

Early Case Capture of Pediatric and Young Adult Cancers (ECC) and Childhood Cancer Survivorship, Treatment, Access, and Research (STAR)

Toye Williams
Project Lead

NPCR Program Review Meeting
April 24, 2019

OVERVIEW OF ECC

Caroline Pryce Walker Conquer Childhood Cancer Act of 2008

CDC shall award a grant to:

- Enhance and expand infrastructure to track epidemiology of pediatric cancer into a comprehensive nationwide registry
- Include actual occurrences of pediatric cancer within weeks of the date of such occurrence

Early Case Capture of Pediatric and Young Adult Cancers (ECC) Project

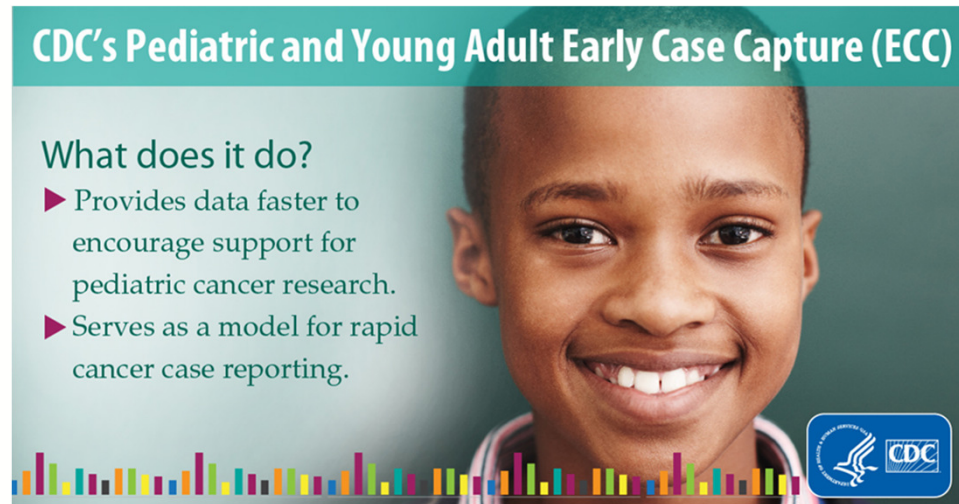

DP 11-1107	DP14-1402
3-Year Project : 9/30/2011-9/29/2014	5-Year Project : 9/30/2014 – 9/29/2019
Cancer Registries Awarded: CA, KY, LA, MN, NE, NY, OK	Cancer Registries Awarded: KY, LA, MN, NE, NY, RI, WI
<p>Overall Goals (Caroline Pryce Walker Act)</p> <ul style="list-style-type: none"> • Enhance infrastructure <ul style="list-style-type: none"> • Report cases • Increase availability of data 	

ACTIVITES

Awardee Activities

- Facilitate rapid reporting
- Expand reporting relationships with facilities
- Monitor data quality, completeness, and timeliness
- Increase availability of pediatric data
- Bi-annual submissions

CDC's Pediatric and Young Adult Early Case Capture (ECC)

What does it do?

- ▶ Provides data faster to encourage support for pediatric cancer research.
- ▶ Serves as a model for rapid cancer case reporting.

The graphic features a smiling young boy's face on the right side. At the bottom, there is a colorful bar chart and the CDC logo.

Required Data Items

- All reportable cancers and benign brain and CNS tumors diagnosed January 1, 2015 forward, age 0-19.

Demographics	Follow-back Info	Diagnostic Info
Last Name	Physician Address	Primary Site
First Name	Physician Phone #	Histology
Birth Date	Patient Address Current	Behavior
Age at DX	Patient Phone Number	Laterality
Social Security #	Follow-up Contact	Date of Diagnosis
Address at DX		Date of 1 st Contact
Race 1-5		Diagnostic Conf.
Spanish/Hispanic Orig.		Sequence Number
Sex		Type of Rpt. Source

Key Outcome Measures

- Data completeness, quality, and timeliness
 - 95% complete, 99% pass edits, 1/1,000 duplicates, 1% missing age, 1% missing sex, 2% missing race, 1% missing county
 - Timeliness: 90% of cases received at CCR within 30 days
- Case-finding audits of reporting hospitals
 - Once every 2 years
- Data submission to CDC twice a year, within 4 months
 - Edited, consolidated data with consistent, unique patient ID
 - Complete submission forms, including calculation of timeliness
 - April: Cases from January-December of previous year
 - October: Cases from January-June of that year

