

Healthy People 2010 Operational Definition

13-15. (Developmental) Increase the proportion of new HIV infected diagnosed before the progression to AIDS.

Comments

This objective was retained at the Healthy People 2010 Midcourse Review despite the current lack of data. An operational definition could not be specified at the time of publication.

The objective title was revised from “Extend the interval of time between an initial diagnosis of HIV infection and AIDS diagnosis in order to increase years of life of an individual infected with HIV” to “Increase the proportion of new HIV infections diagnosed before progression to AIDS.”

The proposed national data source is the HIV/AIDS Reporting System, CDC, NCHHSTP.

See Part C for a description of the HIV/AIDS Reporting System and Appendix A for focus area contact information.
