

## **ICD-10-CM Tabular Changes for 2009**

### T50.B96 code typographical error corrected

In the tabular list version 2007, the entry T50.B86 is meant to be T50.B96. This has been corrected in the 2009 update of the ICD-10-CM tabular list.

### T60.2 codes typographical errors corrected

In the tabular list version 2007, there were four entries below T60.2x, which were listed as T60.21, T60.22, T60.23, and T60.24. These were intended to have an “x” as the fifth character, and to have the previous fifth digits as the sixth characters. These have been corrected to T60.2x1, T60.2x2, T60.2x3, and T60.2x4. The internal style was also modified to support proper indentation, which may affect the appearance of other entries.
