Weight - Interim Annual
**Question ID:** IDN.000_70.000  
**Instrument Variable Name:** 
**Final Documentation Name:** WTFA_SC

**Universe:**  
**Description:**

**Sources:** None  
**Recodes:** None  
**Keywords:** None  
**Notes:** This weight should be used for most sample child analyses when using a full year of data. This weight includes post-stratification adjustments (age, race/ethnicity, sex) using Census Bureau population control totals. The sum of these weights is equal to the average of the civilian, noninstitutionalized U.S. population estimates for persons aged 17 and under for February 2005, May 2005, August 2005, and November 2005.

Please give me the number of the group that represents [your/ person's] Hispanic origin or ancestry.

Universe: AGE = All

Description: All persons

Sources: ORIGIN_I; HHC.180

Recodes: None

Keywords: ethnicity; national origin; ancestry

Notes: "Other-specify" responses were assigned to specific groups where possible. Respondents who selected the generic "Hispanic/Spanish" response category were assigned "09", and in cases where the respondent refused to answer Hispanic origin or didn't know it, this variable was assigned "10" and "11", respectively. When Hispanic origin was not ascertained, this variable was also assigned "11". In cases where "Other-specify" responses were determined to be non-Hispanic, this variable was assigned "12" for not Hispanic/Spanish origin, and ORIGIN_I was back coded to "2" or "No" (no group represented respondent's national origin). Respondents coded at "12" answered 2,7,8, or 9 in ORIGIN_I. Data came from HHC.170 & HHC.180.

Hispanic subgroup detail

00 Multiple Hispanic
01 Puerto Rico
02 Mexican
03 Mexican-American
04 Cuban/Cuban American
05 Dominican (Republic)
06 Central or South American
07 Other Latin American, type not specified
08 Other Spanish
09 Hispanic/Latino/Spanish, non-specific type
10 Hispanic/Latino/Spanish, type refused
11 Hispanic/Latino/Spanish, type not ascertained
12 Not Hispanic/Spanish origin
Recode of full detail race groups

Universe: AGE = All
Description: All persons
Sources: RACFULI2
Recodes: HRACERI2
Keywords: race; new OMB race standards
Notes: This recode contains detail for the 5 OMB race groups, and a multiple race group. This recode does not include information provided in HHC.220 for multiple race mentions (the "primary" race). "Other Race" and "Unspecified Multiple race" are no longer available as separate race responses. These response categories are treated as missing, and the race is imputed if these are the only race responses. * Data not releasable due to respondent confidentiality or for other reasons.

Recode

Universe: AGE = All
Description: All persons

Sources: HHC.200; HHC.220
Recodes: None
Keywords: race; old OMB race standards
Notes: This variable identifies the primary or main race reported by the respondent. Data came from HHC.200 and HHC.220. "Other Race" and "Unspecified Multiple race" are no longer available as separate race responses. These response categories are treated as missing, and the race is imputed if these are the only race responses. If only one valid race was given, that answer was copied from RACE1 to here. If more than one race was given, the response was copied from MLTRAC (HHC.220). *Other Asian - this category includes Korean, Vietnamese, Japanese, and other Asian subgroups. ** Data not releasable due to respondent confidentiality or for other reasons.

Race coded to single/multiple race group

01 White
02 Black/African American
03 Indian (American), Alaska Native
09 Asian Indian
10 Chinese
11 Filipino
15 Other Asian*
16 Primary race not releasable**
17 Multiple race, no primary race selected

**RECODE**  
**Instrument Variable Name:** BMI_SC  
**Final Documentation Name:** BMI_SC  

**Universe:** CSTATFLG = 1 and AGE = 12-17  
**Description:** Sample children aged 12-17 years  

**Sources:** CHEIGHTN; CWGHTP_K  
**Recodes:** None  
**Keywords:** BMI; body mass index; overweight; obesity; underweight  
**Notes:**  
(1) BMI was calculated using the inhouse versions of the height and weight variables, which contain a greater range of height and weight values than are available on the public-use file. The range of possible BMI values listed (0001-9994) does not reflect actual calculated BMI values at the extremes of the range, but rather allows for the theoretical possibility of such unlikely values.  
(2) BMI = [Weight (kg)/[Height (m) squared]] rounded to 2 decimal places. Conversion factors 1 kg = 2.20462 pounds; 1 meter (m) = 39.37008 inches.

