VITAL STATISTICS OF THE UNITED STATES, 1962

VOLUME III – MARRIAGE AND DIVORCE

A brief summary of the contents for each section is listed below for the convenience of the reader. A complete table of contents is shown at the beginning of each section and is identified by a narrow black edge which can be located easily by fanning the pages. Each section is paged independently, using the section number as the identifying prefix.

Section 1. Marriages—Tables

For the United States:

Marriage totals and rates for each State, division, and region.

Marriage totals for each county or county equivalent.

Monthly marriage totals for each State, division, and region.

For the marriage-registration area:

Marriages classified by major demographic characteristics of bride and groom and by characteristics of marriages performed in each participating State.

Section 2. Divorces—Tables

For the United States:

Divorce totals and rates for each State, division, and region.

Divorce totals for each county or county equivalent.

For the divorce-registration area:

Divorces classified by major demographic characteristics of husband and wife, number of children, and legal items such as spouse to whom decree was granted for each participating State.

Section 3. Marriages and Divorces—Puerto Rico and the Virgin Islands

Marriage and divorce totals for each county or county equivalent.

Marriages classified by major demographic characteristics of bride and groom.

For Virgin Islands only, divorces and annulments classified by characteristics of husband and wife, duration of marriage, and legal items.

Section 4. Technical Appendix

Discussion of the historical and contemporary sources of marriage and divorce statistics, design of the samples of marriages and of divorces and annulments, uniformity and completeness of the collected data, and variability of sample estimates. Tables contain sample specifications, lists of data sources, and estimates of sampling variability and completeness of reporting of data.

Section 1. Marriages: Tables

Table	Page
1-1. Estimated number of marriages and marriage rates with percent changes from preceding year: United States, 1920-62, and marriage-registration area, 1957-62-----	1-5
1-2. Estimated marriage rates per 1,000 unmarried female population 15 years of age and over and 15-44 years of age: United States, 1940-62-----	1-5
1-3. Estimated number of marriages and marriage rates by month, with and without seasonal adjustments: United States, 1954-62-----	1-6
1-4. Marriages and marriage rates: United States, each region, division, and State, 1958-62-----	1-7
1-5. Percentage distribution of marriages by age of bride and of groom, by month marriage performed: Marriage-registration area, 1962-----	1-8
1-6. Percentage distribution of marriages by month performed, by marriage order and color of bride and of groom: Marriage-registration area, 1962-----	1-8
1-7. Percentage distribution of marriages by resident status of bride and of groom in State where married: Marriage-registration area and each registration State, 1962-----	1-9
1-8. Percentage distribution of marriages by marriage order of bride and of groom: Marriage-registration area and each registration State, 1962-----	1-9
1-9. Specified age of bride and of groom by median and mean age of spouse at first marriage of both: Marriage-registration area, 1962-----	1-10
1-10. Percentage distribution of marriages by number of this marriage of bride and of groom: Marriage-registration area and each registration State, 1962-----	1-10
1-11. Percentage distribution of first marriages and remarriages by type of ceremony performed, by age of bride and of groom: Marriage-registration area, 1962-----	1-11
1-12. Percentage distribution of first marriages and remarriages of bride and of groom, by type of ceremony performed: Marriage-registration area and each registration State, 1962-----	1-11
1-13. Percentage distribution of all marriages and first marriages of bride and of groom by age at marriage, and median age: Total of 19 selected States, 1953-62-----	1-12
1-14. Percentage distribution of marriages by marriage order of bride and of groom: Total of 19 selected States, 1953-62 -----	1-12
1-15. Marriages by month: United States, marriage-registration area, each region, division, and State, 1962-----	1-13
1-16. Marriages by age of bride and of groom, by month marriage performed: Marriage-registration area, 1962--	1-14
1-17. Marriages by marriage order and color of bride and of groom, by month marriage performed: Marriage-registration area, 1962-----	1-15
1-18. Marriages by day of week marriage performed: Marriage-registration area and each registration State, 1962-	1-15
1-19. Marriages by marriage order and age of bride and of groom, by resident status of bride and of groom in State where married: Marriage-registration area, 1962-----	1-16

Table	Page
1-20. Marriages by resident status of bride and of groom in State where married: Each marriage-registration State, 1962-----	1-17
1-21. Marriages by age of bride, by age of groom: Marriage-registration area, 1962-----	1-18
1-22. Marriages by age of white bride and groom and by age of nonwhite bride and groom: Marriage-registration area, 1962-----	1-19
1-23. First marriages of both bride and groom, by age of bride, by age of groom: Marriage-registration area, 1962 -----	1-19
1-24. Marriages by marriage order, age, and color of bride and of groom: Marriage-registration area, 1962-----	1-20
1-25. Marriages by marriage order and age of bride and of groom for the marriage-registration area and each registration State; and by color for the marriage-registration area: 1962-----	1-21
1-26. Marriages by age and previous marital status of bride, by age of groom: Marriage-registration area, 1962-	1-24
1-27. Marriages by age and previous marital status of groom, by age of bride: Marriage-registration area, 1962-	1-24
1-28. Marriages by age of previously widowed and divorced brides, by age of previously widowed and divorced grooms: Marriage-registration area, 1962-----	1-25
1-29. Marriages by previous marital status of white and nonwhite brides and grooms: Marriage-registration area, 1962 -----	1-25
1-30. Marriages by age, previous marital status, and color of bride and of groom: Marriage-registration area, 1962 -----	1-26
1-31. Marriages by previous marital status and color of bride and of groom: Marriage-registration area and each registration State, 1962-----	1-27
1-32. Marriages by number of this marriage of bride and of groom: Marriage-registration area and each registration State, 1962-----	1-29
1-33. Marriages by age of bride and of groom, by marriage order and type of ceremony performed, whether civil or religious: Marriage-registration area, 1962-----	1-30
1-34. Marriages by marriage order of bride and of groom and type of ceremony performed, whether civil or religious: Each marriage-registration State, 1962-----	1-31
1-35. Marriages: United States, each State and County, 1962-----	1-33

Sampling Variability of the Marriage Statistics

The following statement is essential to understanding the limitations and uses of the small numbers in the tables which present statistics based on data from probability samples of marriage records. The headnote to each such table includes "Based on sample data."

Sampling errors for statistics from the marriage-registration area and each registration State are shown in table 4-7 in the Technical Appendix. In order to reflect more clearly the general patterns of relationships and to retain the convenience of numbers which add to marginal totals, data tables contain some individual small numbers which convey very limited information because the sampling error is so large. It is suggested that for any number less than those shown in the column "Minimum useful statistic" the interpretation be simply "small" rather than any more precise value.

