birth, and in some cases of both of these elements in considerable proportions.

COUNTRY OF BIRTH.

The foreign born population, as returned at the Twelfth Census, numbers 10,460,085, and this element is distributed in detail by country of birth in table LXXIX. These figures include, however, 12,661 persons enumerated in Alaska, 90,780 persons enumerated in Hawaii, and 15,368 persons enumerated at military and naval stations abroad, but for purposes of comparison with a similar distribution of the total foreign born element reported at preceding censuses it is necessary to exclude the number of foreign born persons returned in 1900 in Alaska and Hawaii, as shown by the second column of the same table. The small foreign born element enumerated at military and naval stations abroad is not excluded, as previously explained.

In the general discussion of the native and foreign born elements of the population, considered without regard to specific nativities, the population of Indian Territory and the Indian reservations, specially enumerated in 1890, was assumed to be native born, with the exception of 13 Chinese in Indian Territory who were classed as foreign born.

TABLE LXXIX.—*Foreign born population, distributed according to country of birth: 1900.*

Other countries	2,587	2,558
Born at sea	8,310	8,229

[4] Except Philippine Islands.
[5] Except Cuba and Porto Rico.

For persons born in Canada and Newfoundland an approximate separation is made in 1900, the same as in 1890, of the number who are of English and French extraction, respectively, so far as this separation can be made through the medium of the census enumerators. Similarly, a separation is made at the present census for persons born in what was formerly Poland, according to the respective numbers born in what is now known as German Poland, Austrian Poland, and Russian Poland; but for a little more than 5 per cent of the entire number this separation was not made by the census enumerators.

A detailed presentation of the foreign born population distributed according to country of birth is made in table 33 (page 732) of the general tables, for each state and territory, and in table 35 (page 796), for each city of 25,000 inhabitants or more. The foreign born population of the several states and territories is also distributed by

counties, according to selected countries of birth, in table 34 (page 736) of the general tables, and these county presentations comprehend, either for separate countries of birth or for combinations of related countries of birth, all but 71,682 foreign born persons, this number of persons being included in the country presentations under the designation of "other countries."

The changes which have occurred in the distribution of the total foreign born element by principal countries of birth at each census from 1850 to 1900, inclusive, are shown in table LXXX. As previously stated, the figures for 1900 include foreign born persons enumerated at military and naval stations abroad, but exclude those enumerated in Alaska and Hawaii.

[1] Less than one-tenth of 1 per cent.

[2] Includes Newfoundland.

Of the foreign born element considered in 1900, natives of Germany constitute the largest proportion, or 25.8 per cent, as compared with 30.1 per cent in 1890 and 26 per cent in 1850. Ireland has contributed the next largest proportion of the whole number of foreign born in 1900, or 15.6 per cent, as compared with 20.2 per cent in 1890 and 42.8 per cent in 1850. Natives of England represent 8.1 per cent of the total foreign born in 1900 as compared with 9.8 per cent in 1890 and 12.4 per cent in 1850; and if natives of Scotland and of Wales are included, the proportion in 1900 for the whole of Great Britain becomes 11.3 per cent as against 13.5 per cent in 1890 and 16.8 per cent in 1850.

The proportion of the entire foreign born element in 1900 represented by natives of Norway, Sweden, and Denmark combined, or 10.3 per cent, is only slightly larger than that shown for the same elements in 1890, although the proportion has increased steadily since 1850, when they constituted less than 1 per cent of all the foreign born.

The English and French Canadian elements of our population, taken together, represent 11.4 per cent of the whole body of foreign born in 1900 as compared with 10.6 per cent in 1890 and 6.6 per cent in 1850.

Of the groups of countries thus far mentioned, it appears that there has been a material reduction since 1890 in the proportions represented by natives of Germany, Ireland, and Great Britain, and only a slight increase in the proportions represented by natives of Canada and Newfoundland, and of Norway, Sweden, and Denmark, and, furthermore, if these elements of our foreign born population are considered as a whole, the figures show that, whereas they constituted more than nine-tenths of the entire foreign born population in 1850, they now constitute less than three-fourths of all the foreign born, as shown by the following summary:

CENSUS YEARS.	Aggregate.	Germany.	Ireland.	Great Britain.	Canada and Newfoundland.	Norway, Sweden, and Denmark.
	Per cent.	*Per cent.*	*Per cent.*	*Per cent.*	*Per cent.*	*Per cent.*
1900	74.4	25.8	15.6	11.3	11.4	10.3
1890	84.5	30.1	20.2	13.5	10.6	10.1
1880	88.2	29.4	27.8	13.7	10.7	6.6
1870	90.7	30.4	33.3	13.8	8.9	4.3
1860	91.6	30.8	38.9	14.2	6.0	1.7
1850	93.1	26.0	42.8	16.8	6.6	0.9

There has been, on the other hand, a large increase since 1890 in the proportion of the total foreign born element represented by natives of Austria-Hungary

(including Bohemia), Italy, Poland, and Russia, as set forth in the following summary:

CENSUS YEARS.	Aggregate.	Austria-Hungary and Bohemia.	Italy.	Poland.	Russia.
	Per cent.	*Per cent.*	*Per cent.*	*Per cent.*	*Per cent.*
1900	18.1	5.6	4.7	3.7	4.1
1890	8.9	3.3	2.0	1.6	2.0
1880	4.0	2.1	0.7	0.7	0.5
1870	2.0	1.3	0.3	0.3	0.1
1860	1.2	0.6	0.3	0.2	0.1
1850	0.3	(1)	0.2	.....	0.1

[1] Less than one-tenth of 1 per cent.

At the census of 1850 natives of this group of countries constituted less than one-third of 1 per cent of all the foreign born, but this proportion had increased in 1880 to 4 per cent, and in 1890 to 8.9 per cent. During the past ten years, however, the proportion represented by this group has more than doubled, and now constitutes 18.1 per cent of the entire foreign born element considered.

The proportionate amount of population represented by each of the leading nationalities at each census from 1850 to 1900, inclusive, is expressed graphically by a series of diagrams on plate 17.

The extent to which the newer elements of the foreign born population have increased during the decade, as compared with the increases or decreases in the older foreign elements, is indicated in table LXXXI.

TABLE LXXXI.—*Increase in foreign born population, distributed according to principal countries of birth: 1890 to 1900.*

PRINCIPAL COUNTRIES OF BIRTH.	FOREIGN BORN POPULATION.		INCREASE FROM 1890 TO 1900.

[1] Includes Newfoundland.

[2] Decrease.

Table LXXXI summarizes present conditions very clearly. With the single exception of Bohemia, there has been an increase since 1890 of very much more than 100 per cent, in each case, in natives of those countries from which large contributions have been received in recent years as compared with either a relatively small increase, or an actual decrease, during the same period in natives of the countries from which the greater portions of our foreign born population were formerly derived.

Natives of the countries which have contributed the largest numbers to our foreign born population are distributed very unevenly over the United States, as shown by table LXXXII, from which can be easily determined either the proportions of each nationality found in each state and territory taken as a unit, or the relative concentration of the several nationalities in a comparatively few states or sections of the country.

TABLE LXXXII.—*Foreign born population, distributed according to principal countries of birth, by states and territories arranged geographically: 1900.*

[1] Less than one-tenth of 1 per cent.

[2] Includes Newfoundland.

From table LXXXII there is derived, first, a summary which shows the proportion of each nationality found in each of the geographical divisions of the country, the whole number of natives of each of the principal countries of birth being considered in each case as 100 per cent. The figures comprehended by this summary relate only to foreign born persons living in the United States proper, the small number of foreign born persons enumerated at military and naval stations abroad not being considered.

PRINCIPAL COUNTRIES OF BIRTH.	North Atlantic division.	South Atlantic division.	North Central division.	South Central division.	Western division.

Other countries	31.7	5.6	23.4	2.9	36.4

[1] Includes Newfoundland.
[2] Poland (Austrian) and Poland (unknown).

This summary shows very clearly the extent to which natives of the several nationalities are concentrated in one or more divisions of the country. For example, it shows that more than three-fourths of all the French Canadians are found in the North Atlantic division; or, if the proportion found in the North Central division is also included, it appears that only a little more than 3 per cent of this element is found outside of these two divisions. The North Atlantic division also contains 73 per cent of all the natives of Hungary, 72.7 per cent of all the natives of Italy, and 70.7 per cent of all the natives of Russian Poland. This same division also contains by far the largest proportion of all the natives of Austria, Ireland, and Russia, and more than half of all the natives of England, Scotland, and Wales. The North Central division, on the other hand, contains very nearly 85 per cent of all the natives of Norway, a little more than 75 per cent of all the natives of Bohemia and Holland, very nearly 65 per cent of all the natives of Denmark and Sweden, and 54.9 per cent of all the natives of Germany. Natives of Mexico are practically confined to the South Central and Western divisions, the former division containing 69.5 per cent and the latter division 28.6 per cent of the whole number.

A second summary is also derived from table LXXXII, which shows the proportion which natives of each of the principal foreign countries bears to the total number of foreign born in each geographical division, and the proportions for the several divisions can be compared with one another and, also, with similar proportions for the whole country, as expressed in the first column of the summary.

PRINCIPAL COUNTRIES OF BIRTH.	The United States.	North Atlantic division.	South Atlantic division.	North Central division.	South Central division.	Western division.

[1] Includes Newfoundland.
[2] Less than one-tenth of 1 per cent.
[3] Poland (Austrian) and Poland (unknown).

This summary shows, for illustration, that, whereas natives of Germany constitute a little more than one-fourth of the entire foreign born element in the United States in 1900, they constitute more than one-third of all the foreign born in the South Atlantic and North Central divisions, and somewhat more than three-tenths of all the foreign born in the South Central division. Similarly, this summary shows that natives of Ireland constitute a much larger proportion of all the foreign born in the North Atlantic and South Atlantic divisions than they do in the 3 remaining divisions, the proportion represented by this element in the North Atlantic division being particularly large, or 23.4 per cent.

The concentration of natives of Mexico in the South Central division, previously referred to, is made very apparent by the preceding summary, from which it is seen that they constitute fully one-fifth of all the foreign born in the South Central division as compared with 3.5 per cent in the Western division and less than 1 per cent for each of the other three divisions.

The concentration of foreign born persons of the different nationalities in the principal cities of the country, that is, the proportion which the total number found in the 160 cities (exclusive of Honolulu) having upward of

25,000 inhabitants bears, in each case, to the whole number considered, is shown by the following summary:

PRINCIPAL COUNTRIES OF BIRTH.	Total number in United States.	Number in 160 principal cities.	Per cent in 160 principal cities.
Total foreign born[1]	10,356,644	5,130,281	49.5

Other countries	356,280	151,728	42.6

[1] Includes persons in the military and naval service of the United States (including civilian employees, etc.) stationed abroad, not credited to any state or territory.
[2] Includes Newfoundland.

Of all the nationalities considered, natives of Russia are found most largely in cities, very nearly three-fourths (74.9 per cent) of their entire number in 1900 being contained in the principal cities. The next largest proportion found in the cities is that for natives of German Poland, or 68.7 per cent, while of all the natives of Russian Poland, Italy, and Ireland there is about the same proportion in cities, or 62.7 per cent, 62.4 per cent, and 62 per cent, respectively. Mexico, on the other hand, has contributed only a small proportion of its natives to the population of the cities, this element of foreign birth being confined almost wholly to Texas, Arizona, New Mexico, and California, and is not, therefore, so widely distributed over the country as is the case with many of the other nationalities. Next to Mexico, Norway has the smallest proportion of its natives in the larger cities, or only 22.4 per cent, while of the whole number of natives of Denmark there are in the cities only 28.1 per cent and of the natives of Wales only 32.3 per cent.

Table LXXXIII shows the number and percentage of foreign born persons of each of the principal nationalities in 1900 in each of the 19 cities having 200,000 inhabitants or more, and in 10 other cities in which the foreign born element represents in each case more than 30,000 persons.

[1] Less than one-tenth of 1 per cent.

[2] Includes Newfoundland.

The figures in table LXXXIII can be considered in two ways; first, with respect to the proportion which natives of each of the specified countries bear to the total population of each city, and, second, with respect to the varying proportions of the same nationality found in the different cities.

Considering, first, the distribution of the foreign born element in each city by itself, it appears, for instance, that in New York, the largest city in the country, the foreign born population in 1900 numbers 1,270,080, of which natives of Germany number 322,343, or 25.4 per cent; natives of Ireland, 275,102, or 21.7 per cent; natives of Russia, 155,201, or 12.2 per cent; and natives of Italy, 145,433, or 11.5 per cent. These 4 nationalities constitute, therefore, somewhat more than seven-tenths of the entire foreign born element living in New York city in 1900, to which may be added 71,427 natives of Austria, equivalent to 5.6 per cent of the whole, and 68,836 natives of England, equivalent to 5.4 per cent, bringing the total percentage represented by these 6 nationalities to 81.8, or more than four-fifths of the entire number.

The proportionate distribution of the foreign born element in New York city may be compared with a similar distribution for Chicago, which is the second largest city in point of population. Chicago contains a foreign born population in 1900 of 587,112, and in this city, as in New York, the largest proportions are shown for natives of Germany and of Ireland, namely, 170,738 natives of Germany, representing 29.1 per cent, and 73,912 natives of Ireland, representing 12.6 per cent, of all the foreign born in Chicago. The German element constitutes a somewhat larger proportion of the entire foreign element in Chicago, as compared with New York, and the Irish element a very much smaller proportion. Natives of Sweden constitute the third largest proportion of the foreign born population of Chicago, or 8.3 per cent, and natives of Bohemia the next largest, or 6.2 per cent. There is, also, about 5 per cent each of natives of German Poland, England, and English Canada.

Philadelphia, the third largest city in the country, contains 295,340 foreign born persons in 1900, of which practically one-third are natives of Ireland, very nearly one-fourth are natives of Germany, and practically one-eighth are natives of England. Very nearly 10 per cent, also, of the foreign born element in Philadelphia is represented by natives of Russia, and 6 per cent by natives of Italy, these 5 nationalities combined constituting substantially 85 per cent of all the foreign born population in that city.

In St. Louis, which ranks fourth in population, there is a very large German element, that nationality constituting 52.8 per cent of its entire foreign born population in 1900. Ireland has contributed the next largest proportion, or 17.4 per cent, and is followed by England, with 5.2 per cent, and Russia, with 4.3 per cent.

Natives of Ireland constitute somewhat more than one-third of all the foreign born in Boston in 1900, and natives of Canada of English extraction very nearly one-fourth. There is also in the same city approximately 7 per cent each of natives of Russia, Italy, and

England, and a little more than 5 per cent of natives of Germany.

In Baltimore, the last of the 6 great cities of the country, there is very nearly as large a proportion of natives of Germany as there is in St. Louis, this element in Baltimore constituting 48.4 per cent of its foreign born population as compared with 52.8 per cent in St. Louis. The second largest proportion of the total foreign born in Baltimore is represented by natives of Russia, or 15.3 per cent, and the next largest by natives of Ireland, or 14.1 per cent.

Considering the varying proportions of natives of the principal countries found in the different cities, it appears, first, for natives of Germany, that while they constitute about one-fourth of the entire foreign born element in the United States, as shown by the first two columns in table LXXXIII, they constitute very nearly two-thirds of all the foreign born in Cincinnati, substantially three-fifths in Milwaukee, very nearly three-fifths in Louisville, more than one-half in St. Louis, and very nearly one-half in Baltimore.

Natives of Ireland constitute a little more than 15 per cent of all the foreign born in the country, considered as a whole, but in many of the Eastern cities the proportion is more than twice as large, this element representing, in each case, about one-third of all the foreign born in Boston, Cambridge, Jersey City, New Haven, Philadelphia, and Providence. In 3 other cities, namely, Lowell, Washington, and Worcester, this same element represents very nearly as large a proportion, or substantially three-tenths of the entire foreign born element in these cities.

The French-Canadian element represents a very large proportion of all the foreign born in Fall River and Lowell, or 40.3 per cent in Fall River and 35.8 per cent in Lowell, and this element also constitutes not quite 14 per cent of the foreign born population of Worcester.

Natives of Sweden constitute very nearly one-third of all the foreign born in Minneapolis, and this element is also very strong in St. Paul and Worcester, where it constitutes substantially one-fifth of all the foreign born in these two cities.

New Orleans, of all the cities considered, has the largest proportion of natives of Italy, this element constituting 19.3 per cent of all the foreign born in that city, while New Haven has the second largest proportion, or 17.1 per cent. A further inspection of the table shows, similarly, that the largest proportion of natives of Russia is found in Baltimore, the largest proportion of natives of German Poland in Milwaukee, and the largest proportion of natives of Norway in Minneapolis.

FOREIGN PARENTAGE.

An inquiry was made at the census of 1850, for the first time, as to the nativity of each person enumerated, meaning thereby the state, territory, or country of birth. At the census of 1870 this inquiry was extended to include, in addition to the particular place of birth, a statement of the number having fathers and mothers of foreign birth, respectively; but no effort was made at that census to ascertain the nationality of parents according to specified countries. This was done, however, at the census of 1880, and since that date information has been secured decennially concerning the nationality of the parents of each person enumerated.

The statistics relating to parentage in 1880 were completed for only 36 states and territories, including the District of Columbia, and the ratios derived from this partial tabulation were applied to the whole number of persons of the specified nationalities in the United States in order to determine, approximately, the number of persons who had fathers and mothers born as stated, and indirectly the whole number of persons of foreign parentage.

