1964

VOLUME III—MARRIAGE AND DIVORCE

U.S. DEPARTMENT OF  
HEALTH, EDUCATION, AND WELFARE

JOHN W. GARDNER, SECRETARY

PUBLIC HEALTH SERVICE

WILLIAM A. STEWART, SURGEON GENERAL

WASHINGTON: 1968

## NATIONAL CENTER FOR HEALTH STATISTICS

THEODORE D. WOOLSEY, *Director*

PHILIP S. LAWRENCE, Sc.D., *Associate Director*

OSWALD K. SAGEN, Ph.D., *Assistant Director for Health Statistics Development*

WALT R. SIMMONS, M.A., *Acting Assistant Director for Research and Scientific Development*

ALICE M. WATERHOUSE, M.D., *Medical Consultant*

JAMES E. KELLY, D.D.S., *Dental Advisor*

LOUIS R. STOLCIS, M.A., *Executive Officer*

DONALD GREEN, *Information Officer*

## DIVISION OF VITAL STATISTICS

ROBERT D. GROVE, Ph.D., *Director*

PATIENCE LAURIAT, M.A., *Chief, Marriage and Divorce Statistics Branch*

ROBERT A. ISRAEL, M.S., *Chief, Mortality Statistics Branch*

ARTHUR A. CAMPBELL, *Chief, Natality Statistics Branch*

CHARLES R. COUNCIL, *Chief, Registration Methods Branch*

ALICE M. HETZEL, *Chief, Statistical Resources Section*

# VITAL STATISTICS OF THE UNITED STATES, 1964

## VOLUME III - MARRIAGE AND DIVORCE

A brief summary of the contents for each section is listed below for the convenience of the reader. A complete table of contents is shown at the beginning of each section and is identified by a narrow black edge which can be located easily by fanning the pages. Each section is paged independently, using the section number as the identifying prefix.

### Section 1. Marriages

For the United States:

National trend data.

Marriage totals and rates for each State, division, and region.

Marriage totals for each county or county equivalent.

Monthly marriage totals for each State, division, and region.

For the marriage-registration area:

Marriages classified by major demographic characteristics of bride and groom and by characteristics of marriages performed in each participating State; marriage rates specific for sex, age, and marital status.

### Section 2. Divorces

For the United States:

National trend data.

Divorce totals and rates for each State, division, and region.

Divorce totals for each county or county equivalent.

Trend of national totals of children involved in divorce.

For the divorce-registration area:

For each participating State, divorces classified by major demographic characteristics of husband and wife, characteristics of their marriage, number of children, and legal items.

### Section 3. Puerto Rico and Virgin Islands (U.S.)

Marriage and divorce totals for each county or county equivalent.

Marriages classified by major demographic characteristics of bride and groom.

For Virgin Islands only, divorces and annulments classified by characteristics of husband and wife, duration of marriage, and legal items.

### Section 4. Technical Appendix

Historical and contemporary sources of marriage and divorce statistics, design of the samples of marriages and divorces and annulments, variability of sample estimates, and uniformity and completeness of the reporting forms and the collected data. Tables of the population estimates used as bases for rates.

Guide to Tables in Section 1-Marriages

# Section 1. Marriages

Table	Page
1-1. Estimated number of marriages and marriage rates with percent changes from preceding year: United States, 1920-64, and marriage-registration area, 1957-64-----	1-5
1-2. Estimated marriage rates per 1,000 men and women 15 years of age and over: United States, 1940-64-----	1-6
1-3. Estimated marriage rates per 1,000 unmarried women 15 years of age and over and 15-44 years of age: United States, 1940-64-----	1-6
1-4. Estimated number of marriages and marriage rates by month, with and without seasonal adjustments: United States, 1955-64-----	1-7
1-5. Marriages and marriage rates: United States, each region, division, and State, 1960-64-----	1-8
1-6. Marriages by month: United States, marriage-registration area, each region, division, and State, 1964-----	1-9
1-7. Marriage rates by previous marital status and age: Marriage-registration area, 1964-----	1-10
1-8. Median and first and third quartiles of age at marriage for brides and for grooms by previous marital status of each partner: Marriage-registration area, 1964-----	1-10
1-9. Median and mean age of bride and of groom, by specified age of spouse at first marriage of both: Marriage-registration area, 1964-----	1-11
1-10. Percentage distribution of marriages by previous marital status of bride and of groom: Marriage-registration area and each registration State, 1964-----	1-11
1-11. Percentage distribution of marriages by marriage order of bride and of groom, by color: Marriage-registration area and each registration State, 1964-----	1-12
1-12. Percentage distribution of marriages by month marriage performed, by marriage order and color of bride and of groom: Marriage-registration area, 1964-----	1-13
1-13. Percentage distribution of marriages by resident status of bride and of groom in State where married: Marriage-registration area and each registration State, 1964-----	1-14
1-14. Percentage distribution of first marriages and remarriages by type of ceremony performed, by age of bride and of groom: Marriage-registration area, 1964-----	1-15
1-15. Percentage distribution of first marriages and remarriages of bride and of groom, by type of ceremony performed: Marriage-registration area and each registration State, 1964-----	1-16
1-16. Percentage distribution of all marriages, first marriages, and remarriages of bride and of groom by age at marriage, and median age: Total of 22 selected States, 1955-64-----	1-17
1-17. Marriages by marriage order, age, and color of bride and of groom: Marriage-registration area, 1964-----	1-18
1-18. Remarriages by age, previous marital status, and color of bride and of groom: Marriage-registration area, 1964-----	1-19
1-19. Marriages by marriage order and age of bride and of groom: Each marriage-registration State, 1964-----	1-20
1-20. Marriages by age of bride, by age of groom: Marriage-registration area, 1964-----	1-23
1-21. First marriages of both bride and groom, by age of bride, by age of groom: Marriage-registration area, 1964-----	1-23

Table	Page
1-22. Marriages by age and previous marital status of bride, by age of groom (all grooms and single grooms): Marriage-registration area, 1964-----	1-24
1-23. Marriages by age and previous marital status of groom, by age of bride (all brides and single brides): Marriage-registration area, 1964 -----	1-25
1-24. Marriages by age of widowed and divorced brides, by age of widowed and divorced grooms: Marriage-registration area, 1964-----	1-26
1-25. Marriages by age of white bride and groom and by age of nonwhite bride and groom: Marriage-registration area, 1964-----	1-27
1-26. Marriages by previous marital status and color of bride and of groom: Marriage-registration area and each registration State, 1964-----	1-28
1-27. Marriages by number of this marriage of bride and of groom: Marriage-registration area and each registration State, 1964-----	1-30
1-28. Marriages by previous marital status of white and nonwhite brides and grooms: Marriage-registration area, 1964 -----	1-31
1-29. Marriages by marriage order and age of bride and of groom, by month marriage performed: Marriage-registration area, 1964-----	1-32
1-30. Marriages by marriage order and color of bride and of groom, by month marriage performed: Marriage-registration area, 1964-----	1-33
1-31. Marriages by day of week marriage performed: Marriage-registration area and each registration State, 1964-----	1-34
1-32. Marriages by resident status of bride and of groom in State where married: Marriage-registration area and each registration State, 1964-----	1-35
1-33. Marriages by marriage order and age of bride and of groom, by resident status of bride and of groom in State where married: Marriage-registration area, 1964-----	1-36
1-34. Marriages by marriage order and age of bride and of groom, by resident status in State where married: Marriage-registration area, 1964-----	1-38
1-35. Marriages by marriage order of bride and of groom, by nativity status in State where married: Marriage-registration area and each registration State, 1964-----	1-39
1-36. Marriages by marriage order, resident status, and nativity status of bride and of groom in State where married: Marriage-registration area, 1964-----	1-45
1-37. Marriages by nativity status and resident status in State where married: Each marriage-registration State, 1964 -----	1-46
1-38. Marriages by age of bride and of groom, by previous marital status and type of ceremony performed: Marriage-registration area, 1964-----	1-54
1-39. Marriages by marriage order of bride and of groom and type of ceremony performed: Marriage-registration area and each registration State, 1964-----	1-55
1-40. Marriages by previous marital status of bride and of groom, by resident status and State where married, by type of ceremony: Marriage-registration area and each registration State, 1964-----	1-57
1-41. Marriages: United States, each State and county, 1964-----	1-66

### Sampling Variability of the Marriage Statistics

In the tables which present statistics based on data from probability samples of marriage records, small frequencies have high sampling variability, which limits their usefulness. The sampling errors are shown in table 4-7 in the Technical Appendix. It is suggested that any number smaller than those shown below be interpreted simply as "small" rather than as any more precise value. The true number would very probably be within 60 percent of the figure shown in the table.