	<i>Minimum useful statistic</i>		<i>Minimum useful statistic</i>
Marriage-registration area-----	650	Michigan-----	1,000
Alabama-----	200	Mississippi-----	200
Alaska-----	10	Montana-----	100
California-----	1,000	Nebraska-----	200
Connecticut-----	200	New Hampshire-----	100
Delaware-----	10	New Jersey-----	200
District of Columbia--	200	New York	
Florida-----	200	(excl. N.Y.C.)-----	1,000
Georgia-----	1,000	Ohio-----	1,000
Hawaii-----	100	Oregon-----	200
Idaho-----	200	Pennsylvania-----	1,000
Indiana-----	1,000	Rhode Island-----	100
Iowa-----	200	South Dakota-----	100
Kansas-----	200	Tennessee-----	200
Kentucky-----	200	Utah-----	100
Louisiana-----	200	Vermont-----	10
Maine-----	100	Virginia-----	200
Maryland-----	200	Wisconsin-----	200
Massachusetts-----	200	Wyoming-----	10
		Puerto Rico-----	200
		Virgin Islands-----	10

The rule for selection of these minimum useful statistics is based on an argument that for statistics as small as 1 percent of the total for a State, a relative error of up to about 60 percent can be tolerated with 95 percent confidence. This is a "central tendency rule" and there will, of course, be some deviation from it. Further, the figures shown were rounded because of somewhat greater convenience in presenting and interpreting the minimum useful number.

SECTION 1 - MARRIAGES AND DIVORCES

Table 1-1. Estimated Number of Marriages and Marriage Rates With Percent Changes From Preceding Year: United States, 1920-62, and Marriage-Registration Area, 1957-62

(Refers only to marriages occurring within the specified area. Rates per 1,000 population residing in area. Rates for 1940, 1950, and 1960 based on population enumerated as of April 1; for all other years estimated as of July 1)

AREA AND YEAR	Number	Percent change in number	Rate	Percent change in rate	AREA AND YEAR	Number	Percent change in number	Rate	Percent change in rate
UNITED STATES¹					UNITED STATES¹—Con.				
1962	1,577,000	+1.9	8.5	0	1958	1,369,000	+3.2	10.7	+2.9
1961	1,548,000	+1.6	8.5	0	1955	1,327,000	+1.9	10.4	+1.0
1960	1,523,000	+1.9	8.5	0	1954	1,302,000	+18.6	10.3	+18.4
1959	1,494,000	+3.0	8.5	+1.2	1953	1,098,000	+11.8	8.7	+10.1
1958	1,451,000	-4.4	8.4	-5.6	1952	981,903	-7.4	7.9	-8.1

¹Data are estimated.²Districts shown were county equivalents prior to 1960 (then named "Judicial Divisions"). Data are not available for election districts, the nearest equivalents of counties beginning with 1960.³Marriage licenses issued.⁴Data are estimated from reports for 11 months.⁵Marriages by county where license was issued.⁶Divisions are parishes.⁷Independent cities have the same status as counties and are listed after counties.

Section 2. Divorces: Tables

Table	Page
2-1. Estimated number of divorces and annulments and rates, with percent changes from preceding year: United States, 1920-62-----	2-5
2-2. Divorces and annulments and rates: United States, each region, division, and State, 1958-62-----	2-6
2-3. Reported annulments: United States, each region, division, and State, 1958-62-----	2-7
2-4. Median ages of divorced husband and wife at time of decree and at time of marriage: Divorce-registration area and each registration State, 1962-----	2-8
2-5. Percentage distribution of divorces and annulments by duration of marriage: Divorce-registration area and each registration State, 1962-----	2-8
2-6. Median duration of marriage (in years) prior to divorce or annulment, by number of children reported: Divorce-registration area and each registration State, 1962-----	2-9
2-7. Percentage distribution of divorces and annulments by number of children reported: Divorce-registration area and each registration State, 1962-----	2-9
2-8. Estimated number of children involved in divorces and annulments: Divorce-registration area and each registration State, 1962-----	2-10
2-9. Estimated number of children involved in divorces and annulments: United States, 1953-62-----	2-10
2-10. Divorces and annulments in State where decree was granted distributed by place where marriage was performed: Divorce-registration area and each registration State, 1962-----	2-11
2-11. Divorces and annulments by resident status of defendant husband and wife in State where decree was granted: Divorce-registration area and each registration State, 1962-----	2-11
2-12. Divorces and annulments by age of husband and of wife at time of decree: Divorce-registration area and each registration State, 1962-----	2-12
2-13. Divorces and annulments by age of husband and of wife at marriage: Divorce-registration area and each registration State, 1962-----	2-13
2-14. Divorces and annulments by color of husband and of wife: Divorce-registration area and each registration State, 1962-----	2-14
2-15. Divorces and annulments by marriage order of husband and of wife: Divorce-registration area and each registration State, 1962-----	2-14
2-16. Divorces and annulments by duration of marriage: Divorce-registration area and each registration State, 1962-----	2-15
2-17. Divorces and annulments by number of children reported: Divorce-registration area and each registration State, 1962-----	2-15
2-18. Divorces and annulments by duration of marriage and number of children reported: Divorce-registration area and each registration State, 1962-----	2-16
2-19. Divorces and annulments by legal grounds for decree: Divorce-registration area and each registration State, 1962-----	2-18
2-20. Divorces and annulments by party to whom decree was granted, whether plaintiff or other: Divorce-registration area and each registration State, 1962-----	2-19
2-21. Divorces and annulments by plaintiff and duration of marriage: Divorce-registration area and each registration State, 1962-----	2-20
2-22. Divorces and annulments: United States, each State, and county, 1962-----	2-22

Sampling Variability of the Divorce Statistics

The following statement is essential to understanding the limitations and uses of the small numbers in the tables which present statistics based on data from probability samples of divorce records. The headnote to each such table includes "Based on sample data."

Sampling errors for statistics from the divorce-registration area and each registration State are shown in table 4-8 in the Technical Appendix. In order to reflect more clearly the general patterns of relationships and to retain the convenience of numbers which add to marginal totals, data tables contain some individual small numbers which convey very limited information because the sampling error is so large. It is suggested that for any number less than those shown in the column "Minimum useful statistic" the interpretation be simply "small", rather than any more precise value.

	<i>Minimum useful statistic</i>		<i>Minimum useful statistic</i>
Divorce-registration area-----	160	Missouri-----	200
Alabama-----	200	Montana-----	15
Alaska-----	10	Nebraska-----	15
Georgia-----	100	Ohio-----	200
Hawaii-----	15	Oregon-----	100
Idaho-----	15	Pennsylvania-----	200
Iowa-----	100	South Dakota-----	10
Kansas-----	100	Tennessee-----	200
Maryland-----	100	Utah-----	15
Michigan-----	200	Virginia-----	100
		Wyoming-----	20
		Virgin Islands-----	10

The rule for selection of these minimum useful statistics is based on an argument that for statistics as small as 1 percent of the total for a State, a relative error of up to about 60 percent can be tolerated with 95 percent confidence. This is a "central tendency rule" and there will, of course, be some deviation from it. Further, the figures shown were rounded because of somewhat greater convenience in presenting and interpreting the minimum useful number.