Assuming that the results thus obtained in 1880 are approximately correct, it is possible to show the number and proportion of persons of foreign parentage at each census from 1870 to 1900, inclusive, in comparison with the number and proportion of persons of foreign birth at each census since and including 1850, as indicated by the following summary:

CENSUS YEARS.	Total population considered.	PERSONS OF FOREIGN BIRTH.		PERSONS OF FOREIGN PARENTAGE.	
		Number.	Per cent of total population.	Number.	Per cent of total population.
1900	76,303,387	10,460,085	13.7	26,198,939	34.3
1890	62,622,250	9,249,547	14.8	20,676,046	33.0
1880	50,155,783	6,679,943	13.3	[1]14,922,744	29.8
1870	38,558,371	5,567,229	14.4	10,892,015	28.2
1860	31,443,321	4,138,697	13.2	.....	.....
1850	23,191,876	2,244,602	9.7	.....	.....

[1] Based on partial figures only.

By persons of foreign parentage is meant all persons, whether of native or foreign birth, who have one or both parents foreign born. On this basis there are 26,198,939 persons of foreign parentage in 1900, or 34.3 per cent of the entire population enumerated. There were 20,676,046 persons so returned in 1890, constituting 33 per cent of the population (62,622,250) covered by the general enumeration at that census.

Comparing the figures representing the element of foreign parentage at the last two censuses with similar figures showing the number of persons who are themselves of foreign birth, it appears that, although the foreign born population shows a decrease since 1890 in its proportion to the total population, there has been a slight increase during the same period in the proportion which persons of foreign parentage bear to the entire population. This is due to a considerable diminution in the amount of immigration which has come to this country during the last ten years as compared with the great influx of immigrants during the decade ending in 1890, the children of the foreign immigrants of the preceding decade, or even earlier decades, being classed as native born, while at the same time they help to swell the number and proportion of persons of foreign parentage.

A small number of the persons reported as of foreign birth are themselves of native parentage, so that to a very small extent the number of persons of foreign birth reported at each census is not included in its entirety in the number of persons reported as of foreign parentage. The figures are sufficiently comparable, however, to show the large body of population which must be added to the foreign born element itself in order to ascertain, even approximately, the number of persons of foreign extraction at any of the census periods considered. Moreover, this is the best figure that can be given as expressing the element of our population which is of foreign extraction, as the census inquiry does not go beyond the immediate parents of each person enumerated, and it is impracticable, at least under present conditions, to endeavor to determine the origin of the people beyond a single generation.

With this understanding of what is meant by "persons of foreign parentage," a consideration can be had of the number and proportion of this element found in the several states and territories at the censuses of 1870, 1890, and 1900, respectively, as shown by table LXXXIV.

TABLE LXXXIV.—*Number and percentage of total population of foreign parentage, by states and territories arranged geographically: 1870, 1890, and 1900.*

[1] Includes 91,219 persons in the military and naval service of the United States (including civilian employees, etc.) stationed abroad, not credited to any state or territory.
[2] Dakota territory.

Table LXXXIV shows that more than one-half of the entire population in the North Atlantic division in 1900 is made up of persons of foreign parentage, but the proportions represented by this element in the several states and territories comprising this division vary materially. Considering the percentages somewhat in detail, it appears that while persons of foreign parentage in the division as a whole constitute 51.1 per cent of the total population, this element in Rhode Island constitutes 64.2 per cent, and in Massachusetts 62.3 per cent, of the total population. There is also a very large proportion of persons of foreign parentage in New York, or 59.4 per cent, and in Connecticut, or 57.3 per cent, while the proportion for New Jersey is slightly larger than that for the division itself. Maine, on the other hand, has a very much smaller proportion of persons of foreign parentage in 1900, or 28.8 per cent, and this is also true with respect to Vermont, in which the element of foreign parentage represents only 34.1 per cent of its total population.

In the North Central division, considered in its entirety, persons of foreign parentage constitute 44.2 per cent of its total population in 1900, but the range for the several states comprising this division is very wide, or from 20.1 per cent in Indiana to as high as 77.5 per cent in North Dakota and 74.9 per cent in Minnesota. More than seven-tenths of the population of Wisconsin and more than three-fifths of that of South Dakota are composed of persons of foreign parentage, while in Michigan and Illinois this element represents more than one-half of the total population.

With the exception of New Mexico, there is a large proportion of persons of foreign parentage in the several states and territories comprising the Western division. The largest proportion, or 61.2 per cent, is found in Utah, and the next largest proportions in Montana and California, or 57.3 per cent and 54.9 per cent, respectively. New Mexico has only 16.2 per cent of its population represented by persons of foreign parentage, the next smaller percentage being that for Oregon, or 36.7 per cent.

These are the 3 divisions to which the foreign element of our population has been the most attracted, but in the 2 Southern divisions, which contain only a small proportion of persons of foreign birth or parentage, there is also a wide range in the proportions among the several states and territories comprising them.

In the South Atlantic division about one-fifth of the population of Delaware, Maryland, and the District of Columbia in 1900 is of foreign parentage, but for the remaining states of this division there is only a very small proportion represented by this element. Persons of foreign parentage represent not quite 10 per cent of the population of Florida and a little more than 7 per cent of that of West Virginia; but this element represents less than 3 per cent of the population of Virginia, less than 2 per cent of that of South Carolina and Georgia, and less than 1 per cent of that of North Carolina.

In the South Central division the proportion represented by persons of foreign parentage in 1900 ranges from 1.8 per cent in Mississippi to 15.5 per cent in Texas. Oklahoma contains very nearly as large a proportion as Texas, or 13.6 per cent, while this element represents not quite 12 per cent of the population of Louisiana and not quite 9 per cent of that of Kentucky.

The several elements of the population in 1900 are divided according to the number and proportion of persons of native and foreign parentage in the following summary:

COLOR.	Total population.	PERSONS OF NATIVE PARENTAGE.		PERSONS OF FOREIGN PARENTAGE.	
		Number.	Per cent.	Number.	Per cent.
All classes	76,303,387	50,104,448	65.7	26,198,939	34.3
Total white	66,990,788	41,062,326	61.3	25,928,462	38.7
Native white	56,740,739	41,053,417	72.4	15,687,322	27.6
Foreign white	10,250,049	8,909	0.1	10,241,140	99.9
Total colored	9,312,599	9,042,122	97.1	270,477	2.9

As the term "foreign parentage," as previously explained, includes all persons, either of native or foreign birth, who have one or both parents foreign born, the remainder are considered to be of native parentage. The latter element includes, therefore, all persons, without regard to birth, who have either both parents native born or one parent native born and one parent for whom the birthplace is unknown, and all persons for whom the birthplace of both parents is unknown. This is a matter of convenience purely, inasmuch as the chief purpose is to determine the element of foreign parentage and its proportion to the entire population, and for the further reason that the proportion of persons of "unknown" parentage is very small. With this explanation, the figures contained in the preceding summary can be briefly considered.

Of the entire native white population in 1900, 15,687,322, or 27.6 per cent, are of foreign parentage, while of the 10,250,049 foreign white persons all but 8,909 are of foreign parentage. Not quite 3 per cent of the total colored element of the population is of foreign parentage, comprising principally Chinese and Japanese.

The figures representing persons of native parentage include, as already stated, a very small proportion of persons having either one or both parents of unknown parentage. This is clearly brought out by the following summary, from which it appears that the element of unknown parentage constitutes less than 2 per cent of the whole number of native white persons who have been classed as of native parentage:

PARENTAGE.	Number.	Per cent.
Native white persons of native parentage	41,053,417	100.0
Both parents native	40,329,095	98.3
Father native, mother unknown	89,137	0.2
Father unknown, mother native	129,624	0.3
Both parents unknown	505,561	1.2

The total population enumerated in 1900 comprises, as already stated, 65.7 per cent of persons of native parentage and 34.3 per cent of persons of foreign parentage, apportioned among the white and colored population as follows:

PARENTAGE.	Number.	Per cent.
Total population	76,303,387	100.0
Of native parentage	50,104,448	65.7
Of foreign parentage	26,198,939	34.3
Total white population	66,990,788	87.8
Of native parentage	41,062,326	53.8
Of foreign parentage	25,928,462	34.0
Total colored population	9,312,599	12.2
Of native parentage	9,042,122	11.9
Of foreign parentage	270,477	0.3

The number and proportion of persons of foreign parentage among the white and colored elements of the population in 1900 are shown by states and territories in table LXXXV (page clxxxv).

The proportion of white persons of foreign parentage differs from that for all persons of foreign parentage in certain of the states, particularly in the 2 Southern divisions, where there is a large colored population, but among which the element of foreign parentage is very small. The proportion of white persons of foreign parentage in Hawaii is small as compared with the proportion among its entire population, on account of its large Chinese and Japanese population, all of which is practically of foreign parentage.

In a few of the states, particularly in the Western division, there is a large proportion of colored persons of foreign parentage, due to the presence in these states of a considerable Chinese and Japanese population.

The total number of white persons of foreign parentage in each state and territory in 1900 is shown graphically by the diagram on plate 18.

A further distribution of persons of foreign parentage, according to the number having either both parents foreign born or one parent foreign born and one parent native born, is shown by the following summary:

PARENTAGE.	TOTAL PERSONS OF FOREIGN PARENTAGE.		WHITE PERSONS OF FOREIGN PARENTAGE.		NATIVE WHITE PERSONS OF FOREIGN PARENTAGE.		FOREIGN WHITE PERSONS OF FOREIGN PARENTAGE.		COLORED PERSONS OF FOREIGN PARENTAGE.	
	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.
The United States	26,198,939	100.0	25,928,462	100.0	15,687,322	100.0	10,241,140	100.0	270,477	100.0
Both parents foreign	21,074,679	80.4	20,839,260	80.4	10,659,912	68.0	10,179,348	99.4	235,419	87.0
Father foreign, mother native	3,425,501	13.1	3,402,237	13.1	3,356,630	21.4	45,607	0.4	23,264	8.6
Father native, mother foreign	1,698,759	6.5	1,686,965	6.5	1,670,780	10.6	16,185	0.2	11,794	4.4

Of the entire white element of foreign parentage, more than four-fifths have both parents foreign born, but among the colored persons of foreign parentage the purely foreign element represents 87 per cent of the whole number.

The element of the population that is wholly of foreign parentage is further distributed in the following summary, according to the number and proportion having both parents born in the same country and the number and proportion that are of "mixed foreign parentage;" that is, those having fathers born in Austria and mothers born in Germany, fathers born in England and mothers born in Scotland, fathers born in France and mothers born in Germany, and so on:

PARENTAGE.	TOTAL PERSONS OF FOREIGN PARENTAGE.		WHITE PERSONS OF FOREIGN PARENTAGE.		NATIVE WHITE PERSONS OF FOREIGN PARENTAGE.		FOREIGN WHITE PERSONS OF FOREIGN PARENTAGE.		COLORED PERSONS OF FOREIGN PARENTAGE.	
	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.
The United States	26,198,939	100.0	25,928,462	100.0	15,687,322	100.0	10,241,140	100.0	270,477	100.0
Both parents born in the same country	19,734,001	75.3	19,500,353	75.2	9,600,310	61.2	9,900,043	96.7	233,648	86.4
Of mixed foreign parentage	1,340,678	5.1	1,338,907	5.2	1,059,602	6.8	279,305	2.7	1,771	0.6
One parent foreign, one parent native	5,124,260	19.6	5,089,202	19.6	5,027,410	32.0	61,792	0.6	35,058	13.0

This summary shows that of the 26,198,939 persons of foreign parentage in 1900, 19,734,001, or 75.3 per cent, are of the same foreign extraction, that is, have both parents of the same nationality, while 1,340,678, or 5.1 per cent, are of mixed foreign parentage, and 5,124,260, or 19.6 per cent, are partly of foreign and partly of native parentage.

The distribution of white persons of foreign parentage, on the same basis, does not differ particularly from that given for all persons of foreign parentage, but among native white persons of foreign parentage there is a somewhat different distribution. Of this element only a little more than three-fifths have both parents born in the same country, while very nearly one-third have one parent foreign and one parent native born.

The number of native white persons of foreign parentage in 1900 and the percentage which they constitute, in each case, of the total population, are shown by states and territories in table LXXXVI (page clxxxvi)

TABLE LXXXV.—*Number and percentage of white and colored population of foreign parentage, by states and territories arranged geographically: 1900.*

[1] Includes persons in the military and naval service of the United States (including civilian employees, etc.) stationed abroad, not credited to any state or territory.

Table LXXXVI shows that, with the single exception of New Hampshire, native white persons of foreign parentage constitute a larger percentage of the total population in 1900 than foreign white persons of foreign parentage, and this is due in part to the difference in the distribution of the foreign born element over the country and in part to the decreased amount of immigration which has come to this country since 1890. The large proportion of foreign white persons of foreign parentage in New Hampshire is due to the presence in that state of a very considerable element of French-Canadian extraction.

In many of the principal cities of the country there is a large element of foreign parentage, owing to the concentration in cities of a considerable proportion of the entire foreign population, both of birth and extraction, as shown by table LXXXVII.

TABLE LXXXVII.—*Number of persons of foreign parentage, and percentage of total population, for cities having 25,000 inhabitants or more: 1900.*

CITIES.	Total population.	TOTAL PERSONS OF FOREIGN PARENTAGE.		WHITE PERSONS OF FOREIGN PARENTAGE.		NATIVE WHITE PERSONS OF FOREIGN PARENTAGE.		FOREIGN WHITE PERSONS OF FOREIGN PARENTAGE.		COLORED PERSONS OF FOREIGN PARENTAGE.[1]	
		Number.	Per cent of total population.	Number.	Per cent of total population.	Number.	Per cent of total population.	Number.	Per cent of total population.	Number.	Per cent of total population.

[1] Persons of negro descent, Chinese, Japanese, and Indians. [2] Less than one-tenth of 1 per cent.

Persons of foreign parentage comprise from three-fourths to more than four-fifths of the total population of very many of the principal cities in 1900, the largest proportions being found in Fall River, Woonsocket, Holyoke, Lawrence, Milwaukee, and Hoboken, in the order named. More than three-fourths of the population of New York and Chicago is made up of persons of foreign parentage, Chicago having the larger proportion, or 77.4 per cent as against 76.9 per cent for New York city. Boston has very nearly as large a proportion of foreign parentage, or 72.2 per cent, while in St. Louis this element constitutes 61 per cent of its entire population.

The number of persons of foreign parentage in each state and territory and in each principal city is distributed according to the number having one or both parents born in foreign countries, in tables 36 to 66 (pages 807–905) of the general tables, but comprehending only those countries from which the major portion of the foreign element has come, as considerations of space do not permit the presentation of every country represented by the foreign born population.

Persons of foreign parentage are classified in table LXXXVIII, according to the number having either both parents born in specified countries or one parent so born and one parent native born.

TABLE LXXXVIII.—*Number of persons of foreign parentage, distributed according to the number having one or both parents born in specified countries: 1900.*

[1] Persons of negro descent, Chinese, Japanese, and Indians. [2] Includes Newfoundland.

The entire element of foreign parentage, without respect to color, is distributed according to the percentage having either one or both parents born in specified countries, as shown by the following summary:

SPECIFIED COUNTRIES.	PERSONS OF FOREIGN PARENTAGE.		
	Total.	Having both parents born as specified.	Having one parent born as specified and one parent native.
	Per cent.	*Per cent.*	*Per cent.*
All classes	100.0	80.4	19.6
Austria	1.7	1.6	0.1
Bohemia	1.4	1.3	0.1
Canada (English)[1]	5.0	2.6	2.4

Switzerland	1.0	0.7	0.3
Wales	1.0	0.7	0.3
Other countries	4.1	3.5	0.6
Of mixed foreign parentage	5.1	5.1	.....

[1] Includes Newfoundland. [2] Less than one-tenth of 1 per cent.

This summary shows, for illustration, that persons having both parents born in Germany constitute 23.8 per cent of the whole number of persons of foreign parentage, while those having one parent born in Germany and one parent native constitute 6.1 per cent. The entire element of German parentage, therefore, represents very nearly three-tenths of all the persons of foreign parentage in 1900 as against 19 per cent for persons of Irish parentage and 8.2 per cent for persons of English parentage.

The following summary shows the percentage of white persons having either both parents born in each specified country or one parent so born and one parent native born:

SPECIFIED COUNTRIES.	WHITE PERSONS OF FOREIGN PARENTAGE.	
	Having both parents born as specified.	Having one parent born as specified and one parent native.
	Per cent.	*Per cent.*
Austria	93.9	6.1
Bohemia	91.2	8.8
Canada (English)[1]	51.9	48.1
Canada (French)[1]	78.4	21.6

[1] Includes Newfoundland.

SPECIFIED COUNTRIES.	WHITE PERSONS OF FOREIGN PARENTAGE.	
	Having both parents born as specified.	Having one parent born as specified and one parent native.
	Per cent.	*Per cent.*
Denmark	86.5	13.5
England	63.6	36.4
France	64.5	35.5
Germany	79.7	20.3
Hungary	97.2	2.8
Ireland	80.4	19.6
Italy	96.5	3.5
Norway	86.9	13.1
Poland	97.2	2.8
Russia	97.8	2.2
Scotland	67.6	32.4
Sweden	92.1	7.9
Switzerland	73.7	26.3
Wales	70.3	29.7
Other countries	81.7	18.3

The smallest proportion of white persons having both parents born in the same country is shown for persons of English-Canadian parentage, or 51.9 per cent; that is to say, this element of foreign parentage is very nearly evenly divided between those persons who are wholly of English-Canadian parentage and those who are partly of English-Canadian parentage and partly of native parentage. These figures are indicative, therefore, of the extent to which natives of English Canada have intermarried with natives of this country, although it must be remembered that the statistics of foreign parentage relate to but a single generation, as previously explained. The summary also shows that, on the same basis, there has been a considerable intermarriage between natives of this country and natives of England, France, Scotland, Wales, and Switzerland, in the order named. The countries thus far mentioned are those from which immigration has been received from the earliest periods, and it is possible that these relatively large proportions are due in part to the intermarriage of natives of those countries and natives of this country who are themselves of the same parentage. The least evidence of intermarriage with natives of this country is shown for Russia, Hungary, Poland, Italy, Austria, and Bohemia, countries from which no considerable amount of immigration has been received except in recent years. Of the whole number of persons of Swedish parentage very nearly all, or 92.1 per cent, have both parents born in Sweden, and this large percentage can be contrasted with 86.5 per cent for persons of Danish parentage and 86.9 per cent for persons of Norwegian parentage.

