DELAWARE VALLEY OBGYN & INFERTILITY GROUP, PC PRINCETON IVF LAWRENCEVILLE, NEW JERSEY

Comparison of success rates across clinics may not be meaningful. Patient medical characteristics and treatment approaches vary (see pages 11-20).

2013	ART CYC	LE PR	OFILE		Data verified by Seth G. Derman, MD						
_				 _	a						

Type of ART and Procedural Factors ^a					Patient Diagnosis b					
	IVF	100%	With ICSI	73%	Tubal factor	26%	Uterine factor	4%	Multiple Factors:	
	Unstimulated	1%	Used PGD	4%	Ovulatory dysfunction	49%	Male factor	58%	Female factors only	14%
	Used gestational carrier	1%			Diminished ovarian reserve	27%	Other factor	11%	Female & male factors	47%
					Endometriosis	2%	Unknown factor	0%

-							
Donor eggs?	Yes	Gestational carriers?	Yes	Single women?	Yes	Verified lab accreditation?	Yes
Donor embryos?	No	Embryo cryopreservation?	Yes	SART member?	Yes	(See Appendix C for details.)	

a Reflects features of fresh nondonor cycles. If IVF is <100%, the remaining cycles are GIFT, ZIFT, or a combination of these procedures with IVF.

b Total patient diagnosis percentages may be greater than 100% because more than one diagnosis can be reported for each ART cycle.

[°] Fractions are used for rates with denominators less than 20. Multiple-infant births (e.g., twins) with at least one live infant are counted as one live birth.

d Total cycle number includes those using frozen eggs. It excludes 0 cycle(s) evaluating new procedures. Both cycle types are excluded from ART success rates.

e In this report, births are defined as term if at least 37 full weeks gestation and normal birth weight if at least 2,500 grams (approximately 5 pounds, 8 ounces).

f All ages are reported together because previous data show that patient age does not materially affect success with donor eggs.
