

CLIAC Discussion Questions

▪ **Electronic Health Records (EHRs)**

- In regard to nationally recommended standardized vocabulary sets for laboratory test ordering and test reporting:
 - Would nationally recommended standardized vocabulary sets help laboratories achieve semantic interoperability between the LIS and the EHR?
 - How does CLIAC suggest promoting participation from the laboratory industry, in particular for the current LOINC enhancement project?
 - What should HHS do to advance national adoption of recommended standardized vocabulary sets?
 - How can standardized vocabulary sets for laboratory test ordering and reporting be sustained for the long term?