**Body Mass Index (BMI)**

2010 NATIONAL HEALTH INTERVIEW SURVEY
Sample Child
samchild : Child Health Status & Limitations
PUBLIC USE
Document Version Date: 07-Jun-11

Question ID: CHS.061_02.000
Instrument Variable Name: CONDL11-CONDL110
Final Documentation Name: CCONDL02

Looking at this list, has a doctor or other health professional ever told you that {SC name} had any of these conditions? Which ones?

Universe: CSTATFLG = '1' and (AGE LE '017' and AGE NE ' ')
Description: Sample children LE 17 years

Sources: None
Recodes: None
Keywords: cerebral palsy; developmental delay
Notes: Beginning in 2004 there has been a 10-fold increase in the number of sample children who were reported to have cerebral palsy in CHS.060_02.000, CONDL2. In 2003 there were 34 cases reported; in each year from 2004-2006 there were 311-353 cases reported. This increase is most likely caused by interviewer error due to operational differences between the CASES instrument used prior to 2004 and the Blaise instrument used beginning in 2004. A clarification of the survey instrument will be implemented in the 3rd quarter of 2007. See survey questionnaire for original question format. Question format modified in 2008.

Ever told SC had cerebral palsy
1 Mentioned
2 Not mentioned
7 Refused
8 Not ascertained
9 Don't know

Question ID: CHS.061_03.000
Instrument Variable Name: CONDL11-CONDL110
Final Documentation Name: CCONDL03

Looking at this list, has a doctor or other health professional ever told you that {SC name} had any of these conditions? Which ones?

Universe: CSTATFLG = '1' and (AGE LE '017' and AGE NE ' ')
Description: Sample children LE 17 years

Sources: None
Recodes: None
Keywords: muscular dystrophy
Notes: See survey questionnaire for original question format. Question format modified in 2008.

Ever told SC had muscular dystrophy
1 Mentioned
2 Not mentioned
7 Refused
8 Not ascertained
9 Don't know
Looking at this list, has a doctor or other health professional ever told you that {SC name} had any of these conditions? Which ones?

Question ID: CHS.061_04.000
Instrument Variable Name: CONDL11 - CONDL110
Final Documentation Name: CCONDL04

Universe: CSTATFLG = '1' and (AGE LE '017' and AGE NE ' ')
Description: Sample children LE 17 years

Ever told SC had cystic fibrosis
1  Mentioned
2  Not mentioned
7  Refused
8  Not ascertained
9  Don't know

Question ID: CHS.061_05.000
Instrument Variable Name: CONDL11 - CONDL110
Final Documentation Name: CCONDL05

Universe: CSTATFLG = '1' and (AGE LE '017' and AGE NE ' ')
Description: Sample children LE 17 years

Ever told SC had sickle cell anemia
1  Mentioned
2  Not mentioned
7  Refused
8  Not ascertained
9  Don't know
Looking at this list, has a doctor or other health professional ever told you that {SC name} had any of these conditions? Which ones?

Ever told SC had autism

1  Mentioned
2  Not mentioned
7  Refused
8  Not ascertained
9  Don't know

Ever told SC had diabetes

1  Mentioned
2  Not mentioned
7  Refused

Now, we are going to ask you about [fill1: SC name]'s skin's reaction to the sun. After several months of not being in the sun very much, if [fill1: SC name] went out in the sun for an hour without sunscreen, a hat, or protective clothing, which one of these best describes what would happen to [fill1: SC name]'s skin? (*Read choices 1-5 only.)

*Read if necessary: Even if [fill1: SC name] did not go out in the sun, what would happen if [fill1: SC name] did? Use the most recent experience. If none, then think about the past.

*By "sunburn" we mean even a small part of [fill1: SC name]'s skin turns red or hurts for 12 hours or more.

