LETTER OF TRANSMITTAL

DEPARTMENT OF COMMERCE,
BUREAU OF THE CENSUS,
Washington, D.C., June 1, 1934.

SIR: I transmit herewith certain selected tables presenting some of the mortality statistics compiled for the years 1931 and 1932.

The latest annual report on mortality now in print is that for 1930, which is the thirty-first in a continuous unbroken series covering the period from 1900 to 1930, inclusive. In regular course the volumes for 1931 and 1932 would have been issued by this time, but the limitation on the funds allotted to the Bureau for printing in the fiscal year 1933–34 made it necessary to postpone their publication. Arrangements have now been made and funds secured for printing the delayed reports. But in the meantime, in order that some of the main results of the 1931 and 1932 tabulations may be made available to the public without further delay, it was decided to publish the tables herewith transmitted. These have been selected or derived from the standard general tables which had been completed in manuscript awaiting the time when funds would be available for printing.

The death registration area for which statistics are here presented included in 1931 all States except Texas ~~and South Dakota, and in 1932 all except Texas~~. Texas has ~~now~~ been admitted. So the statistics for 1933 will cover for the first time the entire area of continental United States. This will be the consummation of the more than 30 years of persistent organized effort on the part of the Bureau of the Census and the American Public Health Association, beginning when the registration area for deaths covered only 10 States ~~with~~ the District of Columbia.

Now that the registration area has been completed, the Bureau of the Census looks upon the perfecting of the registration, improvement in the character of the annual reports, and their prompt publication as among the next objectives to be achieved.

Respectfully,

WILLIAM LANE AUSTIN,
Director of the Census.

Hon. DANIEL C. ROPER,
Secretary of Commerce.

Table 1.—Population, deaths (exclusive of stillbirths), and death rates per 1,000 population, by color, for groups of cities and rural districts, by States: 1931 and 1932	2
Table 2.—Total deaths (exclusive of stillbirths) for individual cities having from 10,000 to 25,000 inhabitants, and for individual counties, exclusive of cities, having 10,000 or more inhabitants: 1931 and 1932	6
Table 3.—Deaths (exclusive of stillbirths) from selected causes for States, by groups of cities and rural districts, and for individual cities having 25,000 or more inhabitants: 1931 and 1932	18
Table 4.—Deaths (exclusive of stillbirths) from each cause, by age, sex, and color, in the registration States (including District of Columbia): 1931 and 1932	64
Table 5.—Deaths under 1 year of age (exclusive of stillbirths), from selected causes, in the birth registration area: 1931 and 1932	98

INTRODUCTION

The annual compilation of mortality statistics by the Federal Government, as authorized under the Act of 1902 establishing the permanent Census Bureau, was limited to those States and municipalities which possessed registration records affording satisfactory data in necessary detail. At that time only 10 States and the District of Columbia met this requirement as regards death records and they constituted the death registration area as originally established. Since then the area has been extended from time to time as the States one after another have enacted the necessary legislation and established satisfactory systems of registration. By 1932 all States had been included except ~~South Dakota and~~ Texas. ~~South Dakota~~ was admitted ~~in 1932 and~~ Texas in 1933, making the registration area complete for continental United States.

The period for which annual statistics have been compiled under the Act of 1902 begins with the year 1900. Within that period the death rate has undergone a very marked decline. In fact if we except the year 1918, when the epidemic of influenza contributed to carry the rate up to the high point of 18.1 per thousand population, the rate within the registration area has never since been as high as it was in 1900 when it was 17.6. It has never reached 16 since 1905, or 15 since 1910, or 14 since 1917 (the year 1918 being of course still excepted). From 1921 to 1929 the death rate remained fairly constant, deviating but little from 12. It fell off to 11.3 in 1930, and to 11.1 in 1931; and in 1932 for the first time it went below 11, being 10.9.

In the table below, death rates per 100,000 population are shown by principal causes of death for 1900, 1910, and every year from 1920 to 1932 inclusive. While as a rule the rates from each cause have decreased, there are some notable exceptions. The rate from cancer increased from 63.0 in 1900 to 102.1 in 1932; that from diseases of the heart from 132.1 to 209.9. With the increasing use of automobiles the death rate from automobile accidents has naturally mounted during this period. Deaths from this cause were separately reported for the first time in 1906 when the rate was only 0.4, or about four deaths to a million population. The rate reached 1.8 in 1910, 10.4 in 1920, and 25.2 in 1931 (leaving out collisions with street cars or trains). But in 1932 it fell off to 21.9 which was lower than it had been in any year since 1928.

There has been a very marked decline in the death rate from tuberculosis of the respiratory system—from 180.5 in 1900 to 56.4 in 1932. Other causes which show striking declines include typhoid and paratyphoid fever (from 35.9 to 3.7); scarlet fever (from 10.2 to 2.1); diphtheria (from 43.3 to 4.5); diarrhea and enteritis (from 133.2 to 16.4); pneumonia, all forms (from 180.5 to 76.9).

	SUPPLEMENTAL																		
	This supplemental list is made in accordance with the requirements of the International Conference at Paris, 1929. The deaths shown in this tabulation are supplemental to those reported opposite titles 178 to 194, inclusive. Comparable figures for titles shown in prior years will be found opposite the International List titles. To obtain the total number of deaths in 1931 due to any of the accidental causes the supplemental figures should be added to those reported opposite the International List numbers in the regular table.

	SUPPLEMENTAL																		
Punch symbol	This supplemental list is made in accordance with the requirements of the International Conference at Paris, 1929. The deaths shown in this tabulation are supplemental to those reported opposite Titles 178 to 194, inclusive. Comparable figures for titles shown in prior years will be found opposite the International List titles. To obtain the total number of deaths in 1931 due to any of the accidental causes the supplemental figures should be added to those reported opposite the International List numbers in the regular table.