SECTION 2 - MARRIAGES AND DIVORCES

2-5

Table 2-1. Estimated Number of Divorces and Annulments and Rates, With Percent Changes From Preceding Year: United States, 1920-62

(Data refer only to events occurring within the United States. Includes Alaska beginning 1959, and Hawaii, 1960)

YEAR	Number	Percent change in number	Rate per 1,000 total population ¹	Percent change in rate	Rate per 1,000 married female population 15 years of age and over ²	Percent change in rate

3-6. Marriages by marriage order and age of bride and of groom: Puerto Rico and Virgin Islands, 1962-----	3-5
3-7. Marriages by age of bride, by age of groom: Puerto Rico and Virgin Islands, 1962-----	3-6
3-8. First marriages of both bride and groom, by age of bride, by age of groom: Puerto Rico and Virgin Islands, 1962-----	3-6
3-9. Marriages by age and previous marital status of bride and of groom: Puerto Rico and Virgin Islands, 1962---	3-7
3-10. Marriages by previous marital status of bride, by previous marital status of groom: Puerto Rico and Virgin Islands, 1962-----	3-8
3-11. Marriages by number of this marriage of bride and of groom: Puerto Rico and Virgin Islands, 1962-----	3-8
3-12. Divorces and annulments by specified characteristics: Virgin Islands, 1962-----	3-9
3-13. Divorces and annulments by specified characteristics of husband and of wife: Virgin Islands, 1962-----	3-9
3-14. Divorces and annulments by resident status of defendant husband and wife: Virgin Islands, 1962-----	3-9
3-15. Divorces and annulments by duration of marriage and number of children under 18 years of age: Virgin Islands, 1962-----	3-10
3-16. Divorces and annulments by party to whom decree granted whether plaintiff or other: Virgin Islands, 1962---	3-10
3-17. Divorces and annulments by duration of marriage and plaintiff: Virgin Islands, 1962-----	3-10

NOTES

Reporting areas

Marriage data are shown for both Puerto Rico and the Virgin Islands. Divorce totals are shown for both Puerto Rico and the Virgin Islands and detailed divorce statistics for the Virgin Islands only.

Geographic classification

Data are shown by place of occurrence. Totals are shown for the local areas St. Croix Island and St. John and St. Thomas Islands (the latter two combined) in the Virgin Islands and for the primary geographic subdivisions, "municipios," in Puerto Rico.

Race and color

For 1962, brides and grooms are not shown by color for either Puerto Rico or the Virgin Islands. Husbands and wives divorced in 1962 are classified as white or nonwhite for the Virgin Islands.

Sample data

Since the sampling rate for the Virgin Islands for both marriage and divorce records was 100 percent, there is no sampling error in the statistics for this area. The marriage estimates for Puerto Rico are based on a 5-percent sample; sampling errors for estimated frequencies which are specified percents of the total marriages are as follows:

<i>Frequency expressed as percent</i>	<i>Sampling error (σ)</i>	<i>Frequency expressed as percent</i>	<i>Sampling error (σ)</i>
1 or 99-----	65	10 or 90-----	194
2 or 98-----	91	15 or 85-----	231
3 or 97-----	111	20 or 80-----	259
4 or 96-----	127	25 or 75-----	281
5 or 95-----	141	50 -----	324
7 or 93-----	165		

Section 4—the Technical Appendix—discusses other factors concerning these marriage and divorce statistics.

SECTION 3 - MARRIAGES AND DIVORCES

Table 3-1. Marriages, Divorces, and Rates: Puerto Rico and Virgin Islands, 1940-62

(By place of occurrence. Rates per 1,000 total population in each area except as noted. Rates for 1940, 1950, and 1960 based on population enumerated as of April 1; for all other years based on population estimated as of July 1)

SECTION 4. TECHNICAL APPENDIX

INTRODUCTION

In 1962, two methods were used to collect statistics on marriages and divorces (or annulments). Total numbers of marriages and divorces for States and counties are complete counts provided by State and local officials in all parts of the United States. Data on the characteristics of these events and the persons involved in them, however, are based on samples of marriage and divorce records from the marriage- and divorce-registration areas. Marriage totals by month of occurrence were secured by both methods. Sources of marriage and divorce data since 1867 are shown in table 4-1; a description of these sources can be found in Section 7, Volume III, of *Vital Statistics of the United States, 1960*.

Marriage- and divorce-registration areas

In order to promote regular, timely, and complete reporting, marriage- and divorce-registration areas similar to those developed for the collection of natality and mortality statistics were established in 1957 and 1958, respectively. The areas consist of those States and independent registration areas that meet the following criteria:

1. Central files of marriage or divorce records
2. A statistical report form that includes items conforming closely to those on the Standard Record of Marriage (fig. 4-1) or the Standard Record of Divorce or Annulment (fig. 4-2)
3. Regular and timely reporting by all local areas
4. Agreement on tests of marriage or divorce registration completeness and accuracy, carried out in cooperation with the National Vital Statistics Division (NVSD)

Table 4-2 shows when central files were established and when the States and independent areas began participating in the registration areas. Figures 4-3 and 4-4 indicate the areas participating in the marriage-registration area (MRA) and the divorce-registration area (DRA) in 1962 as well as those maintaining central files of records of marriage and of divorce or annulment but not included in the registration areas. In 1962, 35 States were in the MRA, the same number as in 1961, and 21 in the DRA, Ohio having been added; in addition, the District of Columbia, New Orleans, and Puerto Rico were included in the MRA and the Virgin Islands in both the MRA and the DRA. In 1962, marriages in the MRA represented 62.2 percent of the national total, about the same percent as in 1961; comparable percentages for the DRA are 35.6 for 1962 and 30.2 for 1961.

Statistics based on information from records

In 1960, a probability sample program was initiated for collecting marriage and divorce statistics; for earlier years they were compiled from predesigned tables submitted by the States. The 1960 program was continued in 1961 and in 1962 with two modifications.

1. The 1961 and 1962 programs were limited to samples obtained from the MRA and DRA, whereas the 1960 program was nationwide and consisted of samples from the MRA, the DRA, and the remainder of the Nation. Hence national and regional statistics corresponding to those tabulated for 1960 are not available for 1961 and 1962.
2. Two States and the District of Columbia were admitted to the MRA and two States to the DRA in 1961. In 1962, Ohio was added to the DRA.

The statistical tables for 1962 follow the same design as those for 1961. However, the organization of the volume has been revised. All tables of marriage statistics except those for Puerto Rico and the Virgin Islands are included in Section 1, all tables of divorce statistics except those for Puerto Rico and the Virgin Islands are in Section 2, tables of both kinds of statistics for Puerto Rico and the Virgin Islands are in Section 3, and the Technical Appendix is Section 4.