Skin condition after 1 hr sun exposure without protection

Recodes:
Keywords: worried; depressed

Notes: This question is a part of the short version of the Strengths and Difficulties Questionnaire Extended (SDQ), and is copyrighted by Dr. Robert Goodman, Ph. D. of the Psychiatric Institute of London, England. State and local agencies may use these questions without charge or permission providing the wording is not modified, all questions are retained, and copyright is acknowledged. See questionnaire for original question format. For more information about the background and scoring of this scale, see the CMB Appendix.

In 2004 this variable was located in the CMH section; in 2005 it was moved to the CMB section and given a new question number. In 2006-2007 it remained in CMB. The question wording and answer codes in the final files have remained the same. In 2008-2009 most SDQ questions were removed from the NHIS because of lack of funding. In 2010 the SDQ questions fielded in 2007 were returned to NHIS because of NIMH funding.

Many worries/often seems worried, past 6 m

Universe: CSTATFLG = '1' and ('004' <= AGE <= '017')

Description: Sample children 4-17 years

Notes: This question is a part of the short version of the Strengths and Difficulties Questionnaire Extended (SDQ), and is copyrighted by Dr. Robert Goodman, Ph. D. of the Psychiatric Institute of London, England. State and local agencies may use these questions without charge or permission providing the wording is not modified, all questions are retained, and copyright is acknowledged. See questionnaire for original question format. For more information about the background and scoring of this scale, see the CMB Appendix.

In 2004 this variable was located in the CMH section; in 2005 it was moved to the CMB section and given a new question number. In 2006-2007 it remained in CMB. The question wording and answer codes in the final files have remained the same. In 2008-2009 most SDQ questions were removed from the NHIS because of lack of funding. In 2010 the SDQ questions fielded in 2007 were returned to NHIS because of NIMH funding.

Unhappy/depressed/tearful, past 6 m

There are currently two kinds of flu vaccines available, the seasonal flu vaccine, and the 2009 H1N1 flu vaccine. I will first ask you questions about the vaccine for H1N1 flu, which is sometimes called swine flu or pandemic flu, and then ask you questions about the seasonal flu.

Since October 2009, has {SC name} had a H1N1 flu vaccination? There are two types of H1N1 flu vaccinations. One is a shot and the other is a spray, mist, or drop in the nose.

 Universe:  CSTATFLG='1' and (AGE LE '017' and AGE NE ' ')
 Description:  Sample Child LE 17 years

| H1N1 flu vaccination, since October 2009 |
|---|---|
| 1 | Yes |
| 2 | No |
| 7 | Refused |
| 8 | Not ascertained |
| 9 | Don't know |
How many of these H1N1 vaccinations has [S.C. name] received?

Universe: CSTATFLG='1' and (AGE LE '017' and AGE NE ' ') and CH1N1_1='1'

Description: Sample Child LE 17 years who have had an H1N1 vaccine dose

Sources:

Recodes:

Number of H1N1 flu vaccinations, since October 2009

1 1 vaccination or dose
2 2 or more vaccination doses
7 Refused
8 Not ascertained
9 Don't know
During what month and year did {S.C. name} receive {fill: his/her/his first/her first} H1N1 flu vaccine?

Universe: CSTATFLG='1' and (AGE LE '017' and AGE NE ' ') and CH1N1_2 IN ('1','2')

Description: Sample Child LE 17 who have had one or more H1N1 vaccine doses

Sources:
Recodes:

Keywords: H1N1, flu, flu shot, flu vaccination, swine flu.

Notes: New supplemental question for 2010 only. This question about the H1N1 vaccine was fielded in Quarters 1 and 2 and in the first several weeks of Quarter 3. Therefore, this variable contains data only for Quarters 1 and 2, and the first several weeks of Quarter 3. The variable is blank for the remaining weeks of Quarter 3 and for all weeks of Quarter 4. See Appendix CFI for more information.

Two vaccines, or shots, to prevent the human papillomavirus (pap-uh-LOW-muh-vi-rus) or HPV infection are available in the United States. Both vaccines prevent cervical cancer and one also prevents genital warts. The two HPV vaccines are sometimes called CERVARIX® or GARDASIL®. Before this survey, have you ever heard of HPV vaccines or shots?

