EXPLANATION OF THE NATIONAL HEALTH INTERVIEW SURVEY

The basic purpose of the National Health Interview Survey (NHIS) is to obtain information about the frequency and severity of various illnesses, disability, and accidents, the kind of care and treatment people receive for their health problems, and other information related to the health of our Nation.

Data are compiled for use by Federal, State, and local health departments, medical schools, research organizations, and other groups or individuals.

The U.S. Census Bureau is conducting this survey for the National Center for Health Statistics which is part of the U.S. Public Health Service because of the urgent need for up-to-date statistics on the health of the people. The survey is authorized by title 42, United States Code, section 242k. The information collected is confidential and will be used only for statistical purposes. Participation in this survey is voluntary and there are no penalties for refusing to answer any question. However, your cooperation is extremely important in obtaining much needed information to ensure the completeness and accuracy of the data.

I arranged with (previous respondent) to call today to ask you some questions. Your household was previously provided with a letter explaining this health survey. Adding NHIS Extra Units to Case Management

Usually EXTRA units are picked up by the instrument when you ask the housing unit coverage questions at the beginning of the interview. EXTRA units picked up by the instrument are automatically added to Case Management.

However, *when you discover EXTRA units **after** you have completed the coverage questions, you need to add these EXTRA units to Case Management yourself.*

First determine if a unit is an EXTRA unit by using this criteria:

In general, an EXTRA unit is any separate housing unit that is **not** listed.

Area Segments

The EXTRA unit must be:

- A separate living quarters (live and eat separately) with direct access to the unit
- Within the segment boundaries
- Within the same structure or on the same property as the sample unit

Permit Segments

The EXTRA unit must be:

- A separate living quarters (live and eat separate with direct access to the unit)
- Within the same structure
- Within the same space occupied by the original sample unit

Group Quarters in Area Segments

-  Group Quarters (GQ) do not have separate living quarters, therefore, there are **no** EXTRA units for a GQ by definition. If you find more GQ units than expected as you interview, note this in the Footnotes section of the listing sheet.

Then add the EXTRA unit(s) to Case Management following these steps:

-  If you find more than 3 EXTRA units, call your office before conducting the interview.

