* Estimate is considered unreliable, as specified in National Center for Health Statistics Data Presentation Standards for Proportions (available from: https://www.cdc.gov/nchs/data/series/sr_02/sr02_175.pdf), and is not shown.

¹Based on a survey question that asked respondents, "Is there a place that you usually go to when you are sick or need advice about your health?" and if there was at least one such place, a follow-up question was asked: "What kind of place [is it/do you go to most often] -- a clinic, a doctor's office, an emergency room, or some other place?" The response categories for this second question were: "clinic or health center," "doctor's office or HMO," "hospital emergency room," "hospital outpatient department," "some other place," and "doesn't go to one place most often." For this table, persons who report that they do not know the kind of place, do not go to one place most often, or refuse to answer the follow-up question are defined as having an unknown usual place of care and are not shown. Persons who report the emergency department as their usual place of care are defined as having a usual place of care. Readers should be aware that estimates in this table may differ from tabular results in both NCHS' Health United States and the National Health Interview Survey Early Release reports because in those reports persons who identify the emergency department as their usual place of care are defined as having no usual place of care. Note that in this table, data for hospital emergency room and hospital outpatient department are shown in separate categories; Adult Summary Health Statistics tables for 2013 and earlier combined these into a single category.

HMO is health maintenance organization.

²Refers to persons who indicated only a single race group, including those of Hispanic or Latino origin.

³Refers to persons who indicated more than one race group, including those of Hispanic or Latino origin. Only two combinations of multiple race groups are shown due to small sample sizes for other combinations.

⁴Refers to persons who are of Hispanic or Latino origin and may be of any race or combination of races. "Not Hispanic or Latino" refers to persons who are not of Hispanic or Latino origin, regardless of race.

⁵Shown only for adults aged 25 and over. Estimates are age adjusted to the projected 2000 U.S. population as the standard population using four age groups: 25-44, 45-64, 65-74, and 75 and over.

⁶GED is General Educational Development high school equivalency diploma.

⁷"Full-time" employment is 35 or more hours per week. "Part-time" employment is 34 or fewer hours per week.

⁸Includes persons in families that reported either a dollar amount or would not provide a dollar amount but provided an income interval.

⁹"Poor" persons live in families defined as below the poverty threshold. "Near poor" persons live in families with incomes of 100% to less than 200% of the poverty threshold. "Not poor" persons live in families with incomes that are 200% of the poverty threshold or greater.

¹⁰Based on a hierarchy of mutually exclusive categories. Adults with more than one type of health insurance were assigned to the first appropriate category in the hierarchy. "Uninsured" includes adults who had no coverage as well as those who had only Indian Health Service coverage or had only a private plan that paid for one type of service such as accidents or dental care.

¹¹MSA is metropolitan statistical area. Large MSAs have a population size of 1 million or more; small MSAs have a population size of less than 1 million. "Not in MSA" consists of persons not living in a metropolitan statistical area.

NOTES: Estimates are based on household interviews of a sample of the civilian noninstitutionalized population. This table is based on data from the Sample Adult file and was weighted using the Sample Adult weight. Unknowns for the columns were not included in the denominators when calculating percentages. Percentages may not add to totals due to rounding. "Total" includes other races not shown separately and persons with unknown education, family income, poverty status, and health insurance characteristics. Unless otherwise specified, estimates are age-adjusted using the projected 2000 U.S. population as the standard population and using four age groups: 18-44, 45-64, 65-74, and 75 and over. Estimates for age groups are not age-adjusted. For more information on the data source, methods, and definitions used for this table, refer to Technical Notes for Summary Health Statistics Tables: National Health Interview Survey (available from <http://www.cdc.gov/nchs/nhis/SHS/tables.htm>).

