To complete interviews about these selected residents, I would like to speak with a caregiver who knows about them. Our Resident Questionnaire asks about services provided to the resident and a little about his or her background. I can interview different caregivers for different residents. I would like your help arranging to speak with the caregiver in a private place or some place where we won't be disturbed. The Resident Questionnaire takes about 20 minutes for each selected resident.</p> <p>It will also be helpful if the resident records for each of the residents selected could be retrieved before we begin these interviews.</p>
