Notes: * The universe for the variables in this file consists of responding
       families (specified as FM = ALL).  There may be more than one
       responding family per household.  Analysts can derive the number of
       non-responding families in each household from information contained in
       the household file (refer to the variables REJ_FAM and ACPT_FAM).

Recodes: None

Keywords: income; poverty

Notes: The "Undefinable" cases consist of families where the number of
       children under age 18 in the family is equivalent to the number of
       family members. Published 2001 poverty thresholds from the Census
       Bureau are used in these calculations. FM_KIDS is a generated variable
       indicating how many family members are < 18 years of age.

                               See Family Structure - PU Appendix for values
                               See Family Structure - PU Appendix for value label

Sources: FMSTRCT1
Recodes: None
Keywords: family structure; parent; single parent; step parent; unmarried;
          cohabiting; same-sex
Notes: This is essentially a family level variable that is attached to each
       family member's record. FMSTRCT2 is identical to the variable of the
       same name that was included in the 1998 and 2001 NHIS. Families that
       could not be classified are coded "99". Regarding the family structure
       variables, emancipated minors are treated as adults regardless of their
       age. See the Survey Description document for more information.
