

2022-2026 Rhode Island Cancer Prevention and Control Strategic Plan

The 2022-2026 Rhode Island Cancer Prevention and Control Strategic Plan can be found at: ricancerplan-rihealth.hub.arcgis.com

This website is your home base for learning about the most recent data on cancer in Rhode Island; how the State plans to address, prevent, and control cancer; and how Rhode Islanders can get involved and help.

Unlike the State's previous cancer prevention and control plans, the Rhode Island Department of Health has created a website for the 2022-2026 plan. This online platform allows us to offer interactive features, provide annual updates, and highlight emerging needs in cancer prevention and control.

We invite you to explore, as we work toward our 2022-2026 goals, objectives, and strategies.

The creation of this plan was supported by Cooperative Agreement Number NU58DP006291, funded by the Centers for Disease Control and Prevention and awarded to the Rhode Island Department of Health. Its contents are solely the responsibility of the presenters and do not necessarily represent the official views of the Centers for Disease Control and Prevention, the Department of Health and Human Services, or the Rhode Island Department of Health.
