SUMMARY AND RATE TABLES

Table I.—Population, number of births and deaths, and crude rates: the registration areas, United States, 1900-1938 ---- 16

Table II.—Enumerated population by cities and rural areas, and by race: United States and each State, April 1, 1930 ---- 16

Table III.—Enumerated population by age, race, and sex: United States, April 1, 1930 ---- 17

Table IV.—Estimated midyear population: United States and each State, 1930-1937 ---- 18

Table V.—Population, number of births and deaths, and crude rates: specified foreign countries, 1936 ---- 18

Table VI.—Population, number of births and deaths, and crude rates: specified countries and selected years ---- 19

Table VII.—Crude birth rates (number of live births per 1,000 estimated midyear population): United States, each division and State, 1915-1938 ---- 20

Table VIII.—Crude stillbirth rates (number of stillbirths per 1,000 live births): United States, each division and State, 1922-1938 ---- 21

Table IX.—Crude death rates (number of deaths per 1,000 estimated midyear population): United States, each division and State, 1915-1938 ---- 22

Table X.—Infant mortality rates (number of deaths under 1 year of age per 1,000 live births): United States, each division and State, 1915-1938 ---- 23

Table XI.—Deaths from each cause and crude death rates: United States, 1937 and 1938 ---- 24

Table XII.—Crude death rates (number of deaths per 100,000 estimated midyear population) for selected causes of death: United States, each division and State, 1938 ---- 28

Table XIII.—Births, deaths, infant mortality, and stillbirths: United States, 1938 ---- 30

Section A.—Cities having populations of 10,000 or more in 1930, cities having populations of 2,500 to 10,000 in 1930, and rural districts, in the United States and each State ---- 30

Section B.—Each county (including cities having populations of 10,000 or more in 1930) ---- 33

GENERAL TABLES

Live Births

Table 1.—Live births by month and by population groups: United States and each State, 1938 ---- 85

Table 2.—Live births by race, parent nativity of white, and population groups: United States and each State, 1938 ---- 88

Table 3.—Live births by sex of child, age of mother, race, and parent nativity of white: United States and each State, 1938 ---- 91

Table 4.—Live births by sex of child and by age of parents: United States and each State, 1938 ---- 104

Table 5.—Live births by number of child, age of mother, and race, and for white by nativity of mother: United States, 1938 ---- 116

Table 6.—Live births, by number of child and by race, and for white by nativity of mother: United States and each State, 1938 ---- 121

Table 7.—Cases of plural births classified by number of children born alive and stillborn, and by race and sex: United States and each State, 1938 ---- 127

GENERAL TABLES—Continued

Stillbirths

Page

Table 8.—Stillbirths by month and by population groups: United States and each State, 1938 ---- 131

Table 9.—Stillbirths by race, parent nativity of white, and population groups: United States and each State, 1938 ---- 134

Table 10.—Stillbirths by number of child, age of mother, and race, and for white by nativity of mother: United States, 1938 ---- 137

Total Deaths

Table 11.—Deaths by month and by population groups: United States and each State, 1938 ---- 139

Table 12.—Deaths by race and by population groups: United States and each State, 1938 ---- 142

Table 13.—Deaths by age, race, sex, and population groups: United States and each State, 1938 ---- 144

Table 14.—Deaths from each cause by age, race, and sex: United States, 1938 ---- 178

Table 15.—Deaths by age, race, and sex: each city having a population of 100,000 or more, 1938 ---- 224

Table 16.—Deaths by specified races, sex, age, and population groups: United States and each State, 1938 ---- 233

Table 17.—Deaths from selected causes, by age, race, and sex: each State, 1938 ---- 247

Table 18.—Deaths from each cause, by race and sex: United States and each State, 1938 ---- 394

Table 19.—Deaths from selected causes, by race, sex, and population groups: United States and each State, 1938 ---- 458

Table 20.—Deaths from each cause, by detailed race and sex: United States, 1938 ---- 486

Table 21.—Deaths from selected causes, by month: United States, 1938 ---- 490

Infant Deaths

Table 22.—Deaths under 1 year from selected causes, by age, month, and sex: United States, 1938 ---- 491

Table 23.—Deaths under 1 year from selected causes, by age, race, and sex: United States and each State, 1938 ---- 502

Table 24.—Deaths under 1 year of age from selected causes, by race, sex, and population groups: United States and each State, 1938 ---- 541

Puerto Rico ---- 553, 567

Virgin Islands ---- 553, 576

VITAL STATISTICS OF THE UNITED STATES
PART 1. GEOGRAPHIC CLASSIFICATION BY PLACE OF OCCURRENCE

Introduction

This volume—Vital Statistics of the United States, Part I—contains official statistical tabulations of natality and mortality data for the calendar year 1938. Tables are presented giving detailed statistics of live births, stillbirths, total deaths, and infant deaths in continental United States. Supplementary tabulations for Hawaii, Puerto Rico, and the Virgin Islands are also included. The natality data are classified by geographic area, race and sex of child, age and nativity of parents, month, order of birth, et cetera. Mortality data are classified by geographic area, sex, age, race, month, cause of death, et cetera. The geographic classification refers to the place of birth or death, irrespective of the usual place of residence of the mother of the child, or the usual place of residence of the decedent. The tabulations are derived from transcripts of original birth and death certificates that are received from registration officials of States, cities, and outlying possessions of the United States.

This volume was prepared under the direction of Dr. Halbert L. Dunn, Chief Statistician for Vital Statistics, and Dr. John Collinson, Assistant Chief Statistician for Vital Statistics. Tabulations and introductory material were prepared under the immediate supervision of Dr. Forrest E. Linder, Social Science Analyst.

REVISION OF ANNUAL VITAL STATISTICS VOLUMES

The present volume continues the new series of annual publications begun last year. Prior to 1937, vital-statistics data compiled by the Bureau of the Census were published annually in two volumes, "Birth, Stillbirth, and Infant Mortality Statistics" and "Mortality Statistics." The geographic classifications used in these volumes referred to place of birth or death. From the beginning, the principal compilations of birth and death statistics had been on a de facto geographic basis—that is, births and deaths were tabulated according to the place in which the birth or death occurred, without regard to the usual place of residence. The alternative is to tabulate on a de jure geographic basis, allocating each birth and death to the State, city, and county of residence, or usual place of abode.

The difference between these two methods of tabulation should be emphasized. Many births and deaths occur in cities or counties of which either the mother of the child or the decedent is not a usual resident. These births and deaths are nonresident—a result of temporary movements of the residents of one geographic area to another. This continuous shifting of the population occurs for a number of reasons, one of which is the desire for hospital facilities not available in the city or county of usual residence. Inasmuch as the population census is compiled according to the usual place of abode, the tabulation of vital statistics on a de facto basis has therefore seriously restricted the use of these data for certain purposes.

Important as it is to tabulate births and deaths by place of residence, it was not desirable to make a decided break that would destroy comparability with the series of statistics previously published. The national totals derived from the two types of tabulations are identical, since an international exchange of nonresident births or deaths is neither feasible nor necessary. The differences for State totals are also, in most cases, negligible. Furthermore, tabulations by place of occurrence are required for certain administrative purposes. The natality and mortality data included in part I are therefore a continuation of the figures published for prior years in the annual volumes "Birth, Stillbirth, and Infant Mortality Statistics" and "Mortality Statistics." Data compiled on a de jure or residence basis are published in a second volume entitled "Vital Statistics of the United States, Part II."

The tables in the volumes for 1938 correspond, with a few exceptions, to those published for 1937. The tabulations presented in 1937 were extensively revised so that the data might be more relevant to modern social, medical, and public-health problems. The revisions were based on the results of a survey of the needs of many important social agencies and individual users of vital statistics. Many of the valuable suggestions and comments have been incorporated in the volumes for 1937 and 1938; others will contribute to future improvements and extensions of vital-statistics tabulations.

COMPARABILITY OF CLASSIFICATION

CHANGES IN THE REGISTRATION AREAS.—The first vital statistics published by the Federal Government related to 1850 and were for the entire United States. These statistics were based on information collected during the decennial census of that year. Similar decennial collections were made by census enumerators at each census up to and including the census of 1900. The interval between the occurrence of a birth or a death and the census enumeration resulted in inaccurate and incomplete reports on births and deaths. Since several States had developed efficient systems for the registration of vital statistics, the Bureau of the Census, in 1880, established a national "registration area" for deaths. This original area consisted of only two States—Massachusetts and New Jersey—the District of Columbia, and several large cities, but by 1900 eight other States had been admitted. For the years 1880, 1890, and 1900, mortality data were received from the States and cities included in this expanding area, and both birth and death figures for the entire country were compiled from the reports of census enumerators.

The annual collection of mortality statistics for the registration area began with the calendar year 1900. In 1902, the Bureau of the Census, which had previously functioned only in census years, was made a permanent agency by an act of Congress. This act authorized the Director of the Bureau of the Census to obtain, annually, copies of records filed in the vital-statistics offices of those States and cities having adequate death-registration systems. At that time, not all the States had enacted laws requiring the registration of births and deaths, and in many States the existing laws were poorly enforced. Important dates in the historical development of vital statistics in the various States and the year in which each State was admitted to the national registration areas, are given in table A.

TABLE A.—IMPORTANT DATES IN THE HISTORY OF BIRTH AND DEATH REGISTRATION: UNITED STATES

STATE	FIRST STATE REGISTRATION LAW ENACTED		Enactment of present law (model or conforming to model law) births and deaths	RECORDS ON FILE FOR ENTIRE STATE		ADMITTED TO REGISTRATION AREA	
	Deaths	Births		Deaths	Births	Deaths	Births
Alabama	1881	1881	1919	1908	1908	1925	1927

1900	1/75,994,575	10	30,765,618	40.5			
1890 1/	62,947,714	8	19,659,440	31.2			
1880 1/	50,155,783	2	8,538,366	17.0			

1/ Figures are for census year ending May 31.

NOTE.—For every year the District of Columbia was in both areas, but is not included in the "number of States"; previous to 1933, the death area also included a varying number of registration cities in nonregistration States.

The death-registration area for 1900 consisted of 10 States, the District of Columbia, and a number of qualified cities in nonregistration States. The gradual growth of this area by the addition of more States is shown in table B, which gives for each year the estimated midyear population of the whole United States and the number of States and the estimated population included in the registration area.

Inasmuch as it is more difficult to obtain accurate and complete registration of births than of deaths, the national birth-registration area was not established until 1915. For this reason no birth statistics were published by the Bureau of the Census from 1900 to 1914. The original birth-registration area of 1915 consisted of 10 States and the District of Columbia, but other States were gradually added in the years following. The growth of this area is indicated also in tables A and B.

In 1933, for the first time, both the birth- and death-registration areas included all States, and since that year the annual publications have included data for the entire United States.

The change in areas for which data have been collected and tabulated makes it impossible to obtain a national series of geographically comparable data prior to 1933. However, rates for the expanding registration areas are an approximation to complete national rates, and general comparisons over a long period of years can be made. More exact trends for parts of of the United States can be secured by use of some constant area, such as the original registration areas or the registration areas of 1920. Crude birth, stillbirth, and death rates for the registration areas of each year are given in table I, and crude rates for the individual States are shown in tables VII, VIII, IX, and X.

GEOGRAPHIC CLASSIFICATION.—The geographic code used in tabulating the data published in this report gives a separate identifying number to each city having a population of 10,000 or more in 1930, and to certain towns and townships each having a population of 10,000 or more and a population density of 1,000 or more per square mile. The code also gives a separate number to each county, exclusive of these cities. Although villages and cities having populations of less than 10,000 are not individually identified, each county is divided into two parts, one consisting of "incorporated places" of 2,500 to 10,000, and another consisting of the remainder of the county. In this report most of the tables containing classifications by size-of-population groups show cities of 10,000 or more, cities of 2,500 to 10,000, and rural. Certain tables give a more detailed five-group classification, namely, cities having populations of 100,000 or more; cities of 25,000 to 100,000; cities of 10,000 to 25,000; cities of 2,500 to 10,000; and rural. This finer classification is given where feasible in order to break the heterogeneity of large population groupings.

Prior to 1930 the annual vital-statistics data were tabulated in two general groups—urban and rural. In this classification the urban group included all cities of 10,000 inhabitants or more and a few densely populated towns and townships. The rural group included all remaining areas. These definitions were consistent with those used in the 1920 population census. The definitions used for the 1930 population census were changed so that "urban" included all cities with populations in excess of 2,500, and "rural" included the remaining

areas. To give annual vital-statistics data which could be related to the population census, it was necessary, therefore, to divide into two groups the group previously defined as rural in vital statistics. Thus, by combining the areas of 2,500 to 10,000 with the urban, figures could be obtained that were comparable with those of the 1930 census. Also, by combining the areas of 2,500 to 10,000 with the rural, figures could likewise be obtained that were comparable with the rural as given in the vital-statistics reports prior to 1930.

Most natality and mortality tables published since 1930 show the three-way population classification: Cities in excess of 10,000, cities of 2,500 to 10,000, and rural; but in some tables the simple classifications "urban" and "rural" are used. In these instances, where the dichotomous classification is shown, the rural includes all areas except the cities of 10,000 or more. In the present volume the ambiguous terms "urban" and "rural" are avoided, and the table headings indicate the composition of each population group.

CLASSIFICATION BY RACE.—The detailed racial classification given in this volume shows births and deaths classified by white, Negro, Indian, Chinese, Japanese, and a residual group of numerically minor races. In most tables such an extended classification is not justified and the racial divisions are "white," "Negro," and "other races"; in tables where the main purpose is to isolate the major group, the classifications are simply "white" and "all other." In any case where the racial designation on the birth or death certificate is Mexican, the birth or death is tabulated with "white." This allocation of Mexican births and deaths is consistent with that used prior to 1930 and for the years after 1934. In the annual reports for the years 1930 to 1934, the Mexicans were not classified with the "white" but were tabulated with "other races."