	<i>Minimum useful figure</i>		<i>Minimum useful figure</i>
Marriage-registration area -----	175	Michigan-----	225
Alabama-----	100	Mississippi-----	50
Alaska-----	10	Montana-----	15
California-----	225	Nebraska-----	50
Connecticut-----	50	New Hampshire-----	15
Delaware-----	10	New Jersey-----	100

## SECTION I - MARRIAGES

1-7

Table 1-4. Estimated Number of Marriages and Marriage Rates by Month, With and Without Seasonal Adjustments: United States, 1955-64

(Refers only to marriages occurring within the United States. Alaska included beginning 1959, and Hawaii, 1960. Figures for 1955-59 estimated from final monthly totals for reporting States and adjusted provisional totals for remaining States. Rates on an annual basis per 1,000 estimated population residing in areas for specified month. The number and rates of marriages by month adjusted for seasonal variation are the figures that would have occurred during the month if the characteristic seasonal pattern of marriages observed during the years 1955-64 had been eliminated)

ITEM AND YEAR	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.

SECTION 1 - MARRIAGES

Table 1-7. Marriage Rates by Previous Marital Status and Age: Marriage-Registration Area, 1964

(By place of occurrence. Based on sample data. For frequencies, see tables 1-17 and 1-18; for population bases, see table 4-14, Section 4. Rates per 1,000 population in specified group. Rates for all marriages are based on unmarried population, those for first marriages are based on single population, and those for remarriages are based on widowed and divorced population. Figures for widowed and divorced, but not for all remarriages, exclude data for Michigan and Ohio. All marriages include previous marital status not stated; all remarriages include widowed or divorced not stated. Figures for age not stated are distributed)

PREVIOUS MARITAL STATUS AND AGE	Bride	Groom	PREVIOUS MARITAL STATUS AND AGE	Bride	Groom

<sup>1</sup>Figures exclude data for Kentucky and Ohio.

<sup>2</sup>This State did not require reporting of type of ceremony.

## SECTION 1 - MARRIAGES

1-17

Table 1-16. Percentage Distribution of All Marriages, First Marriages, and Remarriages of Bride and of Groom by Age at Marriage, and Median Age: Total of 22 Selected States, 1955-64

(By place of occurrence. Selected States are Alabama, Alaska, Connecticut, Delaware, Georgia, Hawaii, Idaho, Iowa, Kansas, Maine, Maryland, Michigan, Montana, New Hampshire, New York (excl. N.Y.C.), Oregon, South Dakota, Tennessee, Utah, Vermont, Virginia, and Wyoming. For 1955-59, basic data are counts of marriages supplied by each State. For 1960-64, data are based on samples. Figures for age not stated are distributed. Figures for all marriages include marriage order not stated)

<sup>1</sup>Data are estimated.<sup>2</sup>"Districts" shown are election districts, the nearest equivalent to counties.<sup>3</sup>Includes District 1, Prince of Wales.<sup>4</sup>Marriage licenses issued.<sup>5</sup>Data are estimated for 11 months.<sup>6</sup>Marriages by county where license was issued.<sup>7</sup>Geographically located within limits of Idaho, Montana, and Wyoming.<sup>8</sup>Divisions are parishes.<sup>9</sup>Independent cities have the same status as counties and are listed after counties.<sup>10</sup>Independent city formed January 1, 1963, by consolidating Norfolk County and the independent city of South Norfolk.<sup>11</sup>Princess Anne County consolidated with this independent city, January 1, 1963.

## *Section 2. Divorces*

Table	Page
2-1. Estimated number of divorces and annulments and rates, with percent changes from preceding year: United States, 1920-64-----	2-5
2-2. Divorces and annulments and rates: United States, each region, division, and State, 1960-64-----	2-6
2-3. Reported annulments: United States, each region, division, and State, 1960-64-----	2-7
2-4. Median ages of divorced husband and wife at time of decree and at time of marriage: Divorce-registration area and each registration State, 1964-----	2-8
2-5. Percentage distribution of divorces and annulments by duration of marriage: Divorce-registration area and each registration State, 1964-----	2-8
2-6. Median duration of marriage prior to divorce or annulment: Divorce-registration area and each registration State, 1964-----	2-9
2-7. Divorces and annulments by color of husband by color of wife: Divorce-registration area, 1964-----	2-9
2-8. Estimated number of children involved in divorces and annulments: Divorce-registration area and each registration State, 1964-----	2-9
2-9. Estimated number of children involved in divorces and annulments: United States, 1953-64-----	2-9
2-10. Percentage distribution of divorces and annulments by number of children reported: Divorce-registration area and each registration State, 1964-----	2-10
2-11. Divorces and annulments by place where marriage was performed: Divorce-registration area and each registration State, 1964-----	2-10
2-12. Divorces and annulments by resident status of defendant husband and wife in State where decree was granted: Divorce-registration area and each registration State, 1964-----	2-11
2-13. Divorces and annulments by age of husband and of wife at time of decree: Divorce-registration area and each registration State, 1964-----	2-12
2-14. Divorces and annulments by age of husband and of wife at marriage: Divorce-registration area and each registration State, 1964-----	2-13
2-15. Divorces and annulments by race of husband and of wife: Divorce-registration area and each registration State, 1964-----	2-14
2-16. Divorces and annulments by number of this marriage of husband and of wife at time of decree: Divorce-registration area and each registration State, 1964-----	2-14
2-17. Divorces and annulments by duration of marriage: Divorce-registration area and each registration State, 1964-----	2-15
2-18. Divorces and annulments by number of children reported: Divorce-registration area and each registration State, 1964-----	2-15

Table	Page
2-19. Divorces and annulments by duration of marriage and number of children reported: Divorce-registration area and each registration State, 1964-----	2-16
2-20. Divorces and annulments by month marriage performed: Divorce-registration area and each registration State, 1964-----	2-17
2-21. Divorces and annulments by most specific legal ground for decree: Divorce-registration area and each registration State, 1964-----	2-18
2-22. All legal grounds mentioned in divorce or annulment decrees: Divorce-registration area and each registration State, 1964-----	2-18
2-23. Divorces and annulments by party to whom decree was granted, whether plaintiff or other: Divorce-registration area and each registration State, 1964-----	2-19
2-24. Divorces and annulments by plaintiff and duration of marriage: Divorce-registration area and each registration State, 1964-----	2-20
2-25. Divorces and annulments: United States, each State and county, 1964-----	2-22

### Sampling Variability of the Divorce Statistics

In the tables which present statistics based on data from probability samples of divorce records, small frequencies have high sampling variability, which limits their usefulness. The sampling errors are shown in table 4-8 in the Technical Appendix. It is suggested that any number smaller than those shown below be interpreted simply as "small" rather than as any more precise value. The true number would very probably be within 60 percent of the figure shown in the table.

	<i>Minimum useful figure</i>		<i>Minimum useful figure</i>
Divorce-registration area-----	100	Nebraska-----	15
Alabama -----	100	Ohio -----	100
Alaska -----	10	Oregon-----	50
Georgia -----	50	Pennsylvania -----	100
Hawaii -----	10	Rhode Island-----	10
Idaho -----	15	South Dakota-----	10
Iowa -----	15	Tennessee-----	50
Kansas-----	15	Utah -----	15
Maryland-----	50	Virginia-----	50
Michigan -----	100	Wisconsin -----	15
Missouri -----	50	Wyoming -----	10
Montana-----	15	Virgin Islands-----	10

## SECTION 2 - DIVORCES

2-5

Table 2-1. Estimated Number of Divorces and Annulments and Rates, With Percent Changes From Preceding Year:  
United States, 1920-64

(Refers only to events occurring within the United States. Alaska included beginning 1959, and Hawaii, 1960)

YEAR	Number	Percent change in number	Rate per 1,000 total population <sup>1</sup>	Percent change in rate	Rate per 1,000 married women 15 years of age and over <sup>2</sup>	Percent change in rate
1964	450,000	+5.1	2.4	+4.5	10.0	+4.2

<sup>1</sup>Data are estimated.

<sup>2</sup>Districts shown were county equivalents prior to 1960 (then named "Judicial Divisions"). Data are not available for election districts, the nearest equivalents of counties beginning with 1960.

