INTRODUCTION

The statistics in this report have been assembled by the National Center for Health Statistics to answer questions frequently asked about vital and health statistics for the United States.

Information on births, deaths, marriages, divorces, and life expectancy is based on vital data gathered by the Center's Division of Vital Statistics from the individual States, which are responsible for the registration of these events.

With one exception, the data on health characteristics of the U.S. population are based upon surveys conducted by the Center's Division of Health Interview Statistics and Division of Health Examination Statistics. The exception is reported cases of communicable diseases, which are compiled by the Center for Disease Control, Public Health Service, Atlanta, Georgia.

Data on health personnel are gathered by the Center's Division of Health Resources Utilization Statistics primarily from professional associations.

Vital statistics shown in this report include only events occurring within a specified area. Beginning with 1933, all data cover events occurring within the entire conterminous (48) United States. Beginning with 1959, the figures include Alaska, and starting with 1960, they include Hawaii. For the years prior to 1933, data for marriages, divorces, and births, when these are shown as having been adjusted for underregistration, are for the entire United States. Data for registered births and deaths prior to 1933 are for expanding groups of registration States. Beginning with 1970, data exclude births and deaths of nonresidents of the United States. In that year there were 6,414 births to nonresidents and 1,935 deaths of nonresidents.

Fetal deaths are excluded from birth and death statistics. Fetal death figures for 1969-76 include only fetal deaths for which the stated or presumed period of gestation was 20 weeks or more. For earlier years gestational age not stated is included.

Numbers shown as estimated in certain vital statistics tables are based on a sample of incomplete data. Numbers shown as provisional are based on figures reported on a monthly basis and are subject to revision in final tabulations.

Rates are based on population figures from the U.S. Bureau of the Census. Birth and divorce rates for 1941-46 are based on population including the Armed Forces abroad; other rates are based on total population residing in the area. Beginning with 1940 for years ending in a zero, rates are based on the enumerated population as indicated in table 1. For all other years, rates are based on estimated midyear population.

I. POPULATION

Table 1. Population residing in the United States and annual rate of increase (percent per year) between dates given: Selected years, 1900-1976

Year	Population	Annual rate of increase
1976 (estimated as of July 1)-----	214,649,000	0.76
1975 (estimated as of July 1)-----	213,032,000	0.78
1974 (estimated as of July 1)-----	211,390,000	0.73
1973 (estimated as of July 1)-----	209,851,000	0.78
1972 (estimated as of July 1)-----	208,230,000	0.98
1971 (estimated as of July 1)-----	206,212,000	1.18
1970 (19th decennial census, April 1)-----	203,211,926	1.21
1969 (estimated as of July 1)-----	201,385,000	1.00
1968 (estimated as of July 1)-----	199,399,000	0.98
1967 (estimated as of July 1)-----	197,457,000	0.96
1966 (estimated as of July 1)-----	195,576,000	1.06
1965 (estimated as of July 1)-----	193,526,000	1.46
1960 (18th decennial census, April 1)-----	179,323,175	1.75
1950 (17th decennial census, April 1)-----	150,697,361	1.36
1940 (16th decennial census, April 1)-----	131,669,275	0.70
1930 (15th decennial census, April 1)-----	122,775,046	1.47
1920 (14th decennial census, Jan. 1)-----	105,710,620	1.44
1910 (13th decennial census, April 15)-----	91,972,266	1.95
1900 (12th decennial census, June 1)-----	75,994,575	...