INTERNATIONAL LIST OF CAUSES OF DEATH.—The data in the mortality reports published by the Bureau of the Census are tabulated according to the numbers and titles of the detailed International List of Causes of Death. Complete titles of this list, with the official numbers and subdivisions, are given in the stub of table XI. In some tables it is necessary, on account of space limitations, to abbreviate cause-of-death titles or to indicate the composition of groups of causes by giving the list numbers. In such cases, reference may be made to table XI or to the Manual of the International List of Causes of Death for the complete titles. The manual indicates, also, the main diseases included in each title.

The International List is revised decennially in order that the terminology by which deaths are classified may be consistent with advances in medical science and changes in diagnostic practice. The list used in this volume was adopted by the International Commission on the International List of Causes of Death, which met in Paris in 1929.

Special attention is directed to one feature of the 1929 list as used in these tables. Since the official list did not include titles for certain kinds of accidents, such as accidents in mines and quarries or motor vehicle accidents, a supplemental list of 14 important classes of accidents was adopted. Deaths tabulated in this supplemental classification are also included under the proper official list titles. For example, if there was an accident in which an automobile was driven from the road into a river and the driver was drowned, the death would be classified under International List number 183, which signifies drowning. In the supplemental tabulation this same death would be reclassified under symbol 210 (automobile accident).

NATIVITY CLASSIFICATION.—Early mortality reports published by the Bureau of the Census contained extensive tables showing parent nativity as well as nativity of the decedent. Tables classifying deaths by the birthplace of the decedent and the nativity of parents were discontinued in 1933.

In preceding reports more emphasis has been placed upon country of birth of parents in the birth statistics. Detailed tables showing specific country of birth of mother and specific country of birth of father, as well as more abridged classifications, have been published for each year through 1936. The historical importance of these data in tracing the changing composition of the population of the United States must be recognized. However, in recent years the number of births to foreign-born parents has become a relatively small proportion of the total. Accordingly, tables showing parent nativity for births have been eliminated or revised in the reports for 1937 and 1938. A continued decrease in the proportion of births to foreign-born parents will justify decreased emphasis on this classification in future volumes.

Table C gives the total number of births of white children in the increasing birth-registration area for each year beginning with 1915, and the percent of these having one or both parents of foreign birth. The same data are given for the 10 original birth-registration States. For this original registration area, white births of foreign or mixed parentage were 53.0 percent of all births in 1915, whereas in 1938 this group comprised only 19.2 percent of the total. For the whole United States, in 1938, births of foreign or mixed parentage were only 11.0 percent of the total.

TABLE C.—WHITE LIVE BIRTHS OF FOREIGN PARENTAGE: EXPANDING AND ORIGINAL BIRTH-REGISTRATION AREAS, UNITED STATES

YEAR	EXPANDING BIRTH-REGISTRATION AREA			ORIGINAL BIRTH-REGISTRATION AREA 1/		
	Total white live births	One or both parents foreign-born		Total white live births	One or both parents foreign-born	
		Number	Percent of total		Number	Percent of total
1938	2,005,955	220,286	11.0	611,915	117,413	19.2
1937	1,928,437	230,381	11.9	595,225	124,447	20.9
1936	1,881,883	241,647	12.8	587,359	131,589	22.4
1935	1,888,012	259,613	13.8	589,409	141,957	24.1
1934	1,866,231	255,643	13.7	587,024	152,717	26.0
1933	1,794,946	267,426	14.9	578,841	161,375	27.9
1932	1,805,155	296,124	16.4	616,299	183,344	29.7
1931	1,848,293	330,772	17.9	641,636	204,288	31.8
1930	1,946,841	384,982	19.8	678,387	229,482	33.8
1929	1,924,475	407,022	21.1	678,482	241,070	35.5
1928	1,982,246	434,789	21.9	705,001	260,067	36.9
1927	1,925,585	458,088	23.8	726,931	277.949	38.2
1926	1,707,034	465,746	27.3	723,449	285,047	39.4
1925	1,731,669	487,707	28.2	746,083	303,025	40.6
1924	1,762,872	514,452	29.2	768,354	321,777	41.9
1923	1,644,034	501,124	30.5	752,860	323,070	42.9
1922	1,629,387	510,167	31.3	750,806	329,573	43.9
1921	1,565,446	496,815	31.7	789,173	352,443	44.7
1920	1,395,523	440,585	31.6	755,866	340,806	45.1
1919	1,269,363	439,133	34.6	714,815	346,200	48.4

QUALIFYING FACTORS IN INTERPRETATION AND USE OF DATA

While the data in this volume are available for a variety of administrative and scientific purposes, they cannot be correctly interpreted unless cognizance is taken of various qualifying factors. Obviously the factors to be considered depend upon the specific purposes for which the data are to be used. It is not feasible to catalog all of the pertinent factors in the use of vital-statistics tabulations, but a few of the more important should be mentioned.

Most of the factors limiting the use of vital-statistics data arise from imperfections in the original material or from the impracticability of tabulating or using these data in very detailed categories. These defects should not be ignored, yet their existence does not destroy the value of the tables for most general purposes. Analysis of small differences or exact evaluation and interpretation of vital statistics may require careful study of many related elements. However, the trend of crude birth and death rates, the increase or decrease in the number of deaths from selected causes, and the major differences in rates among States, are all facts that will not be materially changed by finer analysis.

AGE, SEX, RACE.—If crude death rates are used as an index of the health conditions of a community, comparisons of rates for different States or cities are not strictly valid unless the age, sex, and racial composition of the population of each area is considered. It is obvious that, if the population in one State is generally older than that in another, the crude death rate will be higher, even though there is no essential difference in the age-specific death rates.

Similar considerations apply also to crude birth rates. For example, comparison of birth rates of one area having a certain proportion of women of child-bearing age with the rates of another community of a different population composition is erroneous if the rates are used as a measure of fertility.

Various methods have been devised to compensate for differences in the population composition of the areas to be compared. A necessary element of all such methods is the computation of specific birth or death rates for each of the factors to be considered. While the natality and mortality tables in this volume are sufficiently detailed for the most important of these computations, it is also essential to have population figures for each separate age, sex, and racial group. Since detailed population data for 1938 are not yet available, it is not possible, at this time, to present these specific rates. The crude rates given in the summary and rate tables are therefore subject to some limitations when used to compare health or fertility conditions in different areas.

POPULATION ESTIMATES.— Since birth and death rates are ratios of the number of births and deaths to population figures, accurate rates are partially dependent upon accurate population figures. Tabulations showing the number and composition of the population for various areas are available only for the years when regular decennial population censuses are taken. For intervening years population estimates must be used.

Recent estimates for the population of the United States as a whole are based on the number of births and deaths that have occurred since the last census date and on the net immigration and emigration. Certain corrections have been made in the birth and death data for underregistration. The allowances for underregistration of births are based, in part, on recent tests conducted by the Bureau of the Census and on ratios computed from the 1930 census returns in comparison with the number of births registered during the year preceding the census. The net immigration figure represents, as nearly as it is possible to ascertain, the difference between the total number of persons, both citizens and aliens, who arrived in continental United States either from foreign countries or from outlying possessions and the number of persons who left the United States for foreign countries or outlying possessions.

Inasmuch as there is no record of the movement of population from one State or city to another, it is not possible to employ for these smaller areas the method used in estimating the population of the United States. Population estimates for individual cities or counties, population groups, separate races, or for specific age groups, have not been made by the Bureau of the Census since 1933, because it is believed that unavoidable errors in these estimates would be so great as to introduce serious errors into rates computed from them. Population estimates for States and the District of Columbia given in table IV are based on growth trends indicated by former censuses, as well as on local census data, school enrollment figures, directory counts, and other sources of information.

PLACE OF RESIDENCE.—Official national vital statistics and those published by most State and city agencies have, for the most part, been compiled according to the place of birth or death. Under this system of tabulation, the data are tabulated by the city, county, or State in which the birth or death occurred, irrespective of the usual place of residence of the mother of the child, or the usual place of residence of the decedent.

The significance of this method of tabulation can be seen by considering the effect of population movement on death rates. For example, the hospital facilities in a city may attract patients from surrounding areas and, as a result, many of the deaths occurring in this city will not be deaths of residents of this city. The enumerated population of the city does not, under such conditions, represent the number of persons exposed to the risk of death; and the death rate does not accurately describe the mortality of this particular city. A more correct figure is obtained by reallocating all deaths to the place of residence. Since there are many causes contributing to the movement of patients to some area other than their usual place of residence, it cannot be assumed that the direction of the movement is always from rural to urban areas. Similar nonresident factors affect the interpretation of birth statistics based upon place of occurrence. In order to determine the direction or the magnitude of the differences between rates compiled according to place of occurrence and those compiled according to place of residence, it is necessary to examine tabulations compiled on both bases.

Since the data given in this volume are compiled according to place of occurrence, figures for individual cities and counties or for population groups do not always give an accurate indication of relative health and fertility conditions. Tabulations for States as a whole compiled on either basis are essentially the same. Detailed tabulations by place of residence are given in "Vital Statistics of the United States, Part II."

COMPLETENESS OF REGISTRATION.—Although every State has adopted a vital-statistics law requiring the registration of all births and deaths, these laws are not uniformly enforced. In most States where the registration organization is well established and where the persons responsible for filing certificates appreciate the value of registration to the individual as well as its value for statistical purposes, practically all births and deaths are registered. In other States, however, the underregistration is enough to affect the use of the tabulated data for certain purposes.

Accurate information on the completeness of registration in each State is not available. One condition required for admission to the national registration areas was that there exist a demonstrated completeness of registration of at least 90 percent. Using this as a criterion, all of the States were admitted to the registration areas by 1933, and although registration has become more complete in most States, it is likely that there has been regression in some States. Estimates of the completeness of registration in States, based on the comparison of vital-statistics reports and enumerated census data, have been published by several writers.

There is considerable evidence to show that birth registration is more incomplete than death registration. Especially incomplete is the registration of Negro births in isolated rural areas.

INTERPRETATION OF CAUSE-OF-DEATH TABLES

Cause-of-death data given in this volume are classified by the fourth revision of the International List of Causes of Death. The use of this list in the tabulation of data by all States, and by various countries, results in similar cause-of-death titles for the various tables. Unfortunately, this use of a standard classification list, although essential for regional comparisons, does not assure strict comparability of the tabulated figures. At the present time, the type of statement given for the cause of death varies widely according to the care and consideration given to the certification of cause. A high degree of comparability could be attained only if the data on cause of death were reported with equal completeness and accuracy for every area. Table D gives, for 1938, the frequency distribution of States (including the District of Columbia) showing the percent of deaths coded International List numbers 199 and 200, namely, ill-defined causes of death. The variation in the accuracy of reporting throughout the country in 1938 is indicated by the fact that in 29 States less than 1 percent of all deaths were classified in this ill-defined group, while in 6 States over 5 percent, and in 2 States over 10 percent were so classified. Obviously, if a high proportion of deaths are included in this poorly defined cause-of-death class, it means that there is an unknown deficiency in the number of deaths classified in the more precisely defined groups.

The interpretation of data on cause of death is further qualified by the fact that, although in many instances the death is the result of a combination or sequence of causes, it is practicable to tabulate the death under one rubric only. This necessitates a choice of the primary cause from those given on the certificate. This selection of a primary cause is made according to rules given in the Manual of Joint Causes of Death. It is evident, however, that the effect of any such rules on the classification of deaths for specific causes will vary according to the completeness with which all the factors

contributory to the death are reported. If a death is the result of several causes but only a single cause of death is given on the certificate, the Manual of Joint Causes of Death cannot, of course, be used. For this reason the omission of pertinent complicating factors or conditions adding to the risk of death may result in an incorrect assignment of cause. Table E gives the frequency distribution of States (including the District of Columbia) showing the percent of death certificates on which only a single cause of death was stated in 1936, the latest year for which such data are available.

In 12 States more than 50 percent of all certificates had only a single cause of death. In contrast, it can be noted from table E, there were 5 States with less than 30 percent of the certificates reporting only a single cause. This wide variation in the amount of information given on the death certificates must have an appreciable effect on the exact meaning of death rates for specific causes.

Table D.—Frequency distribution of States showing the percent of deaths coded International List numbers 199 and 200: 1938

Percent coded 199 and 200	Number of States
0.0 - 0.9	29
1.0 - 1.9	9
2.0 - 2.9	3
3.0 - 3.9	1
4.0 - 4.9	1
5.0 - 5.9	2
6.0 - 6.9	1
7.0 - 7.9	0
8.0 - 8.9	1
9.0 - 9.9	0
10.0 +	2

Table E.—Frequency distribution of States showing percent of all death certificates having a single cause of death: 1936

Percent having single cause	Number of States
25.0 - 29.9	5
30.0 - 34.9	8
35.0 - 39.9	12
40.0 - 44.9	7
45.0 - 49.9	5
50.0 - 54.9	4
55.0 - 59.9	5
60.0 - 64.9	3

Apart from the question of comparability between areas, there is the additional problem of comparability for a given area from year to year. To a certain extent, time-trend studies would be facilitated if the International List were maintained without change over a long period of years. However, if the list were rigidly fixed it would soon be inconsistent with current medical terminology. To obtain the advantages of frequent revision, and yet to retain a fixed list for a number of years, revisions of the list are made at an international conference every 10 years. In the process of revision, some causes of death included under one title may be transferred to other titles. Since it is difficult to evaluate the numerical importance of all such rearrangements, definite discontinuities are introduced into the time trends of death rates for specific causes of death.

Improvement of diagnostic procedure and development of medical knowledge and facilities are other important factors not to be overlooked in the study of changes in death rates for certain causes. For example, additional diagnostic cancer clinics located throughout the country may correctly diagnose many cancer deaths which might otherwise be classified in an unknown or ill-defined cause-group. Another example might be found in the case of syphilitic deaths. Deaths from syphilis are not always correctly reported, but the recent campaign to promote the treatment of this disease may influence the accuracy of the reporting of syphilis on the death certificates.