<sup>3</sup>Data are incomplete.

<sup>4</sup>Geographically located within limits of Idaho, Montana, and Wyoming.

<sup>5</sup>Districts are parishes.

<sup>6</sup>Independent cities have the same status as counties and are listed after counties.

<sup>7</sup>Covington (city) figures included with Allegheny County.

<sup>8</sup>Galax (city, part) figures included with Carroll County.

<sup>9</sup>Fairfax (city) and Falls Church (city) figures included with Fairfax County.

<sup>10</sup>Galax (city, part) figures included with Grayson County.

<sup>11</sup>South Boston (city) figures included with Halifax County.

<sup>12</sup>Harrisonburg (city) figures included with Rockingham County.

<sup>13</sup>Franklin (city) figures included with Southampton County.

<sup>14</sup>Norton (city) figures included with Wise County.

<sup>15</sup>Independent city formed January 1, 1963, by consolidating Norfolk County and the independent city of South Norfolk.

<sup>16</sup>Princess Anne County consolidated with this independent city January 1, 1963.

## *Section 3. Puerto Rico and Virgin Islands (U.S.)*

Table	Page
3-1. Marriages, divorces, and rates: Puerto Rico and Virgin Islands, 1940-64-----	3-3
3-2. Marriages and divorces and annulments: Puerto Rico, Virgin Islands, and county equivalents, 1964-----	3-3
3-3. Marriages by month marriage performed: Puerto Rico and Virgin Islands, 1964-----	3-4
3-4. Marriages by day of week marriage performed: Puerto Rico and Virgin Islands, 1964-----	3-4
3-5. Marriages by resident status of bride and of groom in area where married: Puerto Rico and Virgin Islands, 1964-----	3-4
3-6. Marriages by nativity status and resident status of bride and of groom in area where married: Puerto Rico and Virgin Islands, 1964-----	3-5
3-7. Marriages by marriage order and age of bride and of groom: Puerto Rico and Virgin Islands, 1964-----	3-6
3-8. First marriages of both bride and groom, by age of bride, by age of groom: Puerto Rico and Virgin Islands, 1964-----	3-6
3-9. Marriages by previous marital status of bride and of groom: Puerto Rico and Virgin Islands, 1964-----	3-7
3-10. Marriages by number of this marriage of bride and of groom: Puerto Rico and Virgin Islands, 1964-----	3-7
3-11. Divorces and annulments by specified characteristics: Virgin Islands, 1964-----	3-8
3-12. Divorces and annulments by specified characteristics of husband and of wife: Virgin Islands, 1964-----	3-8
3-13. Divorces and annulments by resident status of defendant husband and wife: Virgin Islands, 1964-----	3-8
3-14. Divorces and annulments by duration of marriage and number of children under 18 years of age: Virgin Islands, 1964-----	3-9
3-15. Divorces and annulments by party to whom decree granted whether plaintiff or other: Virgin Islands, 1964-----	3-9
3-16. Divorces and annulments by duration of marriage and plaintiff: Virgin Islands, 1964-----	3-9

## NOTES

### Reporting areas

Marriage data are shown for both Puerto Rico and the Virgin Islands. Divorce totals are shown for both Puerto Rico and the Virgin Islands and detailed divorce statistics for the Virgin Islands only.

### Geographic classification

Data are shown by place of occurrence. Totals are shown for the local areas St. Croix Island and St. John and St. Thomas Islands (the latter two combined) in the Virgin Islands and for the primary geographic subdivisions, "municipios," in Puerto Rico. Courts empowered to grant divorces are located only in a few municipios in Puerto Rico; residents of other municipios obtain divorces in these courts.

### Race and color

For 1964, brides and grooms are not shown by color for either Puerto Rico or the Virgin Islands. Husbands and wives divorced in 1964 are classified as white or nonwhite for the Virgin Islands.

Section 4—the Technical Appendix—includes information about the sample specifications, sampling errors, and completeness of reporting for these statistics from Puerto Rico and the Virgin Islands.

SECTION 3 - PUERTO RICO AND VIRGIN ISLANDS

Table 3-1. Marriages, Divorces, and Rates: Puerto Rico and Virgin Islands, 1940-64

(By place of occurrence. Data are supplied by reporting areas except as noted. Rates per 1,000 total population in each area except as noted)

YEAR	MARRIAGES				DIVORCES			
	Puerto Rico		Virgin Islands <sup>1</sup>		Puerto Rico		Virgin Islands <sup>2</sup>

1941	15,007	7.8	248	9.6	2,464	1.3	---	---
1940	19,457	10.4	122	4.9	2,600	1.4	---	---

<sup>1</sup>For 1940-49, data represent marriage licenses; for 1940-50, data are for fiscal years ended June 30.

<sup>2</sup>Includes reported annulments.

<sup>3</sup>Data are estimated.

<sup>4</sup>Data are incomplete.

<sup>5</sup>Divorce rates are based on civilian population.

Table 3-2. Marriages and Divorces and Annulments: Puerto Rico, Virgin Islands, and County Equivalents, 1964

(By place of occurrence. Data are supplied by reporting areas except as noted. For Puerto Rico, county equivalents are municipios; for Virgin Islands, the three principal islands are the primary administrative units)

## SECTION 4. TECHNICAL APPENDIX

### MARRIAGE- AND DIVORCE-REGISTRATION AREAS

In order to promote regular, timely, and complete reporting, marriage- and divorce-registration areas similar to those developed for the collection of natality and mortality statistics were established in 1957 and 1958, respectively. The areas consist of those States and independent registration areas that meet the following criteria:

1. Central files of marriage or divorce records.
2. A statistical report form that includes items conforming closely to those on the Standard Record of Marriage (figure 4-1) or Standard Record of Divorce or Annulment (figure 4-2) issued by the Public Health Service.
3. Regular and timely reporting by all local areas.
4. Agreement on tests of marriage or divorce registration completeness and accuracy, carried out in cooperation with the National Center for Health Statistics (NCHS).

Table 4-2 shows when States and independent areas established central files and when they began participating in the registration areas. Figures 4-3 and 4-4 indicate the areas participating in the marriage-registration area (MRA) and the divorce-registration area (DRA) in 1964 as well as those areas which maintain central files but are not in the registration areas. In 1964, 37 States were in the MRA, Illinois and North Carolina having been added during the year, and 22 in the DRA, the same States as in 1963; in addition, the District of Columbia, New Orleans, and Puerto Rico were included in the MRA and the Virgin Islands in both the MRA and DRA. In 1964, marriages in the MRA represented 70.9 percent of the national total, an increase over the 62.5 percent in 1963; comparable percentages for the DRA are 35.8 for 1964 and 35.7 for 1963.

### SOURCES OF DATA

In 1964, as in earlier years, two methods were used to collect statistics on marriages and divorces or annulments. Total numbers of marriages and divorces for States and counties are complete counts provided by State and local officials in all parts of the United States. However, data on the characteristics of these events and the persons involved in them are based on samples of marriage and divorce records from the marriage- and divorce-registration areas. Marriage totals by month of occurrence were secured by both methods. Sources of marriage and divorce data

since 1867 are shown in table 4-1; a description of these sources can be found in Section 7, Volume III, of *Vital Statistics of the United States, 1960*.

### State and county totals

Most of the statistics shown in this volume are based on the sample records selected for each MRA and DRA State. However, a few tables present figures based on complete counts, which differ slightly from the estimated totals based on sample data. The numbers of marriages in table 1-41 and of divorces and annulments in table 2-25 for States by county are based on complete counts. The data for Puerto Rico and the Virgin Islands shown in 3-2 are likewise based on complete counts. The numbers of marriages by month shown for each State in table 1-6 are also complete counts.

Marriages by county are based on data available in central files for 43 States and the District of Columbia. In the areas lacking central files, the data are based on surveys conducted by registration officials—by State officials in Arizona, Nevada, New Mexico, Oklahoma, Texas, and Washington and by the city clerk in New York City. Colorado county officials reported totals directly to NCHS on a monthly basis.

The number of marriages performed was reported for 46 States. The number of marriage licenses issued was reported for Colorado, Kentucky, Nevada, Washington, and the District of Columbia, as well as for 10 counties in Texas. The number of marriage licenses is usually larger by 1 or 2 percent than the number of marriages performed. (See page 2-1, Section 2, Volume I, *Vital Statistics of the United States, 1959*.)