There is a large excess of white persons having foreign born fathers as compared with the number having foreign born mothers, and this is true, with one excep-

tion, when considered with respect to the nationality of the parents, as shown by the following summary:

SPECIFIED COUNTRIES.	Number of white persons having fathers born as specified.	Number of white persons having mothers born as specified.	Excess of white persons having fathers born as specified.	Excess of white persons having mothers born as specified.
All classes	24,241,497	22,526,225	1,715,272

Other countries	838,952	780,979	57,973	

[1] Includes Newfoundland.

From this summary it appears that there are 24,241,497 white persons having foreign born fathers as compared with 22,526,225 white persons having foreign born mothers, or an excess of those having foreign born fathers of 1,715,272. The one nationality for which there is an excess of foreign born mothers is that of English Canada, but the difference in favor of white persons having mothers so born is very small. There is a large excess of white persons having fathers born in Germany, this excess being equivalent to a little more than 10 per cent of the whole number of white persons having fathers born in that country. There is about the same proportionate excess of fathers born in England, and about one-half the amount proportionally for white persons having fathers born in Ireland. The excess of white persons having fathers born in the different countries specified is offset by a corresponding excess, in each case, of native born mothers, showing that relatively there has been a larger proportion of marriages between foreign born men and native women than there has been between foreign born women and males of native birth. This is a condition to be expected, however, owing to the large excess of males among the foreign immigrants, and to the further fact that this foreign male element is largely composed of adults. This point is brought out somewhat more clearly by the following summaries:

SPECIFIED COUNTRIES.	Total white persons having foreign fathers.	WHITE PERSONS HAVING FATHERS BORN AS SPECIFIED.

[1] Includes Newfoundland.

The first summary relates wholly to white persons having fathers born in certain specified countries, and shows the number and percentage having mothers born in the same country, having mothers born in other

foreign countries, or having native born mothers. A corresponding distribution is made in the second summary for white persons having mothers born in certain specified countries, and from these two summaries it is apparent that native born women have intermarried most frequently with natives of those countries from which the earliest as well as the largest contributions to the foreign born population have been received. These figures are not, therefore, thoroughly indicative of the amount of intermarriage between native born women of American parentage and natives of the different foreign countries, as many of the native born women themselves are undoubtedly of foreign extraction.

The 1,340,678 persons of mixed foreign parentage, previously referred to, are distributed by states and territories, in detail by combinations of parentage, in table 56 (page 850) of the general tables. The number of persons represented by the principal combinations of parentage are reproduced, for the United States as a whole, in the following summary:

FATHER BORN IN—	MOTHER BORN IN—	Persons of mixed foreign parentage.

Total for principal combinations.		1,067,137

The principal combinations of parentage shown in the above summary represent 1,067,137 persons, or practically four-fifths of the entire number of persons of mixed foreign parentage. It includes only the leading combinations of parentage which comprise specific countries, and does not include any combination represented in whole or in part by the designation "other countries" as used in table 56 of the general tables, as the use of such combinations in this connection would be meaningless. The figures thus presented afford partial information as to the extent to which natives of the countries specified have intermarried. For example, it appears that of the whole number of persons of mixed foreign parentage, 14,938 persons have fathers born in Austria and mothers born in Germany, 41,861 persons have fathers born in English Canada and mothers born in Ireland, 92,003 persons have fathers born in England and mothers born in Ireland, 27,927 persons have fathers born in France and mothers born in Germany, 42,523 persons have fathers born in Germany and mothers born in Ireland, and so on. In certain cases the principal combinations used in the above summary show the reverse of these figures, as, for instance, 12,419 persons having fathers born in Germany and mothers born in Austria, 23,290 persons having fathers born in Germany and mothers born in France, and 14,643 persons having fathers born in Ireland and mothers born in Germany.

A detailed presentation is made by states and territories, in table LXXXIX, for all white persons of foreign parentage distributed according to the number and percentage of such persons having either one or both parents born in the specified countries.

Table LXXXIX shows a distribution of the white population of foreign parentage in the several states and territories, according to the nationality of the parents, and shows very clearly, first, the predominating element or elements of foreign parentage in each state and territory, and, second, the different states and sections of the country in which persons of the principal nationalities are largely concentrated.

TABLE LXXXIX.—*Number and percentage of white persons of foreign parentage having either one or both parents born in specified countries, by states and territories arranged geographically: 1900.*

[1] Includes persons in the military and naval service of the United States (including civilian employees, etc.) stationed abroad, not credited to any state or territory.
[2] Less than one-tenth of 1 per cent.

CITIZENSHIP, AND YEARS IN THE UNITED STATES.

Detailed presentations are contained in the general tables (pages 907–1006) relating to citizenship and years in the United States, in which the native and foreign born males of voting age are classified according to general nativity, color, citizenship, literacy, place of birth, and parentage, and the entire foreign born population, including males of voting age, according to the number of years they have been in the United States. These presentations are made for the several states and territories, and for the 161 principal cities of the country, and, in addition, a detailed presentation is made by counties, in table 92 (page 970) of the general tables, giving all the essential facts with respect to the citizenship and literacy of males of voting age, as required by section 7 of the census act.

CITIZENSHIP.

The potential voting strength of the nation and of each state and territory is expressed by the number of its males 21 years of age and over, but by this is not meant the actual number of voters in the several states and territories. It represents, rather, the number of males who from the standpoint of age alone are eligible to vote, aside from any qualifications based upon education, length of residence, or considerations of a like nature imposed by the national or state governments.

On this basis there are, for the entire area of enumeration in 1900, 21,329,819 males of voting age, including 226,837 such males reported in Alaska, Hawaii, Indian Territory, and on Indian reservations situated in certain of the states and territories, areas specially enumerated in 1890 but for which no separate tabulation of males of voting age was made at that census. In order to determine the increase in this class of males from 1890 to 1900 it is necessary, therefore, to exclude the above number of males reported in 1900 for the areas specially enumerated in 1890, as shown by the following summary:

GENERAL NATIVITY AND COLOR.	MALES OF VOTING AGE.			INCREASE FROM 1890 TO 1900.	
	1900		1890	Number.	Per cent.
	Entire area of enumeration.	Exclusive of areas specially enumerated in 1890.			
Aggregate	21,329,819	21,102,982	16,940,311	4,162,671	24.6
Native born	16,227,285	16,082,261	12,591,852	3,490,409	27.7
Foreign born	5,102,534	5,020,721	4,348,459	672,262	15.5
Native white — native parents.	10,636,898	10,535,748	8,807,223	1,728,525	19.6
Native white — foreign parents.	3,466,721	3,458,556	2,150,273	1,308,283	60.8
Foreign white	4,932,524	4,914,173	4,242,360	671,813	15.8
Colored	2,293,676	2,194,505	1,740,455	454,050	26.1
Persons of negro descent.	2,065,989	2,056,552	(1)	.....	.....

[1] Not separately stated in 1890.

From this summary it appears that, exclusive of the areas specially enumerated in 1890, there has been an increase in males of voting age during the past ten years of 4,162,671, or 24.6 per cent, as compared with an increase in the general population of 20.7 per cent for the same area and of 21 per cent for the entire area of enumeration in 1900, as shown by table VI (page xxi). Native born males of voting age have increased 27.7 per cent and foreign born males of voting age 15.5 per cent since 1890 as against an increase in native born population of 22.4 per cent and in foreign born population of 11.9 per cent. There has been a very large increase during the decade in native white males of voting age who are of foreign parentage, or an increase of 60.8 per cent as compared with an increase of only 36.1 per cent for all native white persons of foreign parentage. In each of the other elements of the population the males of voting age show larger percentages of increase than for each element as a whole, as follows: Native white of native parents—all persons, 18.5 per cent; males of voting age, 19.6 per cent. Foreign white—all persons, 12.1 per cent; males of voting age, 15.8 per cent. Colored—all persons, 18.8 per cent; males of voting age, 26.1 per cent.

The number of males of voting age in 1900, classified by general nativity and color, is presented by states and territories in table XC (page cxcix).

The relative proportions of native and foreign born males of voting age in the several states and territories in 1900 are contrasted in table XCI (page cc), with similar results for 1890, the percentages in the latter case being based upon the figures contained in the printed report for that census, as previously explained.

TABLE XC.—*Males of voting age, by general nativity and color, by states and territories arranged geographically: 1900.*

Hawaii	16.4	83.6	.....	.....

For the entire area of enumeration in 1900 native born males of voting age constitute 76.1 per cent and foreign born males of voting age 23.9 per cent of all males of voting age, as compared with 74.3 per cent and 25.7 per cent, respectively, in 1890. There is a somewhat larger proportion of foreign born males of voting age in 1900, as compared with 1890, in Maine, New Hampshire, Massachusetts, Rhode Island, Connecticut, and New Jersey, the largest relative increases being found in New Hampshire and Connecticut. All the remaining states and territories in the United States proper show a decrease in the proportion of foreign born males of voting age in 1900 as compared with the preceding census, the largest relative decreases being found in Arizona, Nevada, California, Idaho, Wisconsin, Minnesota, Utah, and North Dakota. These differences in the proportions shown now as compared with ten years ago are due, as previously explained, to the change in the character of the immigration since 1890 and to the fact that practically all the increase in foreign born since 1890 is found in the Northeastern section of the country.

Males of voting age in 1900 in the several states and territories are further distributed by percentages, according to general nativity and color, in table XCII, similar percentages also being given for 1890, based upon the figures contained in the printed report of that census, as previously explained.

TABLE XCII.—*Percentage of native and foreign white and colored of total males of voting age, by states and territories arranged geographically: 1890 and 1900.*

[1] Persons of negro descent, Chinese, Japanese, and Indians.

Males of voting age, as shown by table XCII, are distributed by general nativity and color, for the entire area of enumeration in 1900, as follows: Native white—native parents, 49.9 per cent; native white—foreign parents, 16.2 per cent; foreign white, 23.1 per cent; colored, 10.8 per cent. These percentages, when compared with similar percentages for 1890, show a relative increase of 3.5 per cent for the native white of foreign parents and five-tenths of 1 per cent for the colored, and a relative decrease of 2.1 per cent for the native white of native parents and 1.9 per cent for the foreign white. Native white males of voting age who are of foreign parentage show a relative increase in their proportion in 1900, as compared with 1890, throughout the entire country, while colored males of voting age have increased relatively, with few exceptions, throughout the Northern and Western sections of the country, the most noticeable exception among the latter element being in California, owing principally to the large decrease in the Chinese population. In many of the Southern states and territories, however, the colored element of voting age shows a decreased proportion, and this decrease is specially noticeable in Virginia, North Carolina, South Carolina, and Louisiana, states in which the colored element is composed mainly of persons of negro descent. Foreign white males of voting age show an increased proportion, as compared with ten years ago, in all the New England states, except Vermont, and in New Jersey, but this element has decreased relatively in all of the remaining states and territories, the decrease as a whole being from 25 per cent in 1890 to 23.1 per cent in 1900, as already stated. Among the native white males of voting age who are of native parentage there has been a decrease since 1890 in their proportion in all the Northern and Western states, with the exception of Nevada, Idaho, and California, but in many of the Southern states and territories there has been a slight relative increase among this element.

If the number of potential voters is compared with the total population in 1900, it is seen that there are, on the average, 3.6 persons to each potential voter. This average varies, however, for the several elements of the population according to the proportion (or percentage) of potential voters among the whole number of persons in each case, as shown by the following summary:

GENERAL NATIVITY AND COLOR.	Total persons.	Potential voters.	Percentage of potential voters of total persons.	Average number of persons to each potential voter.
Aggregate	76,303,387	21,329,819	28.0	3.6
Native white—native parents	41,053,417	10,636,898	25.9	3.9
Native white—foreign parents	15,687,322	3,466,721	22.1	4.5
Foreign white	10,250,049	4,932,524	48.1	2.1
Colored	9,312,599	2,293,676	24.6	4.1
Negro	8,840,789	2,065,989	23.4	4.3
Chinese	119,050	103,006	86.5	1.2
Japanese	86,000	59,054	68.7	1.5
Indian	266,760	65,627	24.6	4.1

The ratio of potential voters to total population in 1900, that is, the average number of persons to each potential voter, is shown for the several states and territories in table XCIII.

TABLE XCIII.—*Ratio of potential voters to total population, by states and territories arranged geographically: 1900.*

Oklahoma	398,331	109,191	3.6
Arkansas	1,311,564	313,836	4.2
Western division	4,091,349	1,447,604	2.8
Montana	243,329	101,931	2.4
Wyoming	92,531	37,893	2.4
Colorado	539,700	185,708	2.9
New Mexico	195,310	55,067	3.5
Arizona	122,931	44,081	2.8
Utah	276,749	67,172	4.1
Nevada	42,335	17,710	2.4
Idaho	161,772	53,932	3.0
Washington	518,103	195,572	2.6
Oregon	413,536	144,446	2.9
California	1,485,053	544,087	2.7
Alaska	63,592	37,956	1.7
Hawaii	154,001	79,607	1.9

Table XCIII shows that in the North Atlantic and North Central divisions there is not a wide variation in the ratio of potential voters to total population in the several states comprising these two divisions, the average number of persons to each potential voter ranging from 3.1 to 3.5 in the first named division and from 3.4 to 3.6 in the last named division.

In the South Central division, aside from Oklahoma, there is no great variation in the ratios, but, with the exception of Oklahoma, the ratios are very much higher than those indicated for the Northeastern and North Central sections of the country, ranging from 3.9 to 4.4 persons to each potential voter.

In the South Atlantic division there is a wide range in the ratios, varying from 3.3 for the District of Columbia to as high as 4.7 for South Carolina, the average for the division as a whole being 4.2 persons.

There is even a more marked variation in the ratios in the Western division of states and territories, or from 2.4 in Montana, Wyoming, and Nevada to 4.1 in Utah, the average for the division as a whole being 2.8 persons.

In Alaska and Hawaii there are on the average less than 2 persons to each potential voter, or 1.7 and 1.9, respectively.

It is apparent, therefore, from these varying ratios of potential voters to population that there is no fixed ratio which can be used in determining the population of different areas, but that this is a matter which depends largely upon the constitution of the population, the ratio being larger or smaller according to the predominance of the several elements of which it is composed.

The number of males of voting age in each state and territory in 1900 is classified according to literacy, in detail by general nativity and color, in tables 67 to 69 (pages 909–912) of the general tables, and from these tables are derived the number and percentage of illiterate males of voting age shown in tables XCIV, XCV, and XCVI (pages cciv–ccvi), respectively. No comparison can be made with similar results for 1890, as no separate tabulation of males of voting age according to literacy was made at that census.

The percentages of literate and illiterate males of voting age, in the aggregate and for each of the several elements, together with the number of males in each class, are summarized, for the entire area of enumeration in 1900, as follows:

GENERAL NATIVITY AND COLOR.	MALES OF VOTING AGE.				
	Total number.	Literate.		Illiterate.	
		Number.	Per cent.	Number.	Per cent.
Aggregate	21,329,819	19,002,279	89.1	2,327,540	10.9
Native born	16,227,285	14,519,747	89.5	1,707,538	10.5
Foreign born	5,102,534	4,482,532	87.8	620,002	12.2

Native white—foreign parents.	3,466,721	3,397,637	98.0	69,084	2.0
Foreign white	4,932,524	4,366,987	88.5	565,537	11.5
Colored	2,293,676	1,220,423	53.2	1,073,253	46.8
Persons of negro descent.	2,065,989	1,088,940	52.7	977,049	47.3
Chinese	103,006	70,804	68.7	32,202	31.3
Japanese	59,054	39,031	66.1	20,023	33.9
Indian	65,627	21,648	33.0	43,979	67.0

The above summary shows that of the 21,329,819 males of voting age in 1900, 19,002,279, or 89.1 per cent, are literate and 2,327,540, or 10.9 per cent, are illiterate. By "illiterate" is meant all persons who can neither read nor write, or who can read but not write. There is a very large percentage of illiterates among each of the several classes of colored males of voting age and a considerable proportion also among foreign white males of voting age. Of the two classes of native white males of voting age much the larger proportion of illiterates is found among those of native parentage, 5.8 per cent of this class of voters being illiterate as compared with 2 per cent for native white males of voting age who are of foreign parentage.

TABLE XCIV.—*Number and percentage of illiterate native and foreign born males of voting age, by states and territories arranged geographically: 1900.*

[1] Includes all persons of negro descent.
[2] Includes persons in the military service of the United States (including civilian employees, etc.) stationed abroad, not credited to any state or territory.
[3] Includes 454 persons of mixed parentage; that is, of native Indian and Russian or other parentage.

The number and proportion of illiterate males of voting age among the several elements of the population are shown in detail for the 38 cities having in 1900 upward of 100,000 inhabitants in tables XCVII and XCVIII.

The largest proportions of illiterates in the 38 cities considered are found in Memphis, New Orleans, Fall River, and Scranton, due in the case of the first two cities named to their large colored population, and in the last two cities named to their large foreign born population.

TABLE XCVII.—*Number and percentage of illiterate native and foreign born males of voting age, for cities having 100,000 inhabitants or more: 1900.*

[1] Persons of negro descent, Chinese, Japanese, and Indians.