NATALITY STATISTICS

Detailed tabulations of the live births registered in the United States in 1938 are given in general natality tables, numbers 1 to 7, inclusive. In these tables the reported births are classified by place of birth, sex and race of child, age and nativity of parents, order of birth, and other subjects. Additional information on birth statistics is included in the section containing summary and rate tables. The following paragraphs point out some of the more important facts for 1938 and give comparable figures for past years.

BIRTH-RATE TREND.—In 1938 there were 2,286,962 registered live births in the United States. With an estimated population of 130,215,000, the crude birth rate is 17.6 per 1,000 estimated population. The number of births reported for the United States birth-registration area and the crude birth rates for each year since 1915 are given in table F. This table also gives the estimated midyear population of the United States and the estimated midyear population and percent of total included in the increasing birth-registration area.

An inspection of table F shows a rapid downward trend in the crude birth rate for more than 20 years. The rate for 1938, as in 1937, is higher than the rates for 1936 and 1935, and is the highest since 1931, but the increase is so slight that it cannot be taken as an assurance that the direction of the trend has materially changed.

TABLE F.—CRUDE BIRTH RATES: BIRTH REGISTRATION AREA, UNITED STATES

YEAR	Estimated midyear population of continental United States	BIRTH-REGISTRATION AREA			
		Estimated midyear population		Live births	
		Number	Percent of total	Number	Rate per 1,000 population
1938	130,215,000	130,215,000	100.0	2,286,962	17.6
1937	129,257,000	129,257,000	100.0	2,203,337	17.0
1936	128,429,000	128,429,000	100.0	2,144,790	16.7
1935	127,521,000	127,521,000	100.0	2,155,105	16.9
1934	126,626,000	126,626,000	100.0	2,167,636	17.1
1933	125,770,000	125,770,000	100.0	2,081,232	16.5
1932	124,974,000	119,027,000	95.2	2,074,042	17.4
1931	124,113,000	117,522,000	94.7	2,112,760	18.0
1930	123,091,000	116,556,000	94.7	2,203,958	18.9
1929	121,526,429	115,097,972	94.7	2,169,920	18.9
1928	119,861,607	113,050,663	94.3	2,233,149	19.8
1927	118,196,785	103,575,656	87.6	2,137,836	20.6
1926	116,531,963	89,682,479	77.0	1,856,068	20.7
1925	114,867,141	87,486,096	76.2	1,878,880	21.5
1924	113,202,319	86,256,025	76.2	1,930,614	22.4
1923	111,537,497	80,694,406	72.3	1,792,646	22.2
1922	109,872,675	79,415,841	72.3	1,774,911	22.3
1921	108,207,853	70,738,177	65.4	1,714,261	24.2
1920	106,543,031	63,740,689	59.8	1,508,874	23.7
1919	105,003,065	61,483,423	58.6	1,373,438	22.3
1918	103,587,955	55,515,241	53.6	1,363,649	24.6
1917	102,172,845	54,771,416	53.6	1,353,792	24.7
1916	100,757,735	32,788,670	32.5	818,983	25.0
1915	99,342,625	30,936,179	31.1	776,304	25.1

The trend of the birth rate, as shown in table F, is affected somewhat by the fact that the registration area included additional States from year to year, and the more recently added States have, in general, higher birth rates than the original States. The additions to the area in various years are shown in table G. The effect of these newly added States on the rate for the area can be seen by comparing the trend of the rate for the original birth-registration area with the trend of the rate for the increasing area. The data for the original birth-registration area are given in table H. For this original area the rate decreased from 25.1 in 1915 to 16.1 in 1938, a decline of 35.9 percent. In the same period the rate for the whole area decreased from 25.1 to 17.6, a decline of 29.9 percent. The time trend of the rate for individual States is given in table VII in the section containing summary and rate tables.

TABLE G.—YEAR IN WHICH EACH STATE WAS ADMITTED TO THE BIRTH-REGISTRATION AREA

YEAR	STATE	YEAR	STATE	YEAR	STATE
1915	Connecticut	1917	Virginia	1925	West Virginia
	Maine		Washington		
	Massachusetts		Wisconsin	1926	Arizona
	Michigan				Idaho
	Minnesota	1919	California		
	New Hampshire		Oregon	1927	Alabama
	New York		South Carolina 3/		Arkansas
	Pennsylvania				Louisiana
	Rhode Island 1/	1920	Nebraska		Missouri
	Vermont	1921	Delaware		Tennessee
	Dist. of Columbia 2/		Mississippi		
			New Jersey	1928	Colorado
1916	Maryland				Georgia
		1922	Illinois		Oklahoma
1917	Indiana		Montana		
	Kansas		Wyoming	1929	Nevada
	Kentucky				New Mexico
	North Carolina	1924	Florida	1932	South Dakota
	Ohio		Iowa		
	Utah		North Dakota	1933	Texas

1/ Dropped from the birth-registration area in 1919; readmitted in 1921.
2/ Included in States.
3/ Dropped from the birth-registration area in 1925; readmitted in 1928.

TABLE H.—CRUDE BIRTH AND DEATH RATES: ORIGINAL BIRTH-REGISTRATION AREA, 1/ UNITED STATES

YEAR	Estimated midyear population	Live births	Total deaths 2/	RATE PER 1,000 POPULATION	
				Live births	Deaths 2/
1938	3/39,160,000	629,900	427,902	16.1	10.9
1937	39,160,000	612,423	450,939	15.6	11.5

1/ Exclusive of Rhode Island. 2/ Exclusive of stillbirths. 3/ Population estimated for 1937; no estimate made for 1938.

In spite of the declining birth rate as indicated in table F, there was still an excess of more than 905,000 births over deaths in the United States in 1938. Even in the original birth-registration area, where the death rate is higher and the birth rate is lower than for the whole United States, there are 629,900 births compared with 427,902 deaths. Data on deaths in the original birth-registration area are included in table H in order to facilitate the comparison of rate trends. As indicated in table J, each State also has a higher birth rate than death rate in 1938.

1/ Rates for United States based on 1939 estimated population. Rates for States based on 1937 estimated population; no estimates made for 1938.
2/ Exclusive of stillbirths.

CRUDE BIRTH RATES BY STATE.—Table J gives the 1938 crude birth and death rates for each State. The reported rates range from 12.9 for New Jersey to 33.9 for New Mexico. With a few exceptions, the crude birth rate is highest in the Southern, Southwestern, and Rocky Mountain States and lowest in the New England, Middle Atlantic, Midwestern, and far Western States. Variations in the age, racial, and marital composition of the population, as well as in other conditions affecting fertility, contribute to these differences in the crude birth rates.

AGE OF PARENTS.—Careful analysis of the trend of birth rates or the comparison of rates between areas necessarily involves the consideration of age-specific birth rates. Such rates are not included in this volume, since accurate estimates of population by age, sex, and marital condition are not available for recent years. Certain detailed tabulations of births by age of father or age of mother are given in tables 3, 4, and 5.

Proportionate distributions of live births by age of mother for the years 1934 to 1938 are given in table K, and similar distributions by age of father are given in table L. Table M gives, for 1938, the proportionate distributions by age of father for each age-of-mother group. It is evident from each of these tables that there is an increasing tendency for a greater proportion of births to occur to parents in younger-age groups. Such changes could arise from differences in the rate of change of age-specific birth rates, from gradual changes in the age distribution of the population in the reproductive period of life, or from changes in the gross marriage rate of the distribution of age at marriage.

It is unfortunate that there are no national statistics on marriage and divorce to which birth statistics could be related.

PLURAL BIRTHS.—The great majority of births registered each year are single births. Of the total of 2,286,962 live births in 1938, there were 2,236,863 single births. In addition to these there were 25,644 cases of twins, 262 cases of triplets, and 1 case of quadruplets, in each of which there was at least one live birth.

The proportion of plural-birth cases to the total number of cases of birth remains fairly constant from year to year. In 1938 there were 11.4 cases of plural births per 1,000 total cases. The highest proportion of plural births was recorded in 1919 when the ratio was 12.2 cases per 1,000. Since 1920 the ratio has fluctuated between 11.2 and 11.9.

The total number of cases of live births; the cases of single births; and the cases of twins, triplets, and quadruplets, are given for the birth-registration area in table N. An authentic case of quintuplets in the United States has never been reported during the time that the Bureau of the Census has been compiling annual birth data.

TABLE K.—DISTRIBUTION OF LIVE BIRTHS, PER 1,000, BY AGE OF MOTHER: UNITED STATES

AGE OF MOTHER	1938	1937	1936	1935	1934
All ages	1,000.0	1,000.0	1,000.0	1,000.0	1,000.0

1915	768,887	761,150	7,737	7,673	64	-------	10.1

1/ Includes only those cases in which at least one was a live birth.

AVERAGE NUMBER OF CHILDREN.—Table O is a tabulation of the average number of children ever born to women who bore children, in each specified year. These averages are given for the years 1929 to 1938. In 1929 the average number of children ever born was 3.2. This figure has gradually declined to 2.8 in 1937 and 1938. The decrease in the average number of children is probably an indication of declining fertility. This interpretation is strengthened by the fact that there is a decrease in the average number of children for almost every age-of-mother group. The figures given cannot be directly interpreted as the average size of family in the whole population, inasmuch as only those mothers who gave birth during the current year are included. Moreover, the average for all ages is affected by changes in the marriage rate or in the average age at marriage, as well as by other factors. Thus, if a rapid increase in the marriage rate increased the proportion of first births, the average number of children would be decreased. This decrease would then be occurring at the same time that the reproductive rate of certain age groups would be increasing.

BIRTH RATES BY MONTH.—The fluctuations of the crude birth rate from month to month are shown in table P for the years 1934 to 1938. In 1938 the highest rate, 18.6, occurred in August and the lowest, 16.5, in December.

ILLEGITIMATE BIRTHS.—The number of illegitimate live births and the rate per 1,000 total live births are given in table Q. In 1938 there were 74,462 births in the United States (exclusive of California, Massachusetts, New York, and Texas) reported as illegitimate, and the rate was 41.1 per 1,000 live births. This rate is one of the highest illegitimacy rates recorded for the registration area since these data were first available in 1917. In that first year the rate was 20.2, and there was a steady increase in the years following. The trend of this rate is somewhat influenced by the changing character of the registration area from year to year. The rate for races other than white is very high, and the addition to the registration area of States with a high proportion of Negroes has accelerated the upward trend of the total rate. However, for the white group alone, there has been a marked increase in the proportion of recorded illegitimate births. In 1917 the rate for the white group in the registration area was 13.0, and in 1938 the rate was 20.5.

TABLE O.—AVERAGE NUMBER OF CHILDREN EVER BORN TO WOMEN WHO BORE CHILDREN IN SPECIFIED YEARS: BIRTH-REGISTRATION AREA, 1/ UNITED STATES

AGE OF MOTHER	AVERAGE NUMBER OF CHILDREN IN—									
	1938	1937	1936	1935	1934	1933	1932	1931	1930	1929

December	16.5	16.5	15.6	15.9	16.6

1/ Exclusive of stillbirths.

Data on illegitimate live births for 1936, 1937, and 1938 for individual States are given in table R. This table gives the number of illegitimate births and the rate for each State, for "white" and "all other races." California, Massachusetts, and New York are not included for any year, and Texas has also

been excluded for 1938. The birth certificates for these States do not require a statement concerning legitimacy. It must be recognized that the reporting of the fact of illegitimacy in other States is probably incomplete and inaccurate.

TABLE Q.—ILLEGITIMATE LIVE BIRTHS BY RACE: BIRTH-REGISTRATION AREA, 1/ UNITED STATES

YEAR	ILLEGITIMATE LIVE BIRTHS					
	Number			Rate per 1,000 total live births		
	Total	White	All other races	Total	White	All other races
1938	74,462	32,043	42,419	41.1	20.5	169.1
1937	74,938	32,231	42,707	40.2	20.1	163.9
1936	72,338	31,850	40,488	39.8	20.3	162.4

2/ Texas did not require a statement in 1938 concerning legitimacy of child.

REPORTING OF STILLBIRTHS.—Information on stillbirths was first collected by the Bureau of the Census in 1918. No data were collected or published for the years 1919 to 1921, inclusive, but since 1922 stillbirth tables have been compiled annually for the birth-registration area.

In some States stillbirths are reported on a single stillbirth certificate, whereas in others, State laws require the physician or attendant at a stillbirth to file both a birth and a death certificate. Such basic differences in reporting procedure introduce some variation in the completeness of registration and in the information reported. More important, from a statistical standpoint, are differences in the legal definitions of a stillbirth used in the States. Variations in the definition make it impossible to compile strictly comparable data for all States, and confuse the interpretation of consolidated national figures. A list showing the various definitions used in reporting stillbirths has been published each year before 1937 in the volume entitled "Birth, Stillbirth, and Infant Mortality Statistics." More recent data on stillbirth definitions for the States are given in Vital Statistics—Special Reports, vol. 3, No. 2, table 13. Neither of these sources of definitions can be considered up-to-date since changes may occasionally be made in State procedures. It is expected that the adoption of a standard stillbirth certificate in 1940 will make these data more complete and uniform.

Detailed tables classifying stillbirths by area, race, age of mother, nativity of parents, and other subjects, are given in tables 8, 9, and 10 in the section containing general natality tables.

The total number of stillbirths and the ratio of stillbirths to each 1,000 live births are given in table S for the birth-registration area for a series of years.

The ratio of stillbirths to live births for the first year that these data are available (1918) is 40.1. For the years 1922 to 1930 the ratio varied around 38, 39, and 40, without demonstrating any appreciable trend. However, since 1930 the ratio has been consistently decreasing; for 1938 it is 32.1, which is 18.1 percent below the ratio for 1930. This decrease in recent years must be due to factors other than changes in the registration area because the area has included the whole United States since 1933.

