

## Healthy People 2010 Operational Definition

---

### **6-12. Reduce the proportion of people with disabilities reporting environmental barriers to participation in home, school, work, or community activities.**

#### **6-12d. People with disabilities reporting environmental barriers to participation in community activities.**

<b>National Data Source</b>	National Health Interview Survey (NHIS), CDC, NCHS.
<b>State Data Source</b>	Not identified.
<b>Healthy People 2000 Objective</b>	Not applicable.
<b>Changes since the 2000 Publication</b>	New subobjective.
<b>Measure</b>	Percent (age adjusted—see Comments).
<b>Baseline (Year)</b>	11 (2002)
<b>Target</b>	7
<b>Target-Setting Method</b>	Better than the best racial/ethnic subgroup.  For a discussion of target-setting methods, see Part A, section 4.
<b>Numerator</b>	Number of persons aged 18 years and older with disabilities who report limited community activities.
<b>Denominator</b>	Number of persons aged 18 years and older with disabilities.
<b>Population Targeted</b>	U.S. civilian, noninstitutionalized population.
<b>Questions Used To Obtain the National Baseline Data</b>	From National Health Interview Survey (NHIS):  ➤ <i>Thinking of your community activities such as getting together with friends or neighbors, going to church, temple or another place of worship, movies, or shopping, do problems with any of these things on the list NOW limit or prevent your participation in community activities?</i>  Yes

No  
Refused/ Not Ascertained/ Don't know

**Expected Periodicity** Periodic.

**Comments** Objective 6-12 moved from developmental to measurable during the Healthy People 2010 Midcourse Review. Four subobjectives were created, addressing environmental barriers to participation in activities by persons with disabilities at home, school, work, and in the community.

Data (except those by education status) are age adjusted to the 2000 standard population using the age groups 18-24, 25-34, 35-44, 45-64, and 65 years and over. Data by education status are age adjusted to the 2000 standard population using the age groups 25-34, 35-44, 45-64, and 65 years and over. Age-adjusted percents are weighted sums of age-specific percents. For a discussion of age adjustment, see Part A, section 7.

For some measures, data do not meet the criteria for statistical reliability, data quality, or confidentiality and have been suppressed. Information on suppression of data for the major Healthy People 2010 data systems has been published in a *Healthy People Statistical Note*.<sup>1</sup>

See Part C for a description of NHIS and Appendix A for focus area contact information.