For the entire area of enumeration in 1900 there are 5,102,534 foreign born males of voting age, representing 48.8 per cent of the total foreign born population (10,460,085) returned at the present census. Excluding from this number of potential voters of foreign birth 78,010 such persons reported in Alaska and Hawaii in 1900, there remains a total of 5,024,524, which number can be compared directly with the 4,348,459 foreign born males of voting age reported in 1890. From these figures it appears, therefore, that there has been an increase since 1890 in potential voters of foreign birth of 676,065, or 15.5 per cent, as compared with an increase in the total foreign born population of 11.7 per cent.

The following summary shows the number and percentage of foreign born males of voting age at the last two censuses who have been naturalized, who have taken out first naturalization papers, or who are aliens:

CITIZENSHIP.	1900				1890	
	Entire area of enumeration.		Exclusive of Alaska and Hawaii.		Number.	Per cent.
	Number.	Per cent.	Number.	Per cent.		
Aggregate	5,102,534	100.0	5,024,524	100.0	4,348,459	100.0
Naturalized	2,862,546	56.1	2,856,758	56.8	2,545,753	58.5
First naturalization papers filed.	416,863	8.2	415,043	8.3	236,061	5.4
Aliens	1,070,126	21.0	1,004,217	20.0	1,189,452	27.4
Unknown	752,999	14.7	748,506	14.9	377,193	8.7

Considering the figures for the entire area of enumeration in 1900, as shown by the above summary, it appears that of the 5,102,534 foreign born males of voting age 56.1 per cent are naturalized, 8.2 per cent have taken out first naturalization papers, 21 per cent have taken no steps toward naturalization, that is, are aliens, and 14.7 per cent have made no return with respect to citizenship. These percentages do not differ particularly from those for foreign born males of voting age in the United States, exclusive of Alaska and Hawaii (third and fourth columns of summary), but if the latter figures are compared with the percentages given for 1890, it is seen that there is in 1900 a somewhat smaller proportion of naturalized males of voting age and of aliens, a larger proportion of those who have filed their first naturalization papers, and a considerably larger proportion of those for whom no information as to citizenship has been returned.

The very large increase in the proportion at the present census of foreign born males of voting age for whom no return as to citizenship was made would seem to be due on the face of the figures to one of two things—that is, either to the failure of the census enumerators throughout the country generally to secure this information for a larger proportion of the foreign born males of voting age in 1900 than was the case in 1890, or to a failure in this respect on the part of the enumerators in the cities principally, owing to the increased difficulty in securing the proper enumeration of the large foreign born population living in the cities, especially that portion which has only recently come into the country. An examination of the figures bearing upon this point shows that the failure to secure this information is, on the whole, more apparent in the rural and semi-rural sections of the country than in the larger cities of the country, and this was also true, but to a less extent proportionally, in 1890. It is reasonable to suppose, therefore, that the increased proportion of persons for whom this information is not reported is due simply to a greater failure on the part of the enumerators at the census of 1900 to secure a proper return concerning citizenship. This statement is further confirmed by the fact that for very nearly all of those foreign born persons in 1900 for whom no information was secured as to the number of years they have been in the United States there was also no return made as to their citizenship. This being the case, it seems proper to eliminate for both censuses the unknown quantity with respect to citizenship, in order to determine whether or not there has been any increase since 1890 in the proportion of foreign born males of voting age who have become naturalized. Ignoring, therefore, the element in 1900 and in 1890 for whom the facts as to citizenship are unknown, it appears that of the 4,349,535 persons for whom a return as to citizenship is made in 1900, 2,862,546, or 65.8 per cent, have been naturalized; 416,863, or 9.6 per cent, have taken out their first naturalization papers; and 1,070,126, or 24.6 per cent, are aliens, that is, either they have not been in this country long enough to take the necessary steps toward acquiring citizenship, or, if they have been here a sufficient length of time, they have not in fact become naturalized. At the census of 1890 there were 3,971,266 persons for whom a return as to citizenship was obtained, and of this number 64.1 per cent had been naturalized, 5.9 per cent had taken out their first naturalization papers, and 30 per cent were aliens. If these figures represent approximately true conditions with respect to citizenship at each census, then there is now, as compared with ten years ago, a considerably larger proportion of naturalized citizens among the foreign born element of the voting population and a very much less proportion of aliens. In fact, considered absolutely, there has been a considerable diminution in the number of aliens during the past ten years, although there has been a large increase in the whole number of foreign born males of voting age. This decrease in the absolute number of aliens is to be expected, both on account of the excessive immigration which came during the latter years of the decade ending in 1890, and on account of the decrease in the number of immigrants during the decade just closed.

Comparing the figures by geographical divisions for the United States proper, it appears that there has been a considerable decrease in the proportion of aliens in each of the 5 divisions and a corresponding increase in the proportion of those who have either become citizens or have taken the first steps toward naturalization. These results are summarized for 1890 and 1900 as follows:

GEOGRAPHICAL DIVISIONS.	Aggregate.	NATURALIZED.		FIRST NATURALIZATION PAPERS FILED.		ALIENS.	
		Number.	Per cent.	Number.	Per cent.	Number.	Per cent.
1900.

Foreign born males of voting age in 1900 are distributed according to citizenship and literacy, by states and territories, in table XCIX (page ccxi). Disregarding the number of persons for whom the facts as to citizenship were not ascertained, as in the preceding summary, the proportions of foreign born males of voting age in 1900 who are naturalized or have taken out first naturalization papers are compared with similar proportions for 1890 in table C (page ccxii).

According to the percentages shown in table C, every state in the North Atlantic division shows a decrease in the proportion of aliens in 1900 as compared with 1890, the largest decrease being that for Rhode Island, which is offset by the large increase in the proportion of those who have been naturalized. There is in New York, New Jersey, and Pennsylvania, a slightly less proportion of naturalized males of voting age, and a considerable increase in the proportion of those who have taken out their first naturalization papers.

In the South Atlantic division there is a decrease in the proportion of aliens since 1890 in every state except West Virginia. In this state there is a very large increase in the proportion of aliens, due to the introduction of a considerable foreign element which has only recently come to this country. South Carolina has substantially the same proportion of naturalized males of voting age in 1900 as it had in 1890, but there is a slight increase in the proportion of those who have taken out their first naturalization papers.

All the states in the North Central division show a smaller proportion of aliens in 1900, but in two of these states, namely, Indiana and Wisconsin, there is a very large increase in the proportion of potential voters of foreign birth who have filed their first naturalization papers, resulting in each case in a considerably decreased proportion of potential voters who have been naturalized. There is only a slight increase in the proportion of naturalized males in South Dakota, Nebraska, and Kansas, the considerable decrease in the proportion of aliens in these states being practically offset by the larger proportion of those who have taken out their first naturalization papers.

Among the states of the South Central division there is a largely increased proportion of males in Texas and Oklahoma who have filed their first naturalization papers, which is offset by a decrease in the proportion of both the naturalized and alien elements.

All the states and territories of the Western division show a decreased proportion of aliens in 1900, and in Colorado this decrease is largely offset by a material increase in the proportion of those who have filed their first naturalization papers.

TABLE XCIX.—*Foreign born males of voting age, classified according to citizenship and literacy, by states and territories arranged geographically: 1900.*

The number of foreign born males of voting age, classified with respect to citizenship and literacy, is shown for the principal cities in 1900 in table 82 (page 936) of the general tables, and from the figures contained in this table is derived table CI, showing, for the 38 cities containing 100,000 inhabitants or more, the proportions of naturalized and aliens among the foreign born males of voting age in 1900. In this table, as in the similar table for states and territories, the unknown element of citizenship has been disregarded.

TABLE CI.—*Percentage of foreign born males of voting age, distributed according to citizenship, for cities having 100,000 inhabitants or more: 1900.*

Scranton, Pa	72.8	5.6	21.6
Syracuse, N. Y	81.0	5.6	13.4
Toledo, Ohio	86.1	3.6	10.3
Washington, D. C	74.3	7.3	18.4
Worcester, Mass	47.8	8.0	44.2

Fall River, of all the cities considered, shows the largest proportion of aliens, or 47.2 per cent, while Worcester has the next largest proportion, or 44.2 per cent. The smallest proportions of aliens in the larger cities of the country are found in Columbus and Cincinnati, in which cities this element represents substantially 6 per cent of the whole number of foreign born males of voting age. In Milwaukee, Minneapolis, and Omaha there is a con-

siderable proportion of foreign born males who have taken out their first naturalization papers, the proportion in Milwaukee being somewhat higher even than that shown for the state of Wisconsin as a whole.

The number of illiterates among foreign born males of voting age, classified by citizenship, is shown by states and territories in 1900 in table CII (page ccxiv).

There is a large percentage of illiterates among the alien element of the foreign born population of voting age, representing, for the entire area of enumeration in 1900, 28.1 per cent of the whole number of aliens. The largest percentage of illiterate aliens is found in Louisiana, where they constitute fully one-half of all the aliens in that state. There is very nearly the same proportion of illiteracy among aliens in West Virginia, or 49.4 per cent, and this is also true with respect to New Mexico, Arizona, and Texas, where the illiterate aliens constitute of all aliens 47.1 per cent, 46.2 per cent, and 44.8 per cent, respectively.

Among the naturalized males of voting age the illiterates constitute, for the entire area of enumeration in 1900, only 6.3 per cent, but in many of the states and territories there is a very considerable percentage of illiterates among this class of potential voters, the largest percentages shown being 20.2 in Vermont, 18.4 in New Mexico, and 18.1 in Hawaii.

Foreign born males of voting age who have taken out first naturalization papers show, for the entire area of enumeration in 1900, very nearly twice as large a proportion of illiterates as that for naturalized males of voting age, but a very much smaller proportion than that reported for the alien element of voting age, or 11.8 per cent as compared with 6.3 per cent for the former and 28.1 per cent for the latter element. The percentages of illiterates for this class of potential voters vary considerably in the several states and territories comprising the United States proper, ranging from as high as 36.6 per cent in Texas to as low as 4.3 per cent in Oregon. Hawaii shows even a larger percentage than Texas, or 45.8.

There is a large proportion of illiterates among the alien element in very nearly all of the larger cities of the country, as shown by table CIII.

TABLE CIII.—*Number and percentage of illiterate foreign born males of voting age, in detail according to citizenship, for cities having 100,000 inhabitants or more: 1900.*

More than one-third of all the aliens in 1900 can not speak the English language, as shown by table CIV (page ccxvi), in which foreign born males of voting age in the several states and territories are classified according to citizenship and inability to speak English.

Briefly analyzing the results shown in table CIV, it appears that in all of the states where there is a considerable alien element of voting age there is a large proportion who can not speak English, and this proportion is especially large in Pennsylvania, West Virginia, Texas, and in many of the states and territories in the Western division. Generally speaking, there is but a small proportion of naturalized males of voting age who can not speak English, but comparatively large proportions are shown for this element in Florida, Texas, and New Mexico.

A similar classification of foreign born males of voting age, according to their inability to speak the English language, is made in table CV for the 38 cities having upward of 100,000 inhabitants in 1900.

TABLE CV.—*Number and percentage of foreign born males of voting age, classified according to citizenship and inability to speak English, for cities having 100,000 inhabitants or more: 1900.*

In these cities, with few exceptions, there is a large proportion of aliens who can not speak English, the largest proportions being found in Allegheny, Cleveland, Milwaukee, Pittsburg, and Scranton. There is a large proportion of naturalized males in Milwaukee who can not speak English, and in this same city there is, also, a large proportion who can not speak English among those who have taken out their first naturalization papers.

TABLE CIV.—*Number and percentage of foreign born males of voting age, classified according to citizenship and inability to speak English, by states and territories arranged geographically: 1900.*

[1] Includes persons in the military and naval service of the United States (including civilian employees, etc.) stationed abroad, not credited to any state or territory.

[2] No inquiry made in Alaska as to ability to speak English.

A detailed presentation by country of birth is made for foreign born males of voting age, and also for the alien element of voting age, in tables 71 and 72 (pages 914–921) of the general tables. The following summary, derived from these two tables, shows the whole number of foreign born males of voting age and of aliens, exclusive of those in Alaska and Hawaii, distributed according to country of birth in detail, with the proportion in each case of aliens to the total number of males of voting age born in each specified country.

COUNTRY OF BIRTH.	FOREIGN BORN MALES OF VOTING AGE.		Per cent of aliens of total.
	Total.	Aliens.

[1] Except China, Japan, and India.
[2] Includes Newfoundland.
[3] Not otherwise specified.
[4] Except Philippine Islands.
[5] Except Cuba and Porto Rico.

The alien element, for the country as a whole, constitutes practically one-fifth of all the foreign born males of voting age in 1900, but among the potential voters of the different nationalities there is in many cases a very large proportion of aliens, the largest proportion shown being for China, or 88.7 per cent, and the next largest that for Japan, or 80 per cent.

The proportion of aliens to total foreign born males of voting age for certain of the nativities specified in the preceding summary is represented graphically by the diagram on plate 18.

A presentation is made by states and territories, in table 73 (page 922) of the general tables, of the entire number of males of voting age, distributed according to parentage, and from this table it appears that 12,752,216, or 59.8 per cent of the whole, are of native parentage and 8,577,603, or 40.2 per cent, are of foreign parentage. The latter number is distributed in the following summary according to the number and percentage of persons having either one or both parents born in the specified countries.

SPECIFIED COUNTRIES.	MALES OF VOTING AGE.	
	Number.	Per cent.
Aggregate	21,329,819	100.0
Of native parentage	12,752,216	59.8
Of foreign parentage	8,577,603	40.2
Austria	151,362	0.7
Bohemia	88,101	0.4
Canada (English)[1]	329,302	1.5
Canada (French)[1]	224,711	1.1
Denmark	95,443	0.5
England	762,951	3.6
France	105,635	0.5
Germany	2,581,918	12.1

Russia	177,517	0.8
Scotland	235,085	1.1
Sweden	337,059	1.6
Switzerland	89,877	0.4
Wales	82,838	0.4
Other countries	442,023	2.1
Of mixed foreign parentage	350,791	1.6

[1] Includes Newfoundland.

This summary shows that there are 2,581,918 males of voting age who are of German parentage, and that this element constitutes 12.1 per cent of the entire number of males of voting age in 1900. The potential voters of Irish parentage number 1,762,889, and constitute 8.3 per cent of all the males of voting age, while those of English parentage number 762,951, and constitute 3.6 per cent of all the potential voters.

YEARS IN THE UNITED STATES.

At the census of 1890 inquiry was made, for the first time, concerning the number of years that each person

of foreign birth had been in the United States, but this information was tabulated for the male alien element of the population only. A similar inquiry was made at the census of 1900, and a presentation is given in table 74 (page 924) of the general tables, for the entire foreign born population, covering their length of residence in this country, as expressed in years and periods of years. From the figures contained in this table, it is possible to apportion the number of foreign born persons enumerated in the census of 1900, according to the number who have come to this country since 1890, the number who have been in the United States between ten and twenty years, and the number who have been here for twenty years and upward; or, in other words, to divide the present foreign born population into three elements, namely, new arrivals since 1890, survivors of the immigrants who came during the preceding decade, and the survivors of the immigrants who came prior to 1880. A division of the foreign born population is made on this basis, by states and territories, in table CVI (page ccxix). This presentation is limited to foreign born persons living in 1900 within the limits of the United States, and the "unknown" years are distributed proportionally among the three periods of years considered.

Table CVI shows that there were 10,341,276 persons of foreign birth living in the United States in 1900, and of this number 2,609,173, or 25.2 per cent, have come to this country during the past decade; that is to say, out of a total of 3,687,564 immigrants since 1890, 2,609,173, or 70.8 per cent, were present in the United States when the census was taken in June, 1900.

The survivors of the foreign born element enumerated in 1890 number 3,503,042 and constitute 33.9 per cent of all the foreign born in the United States in 1900, while the survivors of the foreign born enumerated in 1880 number 4,229,061 and constitute 40.9 per cent of the whole number in 1900.

The total foreign born population in the North Atlantic division in 1900 is very evenly distributed among the three elements under consideration, and this is substantially true for all the states in this division, with the exception of Maine, New Hampshire, and Vermont. The foreign born population in New Hampshire contains a very large proportion of immigrants who have come to this country since 1890, or 41 per cent, and this in fact is the largest proportion shown for this element in any state or territory. There is also a large proportion of this element in Maine, and these large proportions are probably due largely to the number of Canadians who have come to these states during the past ten years.

There is quite a different distribution of the foreign born population in the North Central division as compared with the North Atlantic division, the older elements containing by far the largest proportions, the survivors of those who came prior to 1880 representing 46.9 per cent, and the survivors of those who came between 1880 and 1890 representing 35.1 per cent. North Dakota has the largest proportion of its foreign born population represented by immigrants who have come into the country since 1890, as well as a large proportion of those who came between 1880 and 1890. This is the only state, moreover, in the North Central division which does not have from two-fifths to three-fifths of its foreign born population represented by immigrants who came to this country prior to 1880.

The distribution of the foreign born element in the Western division is very similar to that for the North Central division, but many of the states and territories of this division contain a large proportion of immigrants who have arrived since 1890, particularly in Arizona, New Mexico, Montana, and Wyoming.

In the South Atlantic and South Central divisions very large proportions are shown for the survivors of the immigrants who came prior to 1880, and in some of the states the proportion of the total foreign born represented by this element is very large, particularly in Kentucky, where it represents nearly two-thirds of the entire number of foreign born. The immigrants who have arrived since 1890 also constitute a very considerable proportion of the entire foreign born element in West Virginia, Florida, and Louisiana, and a somewhat less proportion in Texas and Delaware.