TABLE S.—RATIO OF STILLBIRTHS TO LIVE BIRTHS: BIRTH-REGISTRATION AREA, UNITED STATES

YEAR	Live births	Stillbirths: Number	Stillbirths: Rate per 1,000 live births	YEAR	Live births	Stillbirths: Number	Stillbirths: Rate per 1,000 live births
1938	2,286,962	73,467	32.1	1929	2,169,920	85,678	39.5

1930	2,203,958	86,466	39.2	1918	1/1,211,685	1/ 48,634	1/ 40.1

1/ Exclusive of Massachusetts, Rhode Island, Washington, and Baltimore, Maryland. No transcripts of stillbirths were received from these areas.

NOTE.—Data relating to stillbirths were not collected for the years 1919 to 1921, inclusive.

ILLEGITIMATE STILLBIRTHS.—The number of stillbirths reported as legitimate or illegitimate is shown in table T. As may be expected, the stillbirth rate for illegitimate births, 70.6, is higher than the stillbirth rate for legitimate births, 30.6. Data in table T are for the years 1933 to 1938 for "white" and "all other races." California, Massachusetts, and New York are not included in this table for any year, and Texas has also been excluded in 1938.

1/ Exclusive of California, Massachusetts, and New York for each year, and Texas for 1938. These States do not require a statement concerning legitimacy of child.
2/ Data not available.

MORTALITY STATISTICS

Detailed tables classifying deaths in the United States for 1938, by place of death, age, race, sex, cause of death, and other subjects, are given in the section containing general mortality statistics, tables 11 to 21, inclusive. In addition to these detailed tables, selected data for deaths are included

in the summary and rate tables. Special tables for deaths of infants are given in the section containing general infant-mortality tables.

DEATH-RATE TREND.—In 1938 there were 1,381,391 registered deaths in the United States. Using an estimated midyear population of 130,215,000, the crude death rate is 10.6 per 1,000. This rate is 5.4 percent lower than the rate of 11.2 for 1937 and is the lowest rate recorded for the United States death-registration area since 1900. In 1900, the first year for which annual mortality statistics were compiled, the crude death rate was 17.6. The trend of the rate since that year has been generally downward, although 1918 was a year of high mortality and other years have shown small increases.

Table U, giving the number of deaths and the death rate for each year, shows also the estimated population of the United States and the proportion of it that is included in the death-registration area. The States which were added in various years are indicated in table W. Even though the succession of rates in table U does not refer to a strictly comparable geographic area, the consistent downward trend of the rate is not misleading. Essentially the same trend is evident in table H for a constant geographic area. Although there is considerable variation in the level of the rate, similar trends for individual States are shown in table IX.

TABLE U.—CRUDE DEATH RATES: DEATH-REGISTRATION AREA, UNITED STATES

YEAR	Estimated midyear population of continental United States	DEATH-REGISTRATION AREA			
		Estimated midyear population		Total deaths 1/	
		Number	Percent of total	Number	Rate per 1,000 population
1938	130,215,000	130,215,000	100.0	1,381,391	10.6
1937	129,257,000	129,257,000	100.0	1,450,427	11.2
1936	128,429,000	128,429,000	100.0	1,479,228	11.5
1935	127,521,000	127,521,000	100.0	1,392,752	10.9
1934	126,626,000	126,626,000	100.0	1,396,903	11.0
1933	125,770,000	125,770,000	100.0	1,342,106	10.7
1932	124,974,000	120,291,000	96.3	1,308,529	10.9
1931	124,113,000	119,479,000	96.3	1,322,587	11.1
1930	123,091,000	118,472,000	96.2	1,343,356	11.3
1929	121,526,429	116,317,515	95.7	1,386,363	11.9
1928	119,861,607	114,258,516	95.3	1,378,675	12.1
1927	118,196,785	108,177,568	91.5	1,236,949	11.4
1926	116,531,963	104,928,301	90.1	1,285,927	12.3
1925	114,867,141	102,951,999	89.6	1,219,019	11.8
1924	113,202,319	100,082,062	88.4	1,173,990	11.7

1903	80,983,390	32,701,083	40.4	524,415	16.0
1902	79,365,396	32,029,815	40.4	508,640	15.9
1901	77,747,402	31,370,952	40.3	518,207	16.5
1900	2/ 75,994,575	30,765,618	40.5	539,939	17.6

1/ Exclusive of stillbirths.
2/ Population enumerated for census year ending May 31.

CRUDE DEATH RATES BY STATE.—The crude death rate for each State is given in table J. The reported rates range from 7.4 for North Dakota to 14.6 for Arizona. This variation results in part from differences in age, sex, and race composition of the population, and from variation in public-health and medical facilities.

TABLE W.—YEAR IN WHICH EACH STATE WAS ADMITTED TO THE DEATH-REGISTRATION AREA

YEAR	STATE	YEAR	STATE	YEAR	STATE
1880	Massachusetts	1909	Ohio	1920	Nebraska
	New Jersey				
	Dist. of Columbia 1/	1910	Minnesota	1922	Georgia 5/
			Montana		Idaho
1890	Connecticut		North Carolina 4/		Wyoming
	Delaware 2/		Utah		
	New Hampshire			1923	Iowa
	New York	1911	Kentucky		
	Rhode Island		Missouri	1924	North Dakota
	Vermont				
		1913	Virginia	1925	Alabama
1900	Maine	1914	Kansas		West Virginia
	Michigan				
	Indiana	1916	South Carolina	1926	Arizona
1906	California	1917	Tennessee	1927	Arkansas
	Colorado				
	Maryland	1918	Illinois	1928	Oklahoma
	Pennsylvania		Louisiana		
	South Dakota 3/		Oregon	1929	Nevada
					New Mexico
1908	Washington	1919	Florida		
	Wisconsin		Mississippi	1933	Texas

1/ Included in States.
2/ Dropped from the registration area in 1900; readmitted in 1919.
3/ Dropped from the registration area in 1910; readmitted in 1930.
4/ Included only municipalities with populations of 1,000 or more in 1900 (about 16 percent of the total population); the remainder of the State was added to the area in 1916.
5/ Dropped from the registration area in 1925; readmitted in 1928.

DEATHS BY AGE.—Age distributions by sex, race, and cause of death, are included in several of the general mortality tables. A brief summary of these distributions is given in table Y, which shows the total number of deaths in the United States in 1938, classified by age and sex. This table includes also the proportionate age distribution of deaths by sex. Similar distributions for total deaths are given in table Z for the years 1934 to 1938. It can be observed that a smaller proportion of deaths are occurring at younger ages. In each of the age groups under 45 years there was a smaller proportion of the total deaths in 1938 than in 1934, whereas in most of the groups over 45, the proportion increased. While, to a certain extent, this is an indication of changing age-specific death rates, such as the decrease in infant mortality, it is primarily a result of the gradual ageing of the population exposed to the risk of death. Inasmuch as accurate population estimates by age are not available, age-specific death rates have not been computed.

TABLE Y.—DISTRIBUTION OF DEATHS, 1/ PER 1,000, BY AGE AND SEX: UNITED STATES, 1938

AGE	DEATHS 1/					
	Number			Distribution per 1,000		
	Total	Male	Female	Total	Male	Female

Not stated	0.7	0.8	0.9	0.9	1.2

1/ Exclusive of stillbirths.

Table AA gives the total number of deaths in the United States and the proportionate age distribution of deaths by race for 1938. It is apparent that the proportion of deaths that occur at early ages is much higher for Negroes and other races than for the white race. Part of this difference is due to the relatively high proportion of the nonwhite population in the younger age groups, but it also reflects the higher age-specific mortality rates among nonwhite races.

TABLE AA.—DISTRIBUTION OF DEATHS, 1/ PER 1,000, BY AGE AND RACE: UNITED STATES, 1938

AGE	DEATHS 1/							
	Number				Distribution per 1,000			
	Total	White	Negro	Other races	Total	White	Negro	Other races

DEATH RATES BY MONTH.—Table AB gives the crude death rates by month for the United States for the years 1934 to 1938. Death rates are consistently low in the months of August and September, whereas the highest rates are for the first 3 months of the year. For 1938, the highest rate occurred in January, when the rate was 11.9. This high rate, as well as the generally high rates for the winter months, results for the most part from an increase in the number of deaths from respiratory causes. A tabulation of deaths from selected causes, by month, is given in table 21.

TABLE AB.—ANNUAL CRUDE DEATH RATES 1/ PER 1,000 ESTIMATED MIDYEAR POPULATION, BY MONTH: UNITED STATES

MONTH	1938	1937	1936	1935	1934	MONTH	1938	1937	1936	1935	1934
Total	10.6	11.2	11.5	10.9	11.0	June	10.0	10.2	10.7	10.3	10.6
						July	9.8	10.3	11.6	9.9	10.8
January	11.9	13.6	12.6	12.6	11.9	August	9.6	9.7	9.8	9.5	9.6

DEATHS BY RACE.—Table AC is a classification of deaths by race and sex. Out of the total of 1,381,391 deaths in 1938, 1,195,431 or 86.5 percent were classified as white. Negro deaths numbered 178,573 or 12.9 percent. The number of deaths reported for Indian, Chinese, Japanese, and other numerically minor races, totaled 7,387 or less than 1 percent of all deaths.

TABLE AC.—DISTRIBUTION OF DEATHS, 1/ PER 1,000, BY RACE AND SEX: UNITED STATES, 1938

RACE	DEATHS 1/					
	Number			Distribution per 1,000		
	Total	Male	Female	Total	Male	Female
All races	1,381,391	764,902	616,489	1,000.0	1,000.0	1,000.0
White	1,195,431	665,559	529,872	865.4	870.1	859.5
Negro	178,573	94,659	83,914	129.3	123.8	136.1
Indian	5,078	2,722	2,356	3.7	3.6	3.8
Chinese	1,119	1,009	110	0.8	1.3	0.2

DEATH RATES FOR SELECTED CAUSES OF DEATH.—Tabulations of deaths by cause and other classifications are given in general mortality tables, numbers 14 and 17 to 21, inclusive. The number of deaths in the United States in 1938 and the crude death rate for each International List title and subdivision are given in table XI. Death rates for selected causes are tabulated in table XII for each State.

The trend in death rates for specific causes, over the past 20 or 30 years, may be characterized by two general statements. In the first place, there has been a great reduction in the death rates for infectious and preventable diseases; in the second place, there has been an increase in the rates for certain diseases characteristic of older ages. Greatest proportional rate decreases have taken place for such diseases as typhoid and paratyphoid fever, which has declined from a rate of 21.0 in 1911 to 1.9 in 1938; and diphtheria, which declined from a rate of 18.9 in 1911 to 2.0 in 1938. These rates, and those following, are for the changing death-registration area and are the number of deaths per 100,000 estimated midyear population. Greater absolute reductions, though smaller proportionate reductions, have been made for other important causes. The death rate for tuberculosis of the respiratory system has shown a remarkable decrease from 132.7 in 1911 to 44.6 in 1938, and that for diarrhea and enteritis has been reduced from 91.2 in 1911 to 14.2 in 1938. The trend of the rate for influenza and pneumonia is more irregular. The rate for this cause was 149.6 per 100,000 estimated population in 1911. In the following 4 years this rate decreased somewhat, but during the influenza epidemic of 1918, it increased to the extremely high rate of 587.0. In that year more than 1 out of every 200 persons died from influenza and pneumonia. Since 1930 the rate has in general been lower than during the decade 1920 to 1929, declining to 80.2 in 1938, the lowest rate since the death-registration area was established in 1900.

TABLE AD.—DEATH RATES 1/ PER 100,000 ESTIMATED MIDYEAR POPULATION FOR SELECTED CAUSES: DEATH-REGISTRATION AREA, UNITED STATES

(Numbers after causes of death are those of the 1929 revision of the detailed International List)

CAUSE OF DEATH	1911	1912	1913	1914	1915	1916	1917	1918	1919	1920	1921	1922	1923	1924

1/ Exclusive of stillbirths.
2/ Including capillary bronchitis.
3/ Excluding diseases of coronary arteries.
4/ Including ulcer of the duodenum from 1911 to 1920.
5/ Excluding adhesions of intestines from 1911 to 1920.
6/ Not separately tabulated.
7/ Exclusive of accidents associated with automobiles (206,208,210).
8/ Less than one-tenth of 1 per 100,000 population.

For certain diseases characteristic of older ages, the most notable increase is in the rate for cancers and other malignant tumors. The crude death rate for cancer, for the registration area in 1911, was 74.4 per 100,000 estimated population. This rate has gradually increased to 114.6 in 1938. Even this change in rate does not fully indicate the large increase in deaths reported from cancer. The addition to the registration area of States with younger populations has tended to minimize the increase that would be observed in a geographically constant area. For example, while the cancer death rate for the growing registration area increased from 74.4 in 1911 to 114.6 in 1938, the rate for the registration States of 1900 increased from 83.9 to 143.0 in the same interval.

A large increase in rate is also noticeable for diseases of the heart. The rate of 157.1 in 1911 increased to 216.9 in 1938. Here again the full significance of this increase is not evident when only data for the changing registration area are considered.

The rate reductions for infectious and preventable diseases can be largely attributed to the development of modern public-health practice. The increases from such causes as cancer and heart diseases are doubtless due to several reasons. The decrease in deaths from diseases of infancy and childhood, along with the decline in the birth rate, is producing in the United States a population with a higher proportion of persons in the older-age groups. This fact in itself tends to increase the total death rates for diseases associated primarily with advanced age. Also, there is little doubt but that improved diagnostic facilities and increasing hospitalization have increased the number of deaths charged to cancer, as well as to certain other types of disease. An accurate determination of the change in mortality for these causes requires a careful study in which the age composition of the population and other pertinent factors are considered.