Marriage totals for 1964 were obtained for 3,129 counties or equivalent areas of the United States. The total number of marriages for the United States in 1964 is the sum of these figures. No figures were obtained for three small counties.

In 1964, total counts of divorces and annulments were received from State officials of the 50 States and the District of Columbia except that data for some counties of Kentucky and New Mexico and for some parishes of Louisiana were obtained directly by NCHS from local officials. Most of the States maintain central files of divorce records; the county figures are based on these. State officials conducted special surveys to obtain county totals in States without central files in 1964: Arizona, Colorado, Indiana, Minnesota, Nevada, New Mexico, Oklahoma, Texas, Washington, and West Virginia. The divorce and annulment totals thus obtained cover 3,090 counties or equivalent areas of the United States. No totals were obtained for 23 small counties.

The total number of divorces and annulments granted in the United States in 1964 is based on the State totals. The national figure includes an estimate for the parishes of Louisiana which did not report either to the State or NCHS. The Louisiana estimate assumes that the divorce rate in the nonreporting areas of the State was the same as that for the reporting areas.

#### Characteristics of marriages and divorces

As in prior years, the 1964 tabulations are based on items as reported on the records of all States in the registration areas.

Of the 37 States participating in the MRA in 1964, 29 specified the county where the marriage was performed. In the remaining States, including 5 New England States,

place of marriage was reported for cities and towns, which are minor civil divisions directly below the county level.

Information on race or color was not available for marriages in Ohio, California, or Illinois and was not tabulated for New Jersey because of incomplete reporting.

To determine whether a marriage ceremony was civil or religious, the title of the officiant was used to distinguish clergymen and civil officials. There were two States for which this information could not be tabulated: No information about the officiant was requested on the Ohio form; the title of the person performing the ceremony was frequently but not regularly reported on Kentucky records although only his name was requested.

Among characteristics of the bride and groom, either age at marriage or date of birth or both appeared on the record forms of all registration States. Place of resi-

dence was found on all forms, but State was not specified on several of them, Birthplace was requested on all forms except those for Illinois and the District of Columbia.

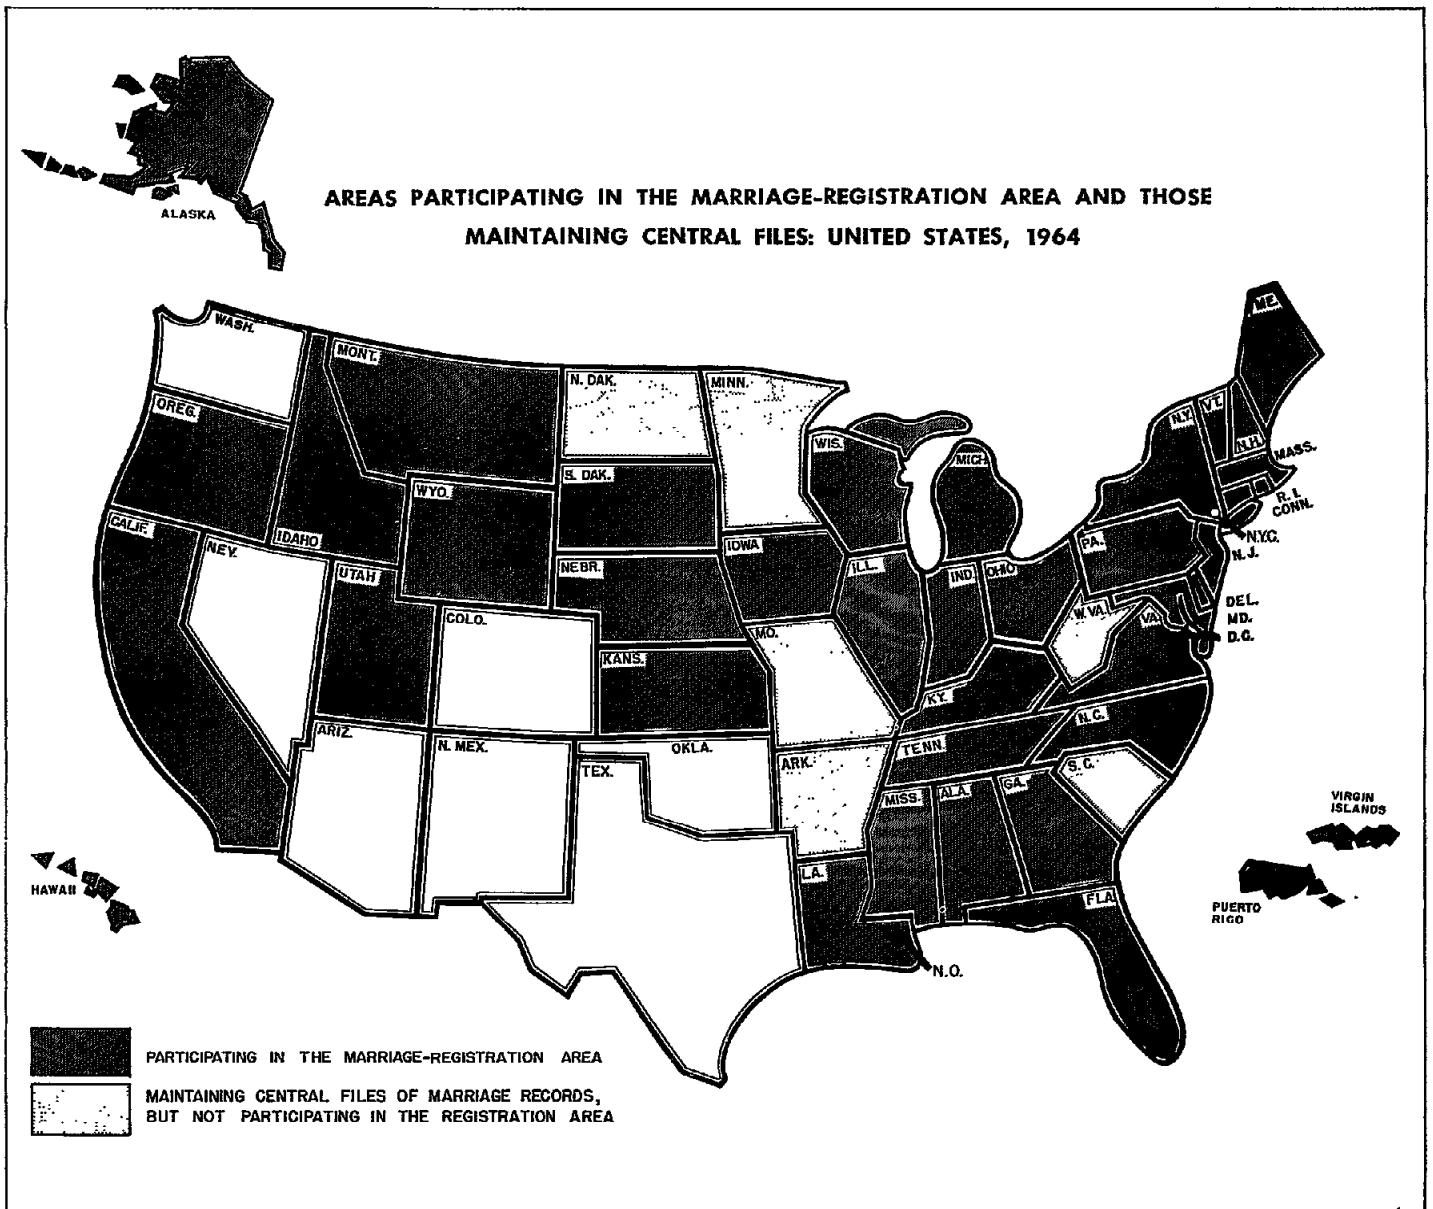

Some data about the marital history of the bride and groom were also available from all MRA States. However, the record forms of Ohio and Michigan included only information about the number of previous marriages of each person; hence they provided no data about the marital status of previously married brides and grooms. These data were also lacking on outdated reporting forms used in a few local offices in Louisiana. In addition, items appearing on four State forms (Idaho, Kansas, Maryland, and Oregon) did not provide data on the number of marriages of previously married persons although these records included items on previous marital status.

Items tabulated for divorces were found on the forms of all DRA States with only five exceptions: The Kansas

record did not include an item on residence of husband and wife; Nebraska and Virginia did not include number of times parties to the divorce had been married; the Nebraska form did not specify the party to whom the decree was granted; and no indication of color was given on the Ohio divorce record. The characteristics common to all records in the DRA were date and place where the decree was granted, age or date of birth, date and place of marriage, the number of children involved, legal grounds for the decree, and which party was the plaintiff.