Table 2. Population residing in the United States, by age, and percent distribution of total population in each age group: 1940, 1960, 1970, and 1976

[Enumerated as of April 1 for 1940, 1960, and 1970 and estimated as of July 1 for 1976]

Age	Population in millions				Percent of total population in age group			
	1976	1970	1960	1940	1976	1970	1960	1940
All ages-----	214.6	203.2	179.3	131.7	100.0	100.0	100.0	100.0
Under 5 years-----	15.3	17.2	20.3	10.5	7.1	8.4	11.3	8.0
5-9 years-----	17.3	20.0	18.7	10.7	8.1	9.8	10.4	8.1
10-14 years-----	19.8	20.8	16.8	11.7	9.2	10.2	9.4	8.9
15-19 years-----	21.2	19.1	13.2	12.3	9.9	9.4	7.4	9.4
20-24 years-----	19.4	16.4	10.8	11.6	9.1	8.1	6.0	8.8
25-29 years-----	17.7	13.5	10.9	11.1	8.3	6.6	6.1	8.4
30-34 years-----	14.2	11.4	11.9	10.2	6.6	5.6	6.7	7.8
35-39 years-----	11.9	11.1	12.5	9.5	5.5	5.5	7.0	7.2
40-44 years-----	11.1	12.0	11.6	8.8	5.2	5.9	6.5	6.7
45-49 years-----	11.7	12.1	10.9	8.3	5.4	6.0	6.1	6.3
50-54 years-----	12.0	11.1	9.6	7.3	5.6	5.5	5.4	5.5
55-59 years-----	10.8	10.0	8.4	5.9	5.0	4.9	4.7	4.5
60-64 years-----	9.3	8.6	7.1	4.8	4.3	4.2	4.0	3.6
65-69 years-----	8.3	7.0	6.3	3.8	3.9	3.4	3.5	2.9
70-74 years-----	5.9	5.4	4.7	2.6	2.8	2.7	2.6	2.0
75 years and over-----	8.7	7.6	5.6	2.6	4.1	3.8	3.1	2.0

II. BIRTHS

Table 3. Live births and birth rates: Selected years, 1930-76

Year	Registered live births ¹		Births adjusted for underregistration ²	
	Number	Rate per 1,000 population	Number	Rate per 1,000 population
1976 ³	3,167,788	14.8	---	---
1975 ³	3,144,198	14.8	---	---
1974 ³	3,159,958	14.9	---	---
1973 ³	3,136,965	14.9	---	---
1972 ³	3,258,411	15.6	---	---
1971 ⁴	3,555,970	17.2	---	---
1970 ⁴	3,731,386	18.4	---	---

¹ Figures for the All other group cover only Negroes. However, the Negro population comprised 95 percent of the corresponding All other population.

IV. FETAL, INFANT, AND MATERNAL MORTALITY

There is substantial evidence that many fetal deaths are not reported. Consequently, the ratios shown in table 8 are believed to be considerably understated. These are annual national

estimates based on the registered births and fetal deaths. Birth registration is much more complete than fetal death registration.

Table 8. Fetal deaths and fetal death ratios: Selected years, 1945-76

[Fetal deaths for 1969-76 include only those with stated or presumed gestation of 20 weeks or more. For earlier years gestational age not stated is included]

1930-----	1,126,856	9.2	---	67.2	195,961	1.6	7.5

¹Estimated for 1935, 1955, 1960, and 1965-69.

²Estimated. Reported annulments included.

VI. HEALTH CHARACTERISTICS

The Division of Health Interview Statistics obtains data on a wide variety of health topics. These data are reported from household interviews conducted during each year in about 40,000 households consisting of about 116,000 persons. Data in tables 12 and 13 are based on

interviews during 1975, while data in table 14 are based on data collected during 1974. The data refer to the civilian, noninstitutional population of the United States. During 1975 this population averaged 209,065,000 persons. In 1974 this population averaged 207,344,000.

