LETTER OF TRANSMITTAL

DEPARTMENT OF COMMERCE,
BUREAU OF THE CENSUS,
Washington, D. C., July 9, 1927.

SIR:

I transmit herewith Part I of the annual report on Mortality Statistics for 1925; this volume includes only rate tables and general tables; the text will be presented in Part II, which will also include the text for Birth, Stillbirth, and Infant Mortality Statistics, 1925.

This is the twenty-sixth compilation of mortality statistics prepared by the Bureau of the Census. It is based on data from transcripts of death certificates received from the registration area for deaths, which included the Territory of Hawaii, the Virgin Islands, and, in continental United States, 40 States, the District of Columbia, and 24 cities in nonregistration States. The States of Alabama and West Virginia were added to the registration area in 1925.

The total number of deaths returned from this part of continental United States, which contained an estimated population of 103,108,000, or 89.4 per cent of the total, was 1,219,019, corresponding to a death rate of 11.8 per 1,000 population. Populations were estimated by the geographer's division of the Bureau of the Census.

This report was prepared under the direction of Dr. William H. Davis, chief statistician for vital statistics, assisted by John B. Mitchell, supervising special agent, and Clyde D. Williams, expert chief of division.

Acknowledgment is made of the efficient service rendered in the preparation of this report by John O. Spain and Miss Maud E. Linder.

Respectfully,

W. M. STEUART,
Director of the Census.

Hon. HERBERT HOOVER,
Secretary of Commerce.
