

Healthy People 2010 Operational Definition

27-1. Reduce tobacco use by adults.

27-1d. (Developmental) Other products.

Comments

The subobjective was deleted at the Healthy People 2010 Midcourse Review. The subobjective, which was intended to measure use of pipes, bidis, and other herbal cigarettes among adults, was deemed too complex to yield meaningful data for public health policy. However, a new subobjective (27-2e) measuring adolescent use of bidis was added during the midcourse review.