Table 12. Selected health statistics: 1975

Health topic	Estimated national annual frequency
Number of acute conditions: ¹	
Infective and parasitic diseases-----	47,608,000
Common cold-----	93,305,000
Other acute respiratory conditions-----	139,655,000
Acute digestive conditions-----	21,618,000
Injuries-----	76,192,000
All other acute conditions-----	64,741,000
Number of days of disability: ²	
Restricted-activity days-----	3,733,892,000
Bed days-----	1,371,418,000
School-loss days (ages 6-16 years)-----	217,102,000
Work-loss days (reported for currently employed persons 17 years and over)-----	433,152,000
Number of persons with limited activity due to chronic disease or impairment:	
With any degree of limitation of activity-----	29,900,000
With limitations in major activity ³ -----	22,519,000
Medical and dental care:	
Number of physician visits-----	1,056,094,000
Home visits-----	8,217,000
Office visits-----	717,746,000
Other visits or consultations-----	330,131,000
Number of dental visits-----	340,882,000
Number of persons injured: ⁴	
In moving motor vehicle accidents-----	5,140,000
In work accidents-----	9,841,000
In home accidents-----	31,197,000
In all other accidents-----	28,352,000

¹Includes only acute conditions for which a doctor was consulted or which caused the person to restrict his normal daily activities for at least 1 day.

²Not mutually exclusive. A work- or school-loss day may also be a bed day. Work-loss days, school-loss days, and bed days are included in restricted-activity days.

³Refers to ability to work, keep house, or engage in school or preschool activities.

⁴Includes only persons whose injuries required medical attention or resulted in at least 1 day of activity restriction. The classes of accidents are not mutually exclusive, e.g., a person injured in a moving motor vehicle while at work is classified in both categories.

Table 13. Leading causes of bed disability due to acute conditions: 1975

[Data are based on household interviews of the civilian, noninstitutionalized population]

Cause	Number in thousands	Percent
All acute conditions-----	866,374	100.0
Respiratory conditions-----	429,549	49.6
Influenza-----	231,759	26.8
Cold and other upper respiratory conditions-----	142,706	16.5
Pneumonia, bronchitis, and other acute lower respiratory conditions-----	55,084	6.4
Injuries-----	141,906	16.4
Fractures, dislocations, sprains and strains-----	73,413	8.5
Infective and parasitic diseases-----	99,780	11.5
Virus, N.O.S.-----	36,814	4.2
Common childhood diseases-----	13,892	1.6
Digestive system conditions-----	48,442	5.6
Genitourinary disorders-----	24,142	2.8
Deliveries and disorders of pregnancy and the puerperium-----	26,067	3.0
Diseases of the ear-----	19,284	2.2
Diseases of the musculoskeletal system-----	19,746	2.3
All other acute conditions-----	57,457	6.6

In general, the items listed follow commonly accepted definitions. Technical aspects of the data and more detailed information about the topics are given in the report entitled "Health Survey Procedure" (*Vital and Health Statistics, Series 1, No. 2*).

The Division of Health Interview Statistics obtains data on chronic conditions reported to have caused or contributed to limitation of activities. The estimates shown in table 14 include conditions limiting major activities such

as working, keeping house, and going to school as well as those causing lesser limitation not related to major activity. Excluded are conditions causing limitation among persons in resident institutions, sanitariums, chronic disease hospitals, nursing homes, and homes for the aged.

Additional data about conditions causing limitation of activities are shown in "Limitation of Activity Due to Chronic Conditions" (*Vital and Health Statistics, Series 10, No. 111*).

Table 14. Number of persons with limitation of activity by selected chronic conditions causing limitation: 1974

[Data are based on household interviews of the civilian noninstitutionalized population]

Condition causing limitation of activity	Number of persons ¹
Persons limited in activity-----	29,292,000
Tuberculosis, all forms-----	122,000
Malignant neoplasms-----	633,000
Benign and unspecified neoplasms-----	262,000
Diabetes-----	1,448,000
Mental and nervous conditions-----	1,504,000
Heart conditions-----	4,753,000
Cerebrovascular disease-----	793,000
Hypertension without heart involvement-----	1,976,000
Varicose veins-----	267,000
Hemorrhoids-----	92,000
Other conditions of circulatory system-----	1,148,000
Chronic bronchitis-----	293,000
Emphysema-----	822,000
Asthma, with or without hay fever-----	1,434,000
Hay fever, without asthma-----	210,000
Chronic sinusitis-----	191,000
Other conditions of respiratory system-----	602,000
Peptic ulcer-----	550,000
Hernia-----	690,000
Other conditions of digestive system-----	948,000
Diseases of kidney and ureter-----	358,000
Other conditions of genitourinary system-----	488,000
Arthritis and rheumatism-----	4,396,000
Other musculoskeletal disorders-----	1,718,000
Visual impairments-----	1,724,000
Hearing impairments-----	702,000
Paralysis, complete or partial-----	974,000
Impairments (except paralysis) of back or spine-----	2,051,000
Impairments (except paralysis and absence) of upper extremities and shoulders-----	650,000
Impairments (except paralysis and absence) of lower extremities and hips-----	1,889,000