State and county totals

The complete counts of marriages and divorces and annulments for States and counties are published in tables 1-35 and 2-22 and State totals in tables 1-4, 2-2, and 2-3. Marriage and divorce totals by local areas for Puerto Rico and the Virgin Islands are published in table 3-2, Section 3. Marriage totals by month of occurrence are shown for all States in table 1-15, Section 1. The State and area totals shown in these tables differ slightly from estimated totals based on the samples for the same States shown in all other tables in this report.

County totals of marriages reported from 43 States and the District of Columbia were based on data available in central files. In the seven States and New York City lacking central files, surveys were conducted. This was done by State officials in Arizona, Nevada, New Mexico, Oklahoma, Texas, and Washington and by the city clerk in New York City. Colorado county officials reported totals to NVSD on a monthly basis.

Annual marriage totals were obtained for 3,110 counties or equivalent areas of the United States. The annual marriage total for the United States is the sum of these figures. No figures were obtained for five counties.

The number of marriages performed was reported for 46 States. The number of marriage licenses issued was reported for Arkansas, Colorado, Kentucky, Nevada, and the District of Columbia as well as for 13 counties in other States. The number of marriage licenses is usually larger by 1 or 2 percent than the number of marriages performed. (See page 2-1, Section 2, Volume I, *Vital Statistics of the United States, 1959.*)

Data on divorces and annulments were received from State officials of 49 States and the District of Columbia. In 1962, 11 States did not maintain central files of divorce records (Arizona, Colorado, Indiana, Minnesota, Nevada, New Mexico, New York, Oklahoma, Texas, Washington, and West Virginia). In these States, State officials conducted special surveys to obtain county totals. Data for Colorado, for some counties of Kentucky, Missouri, and New Mexico, and for some parishes of Louisiana were obtained from surveys of local officials conducted by NVSD. Annual divorce and annulment totals were obtained for 3,090 counties or equivalent local areas of the United States; no totals were obtained for 25 counties. County data were received from the

Virgin Islands and municipality data from Puerto Rico.

The total number of divorces and annulments in the United States was prepared from the State totals; estimates for the nonreporting parishes of Louisiana were included in the national figure. These estimates were based on the assumption that the divorce rate in the nonreporting areas of this State was identical with that for the reporting areas.

Characteristics for which data were obtained

All variables included in the 1962 tabulations appear on the marriage and divorce or annulment record forms of all the registration States with the few exceptions indicated in tables 4-3 and 4-4.

Of the 36 forms used in the marriage-registration area in 1962, 29 specified the county where the marriage was performed and 34 the city or town.

Estimates of numbers of civil and religious ceremonies were made chiefly by distinguishing between officiants who were clergymen and those who were civil officials. These data were not requested on the forms of Ohio or Kentucky, but they were often reported by Kentucky because the name of the person performing the ceremony was requested on the Kentucky records.

Among characteristics of the bride and groom, age at marriage or date of birth and State of residence were on the record forms of all registration States. Some data about the previous marital history of the bride and groom were also available from all MRA States. However, the record forms of Ohio and Michigan included only information about the number of previous marriages of each person and not about marital status before the marriage. On the other hand, neither the number of this marriage nor of previous marriages appeared on the forms of four MRA States (Idaho, Kansas, Maryland, and Oregon). Despite these variations in the records, marriage order (first marriage or remarriage) could be determined for all MRA States.

Items tabulated for divorces were found on the record forms of States included in the DRA with only five exceptions: Kansas requested no data on residence of husband and wife; Nebraska and Virginia requested no data on number of times parties to the divorce had been married; Nebraska requested no data on party to whom decree was granted; and Ohio requested no data on color. The variables on all records in the DRA were date and place where the decree was granted, age or date of birth, date and place of marriage (date of marriage was used for computing duration of marriage to decree), the number of children involved, legal grounds for the decree, and which party was the plaintiff.