Table A-16b. Frequency distributions (in thousands) of having a usual place of health care and of type of place, among adults aged 18 and over, by selected characteristics: United States, 2017

Selected characteristic	All adults aged 18 and over	Does not have usual place of health care ¹	Has usual place of health care ¹	Doctor's office or HMO ¹	Clinic or health center ¹	Hospital emergency room ¹	Hospital outpatient department ¹	Some other place ¹
Hispanic or Latino origin ⁴ , race, and sex								
Hispanic or Latino, male	19,584	5,199	14,331	8,447	5,227	86	217	131
Hispanic or Latina, female	19,832	3,249	16,471	9,787	5,844	351	295	131
Not Hispanic or Latino:								
White, single race, male	76,561	10,666	65,406	48,928	14,206	452	684	700
White, single race, female	80,881	6,268	74,126	57,810	14,366	405	479	735
Black or African American, single race, male	13,175	2,135	10,905	7,162	2,681	422	331	200
Black or African American, single race, female	15,952	1,392	14,452	10,593	3,003	428	187	175

* Corresponding crude percentage for the frequency is considered unreliable, as specified in National Center for Health Statistics Data Presentation Standards for Proportions (available from: https://www.cdc.gov/nchs/data/series/sr_02/sr02_175.pdf), and is not shown.

¹Based on a survey question that asked respondents, "Is there a place that you usually go to when you are sick or need advice about your health?" and if there was at least one such place, a follow-up question was asked: "What kind of place [is it/do you go to most often] -- a clinic, a doctor's office, an emergency room, or some other place?" The response categories for this second question were: "clinic or health center," "doctor's office or HMO," "hospital emergency room," "hospital outpatient department," "some other place," and "doesn't go to one place most often." For this table, persons who report that they do not know the kind of place, do not go to one place most often, or refuse to answer the follow-up question are defined as having an unknown usual place of care and are not shown. Persons who report the emergency department as their usual place of care are defined as having a usual place of care. Readers should be aware that estimates in this table may differ from tabular results in both NCHS' Health United States and the National Health Interview Survey Early Release reports because in those reports persons who identify the emergency department as their usual place of care are defined as having no usual place of care. Note that in this table, data for hospital emergency room and hospital outpatient department are shown in separate categories; Adult Summary Health Statistics tables for 2013 and earlier combined these into a single category. HMO is health maintenance organization.

²Refers to persons who indicated only a single race group, including those of Hispanic or Latino origin.

³Refers to persons who indicated more than one race group, including those of Hispanic or Latino origin. Only two combinations of multiple race groups are shown due to small sample sizes for other combinations.

⁴Refers to persons who are of Hispanic or Latino origin and may be of any race or combination of races. "Not Hispanic or Latino" refers to persons who are not of Hispanic or Latino origin, regardless of race.

⁵Shown only for adults aged 25 and over.

⁶GED is General Educational Development high school equivalency diploma.

⁷"Full-time" employment is 35 or more hours per week. "Part-time" employment is 34 or fewer hours per week.

⁸Includes persons in families that reported either a dollar amount or would not provide a dollar amount but provided an income interval.

⁹"Poor" persons live in families defined as below the poverty threshold. "Near poor" persons live in families with incomes of 100% to less than 200% of the poverty threshold. "Not poor" persons live in families with incomes that are 200% of the poverty threshold or greater.

¹⁰Based on a hierarchy of mutually exclusive categories. Adults with more than one type of health insurance were assigned to the first appropriate category in the hierarchy. "Uninsured" includes adults who had no coverage as well as those who had only Indian Health Service coverage or had only a private plan that paid for one type of service such as accidents or dental care.

¹¹MSA is metropolitan statistical area. Large MSAs have a population size of 1 million or more; small MSAs have a population size of less than 1 million. "Not in MSA" consists of persons not living in a metropolitan statistical area.

NOTES: Estimates are based on household interviews of a sample of the civilian noninstitutionalized population. This table is based on data from the Sample Adult file and was weighted using the Sample Adult weight. Unknowns for the columns were not included in the frequencies, but they are included in the "All adults aged 18 and over" column. "Total" includes other races not shown separately and persons with unknown education, family income, poverty status, and health insurance characteristics. For more information on the data source, methods, and definitions used for this table, refer to Technical Notes for Summary Health Statistics Tables: National Health Interview Survey (available from <http://www.cdc.gov/nchs/nhis/SHS/tables.htm>).
