Notes: Due to the October 2013 federal government furlough, the allowable period to complete sample cases worked in the late fall of 2013 was extended past one month. This impacted cases worked in the first few months of 2014, when interviewers may have been working on cases from the late 2013 and early 2014 samples. These cases from the early 2014 sample, therefore, have a higher proportion of cases finished "late" compared to the rest of the year. Use the INTV\_MON (interview month) variable to view the distribution of cases from January to December, 2014.