This table can be further summarized by showing the proportion of each of these three elements that are contained in each of the 5 geographical divisions of the country, as shown by the following summary:

GEOGRAPHICAL DIVISIONS.	NUMBER OF YEARS IN THE UNITED STATES.		
	Less than 10 years.	10 to 20 years.	20 years and over.
	Per cent.	*Per cent.*	*Per cent.*
The United States	100.0	100.0	100.0
North Atlantic division	59.2	45.4	38.5
South Atlantic division	1.9	1.8	2.4
North Central division	28.7	41.7	46.1
South Central division	3.1	3.0	4.0
Western division	7.1	8.1	9.0

This summary shows that of all the immigrants who have come to this country since 1890 very nearly three-fifths, or 59.2 per cent, are in the North Atlantic division of states as against only 28.7 per cent in the North Central division, showing that this newer element of our foreign born population is largely concentrated in the northeastern part of the country. Of the survivors of the immigrants who came during the preceding decade, or from 1880 to 1890, the North Atlantic and North Central divisions contain more nearly even proportions, but there is a considerably larger proportion in the North Central division of the survivors of the immigrants who came prior to 1880.

TABLE CVI.—*Distribution of the foreign born population of the United States in 1900 according to the number and percentage of persons who have either arrived in this country since 1890, who were residents in 1890, or were residents in 1880, by states and territories arranged geographically.*

STATES AND TERRITORIES.	FOREIGN BORN IN 1900.			FOREIGN BORN IN 1890.			FOREIGN BORN IN 1880.

[1] Exclusive of Alaska and Hawaii and of persons in the military and naval service of the United States (including civilian employees, etc.) stationed abroad, not credited to any state or territory.

As already shown, there are 1,001,595 aliens living in the United States in 1900, and of this number 684,948 persons, or 68.4 per cent, have been in this country 5 years or more, and, so far as length of residence is concerned, are eligible to citizenship. At the census of 1890 there were, out of a total of 1,189,452 aliens, 647,347, or 54.4 per cent, who had been in this country a sufficient length of time to become naturalized. These figures are shown in detail in the following summary:

YEARS.	1900		1890	
	Number.	Per cent.	Number.	Per cent.
Total	1,001,595	100.0	1,189,452	100.0
Less than 1 year	67,904	6.8	65,621	5.5
1 year	73,326	7.3	96,502	8.1
2 years	58,851	5.9	129,539	10.9
3 years	49,299	4.9	130,714	11.0
4 years	56,026	5.6	97,087	8.2
5 to 9 years	254,511	25.4	316,600	26.6
10 to 14 years	177,929	17.8	121,599	10.2
15 years and over	252,508	25.2	209,148	17.6
Unknown	11,241	1.1	22,642	1.9

The alien population is distributed by states and territories in table CVII (page ccxxi) according to the number and proportion who have been in the United States for the different periods of years.

Table CVII shows that in the North Atlantic division as a whole, 67.3 per cent of all the aliens have been in this country 5 years or more. There is about the same proportion in the South Atlantic and North Central divisions, or 68 per cent and 67 per cent, respectively. In the South Central and Western divisions, however, the proportions of aliens eligible to citizenship, so far as length of residence is concerned, is somewhat higher, the percentage for the former division being 72.4 per cent and for the latter, 73.9 per cent.

In many of the states and territories there is a very large proportion of aliens who have been in this country 5 years or more, the largest proportions being 85.1 per cent for South Carolina, 82 per cent for California, and 81.9 per cent for Georgia. The percentages shown for Iowa, Oklahoma, and Oregon are very nearly as large, or 76.8, 79.6, and 79.5, respectively. In West Virginia, on the other hand, the reverse condition is shown, more than three-fifths, or 62.4 per cent, of all the aliens in that state having been in this country less than 5 years. More than one-half of all the aliens in Wyoming and very nearly one-half of those in Montana, have also been in this country less than 5 years.

A proportionate distribution is also made of the alien population according to the length of residence in the United States, for the 38 cities having upward of 100,000 inhabitants, in table CVIII.

TABLE CVIII.—*Alien population, distributed according to number of years in the United States, for cities having 100,000 inhabitants or more: 1900.*

Worcester, Mass	27.7	28.7	19.4	8.9	14.9	0.4

Of all the cities considered in table CVIII, Allegheny shows the largest proportion, or 52.7 per cent, of aliens who have been in this country less than 5 years. The next largest proportions for this class of aliens are found in Pittsburg and Scranton, or 46 per cent and 40.9 per cent, respectively. Los Angeles, among the largest cities of the country, has the least proportion, or 8.4 per cent, of aliens who have been in this country less than 5 years. This portion of the alien element also represents a very small proportion of the whole number of aliens in New Orleans and San Francisco.

TABLE CVII.—*Alien population, distributed according to number of years in the United States, by states and territories arranged geographically: 1900.*

[1] Exclusive of Alaska, Hawaii, and persons in the military and naval service of the United States (including civilian employees, etc.) stationed abroad, not credited to any state or territory.

APPENDIX A.

REPORT ON BOUNDARIES OF TERRITORIAL ACQUISITIONS.

[Reprinted from Census Bulletin No. 74, published July 20, 1901.]

Hon. WILLIAM R. MERRIAM,
Director of the Census.

SIR: I have the honor to transmit herewith, for publication as a census bulletin, the "Report of a Conference upon the Boundaries of the Successive Acquisitions of Territory by the United States." The conference was constituted of representatives of the Department of State, the Coast and Geodetic Survey, the Geological Survey, the Census Office, and the Library of Congress. It was appointed at the request of the Census Office, and as an advisory committee to that office on certain controverted subjects.

In the "Statistical Atlas of the United States, Based upon Results of the Eleventh Census," is a map (plate 1) giving the boundaries of the successive acquisitions of territory by the United States, exclusive of Alaska. The Twelfth Census will probably publish a similar map. Another Government office issues a map giving the same information. In nearly all essentials the two agree, but, naturally, in certain minor points, differences between them may be found. Some of the differences relate to a matter—namely, the true boundary of the Louisiana Purchase—which is of timely interest, now that the centennial anniversary of that purchase is approaching.

Thinking that in such a matter even minor discrepancies between coordinate branches of the Government should, if possible, be harmonized, and seeking the friendly criticism of disinterested experts upon the conclusions of the Census Office, the Acting Director addressed identical letters to the Secretary of State, the Superintendent of the Coast and Geodetic Survey, the Director of the Geological Survey, and the Commissioner of the Land Office, asking each to appoint a representative. The representatives appointed held five meetings, and on every point voted upon, with one exception, reached unanimous conclusions. These conclusions in some cases sustained the position of the Census Office, in some cases sustained the position of the Land Office, and in some cases departed from both. It should be carefully observed that the conference was simply one to advise the Census Office, and that its findings have no official standing, but are entitled only to such weight as is carried by the names of the individuals signing the report. Even so, there is no doubt that its results have materially decreased the conflicts of official authority in this field. The main conclusions of the conference, as detailed in the following pages, may be summarized as follows:

1. The region between the Mississippi River and lakes Maurepas and Pontchartrain to the west, and the Perdido River to the east, should not be assigned either to the Louisiana Purchase or to the Florida Purchase, but marked with a legend indicating that title to it between 1803 and 1819 was in dispute.

2. The line between the Mississippi River and the Lake of the Woods, separating the territory of the United States prior to 1803 from the Louisiana Purchase, should be drawn from the most northwestern point of the Lake of the Woods to the nearest point on the Mississippi River, in Lake Bemidji.

3. The western boundary of the Louisiana Purchase between 49° and 42° north followed the watershed of the Rocky Mountains; thence it ran east along the parallel of 42° north to a point due north of the source of the Arkansas River, and thence south to that source.

4. The northwestern boundary of Texas as annexed extended up the principal stream of the Rio Grande to its source and thence due north to the parallel of 42° north.

5. The southern boundary of the Mexican Cession of 1848 should be drawn from a point on the Rio Grande eight miles north of Paso, instead of from one about thirty miles farther north, as is the usual practice at present, west three degrees, and thence north to the first branch of the Gila River.

The cordial thanks of the Census Office are due to the other branches of the Government service which have aided our work generously and without stint.

Yours, respectfully,

WALTER F. WILLCOX,
Chief Statistician for Methods and Results.

REPORT OF A CONFERENCE UPON THE BOUNDARIES OF THE SUCCESSIVE ACQUISITIONS OF TERRITORY BY THE UNITED STATES, NOVEMBER, 1899, TO JANUARY, 1900.

The undersigned representatives of the Department of State, the Coast and Geodetic Survey, the Geological Survey, the Census Office, and the Library of Congress, constituting a conference upon the boundaries of the successive acquisitions of territory by the United States, so far as discrepancies respecting them have been found to exist, and called together by a circular letter of the Acting Director of the Census, dated November 16, 1899, beg leave to report as follows:

On November 20, 1899, the conference held its first meeting in the Pavilion of the Seals, Library of Congress, that room having been kindly provided for the purpose by the Librarian of Congress. There were present, Mr. Andrew H. Allen, representing the Department of State; Mr. O. H. Tittmann, representing the Coast and Geodetic Survey; Mr. Harry King, from the General Land Office; Mr. Henry Gannett, representing the Geological Survey; and Mr. Walter F. Willcox, representing the Census Office. Mr. P. Lee Phillips, chief of the division of maps and charts in the Library of Congress, also attended the meeting to render such assistance as might be desired in the way of advice touching maps, etc., and their accessibility. Mr. King, of the General Land Office, announced that he attended merely as an auditor, without the intention of participating in the action of the conference, but with the purpose of reporting the contemplated scope of its work to the Commissioner of the General Land Office. The conference then proceeded to organize by the election of Mr. Willcox as chairman and Mr. Allen as secretary. Mr. Phillips was invited by the conference to take part in its business as a member, and very kindly consented to do so.

The territorial acquisitions, concerning the boundaries of which discrepancies had been noted, were taken up in chronological order. The subject of the

LOUISIANA PURCHASE

was thus first considered, and the situation discovered was, briefly, that the territory came into the possession of the United States through the treaty of 1803 with France, having the same extent as when ceded by France to Spain in 1763, and as when retroceded to France by Spain by the treaty of San Ildefonso, of October 1, 1800. To ascertain the extent of this territory eastward, the conference examined the several well-known authorities upon the early history of Louisiana—Marbois, Ellicott, Gayarré, Darby, Stoddard, and others; the treaties involved; letters of Monroe, Jefferson, and Talleyrand; certain maps; the text of the grant to Crozat by Louis XIV, in 1712; the presentation of the case by the Commissioner of the General Land Office in his volume entitled "The Louisiana Purchase;" etc. This examination failed, however, to enable the conference to determine the dispute about the territory between the Mississippi and Perdido rivers, claimed alike by Spain and France, and afterwards by the United States, and finally released by Spain in the treaty of 1819, in language assigning no limits to West Florida. The conference concluded that the boundary line of this territory at the Mississippi River, as claimed by Spain, should be so defined by a legend on the map, and that the boundary line at the Perdido River, as claimed by the United States, should be similarly indicated. This conclusion was reached with an understanding or admission of the following facts touching the territory between the two rivers claimed by Spain as a part of West Florida: That the territory of Louisiana, as described by France and granted to Crozat by Louis XIV, extended on the east to the river Mobile, which, with the port, was ceded specifically by France to England by the treaty of Paris in 1763, Spain at the same time ceding the Floridas to Great Britain, with St. Augustine and the bay of Pensacola—thus, inferentially at least, determining the respective boundaries of Louisiana and West Florida; that the first occupation of the interior of the territory between the rivers Mississippi and Perdido by the Spaniards, was during the war of the American Revolution, when it belonged to Great Britain; that Great Britain retroceded the Floridas to Spain in 1783, at which time the Louisiana territory belonged to Spain by the French cession in the preliminaries of peace of 1762 (confirmed in 1763), whereby "all the country known under the name of Louisiana" was transferred; that Spain in 1800 retroceded Louisiana to France as it was received from France in 1763; that France in 1803 ceded the territory of Louisiana to the United States, as discovered and held by France, ceded to Spain, and retroceded to France; and, finally, that in 1819 Spain ceded to the United States all the territory held or claimed by His Catholic Majesty under the names of East and West Florida. In addition to the grounds of dispute between France and Spain, and the United States and Spain, here shown, there was a conflicting claim concerning the extent of West Florida, born of the contention between French and Spanish discoverers and settlers in the sixteenth and seventeenth centuries; and there was also the claim of the French, by right of La Salle's descent of the Mississippi in 1682, to "all the country drained by that river."

With reference to the Louisiana boundary, there remained but one point of difference between the maps under consideration. Article II of the definitive treaty of peace of 1783, between the United States and Great Britain, after defining the northern boundary to the Lake of the Woods, continues as follows: " * * * Thence through the said lake to the most northwestern point thereof, and from thence on a due west course to the river Mississippi." Such a line as that described being obviously impossible, the Mississippi River being south not west of the Lake of the Woods, the line drawn

by the conference was a line from the most northwestern point of that lake to the nearest point on the Mississippi. This line the conference regarded as justified by rules of international law and practice respecting vaguely described boundaries in such topographical circumstances.

THE OREGON TERRITORY

was the next subject to receive the attention of the conference. There seemed to be nothing in the history of that part of our possessions to warrant mention of the claim of Spain rather than that of Great Britain, and the final settlement of the question of sovereignty and boundaries by the treaty of 1846, fixing the forty-ninth parallel, "by an amicable compromise," as the northern boundary west of the Rocky Mountains, seemed to be a recognition by the United States of the importance of the British pretensions sufficient to warrant mention on the map. The treaty of 1819 (the Florida Cession) had already served as a conclusive relinquishment by Spain of any claim in this quarter. Therefore the conference, considering these facts together with the historical narrative of discoveries and occupations on the northwest coast of America by both Spanish and British explorers and adventurers, and the part played by traders, explorers, and settlers from the United States within the territory known under the name of Oregon in the eighteenth century, determined to place as a legend on the face of the map, to describe briefly and with historical accuracy the area in question, the following words: Oregon territory discovered and settled; British claim extinguished, 1846.

TEXAS

was next in order for discussion and determination, and the conference decided, almost without debate, that the northwestern boundary of that territory as admitted to statehood in the Union, should be that defined on the map of the General Land Office—the line there shown coinciding closely with the line on the Disturnell "Map of the United Mexican States," 1847, filed with the treaty of 1848 as a part of that convention.

THE FIRST MEXICAN CESSION.

The southern boundary of the United States west of the Rio Grande, 1848, was determined in the same manner but with a different result, the line adopted being that indicated on the Disturnell map, according to the conference's interpretation of that chart. The facts are adequately stated by Major Emory on page 16 of his Report on the United States and Mexican Boundary Survey, vol. 1, as follows:

"It is proper for me, however, before closing this chapter, to refer to a publication issued by Mr. J. R. Bartlett, one of the late commissioners on the part of the United States, which professes to give an accurate account of the affairs of the commission. It is not my purpose to review that work, and expose its errors, but simply to correct some statements affecting myself.

"Mr. Bartlett's principal achievement on the boundary was the agreement with General Conde, the Mexican Commissioner, fixing the initial point on the Rio Bravo [i. e., Rio Grande], in the parallel of 32° 22′, instead of a point as laid down on the treaty map, about eight miles above El Paso, which would have brought it to the parallel of 31° 52′. That agreement is no less remarkable than the adroitness and success with which Mr. Bartlett convinced the authorities at Washington of its correctness.

"The question has been so thoroughly discussed that a reproduction of it is not called for. It is sufficient to say here that it was disapproved by the astronomer and surveyor on the commission at the time, and was finally repudiated by the Government.

"* * * My signature as surveyor was only required, as alleged, to perfect the *official documents;* the words of the order were, '*You will sign the map of the initial point agreed upon by the two commissioners.*'

"By reference to the treaty it will be seen that any agreement of the kind required the action of the joint commission, and that the joint commission was to be composed, not only of the *two* commissioners, but of the two surveyors also.

"I refused to recognize the act as that of the joint commission, and signed the map as the order directed, carefully and studiously attaching a certificate that it was the initial point of the two *commissioners;* and to prevent the possibility of misconstruction, an agreement in writing was entered into with Mr. Salazar, and our signatures attested by witnesses, showing that the map was only that of the boundary agreed upon by the two commissioners, and nothing else.

"This course, while it permitted me to obey a specific order in writing from a superior, left the Government free to act, and repudiate the agreement by the two commissioners, as it subsequently did."

As the line on the Disturnell map delimiting the southern boundary of the United States under the treaty of 1848 is identical with the northern boundary of the territory purchased in 1853, the conference next arrived at the point of considering

THE GADSDEN PURCHASE.

An examination of the treaties, of the report of Maj. W. H. Emory, already referred to and quoted, and other evidence, together with a study of the treaty map, developed the fact that the repudiated line agreed to by one of the United States commissioners, Mr. J. R. Bartlett, and the Mexican Commissioner, General Conde, seems to have been adopted by the General Land Office, though after having been run only one and one-half degrees west from the point of beginning, about thirty-eight miles north of Paso, the survey was abandoned and the line repudiated by the Government of the United States. The line indicated by the treaty or Disturnell map begins at a point about eight miles north of Paso or El Paso, runs west three degrees on a parallel, and thence north on a meridian to the first branch of the Gila River. This line was adopted by the conference as the eastern part of the northern boundary of the Gadsden Purchase. The conclusion was reached after consideration of Mr. Bartlett's claims, Major Emory's report, the action of the Government, and the treaty map.

A map indicating the boundary lines discussed and the conclusions reached respecting them is submitted by the conference.

WASHINGTON, *April 5, 1900.*

APPENDIX B.

APPORTIONMENTS.

