VOLUME II-MORTALITY

PART B

Section 7. Geographic Detail for Mortality

Total number of deaths, deaths from selected causes, infant deaths, neonatal deaths, fetal deaths, and selected rates and ratios. Tabulations shown by each State, county, specified urban places, metropolitan and nonmetropolitan counties, population-size groups, and standard metropolitan statistical areas.

Section 8. Puerto Rico and Virgin Islands (U.S.)

Trend of the crude death rate. Frequency tabulations for most characteristics shown in other sections of Volume II.

A brief summary of the contents for each section is listed above for the convenience of the reader. A complete table of contents is shown at the beginning of each section and is identified by a narrow black edge which can be located easily by fanning the pages. Each section is paged independently, using the section number as the identifying prefix.

Table 7-1. Total, Infant, and Neonatal Deaths, and Fetal Deaths, by Color: United States, Each State and County, and Specified Urban Places, 1964

(Refers only to events occurring within the United States. Deaths exclude fetal deaths. Fetal deaths include only those for which the period of gestation was given as 20 weeks or more or was not stated. Specified urban places are those with populations of 10,000 or more in 1960 and are incorporated unless otherwise noted. Figures for white and nonwhite are shown separately for those counties and urban places in which the 1960 populations for nonwhite formed 10 percent or more of the total or numbered 10,000 or more)

Table 7-2. Total Deaths, Infant and Neonatal Deaths and Rates, Fetal Deaths and Ratios, by Color for Population-Size Groups in Metropolitan and Nonmetropolitan Counties: United States and Each State, 1964

(By place of residence. Refers only to events occurring within the United States. Deaths exclude fetal deaths. Fetal deaths include only those for which the period of gestation was given as 20 weeks or more or was not stated. Infant (under 1 year) and neonatal (under 28 days) mortality rates and fetal death ratios per 1,000 live births in specified group. Urban places in metropolitan counties are those with populations of 10,000 or more; urban places in nonmetropolitan counties are those with populations of 10,000 or more but less than 50,000. For definition of areas, see Technical Appendix)

NOTES

Occurrence and residence allocation

In contrast with the method of allocating deaths to place of residence for each of the 50 States and the District of Columbia, residence data for the Commonwealth of Puerto Rico include only those deaths occurring in Puerto Rico. Deaths to nonresidents of the Commonwealth are included in the total, but deaths to residents of Puerto Rico occurring elsewhere are excluded. The same qualification applies to resident deaths in the Virgin Islands.

Data are shown by both place of occurrence and place of residence in Puerto Rico for the primary geographic subdivision, the "municipio," and in the Virgin Islands for St. Croix Island and St. John and St. Thomas Islands (the latter two combined). Deaths by place of residence are shown for municipios only and not for urban places for Puerto Rico; however, for the Virgin Islands they are shown for Charlotte Amalie, the only urban area having a population of 10,000 or more.

Race and color

For 1964, deaths are not shown by color for Puerto Rico; they are classified as white and nonwhite for the Virgin Islands.