Several additional items were found on the marriage and divorce forms of some States. These included occupation, mailing address, religion, and last grade of school completed. Some marriage forms included one or two items about the parents of the bride and the groom. Several divorce reporting forms included birthplace, date of separation of the couple, and data about such legal

FIGURE 4-3

matters as the contesting of the initial action, custody of children, and arrangements for financial support. None of these items were tabulated for 1964.

### **CONTENT AND ARRANGEMENT OF THE TABLES**

By definition the characteristics of marriages and divorces occurring in the MRA and DRA presented in this volume are limited to those available on the marriage and divorce records or, more specifically, to those items included on the standard certificates. Some States tabulate their own data, and some prepare annual reports which present data on additional items included on that State's certificate.

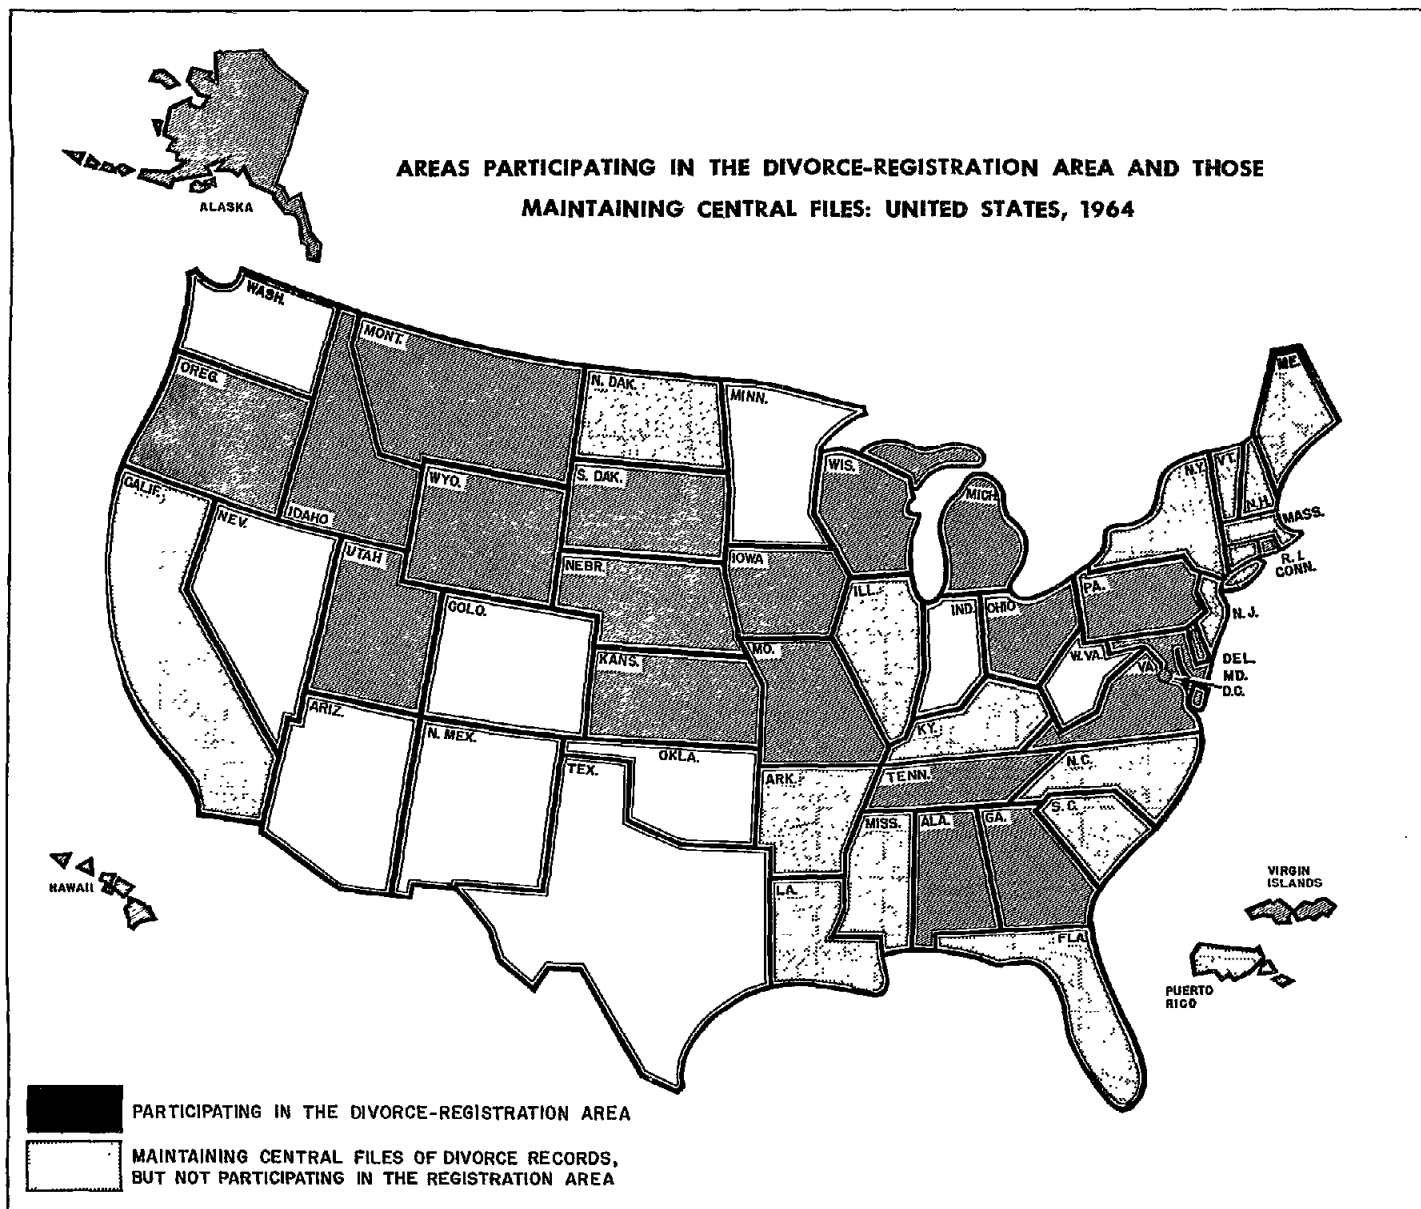

The following characteristics of marriages and of the brides and grooms were tabulated for MRA States: age, color, previous marital status, number of this marriage, county and State of residence, month of marriage, and type of ceremony performed.

The basic items tabulated regarding parties to a divorce were age, race, number of this marriage, residence of the defendant, place and duration of the marriage, and number of children in the family being dissolved. Legal items classifying the party who was the plaintiff, the person to whom the decree was granted, and the grounds for the decree were also tabulated.

The statistical tables for 1964 follow approximately the same design as those for 1963. The organization of the volume remains virtually unchanged. All tables of marriage statistics except those for Puerto Rico and the Virgin Islands are included in Section 1. All tables of divorce statistics except those for Puerto Rico and the Virgin Islands are in Section 2. Tables of both kinds of statistics for Puerto Rico and the Virgin Islands are in Section 3. Section 4 is the Technical Appendix.

Marriage statistics (Section 1) are presented in three principal groups of tables. Tables 1-1 through 1-6 and the last table, 1-41, include the statistics compiled from counts of certificates reported by States and local areas.

FIGURE 4-4

These data are available for the entire Nation, in tables 1-7 through 1-16 summary measures such as rates, medians, and percentages derived from the frequencies shown in later tables are presented. The last and largest group of tables, 1-17 through 1-40, present data based on the MRA sample.

Because of the increased size of the divorce samples in 1963 and in 1964, more detailed data than for earlier years could be presented in most tables. The divorce tables for 1964 (Section 2) include tables on divorces by color of husbands cross-tabulated by color of wife (table 2-7), divorces by month the marriage was performed (table 2-20), and divorces by all legal grounds mentioned in the decree (table 2-22).

The divorce tables show duration of the marriage dissolved (tables 2-5, 2-6, 2-17, and 2-24), number of children involved (tables 2-8 through 2-10 and 2-18), as well as marriage duration cross-classified by number of children (tables 2-19). These are important variables—the first as an index of marital and family stability and

the second as an estimate of the number of persons affected by the dissolution of marriages by divorce.

