

## Healthy People 2010 Operational Definition

---

**25-8. Reduce HIV infections in adolescent and young adult females aged 13 to 24 years that are associated with heterosexual contact.**

**Comments**

This objective was realigned to focus area 13 (HIV) as new objective 13-18, and the text was revised from “ Reduce HIV infections in adolescents and young adults females aged 13 to 24 years that are associated with heterosexual contact” to “Reduce the number of new cases of HIV/AIDS diagnosed in adolescents and young adult females aged 13 to 24 years that are associated with heterosexual contact” at the 2005 Healthy People 2010 Midcourse Review.

The proposed national data source is the HIV/AIDS Surveillance System, CDC, NCHHSTP.

See Part C for a description of the HIV/AIDS Surveillance System and Appendix A for focus area contact information.