As the count of population is made primarily for the purpose of fixing the membership of the House of Representatives, under the provisions of section 2 of Article I of the Constitution, as modified by section 2 of Article XIV of the Amendments, a brief statement is herein made of all acts relating to the various apportionments, together with a table showing the total membership of the House of Representatives under each apportionment and the number of Representatives assigned to each of the states under the several acts from the formation of the government to the present time.

The membership of the House of Representatives was originally fixed at 65, under the provisions of section 2 of Article I of the Constitution.

The apportionment of Representatives in Congress, according to the enumeration of the First, Second, Third, Fourth, Fifth, and Sixth Censuses, was made by Congress. At these apportionments Congress set the ratio of population for each member allowed, and also at each apportionment fixed the total number of members of the House.

The law for the taking of the Seventh Census was intended to be permanent (act of May 23, 1850, 9 Stats., 428). It presented a rule of apportionment, fixed the number of members of the House at 233, and directed the Secretary of the Interior thereafter to make the apportionment to each state.

The apportionment under the Eighth Census was made under this law, but Congress on March 4, 1862, fixed the total number of members at 241, and the Secretary of the Interior apportioned the new quotas to the states.

The ninth and tenth apportionments were made by Congress; hence it may be assumed that the power conferred on the Secretary of the Interior by the act of May 23, 1850, was repealed by implication. Heretofore all apportionments have been made at the long sessions of Congress, being the second session after each census year, but early enough for the election of Representatives to the next ensuing Congress.

The apportionments under the Eleventh and Twelfth Censuses were made at the short session of Congress immediately following the date of the census enumeration, the apportionment act under the Eleventh Census having been approved February 7, 1891, and that under the Twelfth Census, January 16, 1901.

The population of the several states and the number of Indians not taxed, as returned at the Twelfth Census, are given in table 1 on page xviii.

The apportionment of Representatives, based upon the enumeration at the Twelfth Census, as provided by the act of Congress approved January 16, 1901, is shown by states in the following table:

Apportionment of Representatives under the Twelfth Census, by states.

STATES.	Membership prior to apportionment.	Membership after apportionment.	Gain.
Total	357	386	29
Alabama	9	9	.....

[3] Exclusive of persons on Indian reservations.
[4] Decrease; exclusive of persons on Indian reservations.
[5] Decrease.
[6] North and South Dakota combined. Apportioning the population of Dakota territory in 1880, North Dakota (36,909 in 1880) increased 145,810, or 395.1 per cent, and South Dakota (98,268 in 1880) increased 230,540, or 234.6 per cent.
[7] Dakota territory.
[8] Less than one-tenth of 1 per cent.
[9] Decrease; due to loss of territory, West Virginia having been set off from Virginia December 31, 1862.

TABLE 3.—DENSITY OF POPULATION OF STATES AND TERRITORIES AT EACH CENSUS: 1790 TO 1900.

[The density of population is obtained by dividing the population of each state and territory and of the United States by its total land area in square miles at each census. In computing density of population for the United States, the areas and population of Alaska and Hawaii in 1900, of Alaska in 1890, and of Indian Territory in 1860, 1870, and 1880 are not considered. The area of Indian reservations, outside of Indian Territory, is included in the area of the states and territories in which they are severally situated, and in that of the United States, prior to 1890, although the population of these Indian reservations was not ascertained and, for this reason, can not be considered in figuring density of population at the censuses prior to 1890.]

[1] Then in the territory of Mississippi.
[2] Part of Blount annexed to Cullman between 1880 and 1890.
[3] Name changed from Benton in 1858.
[4] Name changed from Baker between 1870 and 1880.
[5] Part of Talladega annexed to Clay in 1895.
[6] Part annexed to Franklin and part of Lawrence annexed since 1830.
[7] Part of Colbert annexed since 1890.
[8] Part of Shelby annexed between 1880 and 1890 and part annexed to Walker since 1890.
[9] Name changed from Sanford between 1870 and 1880.
[10] Part annexed to Colbert since 1890.
[11] Name changed from Cataco in 1821.
[12] Part annexed to Jefferson between 1880 and 1890.
[13] Part of Jefferson annexed since 1890.
[14] Name changed from Hancock in 1850.

TABLE 4.—POPULATION OF STATES AND TERRITORIES BY COUNTIES, AT EACH CENSUS: 1790 TO 1900—Continued.

ARIZONA.

[Organized as a territory February 24, 1863.]

COUNTIES.	1900	1890	1880	1870	1860	1850
The Territory	122,931	59,620	40,440	9,658	[1] 6,482	
Apache [2]	8,297	4,281	5,288			
Cochise [3]	9,251	6,938				
Coconino [4]	5,514					
Gila [5]	[6] 4,973	2,021				
Graham [7]	[6] 14,162	5,670				
Maricopa [5]	20,457	10,986	5,689			
Mohave	3,426	1,444	1,190	179		
Navajo [8]	[6] 8,829					
Pima [9]	14,689	12,673	17,006	5,716		
Pinal [5]	7,779	4,251	3,044			
Santa Cruz [10]	4,545					
Yavapai [4]	13,799	8,685	5,013	2,142		
Yuma	4,145	2,671	3,215	1,621		
San Carlos Indian reservation. [11]	3,065					

[1] Then the county of Arizona, in the territory of New Mexico.
[2] Parts taken to form part of Graham in 1881 and Navajo in 1895.
[3] Organized from part of Pima in 1881.
[4] Coconino organized from part of Yavapai in 1891.
[5] Gila organized from parts of Maricopa and Pinal in 1881.
[6] Exclusive of population of San Carlos Indian reservation.
[7] Organized from parts of Apache and Pima in 1881.
[8] Organized from part of Apache in 1895.
[9] Parts taken to form Cochise and part of Graham in 1881 and Santa Cruz in 1899.
[10] Organized from part of Pima in 1899.
[11] In Gila, Graham, and Navajo counties, but the population in each county was not separately returned.

ARKANSAS.

[Organized as a territory March 2, 1819. Admitted as a state June 15, 1836.]

COUNTIES.	1900	1890	1880	1870	1860	1850	1840	1830	1820	1810	1800	1790

[1] Archuleta organized from part of Conejos in 1885.
[2] Baca organized from part of Las Animas in 1889.
[3] Organized from part of Greenwood in 1874; parts taken to form Kiowa, Otero, and Prowers and parts of Cheyenne and Lincoln in 1889.
[4] Part annexed to Fremont since 1890.
[5] Organized from parts of Bent and Elbert in 1889.
[6] Parts of Gunnison taken to form Pitkin in 1881, and Delta, Mesa, and Montrose in 1883.
[7] Parts of Ouray taken to form Dolores in 1881 and San Miguel in 1883.
[8] Part taken to form part of Elbert in 1874.
[9] Organized from part of Summit in 1883.
[10] Organized from parts of Douglas and Greenwood in 1874; parts taken to form Kit Carson and parts of Cheyenne and Lincoln in 1889.
[11] Part taken to form part of Teller in 1899.
[12] Part taken to form part of Teller in 1899; part of Chaffee annexed since 1890.
[13] Organized from part of Summit in 1883; part taken to form Rio Blanco in 1889.
[14] Taken to form Bent and part of Elbert in 1874.
[15] Mineral organized from parts of Hinsdale, Rio Grande, and Saguache in 1893.
[16] Organized from part of Bent in 1889.
[17] Organized from part of Elbert in 1889.
[18] Montezuma organized from part of La Plata in 1889.
[19] Organized from part of Weld in 1887; parts taken to form Phillips and Sedgwick in 1889.
[20] Organized from part of Weld in 1889.
[21] Organized from part of Logan in 1889.
[22] Organized from part of Garfield in 1889.
[23] Parts taken to form Eagle and Garfield in 1883.
[24] Organized from parts of El Paso and Fremont in 1899.
[25] Organized from part of Weld in 1887; part taken to form Yuma in 1889.
[26] Parts taken to form Logan and Washington in 1887 and Morgan in 1889.
[27] Organized from part of Washington in 1889.

CONNECTICUT.

[1] Organized from part of Howard in 1875.
[2] Name changed from McGhee between 1860 and 1870.
[3] Kiowa organized from parts of Comanche and Edwards in 1886.
[4] Name changed from Hunter between 1860 and 1870.
[5] Organized from Arapahoe and Sequoyah and parts of Buffalo, Foote, Grant, and Kearny in 1884; parts taken to form Haskell and parts of Garfield, Grant, Gray, and Kearny in 1887; Garfield annexed in 1893.
[6] Part taken to form part of Finney and parts annexed to Ford and Hodgeman in 1884.
[7] Part of Foote annexed in 1884 and part taken to form part of Gray in 1887.
[8] Organized from parts of Finney and Hodgeman in 1887; annexed to Finney in 1893.
[9] Name changed from Davis in 1889.
[10] Part taken to form part of Finney and part annexed to Hamilton in 1884; reorganized from parts of the same in 1887.
[11] Organized from parts of Finney, Ford, and Hodgeman in 1887.
[12] Part of Madison annexed between 1860 and 1870.
[13] Stanton and parts of Grant and Kearny annexed in 1884; parts taken to form Stanton and parts of Grant and Kearny in 1887.
[14] Organized from part of Finney in 1887.
[15] Parts of Buffalo and Foote annexed in 1884; parts taken to form parts of Garfield and Gray in 1887.
[16] Name changed from Godfrey between 1860 and 1870; taken to form Chautauqua and Elk in 1875.
[17] Logan, formerly St. John, organized from part of Wallace in 1881.
[18] Organized from Breckenridge and part of Madison between 1860 and 1870.
[19] Part annexed to Greenwood and part taken to form part of Lyon between 1860 and 1870.
[20] Name changed from Lykins between 1860 and 1870.
[21] Name changed from Kansas in 1886.
[22] Name changed from Dorn between 1860 and 1870.
[23] Annexed to Chase between 1860 and 1870.
[24] Taken to form part of Finney in 1884.
[25] Annexed to Hamilton in 1884; reorganized from part of the same in 1887.

[1] Part taken to form part of Durham in 1881.
[2] Scotland organized from part of Richmond in 1900.
[3] Organized from parts of Franklin, Granville, and Warren in 1881.
[4] Part taken to form part of Vance in 1881.

NORTH DAKOTA.

[Dakota organized as a territory March 2, 1861. North Dakota admitted as a state November 2, 1889.]

COUNTIES.	1900	1890	1880	1870
The State	319,146	182,719	[1] 36,909	[1] 2,405
Alred[2]				
Barnes	13,159	7,045	1,585	
Benson[3]	8,320	2,460		
Billings[4]	975	170	1,323	
Bottineau[5]	7,532	2,893		
Bowman[6]		6		
Buford[7]		803		
Burleigh	6,081	4,247	3,246	
Cass	28,625	19,613	8,998	
Cavalier[8]	12,580	6,471		
Church[9]		74		
De Smet[10]				
Dickey[11]	6,061	5,573		
Dunn[12]		159		
Eddy[13]	3,330	1,377		
Emmons	4,349	1,971	38	
Flannery[7]		72		
Foster[14]	3,770	1,210	37	

[1] Total population for Dakota territory in 1880, 135,177; 1870, 14,181; 1860, 4,837.
[2] Organized from part of Howard in 1883; part annexed to Billings in 1897, and part taken to form part of Williams since 1890.
[3] Organized from parts of De Smet and Ramsey in 1883.
[4] Part taken to form Bowman in 1883; Bowman, McKenzie, and part of Alred annexed in 1897.
[5] Part of Renville annexed in 1897.
[6] Organized from part of Billings in 1883; annexed to Billings in 1897.
[7] Organized from part of Wallette in 1883; taken to form part of Williams since 1890.
[8] Part taken to form part of Towner in 1883.
[9] Organized from parts of McHenry and Sheridan in 1887; annexed to McHenry, McLean, and Pierce since 1890.
[10] Name changed from French in 1875; part taken to form part of Benson in 1883, and remainder to form Pierce in 1887.
[11] Organized from part of Lamoure in 1881.
[12] Organized from part of Howard in 1883; annexed to Stark in 1897.
[13] Organized from part of Foster in 1885.
[14] Parts taken to form Eddy in 1885, part of Griggs in 1881, and part of Nelson in 1883.

TABLE 4.—POPULATION OF STATES AND TERRITORIES BY COUNTIES, AT EACH CENSUS: 1790 TO 1900—Continued.

NORTH DAKOTA—Continued.

COUNTIES.	1900	1890	1880	1870
Garfield[1]		33		
Grand Forks[2]	24,459	18,357	6,248	
Griggs[3]	4,744	2,817		
Hettinger[4]		81

Stevens[26]		16	247	
Stutsman	9,143	5,266	1,007	
Towner[27]	6,491	1,450		
Traill[28]	13,107	10,217	4,123	
Wallace[29]		24		
Wallette[30]			432	
Walsh[31]	20,288	16,587		
Ward[32]	7,961	1,681		
Wells[33]	8,310	1,212		
Williams[34]		109	14	
Williams[35]	1,580			
Standing Rock Indian reservation (part of).[37]	2,208	[36] 511		
Unorganized territory				[38] 1,192

[1] Organized from part of Stevens in 1885; annexed to McLean in 1891.
[2] Parts taken to form parts of Walsh in 1881 and Nelson in 1883.
[3] Organized from parts of Foster and Traill in 1881; part taken to form part of Steele in 1883.
[4] Organized from part of Stark in 1883; annexed to Stark in 1897.
[5] Taken to form Alred, Dunn, McKenzie, and Wallace in 1883.
[6] Part taken to form Dickey in 1881.
[7] McIntosh organized from part of Logan in 1883.
[8] Part taken to form part of Church in 1887; part of Church annexed since 1890.
[9] Organized from part of Howard in 1883; annexed to Billings in 1897.
[10] Organized from part of Stevens in 1883; Garfield and Sheridan annexed in 1891, and parts of Church and Stevens annexed since 1890.
[11] Part taken to form Oliver in 1885; part of former Williams annexed since 1890.
[12] Annexed to Ward in 1891.
[13] Organized from parts of Foster, Grand Forks, and Ramsey in 1883.
[14] Organized from part of Mercer in 1885.
[15] Part taken to form part of Walsh in 1881.
[16] Organized from De Smet in 1887; part of Church annexed since 1890.
[17] Parts taken to form parts of Benson and Nelson in 1883.
[18] Part taken to form part of Sargent in 1883.
[19] Part taken to form part of Ward in 1885; annexed to Bottineau and Ward in 1897.
[20] Part of Sisseton and Wahpeton Indian reservation annexed between 1880 and 1890.
[21] Part taken to form part of Towner in 1883.
[22] Organized from parts of Ransom county and Sisseton and Wahpeton Indian reservation in 1883.
[23] Part taken to form part of Church in 1887; annexed to McLean in 1891.
[24] Part taken to form Hettinger in 1883; Dunn, Hettinger, and Wallace annexed in 1897, and part of former Williams annexed since 1890.
[25] Organized from parts of Griggs and Traill in 1883.
[26] Parts taken to form McLean in 1883, and Garfield and part of Ward in 1885; parts annexed to McLean and Ward since 1890.
[27] Organized from parts of Cavalier and Rolette in 1883.
[28] Parts taken to form part of Griggs in 1881 and part of Steele in 1883.
[29] Organized from part of Howard in 1883; annexed to Stark in 1897.
[30] Taken to form Buford and Flannery in 1883.
[31] Organized from parts of Grand Forks and Pembina in 1881.
[32] Organized from parts of Renville and Stevens in 1885; Mountraille annexed in 1891, part of Renville annexed in 1897, and part of Stevens annexed since 1890.
[33] Name changed from Gingras in 1881.
[34] Annexed to Mercer and Stark since 1890.
[35] Organized from Buford, Flannery, and part of Alred since 1890.
[36] Population of Fort Yates and Standing Rock Indian agency, exclusive of reservation Indians.
[37] Can not be located by counties. For population of remainder of reservation see figures for South Dakota. Returned in 1890 as unorganized territory.
[38] Of the population (2,091) of the unorganized territory in Dakota in 1870, 1,192 is estimated to have been within the present limits of North Dakota.

OHIO.

[Admitted as a state November 29, 1802.]

[1] Organized from Indian lands since 1890.

[2] Territory claimed by the United States as a part of the Indian Territory, but organized as Greer county, Texas, February 8, 1860, by an act of the Texas legislature. Returned as a part of Oklahoma in 1890. Decided by the United States Supreme Court, March 16, 1896, against the state of Texas.

[3] Can not be located by counties.

TABLE 4.—POPULATION OF STATES AND TERRITORIES BY COUNTIES, AT EACH CENSUS: 1790 TO 1900—Continued.

OREGON.

[Organized as a territory August 14, 1848. Admitted as a state February 14, 1859.]

[1] Malheur organized from part of Baker in 1887.
[2] Lincoln organized from parts of Benton and Tillamook in 1893.
[3] Now in the state of Washington.
[4] Organized from part of Wasco in 1882 and part taken to form part of Wheeler in 1899.
[5] Umpqua annexed to Douglas in 1862.
[6] Organized from parts of Umatilla and Wasco in 1885 and part taken to form part of Wheeler in 1899.
[7] Parts taken to form Harney in 1889 and part of Wheeler in 1899.
[8] Organized from part of Grant in 1889.
[9] Part of Jackson annexed to Josephine between 1880 and 1890.
[10] Klamath organized from part of Lake in 1882.
[11] Organized from part of Umatilla in 1885.
[12] Organized from part of Wasco in 1889; part of Wasco annexed since 1890.
[13] Parts taken to form Morrow and part of Gilliam in 1885.
[14] Wallowa organized from part of Union in 1887; part of Union annexed to Wallowa since 1890.
[15] Parts taken to form Crook in 1882, Sherman in 1889, part of Gilliam in 1885, and part annexed to Sherman since 1890.
[16] Organized from parts of Crook, Gilliam, and Grant in 1899.