¹Summations of conditions causing limitation may be greater than the number of persons limited because a person can report more than one condition as a cause of his limitation; on the other hand, they may be less because only selected conditions are shown.

Table 15. Communicable diseases—reported cases and registered deaths: 1969-76
 [Numbers after diseases are category numbers of the Eighth Revision International Classification of Diseases, Adapted, 1965. Since frequencies are for calendar years, not all deaths necessarily resulted from the cases tallied]

¹Deaths based on a 50-percent sample.

²Excludes late effects of acute poliomyelitis.

³Including paratyphoid fever.

⁴New diagnostic standards introduced in 1975.

⁵Newly reported civilian cases.

SOURCE: Reported cases of communicable diseases came from the Center for Disease Control, Public Health Service, Atlanta, Ga.

The Division of Health Examination Statistics obtains data on the prevalence of selected chronic conditions and physical measurements of the U.S. population by direct examinations of persons selected in national probability samples. Tables 18 and 19 are based on data collected on adults in 1960-1962. Table 17 presents data on

children aged 6-11 years collected in 1963-1965, while tables 16 and 20 additionally present data on youths aged 6-17 collected in 1966-1970.

Additional data on adults, children, and youth are presented in the more than 75 reports in Series 11 of *Vital and Health Statistics*.

Table 16. Dental, sensory, and speech defects in youths aged 12-17 years: 1966-70

VIII. HEALTH RESOURCES

Table 21. Estimated persons employed in selected occupations within each health field: 1974

Health field and occupation	Active workers
Total ¹ -----	4,672,850 to 4,707,650
Administration of health services-----	² 48,200
Health department, public health administrator-----	5,200
Hospital administrator and assistant-----	17,000
Nursing home administrator and assistant-----	16,000
Voluntary health agency administrator and program representative-----	10,000
Anthropology and sociology-----	1,700
Anthropologist—cultural and physical-----	2700
Sociologist—medical-----	1,000
Automatic data processing in the health field-----	4,000 to 5,000
Systems analyst and programmer-----	4,000 to 5,000
Basic sciences in the health field ³ -----	60,000
Research scientist (other than physician, dentist, veterinarian)-----	60,000
Biomedical engineering-----	12,000
Biomedical engineer-----	4,000
Biomedical engineering technician-----	8,000
Chiropractic-----	16,600
Chiropractor-----	16,600
Clinical laboratory services-----	172,500
Clinical laboratory scientist-----	5,500
Clinical laboratory technologist-----	97,000
Clinical laboratory technician and assistant-----	70,000
Dentistry and allied services-----	279,800
Dentist-----	107,300
Dental hygienist-----	22,500
Dental assistant-----	118,000
Dental laboratory technician-----	32,000
Dietetic and nutritional services-----	72,700
Dietitian and nutritionist-----	48,000
Dietetic technician and food service supervisor-----	24,700
Economic research in the health field-----	² 400
Economist—health-----	400

See footnotes at end of table.

Table 21. Estimated persons employed in selected occupations within each health field: 1974—Con.