As shown in table AD, diseases of the heart led all other causes of death in 1938 with a rate of 216.9 for the United States. Cancers and other malignant tumors ranked second with a death rate of 114.6. Influenza and pneumonia, and tuberculosis (all forms), which ranked first and second, respectively, as causes of death in 1900, were third and sixth, respectively, in 1938.

INFANT MORTALITY STATISTICS

Detailed tables for infant mortality are given in the section containing general infant-mortality tables. Rates for individual States for a series of years are given in rate table X; and the number of infant deaths and death rates for each city and county are included in table XIII.

TREND OF INFANT MORTALITY.—In 1938 there were 116,702 infant deaths registered in the United States. This is the smallest number of infant deaths reported since the birth-registration area was completed in 1933. This reduced number of deaths, taken with an increased number of births in 1938, results in an infant death rate of 51.0 (number of deaths under 1 year of age per 1,000 live births) which is the lowest infant death rate ever recorded for the registration area. Rates for each year, together with the number of infant deaths and the number of live births, are given in table AE. These data are presented for the birth-registration area, inasmuch as the infant mortality rate is computed on the number of live births. The number of infant deaths for the death-registration area can be found in general mortality tables in which the data are classified by age.

The infant mortality rate was 99.9 in 1915, and twice thereafter (in 1916 and 1918) the rate exceeded 100.0. Since 1918 there has been a steady and a rapid decrease in infant mortality. The rate of 51.0 for 1938 is only 51.1 percent of the rate for 1915.

The reduction in infant mortality has occurred in both the "white" and "Negro" races as shown in table AF. Although the rate for Negroes is considerably higher than that for the "white," the proportionate reduction over the last 19 years has been approximately the same for both groups. The data in table AF for "other races" is based on relatively few deaths and the rate is therefore quite variable.

261200 O—40——2

TABLE AE.—INFANT MORTALITY: BIRTH-REGISTRATION AREA, UNITED STATES

YEAR	Live births	DEATHS UNDER 1 YEAR 1/		YEAR	Live births	DEATHS UNDER 1 YEAR 1/

1/ Exclusive of stillbirths.

INFANT MORTALITY BY STATE.—A comparison of the infant death rates of the various States is given in table AG. The lowest rate, 36.3, was reported for Connecticut; and the highest rate, 108.7, for New Mexico. With a few exceptions the rate is highest in the southern and southwestern parts of the country. The comparability of infant death rates between States is affected by incomplete birth and death registration in some States. However, the indicated differences in infant mortality are much too large to be explained by this factor.

TABLE AG.—INFANT MORTALITY RATES: UNITED STATES AND EACH STATE, 1938

AREA	Deaths 1/ under 1 year per 1,000 live births	AREA	Deaths 1/ under 1 year per 1,000 live births
United States	51.0	Missouri	51.5
		Montana	45.5
		Nebraska	36.4
Alabama	60.8	Nevada	47.7
Arizona	98.8	New Hampshire	47.6
Arkansas	51.4	New Jersey	39.5
California	43.7	New Mexico	108.7
Colorado	60.2	New York	40.6
Connecticut	36.3	North Carolina	68.6
Delaware	52.8	North Dakota	49.8

INFANT DEATH RATES BY AGE.—Death rates for infants at various ages during the first year of life are given in table AH. These data are given for the birth-registration area for each year beginning with 1925. The most notable feature of this

table is that, although reductions in rate have been made for almost every age group, little reduction has been made in the rate for deaths under 1 day. Since 1932, the rate for deaths under 1 day has been approximately 15.0 per 1,000 live births until 1938, when it declined to 14.1. While this rate has decreased very little, the total infant death rate has decreased from 71.7 in 1925 to 51.0 in 1938, and the rate for infant deaths over 1 month has decreased from 33.8 to 21.4 in the same period.

TABLE AH.—INFANT MORTALITY RATES (DEATHS 1/ UNDER 1 YEAR PER 1,000 LIVE BIRTHS) BY AGE: BIRTH-REGISTRATION AREA, UNITED STATES

AGE	1938	1937	1936	1935	1934	1933	1932

1/ Exclusive of stillbirths.

Infant death rates at various ages during the first year of life, by race, are shown in table AI for 1938. The difference between "white" and "Negro" infant mortality is proportionately greater during later infancy than during the first days of life. The rate for the "white" under 1 day is 13.9, or 86.9 percent of the rate of 16.0 for Negroes, while the rate for the "white" under 1 year is 47.1, only 60.5 percent as high as the rate of 77.9 for Negroes.

TABLE AI.—INFANT MORTALITY RATES (DEATHS 1/ UNDER 1 YEAR PER 1,000 LIVE BIRTHS) BY AGE AND RACE: UNITED STATES, 1938

AGE	Total	White	Negro	Other races
Under 1 year	51.0	47.1	77.9	102.4
Under 1 day	14.1	13.9	16.0	12.6
1 day	3.6	3.5	4.6	3.0
2 days	2.3	2.2	3.2	3.2
3 to 6 days	3.7	3.4	5.6	6.6
1 week	2.6	2.3	4.6	5.6

11 months	1.0	0.9	1.8	4.1

1/ Exclusive of stillbirths.

INFANT MORTALITY BY MONTH.—Table AJ shows the infant death rates of the United States, by month, for each year from 1934 to 1938. The rate for each month has declined during this period. The decline from 1937 to 1938 was much greater for January, February, and March than for the other months. The indicated decrease of the rate for the winter months seems to have been due partly to fewer deaths from influenza and pneumonia.

TABLE AJ.—INFANT MORTALITY RATES (DEATHS 1/ UNDER 1 YEAR PER 1,000 LIVE BIRTHS) BY MONTH: UNITED STATES

MONTH	1938	1937	1936	1935	1934
Total	51.0	54.4	57.1	55.7	60.1
January	54.3	69.1	60.8	66.7	60.6
February	53.2	63.4	62.0	65.0	66.5
March	51.9	57.1	56.7	62.3	67.7
April	52.0	53.9	59.4	58.6	64.9
May	53.7	51.6	55.5	57.3	60.8
June	53.0	54.3	52.8	53.4	60.2
July	47.9	52.2	52.7	49.2	58.3
August	47.1	47.8	48.6	47.7	52.2
September	46.1	47.0	51.7	46.3	51.6
October	48.0	51.1	59.4	51.0	57.0

December	55.6	55.3	68.6	58.7	63.8

1/ Exclusive of stillbirths.

INFANT DEATH RATES BY CAUSE OF DEATH.—Table AK is a tabulation of infant death rates for selected causes. Rates are given for the United States for the years 1934 to 1938. Outstanding causes of infant deaths are premature birth, pneumonia, diarrhea and enteritis, congenital malformations, and injury at birth.

TABLE AK.—INFANT MORTALITY RATES (DEATHS 1/ UNDER 1 YEAR PER 1,000 LIVE BIRTHS) FOR SELECTED CAUSES: UNITED STATES

CAUSE OF DEATH	1938	1937	1936	1935	1934

1/ The totals from 1933 to 1937 are for the entire United States; totals from 1930 to 1932 are for the death-registration area. See note 2.
2/ Population for eight registration cities only.

NOTE.—The estimated midyear population for 1938 for the United States is 130,215,000; no estimates for 1938 were made for the States.

TABLE V.—POPULATION, NUMBER OF BIRTHS AND DEATHS, AND CRUDE RATES: SPECIFIED FOREIGN COUNTRIES, 1936

COUNTRY	Estimated population	LIVE BIRTHS		DEATHS 1/	
		Number	Rate per 1,000 population	Number	Rate per 1,000 population

4/ For birth-registration area, 63,740,689; for death-registration area, 87,632,592.
5/ Not available.
6/ Excluding the Yukon and Northwest Territories. Registration area excluded the Province of Quebec in 1920 and 1925, but included it in 1930, 1935, 1936, and 1937.
7/ Rate computed.
8/ Including Saarland.
9/ Provisional data.

NOTE.—These figures were taken from the latest official vital-statistics reports or yearbooks of each country unless otherwise specified.

TABLE VII.—CRUDE BIRTH RATES (NUMBER OF LIVE BIRTHS PER 1,000 ESTIMATED MIDYEAR POPULATION): UNITED STATES, EACH DIVISION AND STATE, 1915-1938

(For each State, rates are shown from the year of its admission to the birth-registration area; for each geographic division, rates are shown from the year when the division, as a whole, became a part of the birth-registration area)

DIVISION AND STATE	1915	1916	1917	1918	1919	1920	1921	1922	1923	1924	1925	1926	1927	1928	1929	1930	1931	1932	1933	1934	1935	1936	1937	1/1938

1/ The rate for the United States is based on the estimated midyear population for 1938; all other rates are based on populations estimated for 1937 as no estimates for 1938 were made for the States.

2/ Rhode Island was dropped from the birth-registration area in 1919, readmitted in 1921.

3/ South Carolina was dropped from the birth-registration area in 1925, readmitted in 1928.

TABLE VIII.—CRUDE STILLBIRTH RATES (NUMBER OF STILLBIRTHS PER 1,000 LIVE BIRTHS): UNITED STATES, EACH DIVISION AND STATE, 1922-1938

(The annual collection of stillbirth statistics was begun in 1922. See headnote, table VII)

1/ South Carolina was dropped from the birth-registration area in 1925, readmitted in 1928.

TABLE IX.—CRUDE DEATH RATES (NUMBER OF DEATHS PER 1,000 ESTIMATED MIDYEAR POPULATION): UNITED STATES, EACH DIVISION AND STATE, 1915-1938

(Exclusive of stillbirths. For each State, rates are shown from the year of its admission to the death-registration area; for each geographic division, rates are shown from the year when the division, as a whole, became a part of the death-registration area)

1/ The rate for the United States is based on the estimated midyear population for 1938; all other rates are based on populations estimated for 1937 as no estimates for 1938 were made for States.

2/ Georgia was dropped from the death-registration area in 1925, readmitted in 1928.

TABLE X.—INFANT MORTALITY RATES (NUMBER OF DEATHS UNDER 1 YEAR OF AGE PER 1,000 LIVE BIRTHS): UNITED STATES, EACH DIVISION AND STATE, 1915-1938

(Exclusive of stillbirths. See headnote, table VII)

69	Other general diseases	413	442	0.3	0.3

1/ Less than one-tenth of 1 per 100,000 estimated population.

TABLE XI.—DEATHS FROM EACH CAUSE AND CRUDE DEATH RATES: UNITED STATES, 1937 AND 1938—Continued

(See note at head of this table)

List No.	CAUSE OF DEATH	DEATHS IN THE UNITED STATES: Number 1938	Number 1937	Rate per 100,000 estimated population 1938	Rate 1937
	IV.—Diseases of the blood and blood-making organs	10,739	10,495	8.2	8.1
70	Hemorrhagic conditions	623	720	0.5	0.6
	(a) Primary purpuras	477	528	0.4	0.4
	(b) Hemophilia	146	192	0.1	0.1
71	Anemias	3,352	3,406	2.6	2.6
	(a) Pernicious anemia	2,787	2,901	2.1	2.2
	(b) Other anemias	565	505	0.4	0.4
72	Leukemias and pseudoleukemias	6,188	5,810	4.8	4.5
	(a) True leukemias	4,126	3,899	3.2	3.0
	(b) Pseudoleukemias (Hodgkin's disease)	2,062	1,911	1.6	1.5
73	Diseases of the spleen	412	392	0.3	0.3
74	Other diseases of the blood and blood-making organs	164	167	0.1	0.1
	V.—Chronic poisonings and intoxications	2,790	3,509	2.1	2.7
75	Alcoholism (acute or chronic)	2,569	3,305	2.0	2.6
76	Chronic poisoning by other organic substances	100	105	0.1	0.1
	(a) Occupational	100	13	0.1	1/
	(b) Other chronic poisoning by organic substances		92		0.1
77	Chronic poisoning by mineral substances	121	99	0.1	0.1
	(a) Lead	94	77	0.1	0.1
	(b) Occupational (except lead)	27	11	1/	1/
	(c) Other chronic poisoning by mineral substances		11		1/
	VI.—Diseases of the nervous system and of the organs of special sense	134,483	136,253	103.3	105.4
78	Encephalitis (nonepidemic)	1,415	1,483	1.1	1.1
79	Meningitis	2,485	2,756	1.9	2.1
	(a) Simple meningitis	2,241	2,359	1.7	1.8
	(b) Nonepidemic cerebrospinal meningitis	244	397	0.2	0.3
80	Progressive locomotor ataxia (tabes dorsalis)	829	895	0.6	0.7
81	Other diseases of the spinal cord	2,868	3,008	2.2	2.3
82	Cerebral hemorrhage, cerebral embolism and thrombosis	111,567	111,753	85.7	86.5
	(a) Cerebral hemorrhage	98,517	98,852	75.7	76.5
	(b) Cerebral embolism and thrombosis	8,905	8,470	6.8	6.6
	(c) Softening of the brain	682	725	0.5	0.6
	(d) Hemiplegia and other paralysis, cause unspecified	3,463	3,706	2.7	2.9
83	General paralysis of the insane	4,502	4,160	3.5	3.2
84	Dementia praecox and other psychoses	1,369	1,576	1.1	1.2
85	Epilepsy	2,430	2,710	1.9	2.1
86	Convulsions (under 5 years of age)	544	639	0.4	0.5
87	Other diseases of the nervous system	3,680	3,773	2.8	2.9
	(a) Neuralgia and neuritis	168	176	0.1	0.1
	(b) Other diseases of the nervous system	3,512	3,597	2.7	2.8
88	Diseases of the organs of vision	45	57	1/	1/
89	Diseases of the ear and of the mastoid process	2,749	3,443	2.1	2.7
	(a) Diseases of the ear	1,800	2,190	1.4	1.7
	(b) Diseases of the mastoid process	949	1,253	0.7	1.0
	VII.—Diseases of the circulatory system	378,600	375,582	290.7	290.6
90	Pericarditis	600	659	0.5	0.5
	(A) Chronic rheumatic pericarditis	16	13	1/	1/
	(B) Others under this title	584	646	0.4	0.5
91	Acute endocarditis	3,008	3,189	2.3	2.5
	(a) Specified as acute	2,594	2,738	2.0	2.1
	(b) Unspecified (under 45 years of age)	414	451	0.3	0.3
92	Chronic endocarditis, valvular diseases	47,246	50,307	36.3	38.9
	(A) Endocarditis, specified as chronic, and other valvular diseases	40,271	43,660	30.9	33.8
	(B) Endocarditis, unspecified (45 years and over)	2,946	3,415	2.3	2.6
	(C) Chronic rheumatic valvular diseases including chronic rheumatic endocarditis	4,029	3,232	3.1	2.5
93	Diseases of the myocardium	140,893	148,796	108.2	115.1
	(A) Acute myocarditis	4,167	4,742	3.2	3.7
	(B) Myocarditis, unspecified (under 45 years of age)	874	960	0.7	0.7
	(C) Chronic myocarditis and myocardial degeneration	104,811	110,956	80.5	85.8
	(D) Unspecified	30,318	31,781	23.3	24.8
	(E) Chronic rheumatic myocarditis	723	357	0.6	0.3
94	Diseases of the coronary arteries and angina pectoris	77,444	69,758	59.5	54.0
	(a) Angina pectoris	9,699	10,639	7.4	8.2
	(b) Diseases of the coronary arteries	67,745	59,119	52.0	45.7
95	Other diseases of the heart	80,977	73,692	62.2	57.0
	(A) Functional diseases of the heart	885	881	0.7	0.7
	(B) Other and unspecified	75,431	68,959	57.9	53.4
	(C) Rheumatic heart disease	4,661	3,852	3.6	3.0
96	Aneurysm (except of the heart)	2,644	2,526	2.0	2.0
97	Arteriosclerosis (diseases of the coronary arteries excepted)	21,208	22,048	16.3	17.1
98	Gangrene	653	693	0.5	0.5
	VII.—Diseases of the circulatory system—Continued				
99	Other diseases of the arteries	1,749	1,750	1.3	1.4
100	Diseases of the veins (varices, hemorrhoids, phlebitis, etc.)	752	771	0.6	0.6
101	Diseases of the lymphatic system (lymphangitis, etc.)	131	115	0.1	0.1
102	Idiopathic anomalies of the blood-pressure	1,000	1,011	0.8	0.8
103	Other diseases of the circulatory system	295	267	0.2	0.2
	VIII.—Diseases of the respiratory system	101,565	124,581	78.0	96.4
104	Diseases of the nasal fossae and annexa	889	998	0.7	0.8
	(a) Diseases of the nasal fossae	325	381	0.2	0.3
	(b) Others under this title	564	617	0.4	0.5
105	Diseases of the larynx	416	445	0.3	0.3
106	Bronchitis	3,625	3,980	2.8	3.1
	(a) Acute	1,171	1,325	0.9	1.0
	(b) Chronic	1,761	1,851	1.4	1.4