PENNSYLVANIA.

[1] Total population for Dakota territory in 1880, 135,177; 1870, 14,181; 1860, 4,837.
[2] Formed from unorganized territory in 1883; name changed from Pyatt in 1896.
[3] Jerauld organized from part of Aurora in 1883.
[4] Located within the limits of Standing Rock Indian reservation.
[5] Organized from part of Harding and unorganized territory in 1883; Choteau, Ewing, Harding, Martin, Rinehart, and Wagner annexed in 1899.
[6] Formed from unorganized territory in 1883; annexed to Butte in 1899.
[7] Part of Sisseton and Wahpeton Indian reservation annexed between 1880 and 1890.
[8] Fall River organized from part of Custer in 1883.
[9] Part taken to form part of Marshall in 1885; part of Sisseton and Wahpeton Indian reservation annexed between 1880 and 1890.
[10] Part of Delano taken to form Scobey in 1883; both annexed to Meade in 1899.
[11] Name changed from Rusk in 1883. Located within the limits of Cheyenne River and Standing Rock Indian reservations.
[12] Organized from part of Harding in 1883; annexed to Butte in 1899.
[13] Part taken to form part of Roberts in 1883; part of Sisseton and Wahpeton Indian reservation annexed between 1880 and 1890.
[14] Todd annexed in 1899.
[15] Part of Jayne annexed between 1870 and 1880.
[16] Formed from unorganized territory in 1881; parts taken to form Ewing and part of Butte in 1883; annexed to Butte in 1899.
[17] Formed from unorganized territory in 1883; annexed to Stanley in 1899.
[18] Annexed to Hanson, Hutchinson, McCook, and Turner between 1870 and 1880.
[19] Part taken to form Meade in 1889.
[20] Part taken to form part of Washabaugh in 1883. Located within the limits of Pine Ridge and Rosebud Indian reservations.
[21] Pratt and Presho annexed to Lyman in 1899.
[22] Organized from parts of Day county and Sisseton and Wahpeton Indian reservation in 1885.
[23] Organized from part of Lawrence in 1889; Delano and Scobey annexed in 1899.
[24] Located within the limits of Rosebud Indian reservation.
[25] Sanborn organized from part of Miner in 1883.
[26] Ziebach annexed in 1899.
[27] Name changed from Ashmore in 1875.
[28] Organized from parts of Grant county and Sisseton and Wahpeton Indian reservation in 1883.
[29] Formed from unorganized territory in 1883. Located within the limits of Cheyenne River and Standing Rock Indian reservations.
[30] Part taken to form Washington in 1883. Located within the limits of Pine Ridge Indian reservation.
[31] Jackson, Nowlin, and Sterling annexed in 1899.

TABLE 4.—POPULATION OF STATES AND TERRITORIES BY COUNTIES, AT EACH CENSUS: 1790 TO 1900—Continued.

SOUTH DAKOTA—Continued.

COUNTIES.	1900	1890	1880	1870	1860
Sterling[1]		96			
Sully	1,715	2,412	296		
Todd[2]		188	203	337	
Tripp[3]					
Turner[4]	13,175	10,256	5,320

Wagner[5]					
Walworth	3,839	2,153	46		
Washabaugh[6]					
Washington[7]	(8)	40			
Yankton	12,649	10,444	8,390	2,097	
Ziebach[9]		510			
Cheyenne River Indian reservation.[10]	2,357				
Fort Sisseton[11]			134		
Pine Ridge Indian reservation.[12]	6,827				
Rosebud Indian reservation[13]	5,201				
Sisseton and Wahpeton Indian reservation.[14]			73		
Standing Rock Indian reservation (part of).[15]	1,658				
Unorganized territory				[16]899	

[1] Formed from unorganized territory in 1883; annexed to Stanley in 1899.
[2] Annexed to Gregory in 1899.
[3] Located within the limits of Rosebud Indian reservation.
[4] Part of Jayne annexed between 1870 and 1880.
[5] Formed from unorganized territory in 1883; annexed to Butte in 1899.
[6] Organized from parts of Lugenbeel county and Indian reservation in 1883. Located within the limits of Pine Ridge and Rosebud Indian reservations.
[7] Organized from part of Shannon in 1883.
[8] No returns for part outside of Pine Ridge Indian reservation.
[9] Annexed to Pennington in 1899.
[10] Located in Armstrong, Dewey, Schnasse, and Stanley counties, but division by counties can not be made.
[11] Abandoned in 1888.
[12] Located in Lugenbeel, Shannon, Stanley, Washabaugh, and Washington counties, but division by counties can not be made.
[13] Located in Gregory, Lugenbeel, Lyman, Meyer, Stanley, Tripp, and Washabaugh counties, but division by counties can not be made.
[14] Parts annexed to Richland county, North Dakota, and Codington, Day, and Grant counties, South Dakota, between 1880 and 1890; parts taken to form part of Sargent county, North Dakota, in 1883, and parts of Roberts and Marshall counties, South Dakota, in 1883 and 1885, respectively.
[15] Located in Boreman, Dewey, and Schnasse counties, but division by counties can not be made. For population of remainder of reservation see figures for North Dakota.
[16] Of the population (2,091) of the unorganized territory in Dakota in 1870, 899 persons are estimated to have been within the present limits of South Dakota.

TENNESSEE.

[Admitted as a state June 1, 1796.]

[1] West Virginia set off from Virginia December 31, 1862. For the population of the remaining counties in Virginia from 1790 to 1860, inclusive, see West Virginia.
[2] Includes 48 persons not credited to any county.
[3] Formerly included Charlottesville city.
[4] For population previous to 1850, see District of Columbia, of which it then formed a part. Formerly included Alexandria city.
[5] Amelia and Nottoway reported together in 1790; population credited to Amelia.
[6] Formerly included Staunton city.
[7] Part taken to form part of Dickenson in 1880.
[8] Formerly included Lynchburg city.
[9] Formerly included Manchester city and part of Petersburg city.
[10] Organized from parts of Buchanan, Russell, and Wise in 1880.
[11] Formerly included part of Petersburg city.
[12] Formerly included Winchester city.
[13] Formerly included Richmond city.
[14] Formerly included Williamsburg city.

Yakima[18]	13,462	4,429	2,811	432	.....	.....

[1] Then in the territory of Oregon.
[2] Adams and Franklin organized from parts of Whitman in 1883.
[3] Organized from part of Garfield in 1883.
[4] Organized from parts of Kittitas and Okanogan in 1899.
[5] Part taken to form Garfield in 1881.
[6] Organized from part of Lincoln in 1883.
[7] Organized from part of Stevens in 1899.
[8] Organized from part of Columbia in 1881; part taken to form Asotin in 1883.
[9] Organized from part of Yakima in 1883; part taken to form part of Chelan in 1899.
[10] Organized from part of Spokane and part taken to form Douglas in 1883.
[11] Name changed from Sawamish in 1864.
[12] Organized from part of Stevens in 1883; part taken to form part of Chelan in 1899.
[13] Population returned as for the disputed islands.
[14] Skagit organized from part of Whatcom in 1883.
[15] Part taken to form Lincoln in 1883.
[16] Spokane reported as part of Stevens in 1870.
[17] Parts taken to form Okanogan in 1883 and Ferry in 1899.
[18] Part taken to form Kittitas in 1883.

WEST VIRGINIA.

[Set off from Virginia December 31, 1862. Admitted as a state June 19, 1863.]

[1] Then in the territory of Michigan.
[2] Then in the territory of Indiana.
[3] Parts taken to form part of Sawyer in 1883 and part of Iron in 1893.
[4] Name changed from Dallas in 1869.
[5] Name changed from La Pointe in 1866.
[6] Part taken to form Washburn in 1883.
[7] Part taken to form part of Sawyer in 1883.
[8] Organized from parts of Marinette and Oconto in 1882.
[9] Organized from parts of Langlade and Oconto in 1885; part annexed to Oneida since 1890.
[10] Organized from parts of Ashland and Oneida in 1893.
[11] Name changed from New in 1880; part taken to form part of Forest in 1885, and part of Lincoln annexed between 1880 and 1890.
[12] Part taken to form Oneida in 1885, and part annexed to Langlade between 1880 and 1890.
[13] Part taken to form part of Florence in 1882.
[14] Parts taken to form part of Florence in 1882 and part of Forest in 1885.
[15] Organized from part of Lincoln in 1885; parts taken to form Vilas and part of Iron in 1893; part of Forest annexed since 1890.

TABLE 4.—POPULATION OF STATES AND TERRITORIES BY COUNTIES, AT EACH CENSUS: 1790 TO 1900—Continued.

Wyandotte reservation	1,213	288	...	...	...	...

[1] The northern district embraces the valley of the Yukon and all territory north of it, and the southern district embraces all the remainder of the territory, including the Alaskan peninsula and the chain of Aleutian islands.
[2] The figures given for 1890 are derived from the census taken as of December 28, 1890, under the direction of the Hawaiian Government.
[3] Not separately returned in 1890.
[4] Not separately returned.
[5] Returned with Molokai in 1890.
[6] Includes population of Lanai.
[7] Includes 861 persons not located by nations or reservations.

MINOR CIVIL DIVISIONS.

TABLE 5.—POPULATION OF STATES AND TERRITORIES BY MINOR CIVIL DIVISIONS: 1890 AND 1900.

EXPLANATIONS REGARDING THE MINOR CIVIL DIVISIONS USED BY THE CENSUS.

The states and territories in the United States are composed of counties (called parishes in Louisiana) and a small number of cities which are independent of counties. The cities of Baltimore, Md., and St. Louis, Mo., are each wholly independent of the adjacent county of the same name. In the state of Virginia, 18 cities are independent of the counties in which they are geographically situated.

The principal divisions into which counties are subdivided for governmental purposes are collectively termed "minor civil divisions." These differ in their powers and functions in different states, and, in some cases, in different parts of a state, and also differ greatly in area. They are known in different states as townships, judicial townships, towns, hundreds, beats (or supervisors' districts), commissioners' precincts, election precincts, justices' precincts, civil districts, election districts, magisterial districts, militia districts, police jury wards, plantations, locations, purchases, grants, gores, and surpluses. Besides these principal divisions of the counties there are municipal corporations known as cities, towns, villages, and boroughs, each of which, in certain cases, embraces one or more of the above named minor civil divisions, or forms a part of one or more of them for all purposes of government or for sanitary and police purposes, while some of them are wholly independent of minor civil divisions and constitute principal divisions of counties.

In the states organized from the public domain and surveyed under the national land system, it has been the practice, to a great extent, to take the congressional township, 6 miles square, as a basis of town or township organization.

The counties in the several states and territories differ materially in their relation, on the one hand, to the state or territory; on the other, to the various civil divisions into which they are subdivided.

The conditions of the counties and minor civil divisions are constantly changing as new counties are created or as consolidations take place.

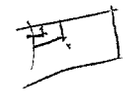
The compact bodies of population that receive special authority for organizing as chartered cities, towns, villages, or boroughs increase in number every year with the growth of communities, requiring special provisions for police and sanitary regulations.

In New England, and in a portion of the country strongly affected by New England migration, the town has many of the powers which, in the south and in the newly settled west, pertain to the county. To a great extent, the citizens of a chartered municipality within such town continue to participate in town government and are subject to town regulations, while in some states the city is more or less independent of the town or township, as previously stated.

The usual subdivision of the city is the ward, a geographical division for representative, executive, or magisterial purposes, but without any legislative functions, except such as are shared by other wards in the city council or board of aldermen.

A fuller explanation than this of the municipal relations of the civil divisions of the states and territories would be beyond the limits of the present purpose, which is to make clear what units were utilized for census purposes in the several states and territories, and for what units population has been separately returned by the census enumerators, as set forth in the following summary:

ALABAMA.—The counties are divided into election precincts. Cities, towns, and villages form parts of the election precincts in which they are located, or are coextensive with one or more of them. Mobile city is independent of the election precincts and forms a principal division of the county.



ALASKA.—No counties or civil divisions exist. The population is given for certain cities, villages, and settlements, although they are not incorporated.

ARIZONA.—The counties are divided into election precincts. Cities and towns form parts of the election precincts in which they are located, or are coextensive with one or more of them.

ARKANSAS.—The counties are divided into townships. Cities, towns, and villages form parts of the townships in which they are located.

CALIFORNIA.—The counties are divided into judicial townships, and are so returned, except Contra Costa county, which is returned by supervisors' districts. Cities and towns form parts of the townships in which they are located, or are coextensive with them. Sacramento city is independent of the judicial townships and forms a principal division of the county. San Francisco city is coextensive with San Francisco county.

COLORADO.—The counties are divided into election precincts. Cities, towns, and villages form parts of the election precincts in which they are located, or are coextensive with one or more of them.

CONNECTICUT.—The counties are divided into towns. Cities and boroughs form parts of the towns in which they are located, the city, in several instances, being coextensive with the town. The borough of Naugatuck is also coextensive with the town of the same name.

DELAWARE.—The counties are divided into hundreds. Cities and towns form parts of the hundreds in which they are located. Wilmington city is coextensive with Wilmington hundred.

DISTRICT OF COLUMBIA.—The county and municipal organizations were abandoned in 1874, and the cities of Washington and Georgetown and the county of Washington thereupon ceased to exist.

FLORIDA.—The counties are divided into election precincts. Cities, towns, and villages form parts of the election precincts in which they are located, or are coextensive with one or more of them.

GEORGIA.—The counties are divided into militia districts. Cities, towns, and villages form parts of the militia districts in which they are located, or are coextensive with one or more of them.

HAWAII.—There is no county organization, but the islands, with two exceptions, are divided into districts. Honolulu city (so-called) is coextensive with the district of Honolulu, but is not incorporated.

IDAHO.—The counties are divided into election precincts. Cities, towns, and villages form parts of the election precincts, or are coextensive with one or more of them.

ILLINOIS.—Of the 102 counties in the state, 83 are divided into townships and 19 are divided into election precincts. Cities, towns, and villages form parts of the townships or election precincts in which they are located, or are coextensive with one or more of them.

INDIANA.—The counties are divided into townships. Cities, towns, and villages form parts of the townships in which they are located.

INDIAN TERRITORY.—There is no county organization, but the territory is divided into nations and reservations. Under the provision of an act of Congress approved June 28, 1898, a number of towns have been incorporated.

IOWA.—The counties are divided into townships. Cities and towns form parts of the townships in which they are located, or are coextensive with them, except Sioux City, which is independent of township organization.

KANSAS.—The county subdivisions are townships. Cities of the first and second classes are independent of the townships and form principal divisions of the counties. Cities of the third class, having a population of 1,000 or over and an assessed valuation of not less than $150,000, may, upon a two-thirds vote, become independent of the townships. In other cities of the third class, those corresponding to incorporated villages in most states, the people participate in the government of the townships in which they are located.

KENTUCKY.—The counties are divided into magisterial districts. Cities, towns, and villages form parts of the magisterial districts in which they are located, or are coextensive with one or more of them.

LOUISIANA.—The parishes, similar to counties in other states, are divided into police jury wards. Cities, towns, and villages form parts of the police jury wards in which they are located, or are coextensive with them. New Orleans city is coextensive with Orleans parish.

MAINE.—The usual divisions of the county are towns and cities, the latter being, in effect, merely towns under a different form of government. Besides these, there are plantations, gores, grants, surpluses, and townships, which, as a rule, are sparsely settled. The form of government granted to plantations is very simple, giving to the organization but little power, while gores, grants, surpluses, and townships, as a rule, are unincorporated, being simply tracts of land laid off by the state authorities. Several villages have been incorporated under a recent act of the legislature, forming parts of the towns in which they are severally located.

MARYLAND.—The counties are divided into election districts. Cities, towns, and villages form parts of the election districts in which they are located, or are coextensive with them. The city of Baltimore is independent of Baltimore county.

MASSACHUSETTS.—The counties are divided into towns and cities, the cities differing from the towns only in the character of their government.

MICHIGAN.—The counties are divided into townships. Cities are independent of the townships and form principal divisions of the counties, while the villages form parts of the townships in which they are located.

MINNESOTA.—The counties are divided into townships. Cities and boroughs, and villages, with few exceptions, are independent of the townships and form principal divisions of the counties. Certain other villages form parts of the townships in which they are located, or are coextensive with them.

MISSISSIPPI.—The counties are divided into beats or supervisors' districts. Cities, towns, and villages form parts of the beats in which they are located, or are coextensive with them. Many of the larger beats are divided into two or more election precincts.

MISSOURI.—The counties are divided into townships. Cities, towns, and villages form parts of the townships in which they are located, or are coextensive with them. The city of St. Louis is independent of St. Louis county.

MONTANA.—The counties are divided into townships, which are subdivided into election precincts. Cities, towns, and villages form parts of the townships in which they are located, or are coextensive with one or more of them.

NEBRASKA.—The counties are divided into either townships or election precincts. A number of cities are independent of the townships and election precincts and form principal divisions of the counties, while other cities and all the towns and villages form parts of the townships or election precincts in which they are located, or are coextensive with them.

NEVADA.—The counties are divided into either townships or election precincts. There are but three incorporated places in the state: Virginia City, which is independent of township government and forms a principal division of the county; and Carson City and Reno town, each of which forms a part of the township or precinct in which it is located.

NEW HAMPSHIRE.—The usual divisions of the county are towns and cities, the latter being, in effect, merely towns under a different form of government. Besides these, there are locations, grants, purchases, and townships, which, as a rule, are unorganized, being simply tracts of land laid off by the state authorities.

NEW JERSEY.—The counties are divided into townships. Cities, towns, villages, and boroughs, with few exceptions,

are independent of the townships and form principal divisions of the counties.