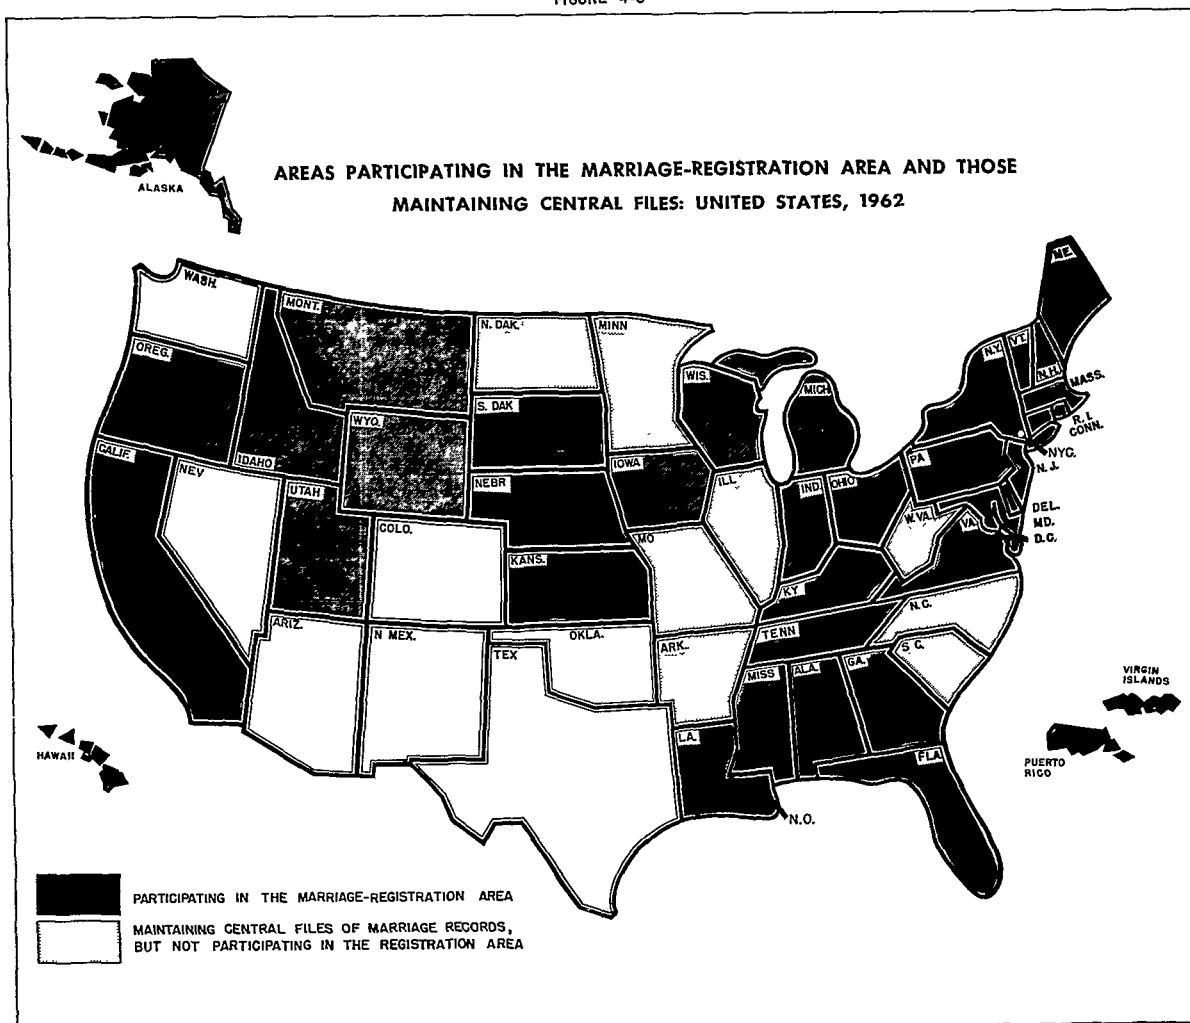

Several additional items are found on the marriage and the divorce forms of a number of States. These include birth-place, occupation, residential address, religion, and last grade of school completed. Some marriage forms include one or two items about the parents of the bride and the groom. Several divorce reporting forms include data about such legal matters as the contesting of the initial action, custody of children, and arrangements for financial support. None of these items were tabulated for 1962.

DESIGN OF THE SAMPLES

Information about the structure of the samples is shown in table 4-5. The marriage sample was designed to yield estimates of area totals as well as frequency distributions and estimates of their parameters. These estimates were made for the marriage-registration area and for each State in the registration area.

Maximum tolerable sampling errors were defined in terms of one standard error (σ) and were specified for each of the percentages shown in table 4-6. Samples for each registration State, as well as for each registration area as a whole, were designed so that sampling errors would not exceed the entries (percentage points) in table 4-6. For example, the sampling error for an estimate of 5 percent

FIGURE 4-3

was not to exceed 1.1 percentage points in any marriage- or divorce-registration State. This means that in approximately two of three samples of a given size the percent would be in the interval 3.9 to 6.1 percent (5 percent plus and minus the maximum sampling error tolerance of 1.1 percentage points).

A sampling rate was selected for each State so that the resulting sample would be at least 400 records, the minimum number required to secure estimates having less than pre-designated maximum sampling errors (table 4-6). Only four different sampling rates were designated for the States in the marriage-registration area—all records, 1/10, 1/20, and 1/100. While each State's records were sampled independently, in computing sampling errors each of the four groups of States with a uniform sampling rate was treated as a stratum. Estimated sampling errors using these four groups as strata are likely to be somewhat larger than those that might have been computed using each State as a stratum; hence, the sampling errors presented here very probably have an extra safety margin.

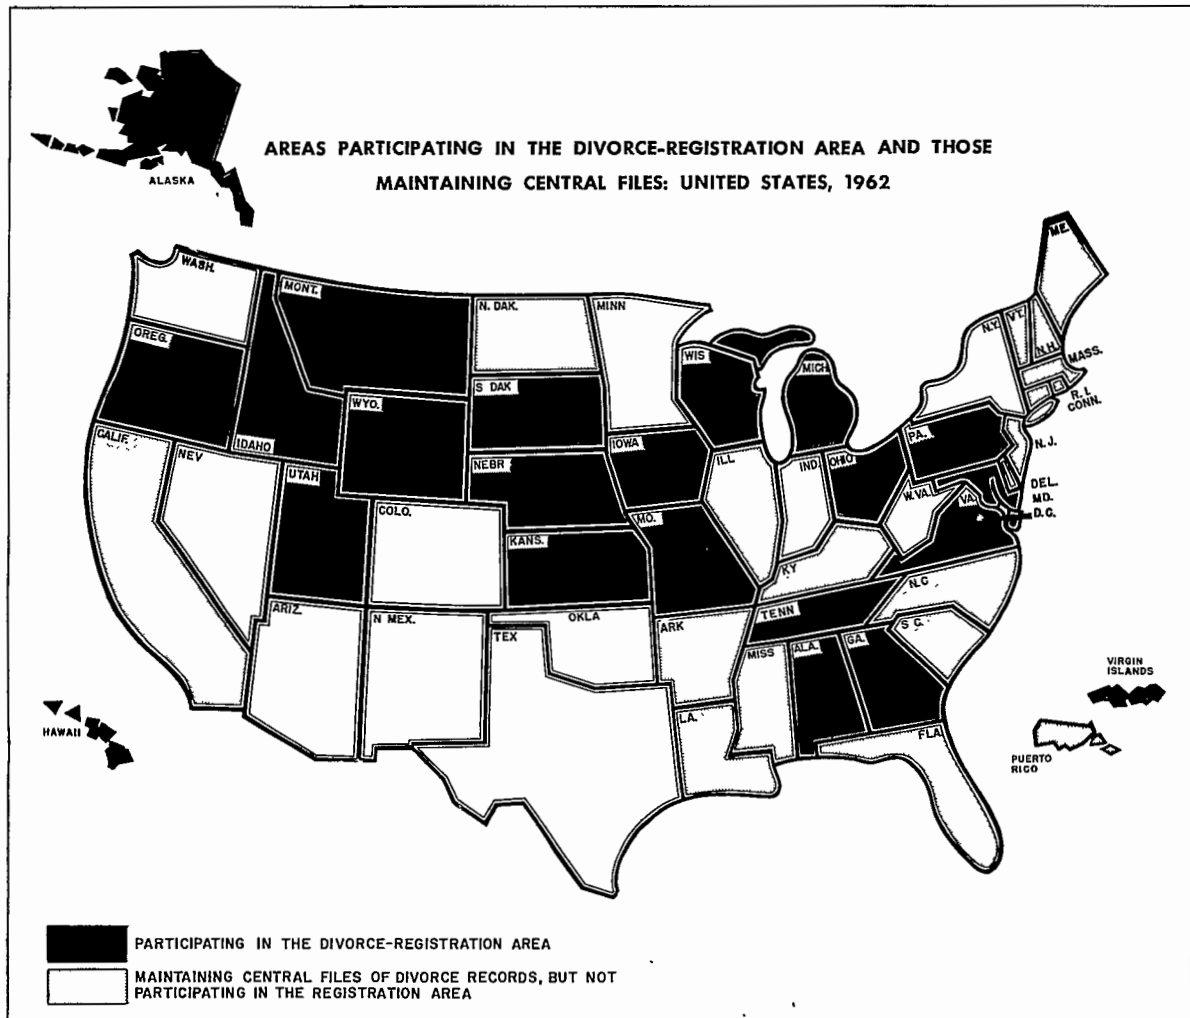

Sampling procedures in the divorce sample parallel those for the marriage sample except that the sampling rates in each stratum (shown in table 4-5) were much larger than corresponding rates in the marriage sample—all records, 1/2, 1/10, and 1/20—in order to secure a minimum of 400 sample records from each State in the DRA.

COLLECTING AND PROCESSING SAMPLE DATA

Agreements specifying procedures for selecting sample records and payments to be made by NVSD were arranged for each reporting area. For marriages, the records to be sampled referred to all marriages performed during 1962 irrespective of the date of issue or date of filing of the license. For divorces, the records to be sampled referred to all annulments and absolute decrees of divorce that were granted during 1962 except for Utah, where they referred to decrees that became final during the year. In States where interlocutory divorce decrees are granted, those granted during the later part of 1962 became final in 1963 and those granted late in 1961 became final in 1962. It is possible that some interlocutory decrees never become final because of death or reconciliation, but it is believed that the number of such cases is very small. In all these States except Utah divorce records are filed in the State office of vital statistics when decrees are granted and not when they become final. In most cases such decrees become final automatically after the lapse of a certain period of time.

The following variables were tabulated from returns of sample marriage records of States in the MRA: month of marriage, age, color, marital status, number of this mar-

FIGURE 4-4

riage, county and State of residence of bride and of groom, and type of ceremony performed. The basic items for divorce were age, color, marriage order, residence of husband and of wife, place and duration of the marriage, and the number of children in the family being dissolved. Legal items classifying the party who was the plaintiff, the person to whom the decree was granted, and the legal grounds for the decree were also tabulated.

The table plans for 1962 are the same as those for 1961. Several of the tabulations are less detailed than those prepared from pretabulated reports from the States in 1959 and preceding years. Because of high proportions of missing responses for the personal items on divorce records, it is not feasible to publish the divorce statistics (Section 2) in as much detail as the marriage statistics (Section 1).

In the tables for marriages great emphasis is given to the comparisons of variations in age at marriage for the marriage-registration area among such subgroups as white and nonwhite persons and single, widowed, and divorced brides and grooms. In addition the distributions of several variables, such as residence and marriage order, are shown for each registration State.

The tables for divorces feature detailed analyses of variations in duration of the marriage dissolved and in number of children involved. These are critical variables—the

first as an index of marital and family stability and the second as part of an estimate of the number of persons affected by the dissolutions of these marriages. The other demographic items were tabulated in broad categories only.

ESTIMATING PROCEDURES

Area totals

Before data were tabulated and statistics estimated, adjustments were made in order to reconcile totals estimated from samples received with pretabulated counts for each reporting area. The procedures were as follows:

Marriages.—No adjustment was made for a State in which the complete count and the sample estimate differed by 1 percent or less. A difference of more than 1 percent was found for one State, Kentucky, where the number of sample records was short. The estimated total for this State is footnoted as incomplete in all tables giving detailed marriage statistics.

Divorces.—Adjustments were made if the pretabulated count for a reporting State differed from the estimated total based on the sample by more than 1 percent. It was found that the samples from three States (Nebraska, Utah, and Wisconsin) were short 170 records, representing 420 events,

less than 1 percent of the divorce total of 147,106 for all registration States combined. In all detailed divorce tables, the number of "not stated" cases was increased for those three States in order to bring their totals up to figures representing complete samples.

Frequencies

Procedures for estimating frequency distributions for various characteristics were similar for the marriage and divorce samples. Frequencies were estimated in two steps:

1. Each sample case, and all items tabulated for that case, was assigned a weight which was the reciprocal of the probability (or sampling ratio) used to select the case. Thus if a marriage record was selected from a State with a probability of 1/100, each item on that record was multiplied by 100, whereas if 100 percent of the records were processed from a State, each item on each such record was multiplied by 1.
2. Frequencies were estimated by summing the inflated numbers of cases instead of tabulating the number of sample cases. Thus each frequency distribution, such as age at marriage of first-married brides, is a sum of the weighted sample cases included.

It should be noted that the weights for all sample records are identical within each registration-area State. However, as shown in table 4-5, the weights for individual MRA States vary from 1 to 100 and those for the DRA States vary from 1 to 20. Therefore, insofar as any given subtotal is composed of unique proportions of weighted cases from the various States, the sampling error for each subtotal will be unique. This means that any two approximately equal subtotals may have different sampling errors.

Percents and rates

Percents in the analytical tables were computed from data excluding numbers of not stated cases. All rates appearing in the analytical tables were based on populations from the U.S. Bureau of the Census. These are populations estimated as of July 1, 1962, present in the area and including Armed Forces stationed in the area but excluding Armed Forces abroad.

Children involved in divorces

Procedures for estimating the number of children reported in divorce suits presented a special problem. The number of children was estimated for each registration State, the DRA, and the United States. In order to obtain a State total, the category "children not stated" was first distributed in accordance with the distribution of divorces by number of children reported. Then the number of divorces in each category with a given number of children was multiplied by the number of children per divorce (that is, the number of divorces involving one child was multiplied by 1, the number involving two children was multiplied by 2, etc.). The sum of the products is the estimate of the number

of children of divorced parents in a given registration State, and the sum of State estimates for participating States is the estimate for the DRA. The national estimate was obtained by multiplying the combined estimates for 14 of the DRA States by the ratio of the 1960 national estimate of children based on the nationwide sample and the comparable figure for the 14 States combined. The ratio is 5.40039, and the 14 States are Georgia, Idaho, Iowa, Kansas, Maryland, Montana, Nebraska, Oregon, Pennsylvania, South Dakota, Tennessee, Virginia, Wisconsin, and Wyoming. Data for these States were used because the other 4 States that participated in the DRA in 1960 were either not representative of the United States or had a very high proportion of divorces with the number of children not stated.

SAMPLING ERRORS

Each estimate computed from samples, except statistics for States where the sample includes all records, has a sampling error (σ). Since all cases in these samples were selected with known probabilities, this sampling error can be computed for each estimate. Each sampling error shown in tables 4-7 and 4-8 is the amount which, when added to and subtracted from the estimated frequency or percent, gives the interval within which the actual quantity being estimated would lie in approximately two out of three samples of equal size. For example, if the sample estimate of the number of wives under 20 years of age at the time of divorce in 1962 is 100,000, and if the sampling error for this estimate is 2,118, the probability is about 2/3 that this sample estimate is within 2,118 of the true total and about 95/100 that this estimate is within two sampling errors (4,236) of the true total.

In order to facilitate comparisons of sampling errors between registration States with widely varying totals of marriages or divorces, the sampling errors are shown for frequencies expressed as percents of State or registration area totals. Sampling errors for frequencies equal in size are markedly larger for the MRA than for the DRA. This greater precision of estimates for the DRA results from the much larger sampling rates of 1/2, 1/10, and 1/20 for strata 2, 3, and 4 than the rates of 1/10, 1/20, and 1/100 for equivalent strata in the MRA sample. The sampling error for the estimated percent corresponding to each frequency can be computed by dividing the sampling error shown for the frequency by the total number of events reported for the area. As an example of the procedures described above for the States and registration areas, suppose the number of nonwhite marriages in California to be 11,290, or 10 percent of the total for the State. The error shown in table 4-7 for this frequency is 1,003. By adding and subtracting 1,003 from 11,290, we obtain the interval 10,287 to 12,293; the chances are about 68 out of 100 that the actual number of nonwhite marriages is in this interval. In order to obtain the sampling error for 10 percent itself, divide 1,003 by the State total, 112,900, with a resulting sampling error of 0.9 percent. Thus the chances are about 68 out of 100 that the

actual percent of nonwhite marriages in California falls between 9.1 and 10.9.