138	Diseases of the male genital organs, not specified as venereal	111	120	0.1	0.1

1/ Less than one-tenth of 1 per 100,000 estimated population.

TABLE XI.—DEATHS FROM EACH CAUSE AND CRUDE DEATH RATES: UNITED STATES, 1937 AND 1938—Continued

(See note at head of this table)

List No.	CAUSE OF DEATH	DEATHS IN THE UNITED STATES			
		Number		Rate per 100,000 estimated population	
		1938	1937	1938	1937
	X.—Diseases of the genitourinary system—Continued				
139	Diseases of the female genital organs, not specified as venereal	3,386	3,847	2.6	3.0
	(a) Cysts of the ovary	648	752	0.5	0.6
	(b) Other diseases of the ovaries and diseases of the tubes and parametrium	1,832	2,083	1.4	1.6
	(c) Diseases of the uterus	796	895	0.6	0.7
	(d) Nonpuerperal diseases of the breast (cancer excepted)	14	16	1/	1/
	(e) Other diseases of the female genital organs	96	101	0.1	0.1
	XI.—Diseases of pregnancy, childbirth, and the puerperal state	9,953	10,769	7.6	8.3
140	Abortion with septic conditions	1,380	1,531	1.1	1.2
141	Abortion without mention of septic conditions (to include hemorrhages)	436	582	0.3	0.5
142	Ectopic gestation	437	461	0.3	0.4
	(a) With septic conditions specified	79	83	0.1	0.1
	(b) Without mention of septic conditions	358	378	0.3	0.3
143	Other accidents of pregnancy (not to include hemorrhages)	104	90	0.1	0.1
144	Puerperal hemorrhage	1,320	1,319	1.0	1.0
	(a) Placenta praevia	355	353	0.3	0.3
	(b) Other puerperal hemorrhages	965	966	0.7	0.7
145	Puerperal septicemia (not specified as due to abortion)	1,874	2,113	1.4	1.6
	(a) Puerperal septicemia and pyemia	1,873	2,105	1.4	1.6
	(b) Puerperal tetanus	1	8	1/	1/
146	Puerperal albuminuria and eclampsia	2,023	2,161	1.6	1.7
147	Other toxemias of pregnancy	498	556	0.4	0.4
148	Puerperal phlegmasia alba dolens, embolus, sudden death (not specified as septic)	524	495	0.4	0.4
149	Other accidents of childbirth	1,338	1,423	1.0	1.1
	(a) Cesarean operation	376	367	0.3	0.3
	(b) Others under this title	962	1,056	0.7	0.8
150	Other and unspecified conditions of the puerperal state	19	38	1/	1/
	XII.—Diseases of the skin and cellular tissue	1,714	1,798	1.3	1.4
151	Furuncle, carbuncle	500	492	0.4	0.4
152	Phlegmon, acute abscess	576	617	0.4	0.5
153	Other diseases of the skin and annexa, and of the cellular tissue	638	689	0.5	0.5
	XIII.—Diseases of the bones and organs of locomotion	1,484	1,551	1.1	1.2
154	Osteomyelitis	999	1,014	0.8	0.8
155	Other diseases of the bones (tuberculosis excepted)	169	207	0.1	0.2
156	Diseases of the joints and other organs of locomotion	316	330	0.2	0.3
	(a) Diseases of the joints (tuberculosis and rheumatism excepted)	204	220	0.2	0.2
	(b) Diseases of other organs of locomotion	112	110	0.1	0.1
	XIV.—Congenital malformations	12,102	11,842	9.3	9.2
157	Congenital malformations (stillbirths not included)	12,102	11,842	9.3	9.2
	(a) Congenital hydrocephalus	1,749	1,584	1.3	1.2
	(b) Spina bifida and meningocele	1,162	1,147	0.9	0.9
	(c) Congenital malformations of the heart	5,953	5,860	4.6	4.5
	(d) Other congenital malformations	3,238	3,251	2.5	2.5
	XV.—Diseases of early infancy	51,106	51,507	39.2	39.8
158	Congenital debility	3,229	3,480	2.5	2.7
159	Premature birth	32,689	33,637	25.1	26.0
160	Injury at birth	9,994	9,598	7.7	7.4
	(A) Cesarean operation	371	403	0.3	0.3
	(B) Without Cesarean operation	7,209	7,106	5.5	5.5
	(C) Cerebral hemorrhage (unqualified) and synonomous terms	2,414	2,089	1.9	1.6
161	Other diseases peculiar to early infancy	5,194	4,792	4.0	3.7
	(a) Atelectasis	2,394	2,207	1.8	1.7
	(b) Icterus of the new-born	711	672	0.5	0.5
	(c) Sclerema	2,089	11	1.6	1/
	(d) Others under this title		1,902		1.5
162	XVI.—Senility	9,242	9,904	7.1	7.7

List No.	CAUSE OF DEATH	DEATHS IN THE UNITED STATES

1/ Rates for the United States are based on the estimated midyear population for 1938; all other rates are based on populations estimated for 1937 as no estimates for 1938 were made for States.

2/ Exclusive of 206, 208, 210, and 211.

3/ Less than one-tenth of 1 per 100,000 estimated population.

* Refer to complete International List titles, table XI.

TABLE XIII.—BIRTHS, DEATHS, INFANT MORTALITY, AND STILLBIRTHS: UNITED STATES, 1938

(White and all other races are shown separately for minor areas only when the populations of all other races in 1930 formed at least 10 percent of the total or numbered 10,000 or more)

AREA	BIRTHS AND DEATHS (exclusive of stillbirths)				INFANT MORTALITY (Deaths of infants under 1 year of age, exclusive of stillbirths)		STILLBIRTHS	
	Number		Excess of births over deaths[1]	Births per 100 deaths			Number	Per 1,000 live births
	Births	Deaths			Number	Per 1,000 live births

1/ A minus sign (-) indicates an excess of deaths over births.
2/ Rate is not computed when the number of deaths is less than 100.
3/ Rates over 300 are not shown.
4/ Includes data for Texarkana, Ark., only.
5/ Certain cities listed in this table are located in more than one county. In these cases, figures for the county include only the figures for that part of the city in the county. Total figures and rates for each of these cities are shown under the county containing the larger proportion of the city's population. Totals for Amarillo, Tex., are shown under Potter County; Atlanta, Ga., under Fulton County; Bethlehem, Pa., under Northampton County; Centralia, Ill., under Marion County; Elgin, Ill., under Kane County; Ellwood City, Pa., under Lawrence County; Fostoria, Ohio, under Seneca County; Huntington, W. Va., under Cabell County; Joplin, Mo., under Jasper County; Rocky Mount, N. C., under Nash County; St. Cloud, Minn., under Stearns County; Watertown, Wis., under Jefferson County; and Youngstown, Ohio, under Mahoning County.
6/ Data for births incompletely reported.
7/ Includes data for Bristol, Tenn., only.
8/ Includes data for Texarkana, Tex., only.
9/ Cities of Virginia are independent, each having the same status as a county. Cities having populations of 10,000 or more include: Charlottesville, Alexandria, Staunton, Lynchburg, Petersburg, Winchester, Richmond, Suffolk, Norfolk, Portsmouth, Danville, Hopewell, Roanoke, and Newport News.
10/ Includes data for Bristol, Va., only.
11/ Includes data for Bluefield, W. Va., only.

120	Diarrhea, enteritis (2 years and over)	4,401	1,731	1,800	371	499	182	58	59	23	42
121	Appendicitis	14,300	7,870	4,934	855	641	295	117	78	66	34
122a	Hernia	4,961	2,692	1,823	333	113	61	24	8	24	5
122b	Intestinal obstruction	7,651	3,148	3,380	496	627	154	32	47	29	46
123	Other diseases of intestines	1,569	779	542	110	138	28	8	4	5	11
124	Cirrhosis of liver	10,808	6,690	3,372	471	275	122	57	29	22	14
125a	Yellow atrophy of liver	448	146	239	23	40	10	4	2	1	3
125b	Other diseases of liver	1,095	516	371	112	96	22	6	4	5	7
126	Biliary calculi	4,651	1,337	3,194	40	80	46	9	29	-------	8
127	Other diseases of gall-bladder, biliary passages	3,818	1,346	2,258	84	130	58	20	30	6	2
128	Diseases of pancreas	736	367	321	25	23	9	4	4	-------	1
129	Peritonitis, cause not specified	1,534	586	681	103	164	33	6	13	4	10
	X.—Diseases of the genitourinary system	119,165	56,660	45,245	9,281	7,979	2,712	843	625	715	529
130	Acute nephritis (including unspecified under 10 years)	3,573	1,368	1,105	563	537	139	37	25	36	41
131	Chronic nephritis	90,715	41,392	36,987	6,559	5,777	2,070	656	501	510	403
132	Nephritis, unspecified (10 years and over)	6,232	2,845	2,167	672	548	121	26	22	42	31
133	Other diseases of kidneys, ureters, etc.*	3,848	1,665	1,626	303	254	101	21	29	38	13
134	Calculi of urinary passages	1,671	1,056	510	61	44	25	14	7	2	2
135	Diseases of bladder (except tumors)	753	384	237	109	23	22	6	2	13	1
136	Diseases of urethra, urinary abscess, etc.	544	287	13	234	10	18	1	-------	17	-------
137	Diseases of prostate	8,332	7,592	-------	740	-------	136	81	-------	55	-------
138	Diseases of male genital organs, not venereal	111	71	-------	40	-------	3	1	-------	2	-------
139a	Cysts of ovary	648	-------	572	-------	76	13	-------	5	-------	8
139b	Other diseases of ovaries, etc.*	1,832	-------	1,279	-------	553	49	-------	24	-------	25
139c	Diseases of uterus	796	-------	698	-------	98	11	-------	9	-------	2
139d	Nonpuerperal diseases of breast (except cancer)	14	-------	10	-------	4	-------	-------	-------	-------	-------
139e	Other diseases of female genital organs	96	-------	41	-------	55	4	-------	1	-------	3
	XI.—Diseases of pregnancy, childbirth, etc.*	9,953	-------	7,566	-------	2,387	419	-------	209	-------	210
140	Abortion with septic conditions	1,380	-------	1,070	-------	310	57	-------	32	-------	25
141	Abortion without mention of septic conditions, etc.*	436	-------	318	-------	118	12	-------	5	-------	7
142a	Ectopic gestation, septic conditions specified	79	-------	58	-------	21	3	-------	1	-------	2
142b	Ectopic gestation, septic conditions not mentioned	358	-------	274	-------	84	12	-------	6	-------	6
143	Other accidents of pregnancy (except hemorrhages)	104	-------	86	-------	18	1	-------	-------	-------	1
144a	Placenta praevia	355	-------	299	-------	56	16	-------	7	-------	9
144b	Other puerperal hemorrhages	965	-------	805	-------	160	33	-------	18	-------	15
145a	Puerperal septicemia and pyemia (see exceptions)*	1,873	-------	1,326	-------	547	78	-------	26	-------	52
145b	Puerperal tetanus (see exceptions)*	1	-------	1	-------	-------	-------	-------	-------	-------	-------
146	Puerperal albuminuria and eclampsia	2,023	-------	1,423	-------	600	117	-------	58	-------	59
147	Other toxemias of pregnancy	498	-------	397	-------	101	18	-------	13	-------	5
148	Puerperal phlegmasia alba dolens, embolus, etc.*	524	-------	450	-------	74	13	-------	7	-------	6
149	Other accidents of childbirth	1,338	-------	1,048	-------	290	58	-------	36	-------	22
150	Other and unspecified conditions of puerperal state	19	-------	11	-------	8	1	-------	-------	-------	1
	XII.—Diseases of the skin and cellular tissue	1,714	816	653	124	121	46	16	14	5	11
151	Furuncle, carbuncle	500	292	168	18	22	10	6	3	-------	1
152	Phlegmon, acute abscess	576	259	199	70	48	17	7	4	3	3
153	Other diseases of skin and annexa, etc.*	638	265	286	36	51	19	3	7	2	7
	XIII.—Diseases of the bones, etc.*	1,484	827	459	122	76	39	16	10	8	5
154	Osteomyelitis	999	601	274	83	41	32	14	9	5	4
155	Other diseases of bones (except tuberculosis)	169	79	70	11	9	2	1	-------	-------	1
156	Diseases of joints, other organs of locomotion	316	147	115	28	26	5	1	1	3	-------
	XIV.—Congenital malformations	12,102	6,207	5,133	454	308	194	79	68	24	23
157a	Congenital hydrocephalus	1,749	803	820	76	50	17	4	7	5	1
157b	Spina bifida and meningocele	1,162	478	640	29	15	20	8	10	-------	2
157c	Congenital malformations of heart	5,953	3,213	2,387	193	160	94	44	35	9	6
157d	Other congenital malformations	3,238	1,713	1,286	156	83	63	23	16	10	14
	XV.—Diseases of early infancy	51,106	25,518	18,119	4,164	3,305	1,376	512	374	278	212
158	Congenital debility	3,229	1,349	942	522	416	122	38	26	36	22