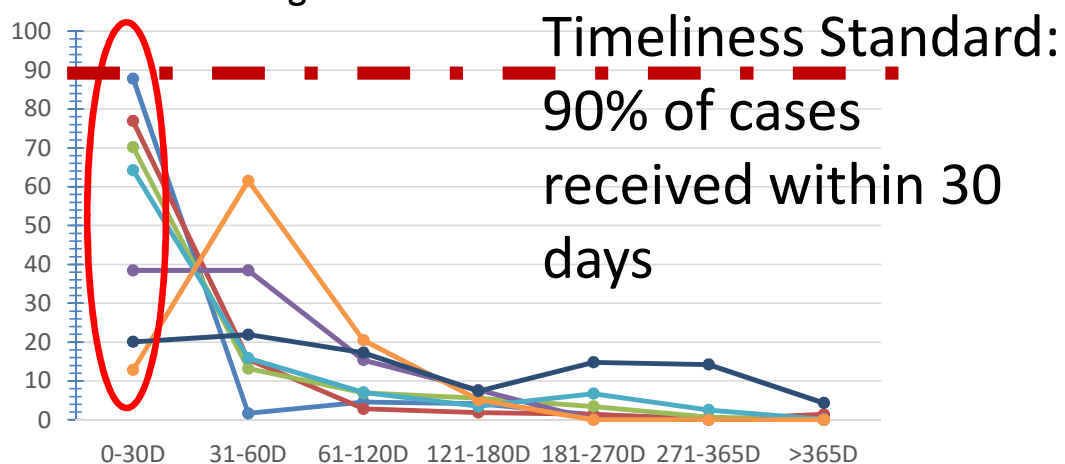

DATA

Timeliness in Diagnosis Year 2015

Timeliness in Diagnosis Year 2016

Timeliness in Diagnosis Year 2017

Timeliness in Diagnosis Year 2018

January-June Completeness

October Submissions

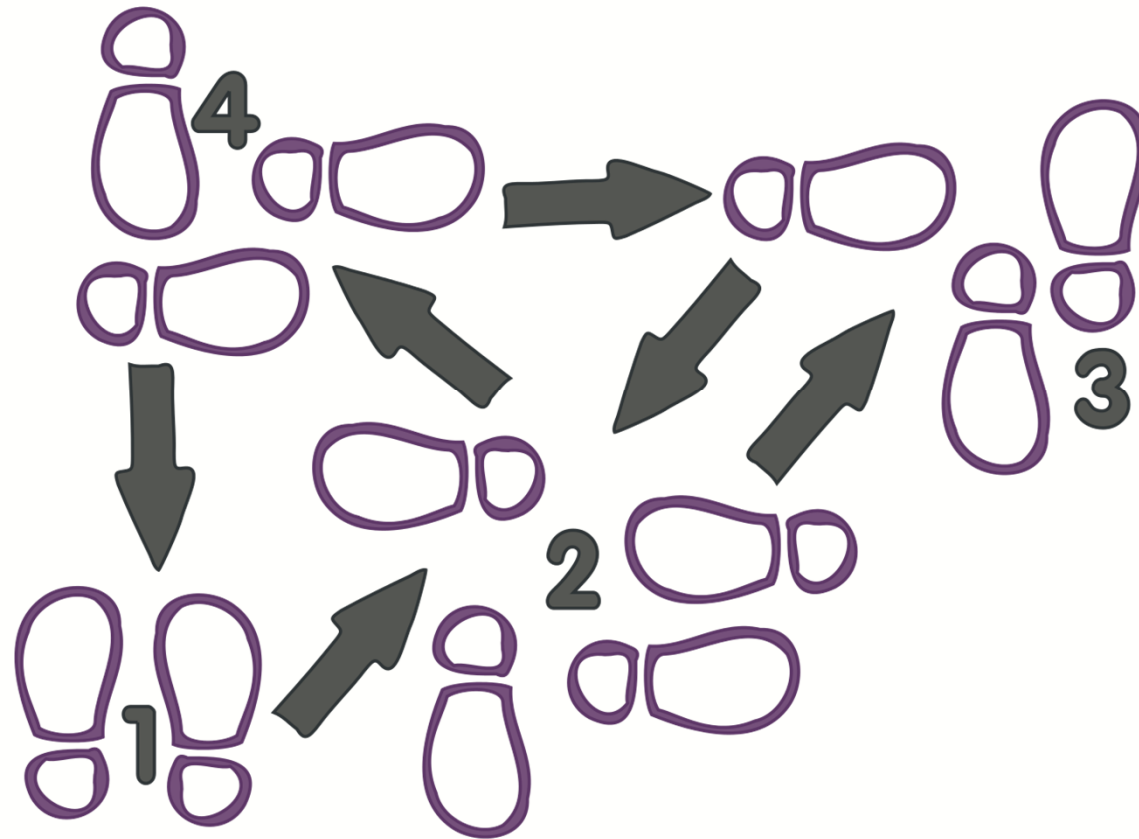

January-December Completeness

April Submissions

NEXT STEPS

Survivorship, Treatment, Access, and Research Act of 2018 (STAR)