NEW MEXICO.—The counties are divided into election precincts. Cities and towns form parts of the election precincts in which they are located, or are coextensive with one or more of them.

NEW YORK.—The counties are divided into towns and cities. Cities and villages are incorporated, the former being independent of the towns from which they are taken, while the latter remain in the towns and form component parts of them, or are coextensive with them. The 5 boroughs of New York city are, Brooklyn, coextensive with Kings county; Manhattan and Bronx, coextensive with New York county; Queens, coextensive with Queens county; and Richmond, coextensive with Richmond county.

NORTH CAROLINA.—The counties are divided into so-called townships. Cities, towns, and villages form parts of the townships in which they are located, or are coextensive with them.

NORTH DAKOTA.—The counties are divided into either civil townships or school townships. The cities and most of the towns and villages are independent of the townships, and form principal divisions of the counties, while certain other towns and villages form parts of the townships in which they are located. Many of the counties have no minor civil divisions and are returned by congressional townships.

OHIO.—The counties are divided into townships. A few cities are independent of the townships and form principal divisions of the counties, while certain other cities and all towns, villages, and hamlets form parts of the townships in which they are located, or are coextensive with them.

OKLAHOMA.—The counties are divided into townships and election precincts. Cities and towns are independent of the townships and election precincts and form principal divisions of the counties.

OREGON.—The counties are divided into election precincts. Cities, towns, and villages, with the exception of a few cities which are independent, form parts of the election precincts in which they are located, or are coextensive with one or more of them.

PENNSYLVANIA.—The counties are divided into townships, cities, and boroughs. Philadelphia city is coextensive with Philadelphia county.

RHODE ISLAND.—The counties are divided into towns and cities, the cities differing from the towns only in the character of their government.

SOUTH CAROLINA.—The counties are divided into townships. Cities, towns, and villages, with the exception of the city of Charleston, which is independent, form parts of the townships in which they are located.

SOUTH DAKOTA.—The counties are divided into civil townships, school townships, school districts, and election precincts. Many of the cities, towns, and villages are independent of the townships and form principal divisions of the counties, while others form parts of the townships and precincts in which they are located, or are coextensive with them. A number of the counties have no minor civil divisions, and are returned by congressional townships.

TENNESSEE.—The counties are divided into civil districts. Cities and towns form parts of the civil districts in which they are located, or are coextensive with one or more of them.

TEXAS.—The organized counties are each divided into four commissioners' precincts, which are subdivided into a certain number of justices' precincts. The population of the organized counties has been returned by justices' precincts, with the exception of Bowie county, which is given by commissioners' precincts. Cities, towns, and villages form parts of the commissioners' precincts or justices' precincts in which they are located, or are coextensive with the justices' precincts.

UTAH.—The counties are divided into election precincts. Cities and towns, with the exception of a few cities which are independent, form parts of the precincts in which they are located, or are coextensive with them.

VERMONT.—The usual divisions of the county are towns and cities, the cities differing from the towns in the character of their government. There are also a few unorganized subdivisions, known as townships, gores, and grants. Under the laws of Vermont, villages are incorporated, and form parts of the towns in which they are located.

VIRGINIA.—The counties are divided into magisterial districts. Towns and villages form parts of the magisterial districts in which they are located, or are coextensive with them; but the cities, 18 in number, maintain municipal organizations independent of counties.

WASHINGTON.—The counties are divided into election precincts. Cities, towns, and villages form parts of the election precincts in which they are located, or are coextensive with one or more of them.

WEST VIRGINIA.—The counties are divided into magisterial districts. Cities, towns, and villages form parts of the magisterial districts in which they are located, or are coextensive with one or more of them.

WISCONSIN.—The counties are divided into towns. Most of the cities and villages are independent of the towns and form principal divisions of the counties, while certain other cities and villages form parts of the towns in which they are located.

WYOMING.—The counties are divided into election districts and each election district may comprise several voting precincts. Cities and towns form parts of the election districts in which they are located, or are coextensive with them.

In the annexed table, giving the population of states and territories by minor civil divisions, the principal divisions of the county (townships, towns, election precincts, etc.) are set out to the marginal line, while the secondary subdivisions, or those which form parts of the principal divisions, are indented one space. In certain instances, where secondary subdivisions only are shown, the principal divisions not having been separately returned by the enumerators, such secondary subdivisions are also set out to the marginal line.

TABLE 5.—POPULATION OF STATES AND TERRITORIES BY MINOR CIVIL DIVISIONS: 1890 AND 1900.

[The population of Alaska, Hawaii, and the Indian Territory is given for certain civil divisions on pages 426 and 427.]

ALABAMA.

[Precinct means election precinct.]

MINOR CIVIL DIVISIONS.	1900	1890
AUTAUGA COUNTY	17,915	13,330
Precinct 1. Prattville, including Prattville town	4,679	3,143
Prattville town	1,929	724

Rockvale precinct, including Rockvale city	1,009	741
Rockvale city	870	
Russell precinct[11]	72	
Sageville precinct[12]	26	
South Canyon precinct,[13] including South Canyon City	1,641	801
South Canyon City	958	
FREMONT COUNTY—Continued.		
Texas Creek precinct	47	69
Upper Beaver precinct[14]	95	
West Florence precinct[10]	80	
Whitehorn precinct[15]	139	
Wilbur precinct[14]	85	
Williamsburg precinct, coextensive with Williamsburg town.	337	457
Williamsburg town	337	
GARFIELD COUNTY[16]	5,835	4,478
Precinct 1. Carbondale, including Carbondale town	598	
Carbondale town	173	166
Precinct 2. Cattle Creek	107	
Precinct 3. West Glenwood, including part of Glenwood Springs town.	750	
Glenwood Springs town (part of)	400	
Total for Glenwood Springs town, comprising precinct 4 and part of precinct 3.	1,350	920
Precinct 4. East Glenwood, comprising part of Glenwood Springs town.	950	
Precinct 5. East Newcastle, including part of Newcastle town.	534	
Newcastle town (part of)	278	
Total for Newcastle town, in precincts 5 and 6	431	311
Precinct 6. West Newcastle, including part of Newcastle town.	344	
Newcastle town (part of)	153	
Precinct 7. Antlers	228	
Precinct 8. Rifle, including Rifle town	670	
Rifle town	273	
Precinct 9. Parachute	427	
Precinct 10. Roan Creek	199	
Precinct 11. Battlement	200	
Precinct 12. Divide Creek	306	
Precinct 13. Cardiff	411	
Precinct 14. Austin	111	
GILPIN COUNTY[17]	6,690	5,867
Precinct 1, including ward 1 of Central City town	800	
Central City town (part of)	737	
Total for Central City town, comprising precincts 3 and 4 and parts of precincts 1 and 2.	3,114	2,480
Ward 1 — 737		
Ward 2 — 775		
Ward 3 — 1,170		
Ward 4 — 432		
Precinct 2, including ward 2 of Central City town	869	
Central City town (part of)	775	
Precinct 3, comprising ward 3 of Central City town	1,170	
Precinct 4, comprising ward 4 of Central City town	432	
Precinct 5, comprising part of Nevadaville town	847	
Total for Nevadaville town, coextensive with precincts 5 and 6.	823	933
Precinct 6, comprising part of Nevadaville town	476	
Precinct 7. Russell Gulch	728	
Precinct 8, comprising part of Black Hawk town	500	
Total for Black Hawk town, comprising precinct 8 and part of precinct 9.	1,200	1,067
Precinct 9, including part of Black Hawk town	900	
Black Hawk town (part of)	700	
Precinct 10. Rollinsville	231	
Precinct 11. Apex	237	
GRAND COUNTY[16]	741	604
Precinct 1. Grand Lake	61	
Precinct 2. Fraser	172	
Precinct 3. Hot Sulphur Springs	199	
Precinct 4. Kremmling	270	
Precinct 5. Sheephorn	39	
GUNNISON COUNTY	5,331	[18]4,359
Precinct 1. Gunnison,[19] comprising part of Gunnison town.	500	909
Total for Gunnison town, comprising precincts 1 and 6 and part of precinct 5.	1,200	1,105
Precinct 2. Doyleville	133	123
Precinct 3. Kezar	83	28

[1] Part taken to form part of Teller county in 1899. Comparison with population for 1890 can not be made; county redistricted since 1890.

[2] Part of Chaffee county annexed since 1890; parts of Sageville, Upper Beaver, and Wilbur precincts taken to form part of Teller county in 1899.

[3] Includes population (107) of Beaver Creek and Galena precincts; Beaver Creek taken to form Russell, Upper Beaver, and Wilbur precincts, and Galena annexed to South Canyon precinct since 1890.

[4] Organized from parts of Canyon City and Currant Creek precincts since 1890.

Ellington township	1,278	1,233
Fall Creek township	983	884
Gilmer township, including part of Columbus village	1,066	1,126
Columbus village (part of)	60	52
Honey Creek township, including Coatsburg village	1,259	1,287
Coatsburg village	321	308
Houston township	822	981
Keene township, including Loraine village	1,168	1,280
Loraine village	349	327
Liberty township	1,141	1,236
Lima township, including Lima village	1,554	1,404
Lima village	280	251
McKee township	1,057	1,065
Melrose township, exclusive of part of Quincy city	2,117	2,077
Mendon township, including Mendon village	1,361	1,489
Mendon village	627	640
Northeast township, including Golden and La Prairie villages.	1,511	1,488
Golden village	516	466
La Prairie village	182	194
Payson township, including Payson and Plainville villages.	1,697	1,819
Payson village	465	----
Plainville village	296	----
Quincy city, in Melrose and Riverside townships	36,252	31,494
Ward 1	5,440	
Ward 2	5,194	
Ward 3	5,497	
Ward 4	6,785	
Ward 5	6,807	
Ward 6	4,189	
Ward 7	2,340	
Richfield township	1,010	1,114
Riverside township, exclusive of part of Quincy city	3,432	2,168
Ursa township	1,486	1,614
ALEXANDER COUNTY	19,384	16,563
Beech Ridge precinct[1]	268	371
Cache precinct[1]	566	----
Cairo precinct,[1] coextensive with Cairo city	12,566	10,422
Cairo city	12,566	10,324
Ward 1	1,354	
Ward 2	1,206	
Ward 3	1,804	
Ward 4	1,519	
Ward 5	1,817	
Ward 6	1,953	
Ward 7	2,913	
Clear Creek precinct	645	546
East Cape Girardeau precinct	449	502
Elco precinct	1,247	1,206
Goose Island precinct	502	734
Lake Milligan precinct	335	357
Sandusky precinct	696	747
Santa Fé precinct	377	279
Thebes precinct, including Thebes village	964	673
Thebes village	417	----
Unity precinct	769	726
BOND COUNTY	16,078	14,550
Burgess township, including Millersburg and Pocahontas villages.	1,551	1,346
Millersburg village	305	----
Pocahontas village	482	372
Central township, including Greenville city	3,467	2,793
Greenville city	2,504	1,868
Ward 1	893	
Ward 2	644	
Ward 3	967	
Lagrange township	1,364	1,401
Mills township	994	1,084
Mulberry Grove township, including Mulberry Grove village.	2,168	2,008
Mulberry Grove village	632	----
Old Ripley township	1,061	1,099
Pleasant Mound township, including Smithboro village	1,466	1,573
Smithboro village	314	393
Shoal Creek township, including Sorento village	2,725	2,170
Sorento village	1,000	538
Tamalco township, including part of Keyesport village	1,282	1,076
Keyesport village (part of)	249	----
Total for Keyesport village, in Tamalco township, Bond county, and Irishtown township, Clinton county.	500	----
BOONE COUNTY	15,791	12,203
Belvidere township, including Belvidere city	8,347	4,882
Belvidere city	6,937	3,867
Ward 1	1,573	
Ward 2	1,491	
Ward 3	1,278	
Ward 4	1,324	
Ward 5	1,271	
Bonus township	1,114	1,015
Boone township, including Capron village and part of Poplar Grove village.	1,469	1,474
Capron village	502	436
Poplar Grove village (part of)	122	89
Total for Poplar Grove village, in Boone and Caledonia townships.	323	232
Caledonia township, including part of Poplar Grove village.	1,176	1,227
Poplar Grove village (part of)	201	143
Flora township	937	869
Le Roy township	842	868
Manchester township	884	935
Spring township	1,022	983
BROWN COUNTY	11,557	11,951
Buckhorn township	1,025	1,013
Cooperstown township	1,411	1,466
Elkhorn township	1,128	1,274
Lee township, including Mound Station town	1,108	1,277
Mound Station town	178	219
Missouri township	786	873
Mt. Sterling township, including Mt. Sterling town	3,138	2,822
Mt. Sterling town	1,960	1,655
Pea Ridge township	946	1,012
Ripley township, including Ripley town	491	496
Ripley town	298	304
Versailles township, including Versailles town	1,524	1,718
Versailles town	524	517
BUREAU COUNTY	41,112	35,014
Arispie township, including part of Tiskilwa village	1,209	1,043
Tiskilwa village (part of)	496	362
Total for Tiskilwa village, in Arispie and Indiantown townships.	965	801
Berlin township, including Malden village and part of Dover village.	1,052	1,126
Dover village (part of)	37	30
Total for Dover village, in Berlin and Dover townships	247	220
Malden village	309	319
Bureau township	761	779
Clarion township	705	792
Concord township, including Buda and Sheffield villages	2,965	2,759
Buda village	873	990
Sheffield village	1,265	993
Dover township, including part of Dover village	1,076	1,188
Dover village (part of)	210	190
Fairfield township	921	847
Gold township	766	499
Greenville township	1,128	946
Hall township, including Ladd and Seatonville villages and Spring Valley city.	9,844	5,688
Ladd village	1,324	----
Seatonville village	909	536
Spring Valley city	6,214	3,837
Ward 1	704	
Ward 2	968	
Ward 3	629	
Ward 4	2,474	
Ward 5	1,439	
Indiantown township, including part of Tiskilwa village	1,271	1,277
Tiskilwa village (part of)	469	439
La Moille township, including La Moille village	1,345	1,312
La Moille village	576	516
Leepertown township, including Bureau village	715	556
Bureau village	545	363
Macon township	692	781
Manlius township	798	810
Milo township	781	792
Mineral township, including Mineral village	1,258	905
Mineral village	339	188
Neponset township, including Neponset village	1,224	1,209
Neponset village	516	542
Ohio township, including Ohio village	1,822	1,197
Ohio village	461	364
Princeton township, including Princeton city	4,886	4,491
Princeton city	4,023	3,396
Ward 1	1,121	
Ward 2	791	
Ward 3	997	
Ward 4	1,114	
Selby township, including Depue and Holloway villages	1,662	1,565
Depue village	488	455
Holloway village	207	----
Walnut township, including Walnut village	1,501	1,368
Walnut village	791	605

[1] Cache precinct organized from parts of Beech Ridge and Cairo precincts since 1890.

TABLE 5.—POPULATION OF STATES AND TERRITORIES BY MINOR CIVIL DIVISIONS: 1890 AND 1900—Continued.

Sidney village	564	581
Somer township	940	1,072
South Homer township, including Homer village	1,821	1,669
Homer village	1,080	917
Stanton township	865	847
Tolono township, including Tolono village and part of Sadorus village.	1,668	1,777
Sadorus village (part of)	56	
Tolono village	845	902
Urbana township, including Urbana city	6,948	4,488
Urbana city	5,728	3,511
Ward 1	939	
Ward 2	2,299	
Ward 3	1,475	
Ward 4	1,015	
CHRISTIAN COUNTY	32,790	30,581
Assumption township, including Assumption village	2,670	2,095
Assumption village	1,702	1,076
Bear Creek township, including Palmer town	1,239	1,321
Palmer town	299	432
Buckhart township, including Edinburg village	2,671	2,408
Edinburg village	1,071	806
Greenwood township	952	1,075
Johnson township	937	983
King township, including part of Harvel village	882	926
Harvel village (part of)	95	
Total for Harvel village,[6] in King township, Christian county, and Harvel township, Montgomery county.	357	246
Locust township, including Owaneco village	1,225	1,254
Owaneco village	255	
May township	885	864
Mosquito township	1,175	1,377
Mt. Auburn township, including Mt. Auburn village	1,440	1,546
Mt. Auburn village	235	222
Pana township, including Pana city	6,561	6,143
Pana city	5,530	5,077
Ward 1	1,260	
Ward 2	1,275	
Ward 3	1,236	
Ward 4	924	
Ward 5	835	
Prairieton township	1,028	1,067
Ricks township, including Morrisonville village	1,675	1,652
Morrisonville village	934	844
Rosemond township	1,069	1,180
South Fork township	1,395	1,506
Stonington township, including Stonington village	1,261	1,096
Stonington village	438	270
Taylorville township, including Taylorville city	5,725	4,038
Taylorville city	4,248	2,829
Ward 1	1,264	
Ward 2	935	
Ward 3	966	
Ward 4	1,083	
CLARK COUNTY	24,033	21,899
Anderson township	1,341	1,293
Auburn township	561	655
Casey township, including Casey city	2,907	2,286
Casey city	1,500	844
Darwin township	1,152	1,103
Dolson township	1,197	1,191

[1] Precincts erroneously returned as townships in 1890.
[2] Given in 1890 as in Mt. Carroll township only.
[3] Includes population (4,434) of Beardstown city and that part of county not returned by precincts in 1890.
[4] Exclusive of population of Beardstown city.
[5] Given in 1890 as in Sadorus township only.
[6] Given in 1890 as in Harvel township, Montgomery county, only.

TABLE 5.—POPULATION OF STATES AND TERRITORIES BY MINOR CIVIL DIVISIONS: 1890 AND 1900—Continued.

ILLINOIS—Continued.