63	Rickets	2	2	--------	--------	--------	--------	--------	--------	--------	--------
64	Osteomalacia	--------	--------	--------	--------	--------	--------	--------	--------	--------	--------
65	Diseases of pituitary body	1	--------	1	--------	--------	--------	--------	--------	--------	--------
66a	Simple goiter	--------	--------	--------	--------	--------	--------	--------	--------	--------	--------
66b	Exophthalmic goiter	34	4	30	--------	--------	10	1	8	--------	1
66c-e	Other diseases of thyroid and parathyroid glands	11	4	7	--------	--------	1	--------	1	--------	--------
67	Diseases of thymus gland	13	6	7	--------	--------	6	4	2	--------	--------
68	Diseases of adrenals (see exceptions)*	5	3	2	--------	--------	--------	--------	--------	--------	--------
69	Other general diseases	1	1	--------	--------	--------	--------	--------	--------	--------	--------
	IV.—Diseases of the blood and blood-making organs	138	65	72	1	--------	26	10	11	3	2
70	Hemorrhagic conditions	9	4	5	--------	--------	1	--------	1	--------	--------
71a	Pernicious anemia	22	10	12	--------	--------	10	5	5	--------	--------
71b	Other anemias	6	4	2	--------	--------	2	--------	--------	2	--------
72a	True leukemias	56	23	33	--------	--------	8	4	3	--------	1
72b	Pseudoleukemias (Hodgkin's disease)	37	19	17	1	--------	3	1	--------	1	1
73	Diseases of the spleen	5	4	1	--------	--------	2	--------	2	--------	--------
74	Other diseases of blood and blood-making organs	3	1	2	--------	--------	--------	--------	--------	--------	--------
	V.—Chronic poisonings and intoxications	50	44	4	1	1	13	12	--------	1	--------
75	Alcoholism (acute or chronic)	49	44	3	1	1	12	11	--------	1	--------
76	Chronic poisoning by other organic substances	1	--------	1	--------	--------	1	1	--------	--------	--------
77a	Chronic lead poisoning	--------	--------	--------	--------	--------	--------	--------	--------	--------	--------
77b,c	Other chronic poisoning by mineral substances	--------	--------	--------	--------	--------	--------	--------	--------	--------	--------
	VI.—Diseases of the nervous system, etc.*	1,660	766	844	28	22	299	128	118	36	17
78	Encephalitis (nonepidemic)	14	11	3	--------	--------	3	1	2	--------	--------
79a	Simple meningitis	25	19	5	1	--------	5	3	--------	2	--------
79b	Nonepidemic cerebrospinal meningitis	--------	--------	--------	--------	--------	--------	--------	--------	--------	--------
80	Progressive locomotor ataxia (tabes dorsalis)	12	8	3	1	--------	1	--------	1	--------	--------
81	Other diseases of spinal cord	38	15	21	1	1	1	--------	1	--------	--------
82a	Cerebral hemorrhage	1,214	523	653	21	17	221	96	90	22	13
82b	Cerebral embolism and thrombosis	201	100	98	1	2	32	13	13	5	1
82c	Softening of brain	4	--------	4	--------	--------	2	2	--------	--------	--------
82d	Hemiplegia and other paralysis, cause unspecified	5	2	3	--------	--------	7	3	3	--------	1
83	General paralysis of insane	34	22	8	3	1	9	3	1	4	1
84	Dementia praecox and other psychoses	14	6	8	--------	--------	--------	--------	--------	--------	--------
85	Epilepsy	28	19	9	--------	--------	6	1	3	1	1
86	Convulsions (under 5 years)	3	2	1	--------	--------	--------	--------	--------	--------	--------
87	Other diseases of nervous system	41	24	16	--------	1	8	5	1	2	--------
88	Diseases of organs of vision	--------	--------	--------	--------	--------	--------	--------	--------	--------	--------
89a	Diseases of ear	16	7	9	--------	--------	1	--------	1	--------	--------
89b	Diseases of mastoid process	11	8	3	--------	--------	3	1	2	--------	--------
	VII.—Diseases of the circulatory system	5,877	3,173	2,601	50	53	1,011	504	349	75	83
90	Pericarditis	4	1	3	--------	--------	--------	--------	--------	--------	--------
91a	Acute endocarditis, specified	49	24	25	--------	--------	7	3	3	--------	1
91b	Endocarditis, unspecified (under 45 years)	2	2	--------	--------	--------	--------	--------	--------	--------	--------
92a	Endocarditis, specified as chronic, etc.*	521	267	246	3	5	113	55	39	9	10
92b	Endocarditis, unspecified (45 years and over)	29	15	14	--------	--------	9	1	2	4	2
93a	Acute myocarditis	155	81	72	2	--------	7	3	1	2	1
93b	Myocarditis, unspecified (under 45 years)	2	--------	1	--------	1	2	2	--------	--------	--------
93c	Chronic myocarditis and myocardial degeneration	1,777	873	879	13	12	341	158	130	23	30
93d	Other diseases of myocardium	289	144	140	5	--------	95	43	37	7	8
94a	Angina pectoris	50	35	15	--------	--------	11	9	2	--------	--------
94b	Diseases of coronary arteries	1,296	865	418	6	7	177	114	52	6	5
95a	Functional diseases of heart	5	3	2	--------	--------	4	3	1	--------	--------
95b	Other and unspecified diseases of heart	1,325	666	619	15	26	190	89	64	17	20
96	Aneurysm (except of heart)	30	18	11	--------	1	3	--------	1	2	--------
97	Arteriosclerosis (except coronary arteries)	295	149	141	4	1	37	15	14	4	4
98	Gangrene	2	1	1	--------	--------	5	3	1	--------	1
99	Other diseases of arteries	31	18	12	1	--------	2	1	1	--------	--------
100	Diseases of veins, etc.*	9	6	2	1	--------	6	4	--------	1	1
101	Diseases of lymphatic system (lymphangitis, etc.)	--------	--------	--------	--------	--------	--------	--------	--------	--------	--------
102	Idiopathic anomalies of blood-pressure	4	4	--------	--------	--------	2	1	1	--------	--------
103	Other diseases of circulatory system	1	1	--------	--------	--------	--------	--------	--------	--------	--------
	VIII.—Diseases of the respiratory system	977	528	418	19	12	226	89	74	40	23
104a	Diseases of nasal fossae	--------	--------	--------	--------	--------	--------	--------	--------	--------	--------
104b	Other diseases of nasal fossae and antrum	6	4	2	--------	--------	1	1	--------	--------	--------
105	Diseases of larynx	1	1	--------	--------	--------	--------	--------	--------	--------	--------
106a	Acute bronchitis	11	2	9	--------	--------	2	--------	1	1	--------
106b	Chronic bronchitis	13	7	5	--------	1	2	1	1	--------	--------
106c,d	Bronchitis, unspecified	5	2	3	--------	--------	2	1	1	--------	--------
107a	Bronchopneumonia	338	171	154	9	4	87	36	32	14	5
107b	Capillary bronchitis	1	--------	1	--------	--------	2	1	1	--------	--------
108	Lobar pneumonia	514	294	203	10	7	91	36	29	15	11
109	Pneumonia, unspecified	7	4	3	--------	--------	7	3	1	2	1
110	Pleurisy	23	10	13	--------	--------	10	3	3	4	--------
111a	Pulmonary embolism and thrombosis	11	4	7	--------	--------	3	1	1	--------	1

TABLE 18.—DEATHS FROM EACH CAUSE, BY RACE AND SEX:

(Exclusive of

List No.	CAUSE OF DEATH	MISSOURI					MONTANA					NEBRASKA				
		Total deaths	White		All other		Total deaths	White		All other		Total deaths	White		All other	
			M	F	M	F		M	F	M	F		M	F	M	F
	VIII.—Diseases of the respiratory system—Continued															
111b	Pulmonary congestion, edema, hemorrhagic infarct	30	13	14	1	2	5	----	5	---	---	28	15	12	-----	1
112	Asthma	55	27	21	2	5	8	4	4	---	---	15	5	10	-----	-----
113	Pulmonary emphysema	4	2	------	1	1	------	----	----	---	---	4	1	3	-----	-----
114	Other diseases of respiratory system (except t.b.)	44	21	13	7	3	17	15	1	1	---	10	9	1	-----	-----
	IX.—Diseases of the digestive system	2,692	1,434	1,025	122	111	379	205	139	16	19	722	425	288	6	3
115a	Diseases of pharynx and tonsils	131	69	53	4	5	33	17	14	1	1	40	19	20	-----	1
115b	Diseases of buccal cavity and annexa	22	10	7	4	1	1	----	1	---	---	8	7	1	-----	-----
116	Diseases of esophagus	5	4	1	----	----	------	----	----	---	---	------	-----	-----	-----	-----
117a	Ulcer of stomach	176	130	32	10	4	25	21	4	---	---	70	58	12	-----	-----
117b	Ulcer of duodenum	69	51	14	3	1	12	11	----	1	---	28	24	4	-----	-----
118	Other diseases of stomach (except cancer)	64	28	30	5	1	11	9	2	---	---	16	7	9	-----	-----
119	Diarrhea, enteritis (under 2 years)	439	210	171	24	34	36	14	11	5	6	38	25	13	-----	-----
120	Diarrhea, enteritis (2 years and over)	167	82	73	6	6	13	5	3	---	5	47	26	21	-----	-----
121	Appendicitis	436	260	145	16	15	74	47	21	5	1	142	90	47	5	-----
122a	Hernia	159	89	53	10	7	10	5	5	---	---	45	27	18	-----	-----
122b	Intestinal obstruction	213	100	89	12	12	44	20	21	2	1	69	37	30	-----	2
123	Other diseases of intestines	47	23	16	5	3	6	4	2	---	---	13	5	8	-----	-----
124	Cirrhosis of liver	377	244	110	13	10	53	32	17	---	4	67	44	22	1	-----
125a	Yellow atrophy of liver	13	3	9	----	1	7	3	4	---	---	3	1	2	-----	-----
125b	Other diseases of liver	39	18	13	4	4	3	2	1	---	---	6	3	3	-----	-----
126	Biliary calculi	179	50	124	3	2	25	6	18	1	---	52	16	36	-----	-----
127	Other diseases of gall-bladder, biliary passages	107	37	66	----	4	17	7	8	1	1	60	26	34	-----	-----
128	Diseases of pancreas	13	10	3	----	----	------	----	----	---	---	8	4	4	-----	-----
129	Peritonitis, cause not specified	36	16	16	3	1	9	2	7	---	---	10	6	4	-----	-----
	X.—Diseases of the genitourinary system	4,679	2,417	1,758	297	207	391	248	127	13	3	1,000	581	396	12	11
130	Acute nephritis (including unspecified under 10 years)	70	36	21	7	6	16	11	4	---	1	21	9	12	-----	-----
131	Chronic nephritis	4,001	2,004	1,572	246	179	267	165	92	8	2	726	404	306	9	7
132	Nephritis, unspecified (10 years and over)	37	21	13	2	1	31	22	8	1	---	44	25	17	1	1
133	Other diseases of kidneys, ureters, etc.*	115	52	48	9	6	10	4	5	1	---	34	15	18	1	-----
134	Calculi of urinary passages	68	41	22	2	3	6	6	----	---	---	14	9	5	-----	-----
135	Diseases of bladder (except tumors)	25	12	10	3	----	2	1	1	---	---	10	6	4	-----	-----
136	Diseases of urethra, urinary abscess, etc.	13	10	------	3	----	------	----	----	---	---	------	-----	-----	-----	-----
137	Diseases of prostate	265	240	------	25	----	40	38	----	2	---	113	112	-----	1	-----
138	Diseases of male genital organs, not venereal	1	1	------	----	----	2	1	----	1	---	1	1	-----	-----	-----
139a	Cysts of ovary	17	------	15	----	2	1	----	1	---	---	6	-----	6	-----	-----
139b	Other diseases of ovaries, etc.*	50	------	42	----	8	8	----	8	---	---	18	-----	15	-----	3
139c	Diseases of uterus	15	------	14	----	1	8	----	8	---	---	13	-----	13	-----	-----
139d	Nonpuerperal diseases of breast (except cancer)	------	------	------	----	----	------	----	----	---	---	------	-----	-----	-----	-----
139e	Other diseases of female genital organs	2	------	1	----	1	------	----	----	---	---	------	-----	-----	-----	-----
	XI.—Diseases of pregnancy, childbirth, etc.*	229	------	204	----	25	35	----	30	---	5	78	-----	77	-----	1
140	Abortion with septic conditions	32	------	28	----	4	7	----	6	---	1	14	-----	14	-----	-----
141	Abortion without mention of septic conditions, etc.*	12	------	12	----	----	1	----	1	---	---	6	-----	6	-----	-----
142a	Ectopic gestation, septic conditions specified	1	------	1	----	----	------	----	----	---	---	------	-----	-----	-----	-----
142b	Ectopic gestation, septic conditions not mentioned	13	------	11	----	2	1	----	----	---	1	7	-----	6	-----	1
143	Other accidents of pregnancy (except hemorrhages)	1	------	1	----	----	1	----	1	---	---	------	-----	-----	-----	-----
144a	Placenta praevia	6	------	6	----	----	1	----	1	---	---	6	-----	6	-----	-----
144b	Other puerperal hemorrhages	19	------	17	----	2	2	----	2	---	---	9	-----	9	-----	-----
145a	Puerperal septicemia and pyemia (see exceptions)*	62	------	55	----	7	5	----	4	---	1	10	-----	10	-----	-----
145b	Puerperal tetanus (see exceptions)*	------	------	------	----	----	------	----	----	---	---	------	-----	-----	-----	-----
146	Puerperal albuminuria and eclampsia	45	------	38	----	7	3	----	3	---	---	10	-----	10	-----	-----
147	Other toxemias of pregnancy	9	------	8	----	1	1	----	1	---	---	2	-----	2	-----	-----
148	Puerperal phlegmasia alba dolens, embolus, etc.*	5	------	5	----	----	6	----	6	---	---	7	-----	7	-----	-----
149	Other accidents of childbirth	24	------	22	----	2	6	----	5	---	1	7	-----	7	-----	-----
150	Other and unspecified conditions of puerperal state	------	------	------	----	----	1	----	----	---	1	------	-----	-----	-----	-----
	XII.—Diseases of the skin and cellular tissue	63	31	29	1	2	10	8	1	1	---	20	8	10	-----	2
151	Furuncle, carbuncle	20	13	7	----	----	2	2	----	---	---	5	5	-----	-----	-----
152	Phlegmon, acute abscess	14	6	7	1	----	2	1	1	---	---	5	1	4	-----	-----
153	Other diseases of skin and annexa, etc.*	29	12	15	----	2	6	5	----	1	---	10	2	6	-----	2
	XIII.—Diseases of the bones, etc.*	38	18	16	2	2	8	5	2	1	---	14	6	7	1	-----