Childhood Cancer
STAR ACT
Survivorship Treatment Access and Research

Congress has authorized CDC to:

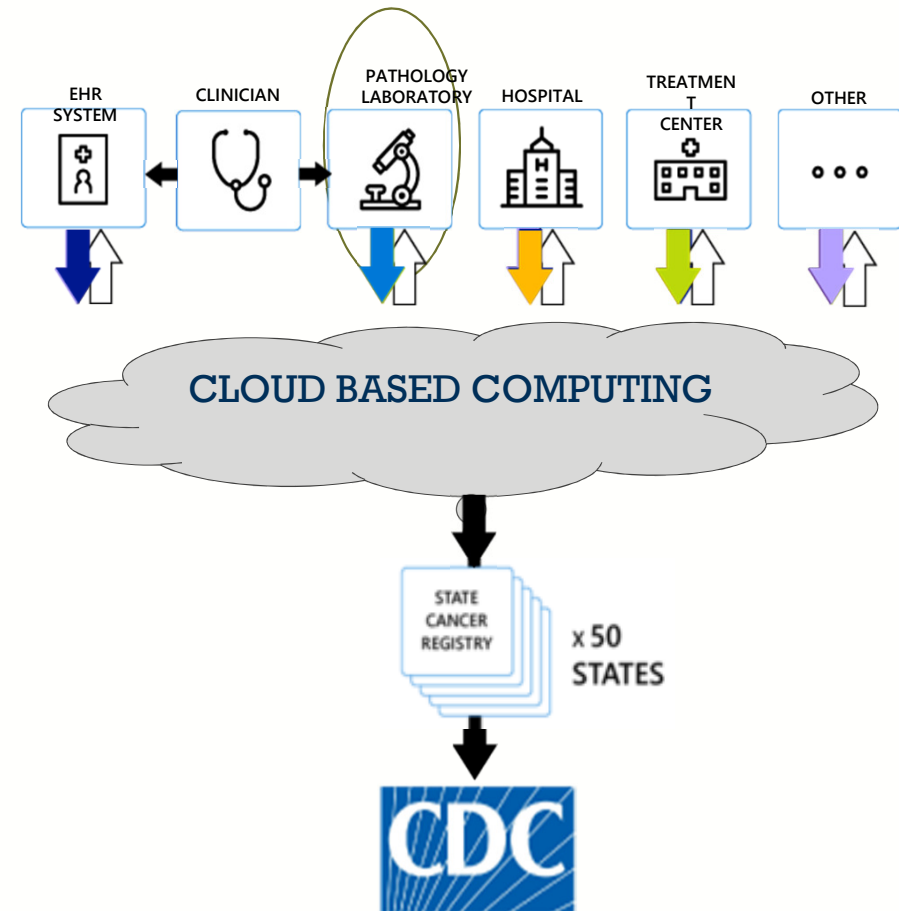

1. Identify, recruit, and train potential sources for reporting cases.
2. Develop practices to ensure early inclusion of cases in State cancer registries through electronic reporting.
3. Collect and submit de-identified data to CDC for inclusion in a national database.
4. Improve State cancer registries and the database, as appropriate, including to support the early inclusion of PAYAC cases

Cancer Data Modernization

- Improving our cancer registry system's ability to capture electronic pathology reports for **ALL** cancers INCLUDING pediatric cancers
- Continue working with the states to improve timeliness and completeness of these cases within 30 days
- Strengthen relationships with key partners such as NCI and the Children's Oncology Group hospitals

Future Vision

- Electronically send first diagnosis of cancer to the platform
- **Automate** in platform
- One process for all states
- **Real-time** reporting and more efficient data processing

Value of the Cloud: Real-time Data

- Enable faster reporting of all cancer cases
 - Including pediatric and young adult cancers
- Find out what interventions work
- Inform resources allocation
- Timely identification for clinical trials
- Identify research priorities more quickly