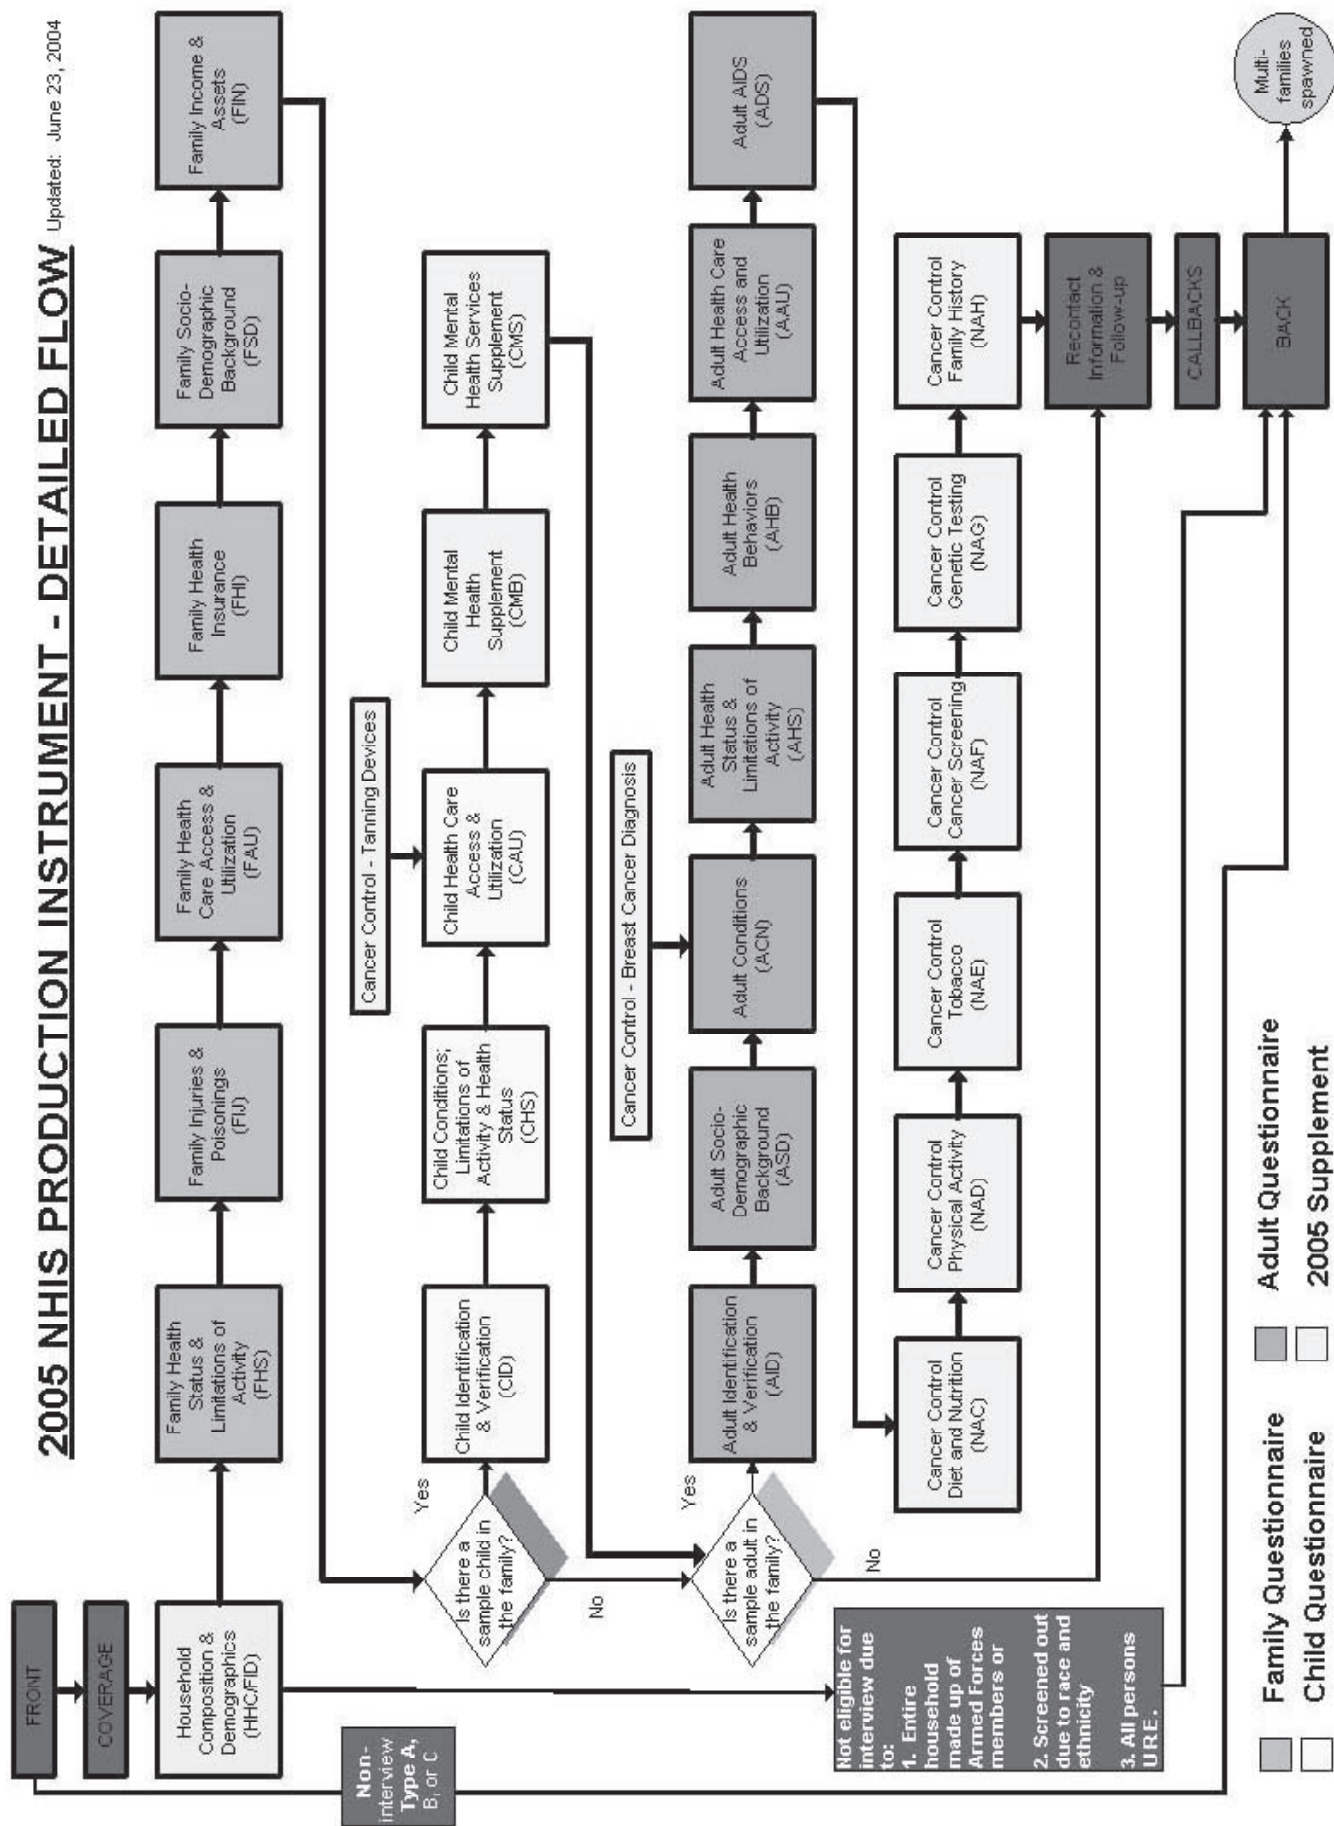

1. Go to the Case List Screen.
2. Place the cursor on the parent unit address on the Case List Screen.
3. Press F4 to create new record for the EXTRA unit(s).
4. Enter the unique unit designation or correct the address for the EXTRA unit.