CHS Appendix

A Preliminary Evaluation and Recommendations for use of the Mental Health Indicator (MHI) in the NHIS for children ages 2 to 3

This is based on a report by Thomas M. Achenbach, Ph.D., which was submitted to the Division of Health Interview Statistics on May 10, 1999.

Introduction

The NHIS mental health indicators, MHIBOY2 and MHIGRL2 are located in the Child Health Status (CHS) section of the survey, and are based on items from the Child Behavior Checklist (CBCL) that were identified by Dr. Thomas Achenbach as providing the best discrimination between demographically similar children referred for mental health services versus nonreferred (Achenbach and Edelbrock, 1983). To take account of gender and age differences in the discriminative power of particular items, the items were selected separately for each gender and age group. From the original ten items identified in Dr. Achenbach’s 1995 analyses, the 1997 NHIS elected to include only 4 items (per gender). These include whether male sample children (aged 2-3 years) had been uncooperative, had trouble sleeping, had speech problems, or been unhappy or depressed in the past 2 months, and whether female sample children (aged 2-3 years) had temper tantrums, had speech problems, had been nervous or high-strung, or been unhappy or depressed in the past 2 months. Response categories included “Not true”, “Sometimes true”, or “Often true” (as well as “Refused” and “Don’t know”). These items are also located in the CHS section (see CHS.321_01-04.000 and CHS.361_01-04.000).

It is essential to note that such a small set of items cannot be used to evaluate individual children for clinical or other purposes. Even for use as a mental health indicator in large surveys such as the NHIS, very small sets of items can serve only as approximate indicators of needs for mental health services. Multiple items tapping each of several specific areas of functioning would be needed to identify specific disorders, such as Attention Deficit Hyperactivity Disorder (ADHD), Depression, Conduct Disorder, and Somatization Disorder. (Note: The items for children ages 4 to 17 were replaced in the 2001 NHIS with a different instrument, the Strengths and Difficulties Questionnaire (SDQ)).

It should also be noted that different cutpoints on the distributions of item scores may be needed for different purposes. For example, a very low cutpoint may be useful if the goal is to identify every possible case for which mental health services might be considered. However, very low cutpoints result in relatively high false positive rates, i.e., the inclusion of substantial numbers of healthy individuals among those identified as potentially needing services. Conversely, higher cutpoints may yield greater overall accuracy in classifying potential cases versus noncases, but at the cost of missing more cases potentially needing services.
Data Analyses

Dr. Achenbach specified and reviewed data analyses that were done at NCHS. These included tabulations of specific responses to each behavioral/emotional problem item; tabulations of relations between total problem scores and classification of children as deviant versus nondeviant on the basis of external criteria (e.g., parents ever being told by health professionals that their child had ADHD, mental retardation, other developmental delay, autism, down syndrome, or a learning disability; parents having talked to mental health professionals about their child in the preceding 12 months; or parents needing mental health services for their child but unable to afford it); and Relative Operating Characteristic (ROC) analyses of cutpoints on the total problem scores. Because each behavioral/emotional problem item was scored “0” (not true of the child), “1” (somewhat or sometimes true), or “2” (very true or often true), total scores across the 4 items for each gender/age group could range from “0” to “8”. Dr. Achenbach examined the results and recommended changes and additions to the analyses.

Based on the analyses to date, Dr. Achenbach makes the following recommendations for boys and girls ages 2-3. Total scores on the 8 problem items are useful for quantitative analyses in relation to other variables. However, categorical mental health indicators should not be derived from specific cutpoints on the total scores for the 4 behavioral/emotional problem items on the basis of 1997 NHIS data for ages 2-3 for the following reasons:

The total number of children, 44 boys and 27 girls, classified as deviant according to external criteria (e.g., parents being told their child had ADHD; talking to mental health professionals about their child) was too small to provide a sound basis for establishing cutpoints;

Many disorders relevant to defining criterion groups (e.g., ADHD) are not identified as early as age 2-3;

The rates of referral for mental health services and other possible indicators of deviance are much lower at ages 2-3 than at older ages.
CMB Appendix