### Tabulation of grounds for divorce

As was done for the first time in 1963, detailed tabulations were prepared for 1964 on legal grounds for decree. As about 12 percent of the decrees were granted on two or more legal grounds, two tables presenting data on grounds are published. Table 2-22 shows the distribution of all legal grounds mentioned; the sum of all frequencies for a State is larger than the number of divorces. In table 2-21 decrees with multiple grounds are classified with respect to the most specific ground as follows:

1. "Adultery" includes all cases where this ground was mentioned irrespective of other grounds.
2. "Bigamy or fraud" includes all cases where either or both of these two grounds were mentioned irrespective of other grounds.

3. "Conviction of crime" includes all cases where this ground was mentioned irrespective of other grounds.
4. "Drunkenness" includes all cases where this ground was mentioned irrespective of other grounds.
5. "Desertion or abandonment" includes cases where either or both of these grounds were mentioned except those included in categories 1 through 4.
6. "Neglect or nonsupport" includes cases where non-support, gross neglect, neglect of duty, and failure to provide are mentioned separately or in any combination except those included in categories 1 through 5.
7. "Cruelty" includes cases where this ground is mentioned except those included in categories 1 through 6.
8. "Indignities" includes cases where this ground was mentioned except those included in categories 1 through 7.
9. "Incompatibility" includes cases where this ground was mentioned except those included in categories 1 through 8.
10. "Other" includes cases with legal grounds not covered in categories 1 through 9.

As no decree was granted on any combination of the first four grounds (adultery, bigamy or fraud, conviction of crime, and drunkenness), categories 1, 2, 3, and 4 are mutually exclusive. It should be pointed out, however, that whenever categories 5 through 10 were mentioned in conjunction with any one of the categories 1 through 4, the grounds were coded to the appropriate 1 through 4 category.

## SAMPLE DESIGN

### Obtaining the records

Each year the States participating in the MRA and DRA prepare microfilm copies of their records which are purchased by NCHS; Puerto Rico also prepares copies of its marriage records, and the Virgin Islands copies both its marriage and divorce records. Further processing steps, i.e., sample selection, punch-coding, verification, and tabulation, are carried out by NCHS.

For marriages, the records refer to all marriages performed within 37 States, the District of Columbia, Puerto Rico, and the Virgin Islands, which composed the MRA during 1964, irrespective of the date of issue of the license or registration of the marriage. For divorces, the records refer to all decrees of absolute divorce and of annulment that were granted during 1964 within 22 States and the Virgin Islands, which composed the DRA.

Interlocutory divorce decrees for all those States which grant them except Utah are included among the records for the year in which they were granted. In most cases, interlocutory divorces become final automatically after the lapse of a certain period of time. Thus those granted late in 1963 did not become final until 1964, and those granted during the latter part of 1964 will not become final until sometime in 1965. It is possible that

some interlocutory decrees never become final because of death or reconciliation, but it is believed that the number of such cases is very small. In Utah, the divorce record is filed with the State in the year when the interlocutory decree becomes final.

### Sampling procedures

The marriage sample was designed to yield estimates of area totals as well as frequency distributions and estimates of their parameters. These estimates were made for the MRA and for each State in the registration area. A sampling rate was designated for each MRA State so that the selected sample for it would consist of at least 2,500 records. Five different sampling rates were used: all records, 1/2, 1/5, 1/10, and 1/20. The overall ratio for the MRA was 1/8 for 1964.

Sampling procedures for the divorce sample parallel those for the marriage sample except for the size of the sample from each registration State. A sampling rate was determined so that the sample for each DRA State would contain at least 1,000 records. Four different sampling rates were used: all records, 1/2, 1/5, and 1/10. Overall, about 1/4 of the records were selected for the DRA sample in 1964.

Although each State's records were sampled independently, each group of States with the same sampling rate was treated as a stratum for computing sampling errors. Estimated sampling errors for the MRA and the DRA States that were computed are likely to be somewhat larger than those that might have been computed using each State as a stratum.

The sampling rates, numbers of events, and sample cases by State for 1964 are shown in tables 4-5 (marriages) and 4-6 (divorces).

Sampling marriage and divorce records for States in the registration areas was initiated in 1960. For earlier years, data on characteristics had been compiled from predesigned tables submitted by the States. The 1964 sample is an extension of the sampling procedures used each year since 1960. However, there have been several major modifications since that year.

1. In 1963, the size of both the marriage and divorce samples was increased greatly over that of prior years: for marriages it was almost tripled and for divorces about doubled. The expansion was accomplished, using substantially the same sample design, by increasing the sample selection rates and the minimum sample size for each State. In 1964, the marriage sample was again increased by raising the minimum sample size for six States. The divorce sample was also enlarged by increasing the sampling rates for Ohio and Missouri. The higher sampling rates significantly reduced sampling errors.
2. For 1963 and 1964, copies of all marriage records except for a sample selected and reported for New York and of all divorce records from the registration areas were inspected, and the sample was selected in NCHS. In prior years the sample had been selected in

the State offices. This change in procedure resulted in more uniform control over sampling procedures and specifications and in more detailed information about the type of nonsampling errors described in a later section of this appendix.

3. In 1960 the sampling program was nationwide; it included States in the MRA and the DRA as well as the remainder of the Nation. Since 1960 only records of States in the MRA and DRA have been sampled. Thus some of the national and regional data available for 1960 are not available for later years.
4. Additional States have been admitted to the registration areas since 1960. Indiana, Massachusetts, and the District of Columbia were admitted to the MRA and Michigan and Missouri to the DRA in 1961. Ohio and Rhode Island were added to the DRA in 1962 and 1963, respectively. Illinois and North Carolina were admitted to the MRA in 1964.

## ESTIMATING PROCEDURES

### Area totals

Before the sample data were weighted and tabulated, adjustments were made in order to reconcile sample totals with independent counts for each reporting area. The procedures were as follows:

For marriages, as in previous years, no adjustment was made for a State in which the complete count and the sample estimate differed by 1 percent or less. A difference of more than 1 percent but of less than 4 percent was found for four States, the District of Columbia, and Puerto Rico. In one State and the District of Columbia, the sample counts were acceptable because the independent totals to which they were compared were actually counts of marriage licenses issued. In another State, the independent counts did not include some delayed registrations which were among the microfilmed records for the year. In the remaining areas, where the sample counts were low, the missing records were tabulated as "not stated."

For divorces, adjustments were made if the sample counts for a reporting State differed from independent counts by more than 1 percent. It was found that the samples for two States, Utah and Michigan, were under the expected number of records. For both States the missing records were tabulated as "not stated" for purposes of the detailed characteristics.

### Frequencies

Procedures for estimating frequency distributions for various characteristics were similar for the marriage and divorce samples. Frequencies were estimated in two steps.

1. Each sample case was assigned a weight which was the reciprocal of the probability (or sampling ratio) used to select the case. Thus if a marriage record

was selected from a State with a sampling ratio of 1/10, that record was assigned a weight of 10, whereas if 100 percent of the records were processed from a State, each such record was assigned a weight of 1.

2. Tabulated counts consisted of summing the weights of the records. Thus each frequency distribution such as age at marriage of first-married brides is a sum of the weighted sample cases included.

It should be noted that the weights for all sample records are identical within each State. However, as shown in tables 4-5 and 4-6, the weights for marriage records vary from 1 to 20 and those for divorce records from 1 to 10 among the registration States. Therefore any two approximately equal subtotals may have different sampling errors.

### Percents and rates

Percents shown in the analytical tables were computed from data excluding numbers of not stated cases. Rates appearing in these tables were based on population estimates developed by the U.S. Bureau of the Census (tables 4-11 through 4-14). The population estimates refer to July 1, 1964, and include Armed Forces stationed in the United States but exclude the Armed Forces abroad.

### Allocations

Because States in the DRA vary radically in the extent to which items are reported on the divorce records, no allocations were made prior to tabulation of the divorce data. Only selected characteristics on the marriage records were edited: values were allocated for ages of brides and grooms and date of marriage. These items have been reported with 99 percent or more completeness since 1960.

The allocation procedures used were the same as in previous years and were as follows:

1. In case the age of only one partner was reported, the age of the other was allocated as follows:

$$\text{Allocated age of groom} = 1.14 (\text{age of bride}) - 0.35$$

$$\text{Allocated age of bride} = 0.88 (\text{age of groom}) + 0.31$$

2. If the ages of both partners were blank and neither partner was widowed, ages allocated to each were those of the last preceding couple with neither partner widowed.
3. If the ages of both partners were blank and one or both partners were widowed, ages allocated to each were those of the last preceding couple with both partners widowed.
4. If month of marriage was blank, it was allocated sequentially from January through December.
5. If day of marriage was blank, it was allocated sequentially from 1 through 28.

