## THE WOMEN'S PLACE DESOTO, TEXAS

Comparison of success rates across clinics may not be meaningful. Patient medical characteristics and treatment approaches vary (see pages 11–20).

## 2013 ART CYCLE PROFILE Data verified by Lisa A. King, MD Type of ART and Procedural Factors IVF 100% With ICSI 75% Tubal factor 0% Uterine factor 0% Multiple Factors:

0% Multiple Factors: Unstimulated **Used PGD** 40% Male factor 0% 0% 0% Ovulatory dysfunction 80% Female factors only Used gestational carrier 0% Diminished ovarian reserve 0% Other factor 0% Female & male factors 20% **Endometriosis** 0% Unknown factor 0%

## CURRENT SERVICES & PROFILE Current Name: The Women's Place

Donor eggs?	No	Gestational carriers?	No	Single women?	No	Verified lab accreditation?	No
Donor embryos?	Yes	Embryo cryopreservation?	No	SART member?	Yes	(See Appendix C for details.)	

a Reflects features of fresh nondonor cycles. If IVF is <100%, the remaining cycles are GIFT, ZIFT, or a combination of these procedures with IVF.

b Total patient diagnosis percentages may be greater than 100% because more than one diagnosis can be reported for each ART cycle.

<sup>&</sup>lt;sup>c</sup> Fractions are used for rates with denominators less than 20. Multiple-infant births (e.g., twins) with at least one live infant are counted as one live birth.

d Total cycle number includes those using frozen eggs. It excludes 0 cycle(s) evaluating new procedures. Both cycle types are excluded from ART success rates.

e In this report, births are defined as term if at least 37 full weeks gestation and normal birth weight if at least 2,500 grams (approximately 5 pounds, 8 ounces).

f All ages are reported together because previous data show that patient age does not materially affect success with donor eggs.