Health field and occupation	Active workers
Environmental sanitation-----	20,000
Sanitarian-----	15,000
Technician and aide-----	5,000
Food and drug protective services-----	47,900
Inspector (health, food and drug, other)-----	16,400
Food and drug chemist or microbiologist-----	1,100
Food technologist-----	27,000
Food technician-----	² 3,400
Funeral directing and embalming-----	50,000
Funeral director and embalmer-----	50,000
Health and vital statistics-----	⁴ 1,350
Health statistician-----	1,100
Vital record registrar-----	150
Demographer-----	100
Health education-----	22,500 to 23,000
Public health educator-----	2,500 to 3,000
School health educator or coordinator-----	² 20,000
Health information and communication-----	7,400 to 10,500
Biomedical photographer-----	2,000 to 3,000
Health information specialist and science writer-----	2,000 to 4,000
Medical writer-----	1,400
Technical writer and editor-----	1,500
Medical illustrator-----	² 500 to 600
Library services in the health field-----	10,300
Medical librarian-----	3,000
Medical library technician and clerk-----	7,300
Medical records-----	60,000
Registered record administrator-----	5,500
Accredited record technician-----	7,500
Other medical record personnel-----	47,000
Medicine and osteopathy-----	362,700
Physician (M.D.)-----	350,600
Physician (D.O.)-----	12,100

See footnotes at end of table.

Table 21. Estimated persons employed in selected occupations within each health field: 1974—Con.

Health field and occupation	Active workers
Midwifery-----	4,300
Lay midwife-----	2,500
Nurse-midwife-----	1,800
Nursing and related services-----	2,319,000
Registered nurse-----	857,000
Practical nurse-----	492,000
Nursing aide, orderly or attendant-----	936,000
Home health aide-----	34,000
Occupational therapy-----	13,500 to 14,500
Occupational therapist-----	8,000
Occupational therapy technician or assistant-----	25,500 to 6,500
Opticianry-----	12,000
Dispensing optician-----	12,000
Optometry-----	25,100 to 25,300
Optometrist-----	19,300
Optometric assistant-----	25,000
Optometric technician-----	2,800 to 1,000
Orthotic and prosthetic technology-----	2,800 to 3,800
Orthotist and prosthetist-----	2,800 to 3,800
Pharmacy-----	132,900
Pharmacist-----	132,900
Physical therapy-----	26,100
Physical therapist-----	18,000
Physical therapy technician or assistant-----	8,100
Podiatric medicine-----	7,100
Podiatrist-----	7,100
Psychology-----	35,000
Psychologist-----	35,000
Radiologic technology-----	100,000
Radiologic (X-ray) technologist, technician or assistant-----	100,000

See footnotes at end of table.

Table 21. Estimated persons employed in selected occupations within each health field: 1974—Con.

Health field and occupation	Active workers
Respiratory therapy----- Respiratory therapist and technician-----	18,000 to 19,000 18,000 to 19,000
Secretarial and office services in the health field----- Receptionist, secretary, assistant, or aide-----	² 275,000 to 300,000 275,000 to 300,000
Social work-----	38,600
Social worker—medical and psychiatric----- Social work assistant and aide-----	34,300 ⁴ 4,300
Specialized rehabilitation services-----	11,250 to 13,250
Corrective therapist----- Educational therapist----- Manual arts therapist----- Music therapist----- Therapeutic recreational specialist----- Home economist in rehabilitation-----	1,100 400 1,000 2,200 6,000 to 8,000 550
Speech pathology and audiology----- Speech pathologist and audiologist-----	27,000 27,000
Veterinary medicine-----	33,500
Veterinarian----- Animal technician-----	28,500 5,000
Vocational rehabilitation counseling----- Vocational rehabilitation counselor-----	17,700 17,700
Miscellaneous health services-----	323,950
Electrocardiograph technician----- Electroencephalograph technician----- Emergency medical technician----- Medical assistant----- Operating room technician----- Ophthalmic medical assistant----- Orthoptist----- Physician's assistant-----	² 9,500 4,000 260,000 16,000 12,000 20,000 ² 450 2,000

¹Each occupation is counted only once. For example, all physicians are in medicine and osteopathy.

²Previous estimate repeated in absence of sufficient information on which to base revision.

³Statistics are not available on what percentage of the estimated 250,000 physical scientists are employed in the health field.

⁴1968 estimate repeated in absence of sufficient information on which to base revision.

¹Estimated.

²Includes non-Federal physicians in 50 States, District of Columbia, Puerto Rico, and other U.S. outlying areas (American Samoa, Canal Zone, Guam, Pacific Islands, and Virgin Islands), those with addresses temporarily unknown to American Medical Association; and Federal physicians in the United States and abroad. Excludes physicians with temporary foreign addresses.

³Includes civilians in 50 States, District of Columbia, Puerto Rico, and other U.S. outlying areas; U.S. citizens in foreign countries; and the Armed Forces in the United States and abroad.

⁴Excludes physicians with addresses temporarily unknown to the American Medical Association and those whose status was not reported to the American Osteopathic Association. Includes for 1970-1976 M.D.'s not classified as to their specialty or activity.

⁵Includes physicians in solo practice and in partnership, group, or other forms of office practice and those in hospital-based practice—interns, residents, fellows, and full-time hospital staff.

¹Includes non-Federal physicians in the 50 States, District of Columbia, Puerto Rico, and other U.S. outlying areas (American Samoa, Canal Zone, Guam, Pacific Islands, and Virgin Islands); those with addresses temporarily unknown to the American Medical Association; and Federal physicians in the United States and abroad. Excludes physicians with temporary foreign addresses.

²Includes non-Federal and Federal physicians in the 50 States and the District of Columbia and those in U.S. possessions and foreign countries.

³Includes physicians reporting "no specialty" and specialties not listed on American Medical Association list of specialty designations.

⁴Includes interns and residents.

⁵Includes medical teaching, administration, research, and other activities.

⁶Includes 29 inactive physicians and 43 "not classified."

80-84 years-----	246,096	113,137	132,959	90.3	115.2	76.3
85 years and over-----	304,472	113,119	191,353	154.9	179.8	143.1

¹Includes deaths for which age was not stated.

Leading Causes

The next table shows the number of deaths and death rates for the leading causes of death in 1976 and death rates for these causes in 1900.

Figures for the 2 years show gross changes in mortality, but they are not exactly comparable in many respects. The rates for 1900 are based on deaths in 10 States and the District of Columbia, while the figures for 1976 are for the entire United States. New discoveries in medicine and new diagnostic facilities have produced an improvement in reporting causes of death. Causes of death which were not recognized as disease entities in 1900 are relatively frequent in

1976. The classification of causes of death is revised every decade to keep abreast of new information.

For 1976 deaths were classified according to the Eighth Revision International Classification of Diseases, Adapted, and for 1900 according to the First Revision of the International Lists. Also, beginning with 1949, the underlying cause of death indicated by the physician is generally the cause used in statistical tabulation. In earlier years, a fixed set of priorities was used to select the cause of death to be tabulated when more than one cause was reported.

Table 26. Deaths and death rates for the 10 leading causes of death in 1976 and death rates for these same causes in 1900

Rank, 1976	Cause of death and category numbers of the Eighth Revision International Classification of Diseases, Adapted, 1965	Number of deaths, 1976	Rate per 100,000 population	
			1976	1900
	All causes-----	1,909,440	889.6	1,719.1
1	Diseases of heart-----390-398,402,404,410-429	723,878	337.2	137.4
2	Malignant neoplasms, including neoplasms of lymphatic and hematopoietic tissues-----140-209	377,312	175.8	64.0

Selected Causes

Table 29. Age-adjusted death rates for 69 selected causes of death: 1970 and 1976
 [Refers only to resident deaths occurring within the United States. Excludes fetal deaths. Based on age-specific death rates per 100,000 estimated midyear population in specified group. Computed by the direct method, using as the standard population the age distribution of the total population of the United States as enumerated in 1940]

