

Healthy People 2010 Operational Definition

- 23-8. (Developmental) Increase the proportion of Tribal and local agencies that incorporate core competencies in the essential public health services into job descriptions and performance evaluations.**
- 23-8a. (Developmental) Increase the proportion of Tribal health agencies that incorporate core competencies in the essential public health services into job descriptions and performance evaluations.**

Comments

Objective 23-8 was retained during the Healthy People 2010 midcourse review despite the current lack of data. Two subobjectives were created, one focusing on Tribal health agencies and the other on local health agencies.

An operational definition for this subobjective could not be specified at the time of publication.

There are currently no data sources identified at the Tribal level. A proposed data source for local health agencies is the National Profile of Local Health Departments (NPLHD), National Association of Country and City Health Officials.

See Part C for a description of NPLHD and Appendix A for focus area contact information.