The standard error of a proportion in a subgroup of a subtotal—say, the proportion of nonwhite marriages in the age group 15-19 years—may be estimated from the formula

$$S_p \doteq \frac{\sqrt{P_y^2 S_x^2 - P_x^2 S_y^2}}{P_y^2 N}$$

P_y is the proportion the denominator is of the total marriages of the State. P_x is the proportion the numerator is of the State total. S_y is the standard error of the denominator, and S_x is the standard error of the numerator. N is the total number of marriages for the State. Use of this equation can be best illustrated by an example. Suppose for the State of Alabama that 45 percent of the marriages of nonwhite brides from the sample fell into the age group 15-19 years and we want to approximate the standard error of this proportion. Suppose also that the estimated number of nonwhite marriages for the entire State was 8,000 and that the number falling into the age group 15-19 years was 3,600. Eight thousand marriages is close to 25 percent (P_y), and 3,600 is close to 10 percent (P_x) of the 33,660 (N) marriages in Alabama during 1962. From table 4-7 we find that for Alabama the standard error of 8,000 is 336 (S_y) and of 3,600 is 240 (S_x). Substituting these values into the formula we obtain

$$S_p \doteq \frac{\sqrt{(.25)^2 (240)^2 - (.10)^2 (336)^2}}{(.25)^2 (33,660)} = .024$$

Therefore the chances are about 68 in 100 that the true proportion is between .426 and .474.

To determine if two proportions are significantly different, divide the difference by the square root of the sum of the squares of their standard errors. If the quotient of this division is greater than 2, then the probability that the difference is due to chance is less than 1 in 20.¹ (The figure 2 is the rounded value of "Student's" t at the 5-percent level of significance for the hypothesis that the difference between the two estimates is zero when samples are large, i.e., containing 60 or more cases.) To illustrate, suppose we wish to compare the proportion of nonwhite marriages in the 15-19 age group for the two States of Alabama and Louisiana. Assume that the proportions were 45 percent with standard error .024 for Alabama and 49 percent with standard error .027 for Louisiana. Division of the difference by the square root of the sum of the squares of the standard errors gives us

$$\frac{(.49 - .45)}{\sqrt{(.024)^2 + (.027)^2}} = 1.1$$

This value is less than 2; therefore the difference between the two proportions may well have been due to chance.

COMPLETENESS OF THE DATA

Among the various factors which produce errors in the 1962 marriage and divorce statistics, incompleteness of reporting is one of the most important. It is the one factor for which detailed and complete estimates are available. Table 4-9 (marriages) and tables 2-10 through 2-21 in Section 2 (divorces and annulments) show the numbers of cases with various characteristics not stated because of incompleteness of returns of sample records, because of items missing from State record forms, and because of data not reported on individual sample records.

An important quality check involves the comparison of the complete count of events reported by a State with the estimate of the number of events based on the sample. If these two estimates differed by more than 1 percent, an attempt was made to reconcile the difference. In most instances this involved querying State officials, but in several cases it was found that some records such as unused marriage licenses, duplicates, and divorce decrees which were not absolute had been included in the samples or in the reported totals or in both. This querying was a marked aid in improving the accuracy of the pretabulated totals and of the samples.

On the basis of these checks it is estimated that marriage records were not received for 0.3 percent of all marriages in the MRA. Among the States in the sample, the largest proportion of records not received was for Kentucky (10 percent).

For the DRA, the sample records were not received for 0.1 percent of all divorces. The samples from three States were short—5.5 percent of the decrees granted in Utah were not received, 1.0 percent of those in Nebraska, and 0.2 percent of those in Wisconsin.

The principal reason for incompleteness of reporting various characteristics for marriages is the absence of specific items on the marriage records. For example, the fact that reporting color or race was not required on the marriage forms for Ohio, California, and New Jersey results in this item not being available for 23 percent of the marriages in the MRA. Incompleteness of reporting of this item in other MRA States adds less than 1 percent to the total proportion not reporting race or color. Similar situations exist in various States for the reporting of number of present marriage, marital status, and type of ceremony. Responses to these items are nearly complete in the areas that request them, but the items have not been standardized on the marriage records of enough reporting areas.

The principal source of incompleteness in the 1962 divorce statistics is the failure to get key items of personal and demographic data in several States even when these

¹Helen M. Walker and Joseph Lev, *Statistical Inference*. New York, Holt, Rinehart and Winston, 1953. pp. 154-157.

SECTION 4 - MARRIAGES AND DIVORCES

items are on the record forms. The proportion of records not stating age at decree varies among the 21 DRA States from less than 1 to 97 percent; for race or color, the corresponding range is from 0 to 80 percent; for marriage order, the analogous range among DRA States having this item is from less than 1 to 96 percent; for duration of marriage, the range is 0 to 21 percent; and for number of children, the range is from 0 to 25 percent.