112	Asthma	165	79	73	7	6	51	20	16	10	5
113	Pulmonary emphysema	13	10	3	-------	-------	1	1	-------	-------	-------
114	Other diseases of respiratory system (except tuberculosis)	156	112	32	11	1	40	5	7	18	10
	IX.—Diseases of the digestive system	8,144	4,551	3,252	192	149	2,464	856	665	482	461
115a	Diseases of pharynx and tonsils	366	180	160	15	11	119	37	40	19	23
115b	Diseases of buccal cavity and annexa	63	35	21	7	-------	36	11	9	6	10
116	Diseases of esophagus	17	9	7	-------	1	4	1	1	2	-------
117a	Ulcer of stomach	647	528	98	16	5	96	51	11	21	13
117b	Ulcer of duodenum	365	304	53	7	1	40	31	2	6	1
118	Other diseases of stomach (except cancer)	56	30	26	-------	-------	84	20	20	20	24
119	Diarrhea, enteritis (under 2 years)	610	309	247	28	26	1,009	321	251	239	198
120	Diarrhea, enteritis (2 years and over)	207	95	106	5	1	175	48	51	38	38
121	Appendicitis	1,512	888	567	30	27	285	116	86	36	47
122a	Hernia	657	356	279	15	7	54	22	15	14	3
122b	Intestinal obstruction	591	282	270	18	21	185	49	62	27	47
123	Other diseases of intestines	193	98	83	5	7	40	16	5	9	10
124	Cirrhosis of liver	1,517	956	512	30	19	130	69	26	22	13
125a	Yellow atrophy of liver	44	21	21	1	1	12	2	5	2	3
125b	Other diseases of liver	101	52	39	6	4	22	9	4	5	4
126	Biliary calculi	609	178	421	-------	10	33	7	21	2	3
127	Other diseases of gall-bladder, biliary passages	342	117	222	1	2	85	28	42	4	11
128	Diseases of pancreas	105	58	43	4	-------	20	9	7	2	2
129	Peritonitis, cause not specified	142	55	77	4	6	35	9	7	8	11
	X.—Diseases of the genitourinary system	11,130	5,608	5,004	243	275	3,385	1,198	966	633	588
130	Acute nephritis (including unspecified under 10 years)	110	50	51	3	6	190	60	34	55	41
131	Chronic nephritis	8,934	4,150	4,399	183	202	2,45[illegible]	879	744	443	390
132	Nephritis, unspecified (10 years and over)	170	82	82	4	2	358	118	99	69	72
133	Other diseases of kidneys, ure' rs, etc.*	371	193	153	12	13	84	27	36	9	12
134	Calculi of urinary passages	236	160	70	3	3	26	12	9	3	2
135	Diseases of bladder (except tumors)	40	25	13	-------	2	10	4	3	3	-------
136	Diseases of urethra, urinary abscess, etc.	29	17	1	10	1	17	3	-------	14	-------
137	Diseases of prostate	952	926	-------	26	-------	132	95	-------	37	-------
138	Diseases of male genital organs, not venereal	7	5	-------	2	-------	-------	-------	-------	-------	-------
139a	Cysts of ovary	80	-------	74	-------	6	3	-------	2	-------	1
139b	Other diseases of ovaries, etc.*	143	-------	113	-------	30	80	-------	25	-------	55
139c	Diseases of uterus	46	-------	43	-------	3	27	-------	13	-------	14
139d	Nonpuerperal diseases of breast (except cancer)	1	-------	1	-------	-------	-------	-------	-------	-------	-------
139e	Other diseases of female genital organs	11	-------	4	-------	7	2	-------	1	-------	1
	XI.—Diseases of pregnancy, childbirth, etc.*	717	-------	650	-------	67	421	-------	218	-------	203
140	Abortion with septic conditions	123	-------	100	-------	23	42	-------	19	-------	23
141	Abortion without mention of septic conditions, etc.*	37	-------	36	-------	1	18	-------	9	-------	9
142a	Ectopic gestation, septic conditions specified	8	-------	7	-------	1	2	-------	-------	-------	2
142b	Ectopic gestation, septic conditions not mentioned	31	-------	25	-------	6	9	-------	1	-------	8
143	Other accidents of pregnancy (except hemorrhages)	5	-------	5	-------	-------	11	-------	8	-------	3
144a	Placenta praevia	27	-------	27	-------	-------	15	-------	8	-------	7
144b	Other puerperal hemorrhages	89	-------	82	-------	7	33	-------	15	-------	18
145a	Puerperal septicemia and pyemia (see exceptions)*	113	-------	103	-------	10	64	-------	31	-------	33
145b	Puerperal tetanus (see exceptions)*	-------	-------	-------	-------	-------	-------	-------	-------	-------	-------
146	Puerperal albuminuria and eclampsia	83	-------	76	-------	7	122	-------	70	-------	52
147	Other toxemias of pregnancy	33	-------	31	-------	2	31	-------	19	-------	12
148	Puerperal phlegmasia alba dolens, embolus, etc.*	46	-------	42	-------	4	23	-------	12	-------	11
149	Other accidents of childbirth	121	-------	116	-------	5	51	-------	26	-------	25
150	Other and unspecified conditions of puerperal state	1	-------	-------	-------	1	-------	-------	-------	-------	-------
	XII.—Diseases of the skin and cellular tissue	159	84	66	3	6	53	22	16	7	8
151	Furuncle, carbuncle	37	25	12	-------	-------	16	10	4	1	1
152	Phlegmon, acute abscess	57	28	22	2	5	24	7	9	2	6
153	Other diseases of skin and annexa, etc.*	65	31	32	1	1	13	5	3	4	1
	XIII.—Diseases of the bones, etc.*	142	92	37	6	7	46	21	10	12	3
154	Osteomyelitis	93	67	19	3	4	32	13	6	10	3
155	Other diseases of bones (except tuberculosis)	18	11	7	-------	-------	4	2	-------	2	-------
156	Diseases of joints, other organs of locomotion	31	14	11	3	3	10	6	4	-------	-------
	XIV.—Congenital malformations	1,204	615	546	27	16	344	170	122	28	24
157a	Congenital hydrocephalus	245	104	134	4	3	43	20	15	3	5
157b	Spina bifida and meningocele	104	50	51	1	2	29	11	14	2	2
157c	Congenital malformations of heart	518	271	227	12	8	167	87	53	11	16
157d	Other congenital malformations	337	190	134	10	3	105	52	40	12	1
	XV.—Diseases of early infancy	3,999	2,168	1,505	163	163	2,063	740	570	411	342

TABLE 20.—DEATHS FROM EACH CAUSE, BY DETAILED RACE AND SEX: UNITED STATES, 1938

(Exclusive of stillbirths. Numbers 1 to 200b after causes of death are those of the 1929 revision of the detailed International List. Numbers 201 to 214 are symbols for a supplemental classification of certain causes of death, introduced by the Division of Vital Statistics, Bureau of the Census, U. S. A.)

SUPPLEMENT

SUPPLEMENT

Hawaii, Puerto Rico, and the Virgin Islands

Hawaii

The Territory of Hawaii was admitted to the death-registration area in 1917 and to the birth-registration area in 1929.

The number of live births reported in Hawaii in 1938 was 9,062. Of these, 3,184, or 35 percent, were Japanese; 2,172, or 24 percent, were Part-Hawaiian; 1,619, or 18 percent, were Caucasian; 1,107, or 12 percent, were Filipinos; 483, or 5 percent, were Chinese; and 345, or 4 percent, were Hawaiian.

The number of deaths from all causes in Hawaii in 1938 was 3,224, and the estimated population was 405,000, giving a crude death rate of 8.0 per 1,000 population against 8.9 in 1937. The highest death rates per 100,000 population in 1938 were: For diseases of the heart (all forms), 127.7; pneumonia (all forms), 75.3; cancers and other malignant tumors, 67.9; tuberculosis (all forms), 66.2; nephritis, 62.7; and cerebral hemorrhage, embolism, and thrombosis, 55.3. These causes account for more than 57 percent of all deaths.

Deaths under 1 year numbered 531, equivalent to a rate of 58.6 per 1,000 live births, against 68.9 in 1937. More than 50 percent of these infant deaths were due to pneumonia (all forms) and premature birth, the rates for these causes being 15.6 and 13.9, respectively. The most marked decrease in any mortality rate in 1938 is shown for measles, from 47.1 to 0.5; the largest increase shown is for cerebral hemorrhage, embolism, and thrombosis, from 44.6 to 55.3.

Puerto Rico

Puerto Rico was admitted to the death-registration area in 1932. The number of deaths from all causes in Puerto Rico in 1938 was 33,874 and the estimated population was 1,806,000, giving a crude death rate of 18.8 per 1,000 population, against 20.9 in 1937. The highest crude death rates per 100,000 population were: For tuberculosis (all forms), 274.3; diarrhea and enteritis (under 2 years), 272.3; pneumonia (all forms), 176.1; diarrhea and enteritis (2 years and over), 143.2; diseases of the heart (all forms), 120.5; nephritis, 116.2; congenital malformations and diseases of early infancy, 109.7; and malaria, 107.3. These causes account for 70.3 percent of all deaths. The greatest decrease in any mortality rate in 1938 was 33.3 for diarrhea and enteritis (under 2 years).

Virgin Islands

The Virgin Islands—St. Croix, St. Thomas, and St. John—were admitted to the birth- and death-registration areas in 1924.

A special census of the population of these islands was taken by the Bureau of the Census in 1930. The population then numbered 22,012, of which 78.3 percent were Negroes. Because of the continuous decrease of the population from 1860 to 1930, rates have not been computed.

In 1938, 703 births were reported in the Virgin Islands, and of this number the Negro births represented over 74 percent. There were 488 deaths in 1938, more than 80 percent of which were deaths of Negroes.

The largest number of deaths resulted from diseases of the heart (all forms), nephritis, diarrhea and enteritis (under 2 years), pellagra, pneumonia (all forms), congenital malformations and diseases of early infancy, cancers and other malignant tumors, syphilis, and cerebral hemorrhage, embolism, and thrombosis. These diseases accounted for more than 74 percent of all deaths.

Deaths under 1 year numbered 93 and represent an infant mortality rate of 132.3 per 1,000 live births, which is 8.2 higher than the corresponding rate (124.1) for 1937. Nearly 66 percent of all deaths occurring among infants under 1 year of age were caused by diarrhea and enteritis, premature birth, and pneumonia (all forms), the rates for these causes being 46.9, 21.3, and 18.5, respectively. The infant mortality rate for Negroes was 131.9, or 1.0 higher than the corresponding rate (130.9) for 1937.