### Children involved in divorces

Procedures for estimating the number of children reported in divorce suits presented a special problem. The number of children was estimated for each registration State, the DRA, and the United States. In order to obtain a State total, the category "children not stated" was first distributed to reflect the distribution of divorces by number of children reported. Then the estimated number of divorces with a given number of children was multiplied by the number of children (that is, the number of divorces involving one child was multiplied by 1, the number involving two children was multiplied by 2, and so forth). The sum of the products is the estimated number of children of divorced parents in a given registration State. The sum of State estimates for participating States is the estimate for the DRA.

The national estimate was obtained by inflating the estimated number of children obtained by the above procedure for 14 States common to the DRA in 1960 and 1964 by the ratio of the 14 States combined to the 1960 national estimate of children. The 14 States were Georgia, Idaho, Iowa, Kansas, Maryland, Montana, Nebraska, Oregon, Pennsylvania, South Dakota, Tennessee, Virginia, Wisconsin, and Wyoming. The inflation ratio used was 5.40039.

### SAMPLING ERRORS

Each estimate based on a sample except statistics for States where all records were used has a sampling error ( $\sigma$ ). Since all cases were selected with known probabilities, the sampling error of each estimate can be computed. The sampling errors shown in tables 4-7 and 4-8 are the amounts which when added to and subtracted from the estimated frequency or percent give the interval within which the actual quantity being estimated would lie in approximately two out of three samples of equal size. For example, if the sample estimate of the number of wives under 20 years of age at the time of divorce in 1964 is 15,000, and if the sampling error for this estimate is 320, the probability is about 2/3 that this sample estimate is plus or minus 320 of the true total and about 95/100 that this estimate is plus or minus two sampling errors (640) of the true total.

In order to facilitate comparisons of sampling errors between registration States with widely varying totals of marriages or divorces, the sampling errors are shown for frequencies expressed as percents of State or registration area totals. The sampling error for an estimated percent based on the total number of events can be computed by dividing the sampling error shown for the frequency by the total number of events reported for the area. As an example of the procedure, suppose the number of nonwhite marriages in California to be 12,910, or 10 percent of the total for the State. The sampling error shown in table 4-7 for this frequency is 470. By adding and subtracting 470 from 12,910, we obtain the interval 12,440 to 13,380; the chances are about 68 out of 100 that the actual

number of nonwhite marriages is in this interval. In order to obtain the sampling error for 10 percent itself, we divide 470 by the State total, 129,100, with a resulting sampling error of 0.4 percent. Thus the chances are about 68 out of 100 that the actual percent of nonwhite marriages in California falls between 9.6 and 10.4.

The standard error of a proportion which is based on a subgroup in a State may be represented by the following formula

$$S_p = \frac{\sqrt{P_y^2 S_x^2 - P_x^2 S_y^2}}{P_y^2 N}$$

where:  $P_y$  is the proportion the denominator is of the total marriages of the State;  $P_x$  is the proportion the numerator is of the State total;  $S_y$  is the standard error of the denominator;  $S_x$  is the standard error of the numerator; and  $N$  is the total number of marriages for the State. Use of this equation can best be described by an example. Suppose for the State of Alabama that 40 percent of the nonwhite brides were aged 15-19 years and we want to approximate the standard error of this proportion. Suppose also that the estimated number of nonwhite marriages for the entire State was 9,000 and that 3,600 of all brides were aged 15-19 years. Nine thousand marriages is close to 25 percent ( $P_y$ ), and 3,600 is close to 10 percent ( $P_x$ ) of the 37,250 ( $N$ ) marriages in Alabama during 1964. From table 4-7 we find that for Alabama the standard error of 9,000 is 251 ( $S_y$ ) and of 3,600 is 174 ( $S_x$ ). Substituting these values into the formula we obtain

$$S_{(.40)} = \frac{\sqrt{(.25)^2 (174)^2 - (.10)^2 (251)^2}}{(.25)^2 (37,250)} = .015$$

Therefore the chances are about 68 in 100 that the true proportion is between .385 and .415, or 38.5 and 41.5 percent.

To determine if two proportions are significantly different, we divide the difference by the square root of the sum of the squares of their standard errors. If the quotient of this division is greater than 2, the probability that the difference between the two figures is due to chance is less than 1 in 20. To illustrate, suppose we wish to compare the proportion of nonwhite marriages in the 15-19 age group for Alabama and Louisiana. Assume that the proportions were 0.40 with standard error .015 for Alabama and 0.44 with standard error .019 for Louisiana. Division of the difference by the square root of the sum of the squares of the standard errors gives us

$$\frac{(.44 - .40)}{\sqrt{(.015)^2 + (.019)^2}} = 1.6$$

This value is less than 2, and so the difference between the two proportions cannot be assumed to be significant.

## NONSAMPLING ERRORS

In addition to the sampling errors described above, there are several other sources of variation, most of which are little affected by the size or design of the sample. For example, items may be missing from reporting forms and hence be not reportable; items that do appear on a form may be vague and ambiguous; responses may be incorrect, unreadable, or missing, data may be submitted on outdated record forms; records may be erroneously included or excluded in the microfilm files sent to NCHS; or the editing or coding instructions may be inadequate to cover all cases.

For most of the data available from 1960 onward, the completeness and year-to-year consistency are evidence of the basic reliability and coverage of the marriage- and divorce-registration systems. Furthermore, several of the States currently working to improve their registration practices in order to enter the registration areas are achieving higher levels of completeness and adequacy of reporting than those currently in the MRA or DRA. This is particularly true in the case of divorces.

Sending the complete files of marriage and divorce records to NCHS for processing, initiated in 1963, permits special investigation into various types of nonsampling errors for specified areas. Such studies were undertaken in 1963 by examination of the microfilm files. A report of this research is included in Section 4, Volume III, *Vital Statistics of the United States, 1963*.

### Incomplete reporting

Nonresponse errors in marriage and divorce data arise from two sources: An item may not be included on the reporting form (not reportable); or although the item may be on the form, there may be no response or the response may be illegible (not completed). Regarding the second source of nonresponse, some reporting forms include items which are badly worded and do not elicit responses which are sufficiently precise to be classified. Furthermore, sometimes when a State revises its form to include additional items, copies of the old form are still extensively used by registration offices until a supply of the new version is received. The items not included on the old forms are tabulated as "not completed."

Data presented in tables 4-9 and 4-10 show the proportions of not stated cases for specified characteristics of marriages and divorces for 1964. The proportions "not reportable" and "not completed" are shown separately for the MRA and for the DRA. Footnotes to entries under the characteristics identify the specific reporting areas for which an item was not reportable. Not completed cases were estimated by subtracting the not reportable responses from all nonresponses. Not completed cases were typically blank, but illegible responses and cases of records not received were also included in this category as well as some responses which were inappropriate. For example, numbers were written on some sample records instead of the specific previous marital status of the bride

and groom. Checks of problems as they arose yielded evidence of only scattered instances of such responses. A major proportion of the not stated cases for marriages were because of the absence of items on some of the reporting forms. The majority of not stated items on records of divorce and annulment came from lack of response to some of the items requested on the reporting forms.

For the MRA, color of bride and groom constituted the largest not completed characteristic (5.4 percent for brides and for grooms). There were also a high proportion of cases in which the color data were not reportable (16.7 percent). Proportions of not reportable cases for State of birth increased substantially in 1964 because Illinois, a State which still does not report this item, was included in the MRA. Proportions of not reportable cases were also large for type of marriage ceremony (8.4 percent). Most of the remaining not reportable cases arose from variations in items about the marital status of previously married brides and grooms.

For the DRA, reporting of personal characteristics (such as age, race, and marriage order) was slightly more complete in 1964 than in 1963, while reporting of other items was a little less complete. Even so, items of personal information have typically been less complete than legal items and information about the marriage. One possible explanation of the incompleteness of personal items is that in several States the local court official responsible for filing the form is not empowered to require completion of the reporting form but can only secure information from transcripts of court proceedings on the case.

Race or color was missing from the divorce record in only one DRA State, but this accounted for 15.6 percent of all divorces. The number of times husband and wife were married was not requested on two forms, and data for classifying residence of the defendant and to whom the decree was granted were each missing from one form.

### Other sources of error

*Inconsistent responses.*—Consistency between items on the marriage and divorce certificates is limited, by necessity, to a very small number of items. When age and date of birth are both reported, they are not always consistent. Previous marital status is sometimes not consistent with number of times married or number of this marriage.

*Ambiguous wording of items.*—Some of the items are worded so that they do not yield information which can be classified in standardized categories. Some briefly worded items actually require additional questions on the part of the local recorder in order to obtain the detailed information sought. Items which were most frequently sources of this type of error were those requesting geographic place names (residence, place of marriage, and place of birth) and those requesting data about previous marriages.

*Microfilm errors.*—Errors in the arrangement of the records received on microfilm in NCHS sometimes occur when numbers on the records are out of sequence, missing, or duplicated or when records which are not part of the

universe being sampled are erroneously included in the file. No standardized order of records has yet been developed for microfilming the marriage and divorce records, as is the case for birth and death records. In one area, permanent State files of marriage records were arranged by date of application for the license rather than by a number assigned to licenses used in each county. Thus marriages actually occurring in any year may have been included in files for earlier years. A recent check indicates that 4 to 5 percent of the 1964 marriages were so duplicated. Special arrangements to locate and microfilm these records are made each year by NCHS. In a few other cases, relatively small numbers of records of marriages occurring in earlier or later years were interspersed with records for the data year.

*Processing errors.* Errors in coding and tabulating may arise from inadequate instructions or specifications. Coding instructions may not provide rules for some decisions coders are expected to make, and individual judgments may be substituted. All coding was verified 100

percent; taped data were edited for impossible codes and for inconsistencies where possible. Instances of impossible codes and inconsistencies in information about previous marriages were rechecked to the records. This editing and rechecking indicated only negligible numbers of coding errors.

Table 4-1. Sources of Marriage and Divorce Data: United States, 1867-1964

TIME PERIOD	Marriage	Divorce <sup>1</sup>
1867-86	Estimates prepared by National Office of Vital Statistics based on results of field survey covering 20-year period conducted in 1887-88 by the U.S. Department of Labor.	Numbers and detailed statistics (legal grounds, duration of marriage, number of children reported, etc.) obtained in field survey covering 20-year period conducted in 1887-88 by the U.S. Department of Labor.
1867-1906	Estimates based on data from field survey covering 20-year period conducted in 1905-07 by the U.S. Bureau of the Census.	Numbers and detailed statistics (legal grounds, duration of marriage, number of children reported, etc.) obtained in field survey covering 20-year period conducted in 1906-07 by the U.S. Bureau of the Census.
1907-15	Estimates prepared by Bureau of the Census based on records from selected States.	Same as for marriage.
1916	Numbers collected through mail survey conducted in 1917-18 by Bureau of the Census.	Numbers and detailed statistics collected through mail survey conducted in 1917-18 by Bureau of the Census.
1917-21	Estimates prepared by Bureau of the Census based on records from selected States.	Same as for marriage.
1922-32	Annual collection by Bureau of the Census through mail query to States with central files and to counties in the remaining States.	Numbers and detailed statistics collected annually by Bureau of the Census through mail query to States with central files and to counties in the remaining States.
1933-36	Estimates by S. A. Stouffer and L. M. Spencer on basis of data available from selected States ( <i>American Journal of Sociology</i> , January 1939).	Same as for marriage.
1937-40	Estimates based on transcript returns and mail surveys of State and county offices conducted by Bureau of the Census. Some detailed statistics for 1940 based on transcript program.	Same as for marriage.
1941-43	Estimates based on data from published State reports and from files of Bureau of the Census and Federal Home Loan Bank Board.	Same as for marriage.
1944-47	Estimates based on figures for marriages and marriage licenses obtained by National Office of Vital Statistics from State and local registration offices.	Estimates based on figures for divorces and annulments obtained by National Office of Vital Statistics from State and local registration offices.
1948-56	Estimates based on figures for marriages and marriage licenses obtained by National Office of Vital Statistics from State and local registration offices; detailed statistics based on pretabulated data provided by State offices of vital statistics.	Estimates based on figures for divorces and annulments obtained by National Office of Vital Statistics from State and local registration offices; detailed statistics based on pretabulated data provided by State offices of vital statistics.
1957	Estimates based on figures for marriages and marriage licenses obtained by National Office of Vital Statistics from State and local registration offices; detailed statistics based on pretabulated data provided by States participating in the marriage-registration area (MRA).	Same as for 1948-56.
1958-59	Same as for 1957.	Estimates based on figures for divorces and annulments obtained by National Office of Vital Statistics from State and local registration offices; detailed statistics based on pretabulated data provided by States participating in the divorce-registration area (DRA).
1960	Statistics prepared in the National Center for Health Statistics from nationwide probability samples of marriage records designed to provide estimates for the United States, the four regions, the marriage-registration area, and each registration State. Totals of either marriages or marriage licenses by county and by month also tabulated in each State. These and totals estimated from samples were checked for consistency.	Statistics prepared in the National Center for Health Statistics from nationwide probability samples of divorce records. Records in the sample provided statistics on absolute divorces and annulment for the United States, the four regions, the divorce-registration area, and each registration State. Totals for each State by county also tabulated in each State. These and totals estimated from samples were checked for consistency.
1961-64	Statistics prepared in the National Center for Health Statistics for the MRA and each MRA State from probability samples of the marriage records collected by each MRA State. Pretabulated totals of marriages or marriage licenses by county and by month, reported for all States, used to compute totals for the United States, four regions, and nine geographic divisions; also, for MRA States, checked for consistency with totals estimated from sample records.	Statistics prepared in the National Center for Health Statistics for the DRA and each DRA State from probability samples of the records of absolute divorces and annulments collected by each DRA State. Pretabulated totals by county, reported for all States, used to compute totals for the United States, four regions, and nine geographic divisions; also, for DRA States, checked for consistency with totals estimated from sample records.

<sup>1</sup>Includes reported annulments.

<sup>1</sup>Not on Standard Record of Marriage. (Information used in NCHS to distinguish religious from civil ceremonies if type of ceremony not stated.)<sup>2</sup>Reportable as number of previous marriages.<sup>3</sup>Item does not specifically request State, but State was reported on most records, and State was allocated only for major cities of residence or of birth.<sup>4</sup>For this State, cities and towns are minor civil divisions directly below the county level. (Towns are equivalents of townships.)<sup>5</sup>Not reportable; requests name but not title of officiant.<sup>6</sup>Reportable as "Number of marriage."

Ohio	1/10	2,506	25,060
Pennsylvania	1/10	1,615	16,150
Virgin Islands	All records	200	200

<sup>1</sup>Number of sample records weighted by reciprocal of sampling rate.

<sup>2</sup>Excluding Virgin Islands.

Table 4-7. Marriage Sample-Sampling Error of Estimated Frequency Expressed as Percentage of Area Total:  
 Marriage-Registration Area, Each Registration State, Puerto Rico, and Virgin Islands, 1964

(Estimates for the entire MRA have distributions of sampling errors generated by changes in contributions of cases from each stratum. For sampling errors in this table for the entire MRA, it is assumed that these contributions are proportionate to stratum totals. Figures for Alaska, Delaware, Vermont, Virgin Islands, and Wyoming have no sampling errors since all records were tabulated)

<sup>1</sup>Not stated" data composed of not reportable (item was not on record of entire reporting area) and not completed (item was on the record but not filled in or the number of records from a reporting area was incomplete).  
<sup>2</sup>Puerto Rico and Virgin Islands excluded.  
<sup>3</sup>Not reportable.  
<sup>4</sup>Not reportable for remarriages in four registration States. For these States, total marriages include the following percentages of remarriages: Idaho, 33.4 percent of brides, 29.4 percent of grooms; Kansas, 23.2 percent of brides, 23.6 percent of grooms; Maryland, 22.0 percent of brides, 22.7 percent of grooms; Oregon, 22.2 percent of brides, 22.8 percent of grooms.  
<sup>5</sup>Not reportable for Cook and DuPage Counties.  
<sup>6</sup>Not reportable for remarriages in Michigan and Ohio. For Michigan, figures include remarriages of 22.7 brides and 22.6 grooms; for Ohio, figures include remarriages of 23.5 brides and 23.3 grooms.  
<sup>7</sup>Not tabulated because data were not comparable.  
<sup>8</sup>Not tabulated.
