

## Healthy People 2010 Operational Definition

---

**13-18. (Developmental) Reduce HIV infections in adolescent and young adult females aged 13 to 24 years that are associated with heterosexual contact.**

**Comments**

This objective was previously objective 25-8 (from the STD focus area). The text was revised from “Reduce HIV infections in adolescents and young adults females aged 13 to 24 years that are associated with heterosexual contact” to “Reduce the number of new cases of HIV/AIDS diagnosed in adolescents and young adult females aged 13 to 24 years that are associated with heterosexual contact” at the 2005 Healthy People 2010 midcourse review.

An operational definition could not be specified at the time of publication.

The proposed national data source is the HIV/AIDS Reporting System, CDC, NCHHSTP.

See Part C for a description of the HIV/AIDS Reporting System and Appendix A for focus area contact information.