The Short Strengths and Difficulties Questionnaire (SDQ)

In the NHIS questions CMB.020_01.000 to CMB.030_00.000 make up a brief version of the SDQ. The questions are derived from the parent version of the long Strengths and Difficulties Questionnaire Extended (SDQ), developed and copyrighted by Dr. Robert Goodman, Institute of Psychiatry, London, England. Questions from the SDQ are used in the NHIS with Dr. Goodman’s permission. The short SDQ, constructed to save time and space in the questionnaire, was added for children aged 4-17 years as a part of a collaborative agreement between NCHS and the National Institute of Mental Health (NIMH) of the National Institutes of Health (NIH). The long SDQ consists of 25 scale items. Detailed information on the SDQ can be found in Appendix 5 of the Dataset Documentation for the 2004 NHIS and on the SDQ web site at http://www.sdqinfo.org.

The items in the short SDQ correlate to the subscales in the long SDQ as follows:

CMB.020_01.000  Generally obedient, correlates 0.69 with the long SDQ conduct score.
CMB.020_02.000  Many worries…, correlates 0.71 with the long SDQ emotion score.
CMB.020_03.000  Often unhappy…, correlates 0.64 with the long SDQ emotion score.
CMB.020_04.000  Gets along better…, correlates 0.69 with the long SDQ peer problems score.
CMB.020_05.000  Sees tasks through, correlates 0.72 with the long SDQ hyperactivity-inattention score.

In order to score the short SDQ the response for each item in CMB.020 is assigned a value from 0 – 2 based on the scale below, then all values are summed to produce a total score. A total score from 1 to 5 correlates 0.84 with the long SDQ total difficulties score.

Scoring of the Short SDQ

<table>
<thead>
<tr>
<th>Response</th>
<th>Not true</th>
<th>Somewhat true</th>
<th>Definitely true</th>
</tr>
</thead>
<tbody>
<tr>
<td>Value for CMB.020_02, CMB.020_03 and CMB.020_04</td>

</tr>
</tbody>
</table>

CMB.030 is taken from a set of SDQ extended or impact questions which measure the impact of the child’s difficulty on various aspects of his/her life. CMB.030 correlates 0.62 with the SDQ impact score from the extended SDQ questions. (See Appendix V of the Dataset Documentation for the 2004 NHIS and/or the SDQ Web site at http://www.sdqinfo.org).
CFI Appendix

For the 2009-2010 flu season, a seasonal flu vaccine was developed and manufactured before the 2009 H1N1 flu (swine flu) was identified. Once the H1N1 flu was identified, an H1N1 flu vaccine was developed. When available, the H1N1 vaccine was offered in addition to the seasonal flu vaccine. Both the seasonal vaccine and the H1N1 vaccine were available for administration either as a shot or as a nasal spray. In order to collect information about the seasonal and H1N1 flu vaccines for children for the 2009-2010 flu season, the NHIS added supplemental questions about the H1N1 to the CFI section beginning in January 2010.

For the 2010-2011 flu season, the H1N1 vaccine and the seasonal flu vaccine were combined into one flu vaccine for administration either as a shot or as a nasal spray. In order to collect information about flu vaccination for children for the 2010-2011 flu season, the NHIS added new supplemental questions to the CFI section of the Sample Child Instrument beginning on August 11, 2010.

When these new flu vaccination questions were introduced in August, the old questions on separate seasonal flu and H1N1 vaccinations were no longer applicable and were dropped from the survey. New variable names were assigned to the new vaccination variables, and the final data file will contain both the old and the new variables for all four quarters. However, the old flu variables contain data only for Quarters 1 and 2, and July 1-August 10 of Quarter 3, when the old flu questions were fielded. The old variables will be blank for the remaining weeks of Quarter 3 and all weeks of Quarter 4, when the new questions were fielded. Similarly, the new flu variables contain data only for August 11-September 30 of Quarter 3 and all of Quarter 4, when the new flu questions were fielded. The new variables will be blank for Quarters 1 and 2, and July 1-August 10 of Quarter 3, when the old questions were fielded.
**Additional References on the SDQ and/or its use in the NHIS**
