<b>Changes since the 2000 Publication</b>	None.
<b>Measure</b>	Percent.
<b>Baseline (Year)</b>	100 (1997) (Reynosa).
<b>Target</b>	100
<b>Target-Setting Method</b>	10 percentage point improvement.  For a discussion of target-setting methods, see Part A, section 4.
<b>Numerator</b>	Number of residents of Reynosa who have wastewater treatment service.
<b>Denominator</b>	Number of Reynosa resident persons.
<b>Population Targeted</b>	Resident population of Reynosa.
<b>Questions Used To Obtain the National Baseline Data</b>	Not applicable.
<b>Expected Periodicity</b>	Periodic.

## Comments

The 200-kilometer border region is home to more than 10.5 million people, with about 6.2 million in the United States and 4.3 million in Mexico. In 1996, there were approximately 250,000 people in the Mexico border cities without potable water and 1.5 million people without sewer connections. In Mexico, the population figures are official estimates for 1998 based on 1990 census data.

In the United States, there is virtually 100 percent coverage in the major cities. Data for cities and the smaller border towns can be found at:
