2010 National Survey of Residential Care Facilities (NSRCF)
Facility File
Restricted Variables (REVISED 3/12/2012)

Restricted data are information that could compromise the confidentiality of survey respondents or institutions, or is sensitive by nature. If researchers interested in using the 2010 National Survey of Residential Care Facilities find that something asked on the questionnaires does not have a corresponding variable in the public-use file (PUF) data dictionary, that variable may be restricted. This document outlines variables considered restricted that are not available in the PUF or are presented in different form in the PUF. If after reviewing this document, you cannot find the information you are looking for or have questions about variables listed below, please email rdca@cdc.gov or call Long-Term Care Statistics Branch at (301)458-4747.
