

Healthy People 2010 Operational Definition

2-4. Increase the proportion of adults with doctor-diagnosed arthritis who receive health care provider counseling.

2-4b. For physical activity or exercise.

National Data Source	National Health Interview Survey (NHIS), CDC, NCHS.
State Data Source	Behavioral Risk Factor Surveillance System (BRFSS), CDC, NCCDPHP.
Healthy People 2000 Objective	Not applicable.
Changes since the 2000 Publication	New subobjective (see Comments).
Measure	Percent (age adjusted—see Comments).
Baseline (Year)	52 (2002)
Target	67
Target-Setting Method	Better than the best racial/ethnic subgroup. For a discussion of target-setting methods, see Part A, section 4.
Numerator	Number of persons aged 18 years and older with doctor-diagnosed arthritis and who received health care provider counseling for physical activity or exercise.
Denominator	Number of persons aged 18 years with doctor-diagnosed arthritis.
Population Targeted	U.S. civilian, noninstitutionalized population.
Questions Used To Obtain the National Baseline Data	From the 2002 National Health Interview Survey: [NUMERATOR:] ➤ <i>Has a doctor or other health professional ever suggested physical activity or exercise to help your arthritis or joint symptoms?</i>

[DENOMINATOR:]

- *Have you ever been told by a doctor or other health professional that you have some form of arthritis, rheumatoid arthritis, gout, lupus, or fibromyalgia?*

Expected Periodicity Periodic.

Comments Data are age adjusted to the 2000 standard population using age groups 18-44, 45-64, 65-74, and 75 years and over. Data by education status are age adjusted using the age groups 25-44, 45-64, 65-74, 75 and over. Age-adjusted percents are weighted sums of age-specific percents. For a discussion on age adjustment, see Part A, section 7.

Objective 2-4 moved from developmental to measurable during the Healthy People 2010 Midcourse Review. Two subobjectives were created: 2-4a addresses counseling related to weight reduction among overweight and obese persons with arthritis, while 2-4b addresses counseling related to physical activity or exercise.

Objective 2-4 was adapted from Healthy People 2000 objective 17.14, which focused on formal patient education for persons with chronic and disabling conditions. Objective 17.14 tracked the proportion of persons with diabetes and asthma who attended patient education classes. These data were not age-adjusted.

For some objectives, data do not meet the criteria for statistical reliability, data quality, or confidentiality and have been suppressed. Information on suppression of data for the major Healthy People 2010 data systems has been published in a *Healthy People Statistical Note*.¹

See Part C for a description of NHIS and Appendix A for focus area contact information.
