RSS Inventory Tracking System (RITS) Update
February 23, 2005

RITS Capabilities

- RITS provides the capability to track inventory, issue inventory pick lists and provides visibility at Project, State, and Federal levels
- Allows the Project areas to manage local inventory as well as SNS Inventory

RITS Background

- SNS commitment to all 62 Project areas to provide a system to track SNS inventory from the Project Area receiving warehouses to Points of Dispensing
- Vendor evaluation and review
- Vendor demonstration and Pilot with project areas
- “GO” decision to move forward with solution

RITS Deployment

- SNS Hosted solution with High availability
- Available via any Internet connection
- Redundancy for Project Area Internet needs
- Use of the system by Project Areas is not required, optional at this time
- Future identification of Project Area interest and roll-out scheduling for your locale

RITS Project approach

- Phased approach – Project Area Deployment identification (QTR 3, CY05)
- Software modifications for roll-out
- Marketing – Conferences, web casts, Extranet, Listserv
- Production Implementation
- Training
    - Train the Trainer
    - CD ROM materials
    - Web enabled
    - On-site
- Target Go-Live 30 Sept 05

Next Steps

- Project area user groups
- Commitment of resources
- Local logistics resources
- RITS roles/responsibilities
- RITS Pilot sites