Cause of death and category numbers of the Eighth Revision International Classification of Diseases, Adapted, 1965	1976	1970
All causes-----	627.5	714.3
Bacillary dysentery and amebiasis-----004,006	0.0	0.0
Enteritis and other diarrheal diseases-----008,009	0.7	1.0
Tuberculosis, all forms-----010-019	1.1	2.2
Tuberculosis of respiratory system-----010-012	0.9	1.7
Tuberculosis, other forms-----013-019	0.3	0.5
Whooping cough-----033	0.0	0.0
Streptococcal sore throat and scarlet fever-----034	0.0	0.0
Meningococcal infections-----036	0.2	0.3
Septicemia-----038	2.3	1.4
Acute poliomyelitis-----040-043	0.0	0.0
Measles-----055	0.0	0.0
Syphilis and its sequelae-----090-097	0.1	0.2
Other infective and parasitic diseases-----Remainder of 000-136	1.7	1.8
Malignant neoplasms, including neoplasms of lymphatic and hematopoietic tissues-----140-209	132.3	129.9
Malignant neoplasms of buccal cavity and pharynx-----140-149	3.0	3.1
Malignant neoplasms of digestive organs and peritoneum-----150-159	33.6	35.2
Malignant neoplasms of respiratory system-----160-163	33.5	28.4
Malignant neoplasm of breast-----174	12.6	12.6
Malignant neoplasms of genital organs-----180-187	14.7	15.6
Malignant neoplasms of urinary organs-----188,189	5.5	5.7
Malignant neoplasms of all other and unspecified sites-----170-173,190-199	16.8	15.9
Leukemia-----204-207	5.4	5.8
Other neoplasms of lymphatic and hematopoietic tissues-----200-203,208,209	7.3	7.7
Benign neoplasms and neoplasms of unspecified nature-----210-239	1.7	2.0
Diabetes mellitus-----250	11.1	14.1
Avitaminoses and other nutritional deficiencies-----260-269	0.7	0.8
Anemias-----280-285	1.0	1.3
Meningitis-----320	0.7	0.8
Major cardiovascular diseases-----390-448	284.4	340.1
Diseases of heart-----390-398,402,404,410-429	216.7	253.6
Active rheumatic fever and chronic rheumatic heart disease-----390-398	4.7	6.3
Hypertensive heart disease-----402	2.0	2.9
Hypertensive heart and renal disease-----404	1.0	2.0
Ischemic heart disease-----410-413	191.6	228.1
Acute myocardial infarction-----410	102.9	130.4
Other acute and subacute forms of ischemic heart disease-----411	1.3	1.6
Chronic ischemic heart disease-----412	87.3	96.0
Angina pectoris-----413	0.1	0.1
Chronic disease of endocardium and other myocardial insufficiency-----424,428	1.3	2.3
All other forms of heart disease-----420-423,425-427,429	16.1	12.0
Hypertension-----400,401,403	1.8	2.9
Cerebrovascular diseases-----430-438	51.4	66.3
Cerebral hemorrhage-----431	8.0	14.6
Cerebral thrombosis-----433	11.4	17.3
Cerebral embolism-----434	0.2	0.3
All other cerebrovascular diseases-----430,432,435-438	31.8	34.1
Arteriosclerosis-----440	6.4	8.4
Other diseases of arteries, arterioles, and capillaries-----441-448	8.0	8.8
Acute bronchitis and bronchiolitis-----466	0.3	0.5
Influenza and pneumonia-----470-474,480-486	17.4	22.1
Influenza-----470-474	1.9	1.3
Pneumonia-----480-486	15.5	20.8

Table 29. Age-adjusted death rates for 69 selected causes of death: 1970 and 1976—Con.