Numbers and detailed statistics (legal grounds, duration of marriage, number of children reported, etc.) obtained in field survey covering 20-year period conducted in 1887-88 by the U.S. Department of Labor.
1887-1906-----	Estimates based on data from field survey covering 20-year period conducted in 1906-07 by the U.S. Bureau of the Census.	Numbers and detailed statistics (legal grounds, duration of marriage, number of children reported, etc.) obtained in field survey covering 20-year period conducted in 1906-07 by the U.S. Bureau of the Census.
1907-15-----	Estimates prepared by Bureau of the Census based on records from selected States.	Same as for marriage.
1916-----	Numbers collected through mail survey conducted in 1917-18 by Bureau of the Census.	Numbers and detailed statistics collected through mail survey conducted in 1917-18 by Bureau of the Census.
1917-21-----	Estimates prepared by Bureau of the Census based on records from selected States.	Same as for marriage.
1922-32-----	Annual collection by Bureau of the Census through mail query to States with central files and to counties in the remaining States.	Numbers and detailed statistics collected annually by Bureau of the Census through mail query to States with central files and to counties in the remaining States.
1933-36-----	Estimates by S. A. Stouffer and L. M. Spencer on basis of data available from selected States (<i>American Journal of Sociology</i> , January 1939).	Same as for marriage.
1937-40-----	Estimates based on transcript returns and mail surveys of State and county offices conducted by Bureau of the Census. Some detailed statistics for 1940 based on transcript program.	Same as for marriage.
1941-43-----	Estimates based on data from published State reports and from files of Bureau of the Census and Federal Home Loan Bank Board.	Same as for marriage.
1944-47-----	Estimates based on figures for marriages and marriage licenses obtained by National Office of Vital Statistics from State and local registration offices.	Estimates based on figures for divorces and annulments obtained by National Office of Vital Statistics from State and local registration offices.
1948-56-----	Estimates based on figures for marriages and marriage licenses obtained by National Office of Vital Statistics from State and local registration offices; detailed statistics based on pretabulated data provided by State offices of vital statistics.	Estimates based on figures for divorces and annulments obtained by National Office of Vital Statistics from State and local registration offices; detailed statistics based on pretabulated data provided by State offices of vital statistics.
1957-----	Estimates based on figures for marriages and marriage licenses obtained by National Office of Vital Statistics from State and local registration offices; detailed statistics based on pretabulated data provided by States participating in the marriage-registration area (MRA).	Same as for 1948-56.
1958-59-----	Same as for 1957.	Estimates based on figures for divorces and annulments obtained by National Office of Vital Statistics from State and local registration offices; detailed statistics based on pretabulated data provided by States participating in the divorce-registration area (DRA).
1960-----	Statistics prepared in the National Vital Statistics Division from nationwide probability samples of marriage records designed to provide estimates for the United States, the four regions, the marriage-registration area, and each registration State. Totals of either marriages or marriage licenses by county and by month also tabulated in each State. These and totals estimated from samples were checked for consistency.	Statistics prepared in the National Vital Statistics Division from nationwide probability samples of divorce records. Records in the sample provided statistics on absolute decrees of divorce and annulment for the United States, the four regions, the divorce-registration area, and each registration State. Totals for each State by county also tabulated in each State. These and totals estimated from samples were checked for consistency.
1961-62-----	Statistics prepared in the National Vital Statistics Division for the MRA and each MRA State from probability samples of the marriage records collected by each MRA State. Pretabulated totals of marriages or marriage licenses by county and by month, reported for all States, used to compute totals for the United States, four regions, and nine geographic divisions; also, for MRA States, checked for consistency with totals estimated from sample records.	Statistics prepared in the National Vital Statistics Division for the DRA and each DRA State from probability samples of the records of absolute divorces and annulments collected by each DRA State. Pretabulated totals by county, reported for all States, used to compute totals for the United States, four regions, and nine geographic divisions; also, for DRA States, checked for consistency with totals estimated from sample records.

¹Includes reported annulments.

SECTION 4 - MARRIAGES AND DIVORCES

Table 4-2. Years Central Files of Marriage and Divorce Records Were Established and Years Admitted to the Marriage- and Divorce-Registration Areas: States and Outlying Areas

(The marriage-registration area was established January 1, 1957, and the divorce-registration area January 1, 1958)

AREA	MARRIAGES		DIVORCES		AREA	MARRIAGES		DIVORCES

¹Not on Standard Record of Marriage. (Information used in NVSD to determine county of marriage if county is not stated.)²Not on Standard Record of Marriage. (Information used in NVSD to distinguish religious from civil ceremonies if type of ceremony is not stated.)³Reportable in 20 States as "Number of previous marriages."⁴For this State, cities and towns are minor civil divisions directly below the county level. (Towns are equivalents of townships.) The item "city or town" was used to code county of occurrence.⁵Name of officiant only is required on State record form. Title of officiant was also given on approximately 40 percent of sample records received.

SECTION 4 - MARRIAGES AND DIVORCES

Table 4-4. Selected Items of Statistical Information on Divorce or Annulment Records of Divorce-Registration States: 1962

(Items listed are those on the Standard Record of Divorce or Annulment, PHS-2040. "X" denotes presence of item on State record form)

STATE	ITEMS CONCERNING DIVORCE					ITEMS CONCERNING MARRIAGE			ITEMS CONCERNING HUSBAND AND WIFE			
	Date	County or county equivalent	Legal grounds	Plaintiff	To whom granted	Number of children	Date	State where marriage occurred	Date of birth or age	Race or color	Number of this marriage ¹	State of residence
Alabama	X	X	X	X	X	X	X	X	X	X	X	X
Alaska	X	X	X	X	X	X	X	X	X	X	X	X

Wisconsin	X	X	X	X	X	X	X	X	X	X	X	X
Wyoming	X	X	X	X	X	X	X	X	X	X	X	X

¹Reportable in Georgia and South Dakota as "Number of previous marriages."

Table 4-5. Marriage and Divorce Samples-Sampling Rates and Sample Size: Marriage- and Divorce-Registration Areas, 1962

(Refers only to events occurring in a specified area)

AREA AND STRATUM	Number of primary sampling areas	Sampling rate	Number of sample records	Estimated number of events ¹
MARRIAGE-REGISTRATION AREA				
Marriage-registration States-----	36	...	43,071	981,015
Stratum 1-----	4	All records	11,005	11,005
Stratum 2-----	7	1/10	4,659	46,590
Stratum 3-----	18	1/20	22,716	454,320
Stratum 4-----	7	1/100	4,691	469,100
Puerto Rico-----	1	1/20	1,106	22,120
Virgin Islands-----	1	All records	422	422
DIVORCE-REGISTRATION AREA				
Divorce-registration States-----	21	...	16,706	147,106
Stratum 1-----	2	All records	1,786	1,786
Stratum 2-----	6	1/2	6,050	12,100
Stratum 3-----	7	1/10	4,418	44,180
Stratum 4-----	6	1/20	4,452	89,040
Virgin Islands-----	1	All records	180	180

¹Number of sample records weighted by reciprocal of sampling rate.

Table 4-6. Marriage and Divorce Samples-Maximum Sampling Errors in Percentage Points, for Specified Estimates of Marriage and Divorce Records: Registration Areas and Registration States, 1962

AREA	PERCENT OF CASES WITH CHARACTERISTIC				
	2	5	10	25	50
Marriage-registration area-----	0.2	0.3	0.4	0.5	0.6
Divorce-registration area-----	0.2	0.3	0.4	0.6	0.7
Each registration State-----	0.7	1.1	1.5	2.2	2.5

SECTION 4 - MARRIAGES AND DIVORCES

Table 4-8. Divorce Sample-Sampling Error of Estimated Frequency Expressed as Percentage of Area Total: Divorce-Registration Area, Each Registration State, and Virgin Islands, 1962

(Estimates for the entire DRA have distributions of sampling errors generated by changes in contributions of cases from each stratum. For sampling errors in this table for the entire DRA, it is assumed that these contributions are proportionate to stratum totals. Figures for Alaska, South Dakota, and Virgin Islands have no sampling errors since all records were tabulated)

AREA	All divorces and annulments	SAMPLING ERROR OF ESTIMATED FREQUENCY EXPRESSED AS PERCENTAGE OF AREA TOTAL										
		1 or 99	2 or 98	3 or 97	4 or 96	5 or 95	7 or 93	10 or 90	15 or 85	20 or 80	25 or 75	50