[Refers only to resident deaths occurring within the United States. Excludes fetal deaths. Based on age-specific death rates per 100,000 estimated midyear population in specified group. Computed by the direct method, using as the standard population the age distribution of the total population of the United States as enumerated in 1940]

Cause of death and category numbers of the Eighth Revision International Classification of Diseases, Adapted, 1965	1976	1970
Bronchitis, emphysema, and asthma-----490-493	7.9	11.6
Chronic and unqualified bronchitis-----490,491	1.5	2.1
Emphysema-----492	5.7	8.4
Asthma-----493	0.8	1.0
Peptic ulcer-----531-533	2.1	3.2
Appendicitis-----540-543	0.3	0.6
Hernia and intestinal obstruction-----550-553,560	1.8	2.6
Cirrhosis of liver-----571	13.6	14.7
Cholelithiasis, cholecystitis and cholangitis-----574,575	0.8	1.3
Nephritis and nephrosis-----580-584	2.8	3.5
Acute nephritis and nephrotic syndrome-----580,581	0.5	0.6
Chronic and unqualified nephritis and renal sclerosis-----582-584	2.3	3.0
Infections of kidney-----590	1.1	2.8
Hyperplasia of prostate-----600	0.3	0.6
Complications of pregnancy, childbirth, and the puerperium-----630-678	0.2	0.5
Abortions-----640-645	0.0	0.1
Other complications of pregnancy, childbirth, and the puerperium-----630-639,650-678	0.2	0.4
Congenital anomalies-----740-759	6.4	7.6
Certain causes of mortality in early infancy-----760-769.2,769.4-772,774-778	12.6	19.0
Birth injury, difficult labor, and other anoxic and hypoxic conditions-----764-768,772,776	6.8	10.0
Other causes of mortality in early infancy-----Remainder of 760-778	5.8	9.0
Symptoms and ill-defined conditions-----780-796	11.6	10.4
All other diseases-----Residual	43.1	40.2
Accidents-----E800-E949	43.2	53.7
Motor vehicle accidents-----E810-E823	21.5	27.4
All other accidents-----E800-E807,E825-E949	21.7	26.3
Suicide-----E950-E959	12.3	11.8
Homicide-----E960-E978	9.5	9.1
Other external causes-----E980-E999	2.2	2.8

Table 39. Deaths and death rates for Motor vehicle accidents and All other accidents in order of frequency: 1976

Cause of death and category numbers of the Eighth Revision International Classification of Diseases, Adapted, 1965	Number	Rate ¹
All accidents-----E800-E949	100,761	46.9
Motor vehicle accidents-----E810-E823	47,038	21.9
All other accidents-----E800-E807,E825-E949	53,723	25.0
Accidental falls-----E880-E887	14,136	6.6
Accidents caused by fires and flames-----E890-E899	6,338	3.0
Accidental drowning and submersion-----E910	5,645	2.6
Accidental poisoning by solid and liquid substances-----E850-E869	4,161	1.9
Inhalation and ingestion of food or other object causing obstruction or suffocation-----E911,E912	3,033	1.4
Surgical and medical complications and misadventures-----E930-E936	3,009	1.4
Accident caused by firearm missile-----E922	2,059	1.0
Striking against or struck accidentally by objects, including falling objects-----E916,E917	1,875	0.9
Accidental poisoning by gases and vapors-----E870-E877	1,569	0.7
Air and space transport accidents-----E840-E845	1,445	0.7
Water transport accidents-----E830-E838	1,371	0.6
Accidents due to natural and environmental factors-----E900-E909	1,299	0.6
Accidents caused by electric current-----E925	1,041	0.5
Accidental mechanical suffocation-----E913	911	0.4
Late effects of accidental injuries-----E940-E949	778	0.4
Machinery accidents not elsewhere classifiable-----E928	768	0.4
Railway accidents-----E800-E807	552	0.3
Caught accidentally in or between objects-----E918	471	0.2
Accident caused by explosive material-----E923	442	0.2
Other road vehicle accidents-----E825-E827	238	0.1
Accident caused by hot substance, corrosive liquid, and steam-----E924	210	0.1
Vehicle accidents not elsewhere classifiable-----E927	170	0.1
Accident caused by cutting or piercing instrument-----E920	135	0.1
Residual-----E914,E915,E919,E921,E926,E929	2,067	1.0
