NATIONAL SURVEY OF FAMILY GROWTH, CYCLE III
PUBLIC USE TAPE

Introduction

Fieldwork for the National Survey of Family Growth (NSFG), Cycle III was conducted in 1982 by Westat, Inc., under contract with the National Center for Health Statistics. Interviews were conducted by professional female interviewers in respondents' homes with 7,969 women 15-44 years of age regardless of marital status. This represents a departure from Cycles I and II, from which never married childless women were excluded.

The data from the NSFG are used by the National Center for Health Statistics as the basis for a series of reports on fertility, family formation, contraception and related issues, and by contributing agencies for their own research programs.

To make the data more widely available, a standardized micro-data tape has been prepared for distribution. This Tape Documentation Manual contains a detailed description of the data tape.

The tape consists of the raw data for the respondent and interval files, and a set of computer generated variables for each. The respondent file includes a wide range of background characteristics, a number of measures of fertility and contraception, measures of fecundity and birth expectations, use of family planning services, and marital history. The interval file contains detailed data from the pregnancy histories.

User Services

Questions and comments concerning the National Survey of Family Growth may be addressed to:

Family Growth Survey Branch
Division of Vital Statistics
National Center for Health Statistics
3700 East-West Highway
Hyattsville, Maryland 20782

or call Marjorie Horn or William Mosher at: (301) 436-8731.

The staff of the NSFG will assist users as much as possible within the constraints of time and staff availability.

Publications from the National Survey of Family Growth, Cycle III

The National Center for Health Statistics has planned reports from the NSFG, Cycle III, on the following subjects: Contraceptive use; use of services for family planning and infertility; number, timing and wantedness of births; fecundity impairments including infertility; formation and disruption of marital and non-marital unions; and the use effectiveness of contraceptives.

Individuals and educational institutions may obtain single copies of publications free of charge by writing:

Scientific and Technical Information Branch
National Center for Health Statistics
3700 East-West Highway
Hyattsville, Maryland 20782

A list of NSFG publications was published in the Spring 1983 issue of Population Index: "A Bibliography of Publications Based on the U.S. National Survey of Family Growth."

A current listing of NSFG publications and copies of the Cycle III questionnaire may be obtained by writing the Family Growth Survey Branch, Division of Vital Statistics, NCHS, 3700 East-West Highway, Hyattsville, MD 20782.

Editing of the Data Before Imputation

The data were manually edited in the field by the interviewers' supervisors, and by coders in the home office of Westat, Inc., the fieldwork contractor. Over 220 pages of computer edits, all of them reviewed by the Family Growth Survey Branch (FGSB) and the Computer Applications Staff (CAS) of the Division of Vital Statistics (DVS), NCHS, were also conducted by the contractor before the data tape was delivered to NCHS. Some of these edits were repeated by NCHS to check the accuracy of the contractor's editing. Additional computer edits for acceptable codes and internal consistency of both the raw data and the computer generated variables ("recodes") were conducted by CAS and the FGSB staff before imputation.

Missing and inconsistent data items were resolved through data retrieval in the early stages of editing, and by examination of related items in the questionnaire in the later stages. As far as possible, inconsistencies in the recodes were resolved on a case-by-case basis, based on related data. If inconsistencies could not be resolved, the case was assigned as missing for the recode, and the value was imputed. Information on data-cleaning for specific variables is included in the detailed recode specifications (Appendix 1), where relevant.

Missing Data

Data are sometimes missing for particular items, because the respondent would not or could not answer the question, or because the interviewer mistakenly skipped the question. For basic data (as opposed to "recodes") refusals and "don't know" responses were coded "7" or "8" respectively. If it was not useful for analytical purposes to code those responses, or when the datum was missing due to interviewer error or other reasons, the item was considered "not ascertained", and coded "9". For computer generated variables ("recodes") all missing data were grouped into one "not ascertained" code (9).

For a few items, data not obtained in the interview were imputed by the contractor. For instance, if the datum sought was the month in which an event occurred, but the respondent could remember only that it was "winter", the month was imputed as "January"; similarly, if the day of the month was not known, it was imputed as the 15th. For a very few respondents, race and age were also imputed, because those data were necessary to compute weights.

Imputation

For the majority of the recodes, values were imputed for cases with missing values. All imputed variables were "flagged." Recodes are listed in the Respondent and Interval File Indexes, along with tape locations for imputation flags for recodes which were imputed. This section describes how the imputation was done.

A. Imputed variables

About 120 variables in the respondent file and 2 in the interval file were imputed. The purpose of imputation was to allow NCHS to produce internally consistent national estimates in its pre-planned Advance Data and Series 23 reports. The imputed variables include social and economic characteristics, past and current contraceptive use, family planning services, fecundity, fertility and marital history. We recommend that tape users use the imputed variables for most analyses. Results using these variables should be identical to results in NCHS reports using final (not preliminary) data.

B. Imputation procedures

For most variables, the level of missing data was very low (usually under 2 percent). A hot-deck imputation procedure with a standard matrix was used. Exhibit 1 shows an example variable (VAR 165). The imputation matrix contains 4 marital status categories: never married and never had intercourse, never married and ever had intercourse, currently married, and formerly married. These are crossed with 2 race groups (black and other) and 3 age categories, making a 24-cell matrix.

For each recode, the imputation specifications include initial values for each cell. The specifications also contain the code categories, any special instructions (e.g. in the exhibit, "Donor cases should contain non-blank values"), and (in Exhibit 2) edit specifications for the imputed values.

All cases with imputed values that did not pass the edits were printed out, and looked at individually to determine whether (1) the case was imputed correctly; (2) the edit specifications were working as intended; or (3) the case was a special situation (or "override"). Specifications were revised extensively at this stage, and the process was repeated several times, until the number of cases failing the edits was manageable (i.e., a few hundred). Cases were again looked at individually, and those that did not involve special situations ("overrides") were assigned individually. The process was repeated until all cases in the entire file passed all the edits for all the "recoded" variables.

C. Special imputation procedures

More refined imputation procedures were required for two variables: poverty level income and date of first intercourse.

Poverty level income

This is the total family income expressed as a percentage of the poverty level income for a family of that size. The level of missing data on this variable

IF MIHDSRC1 = 3, then CONSTAT = 6,7,11,12,13 or 14 165-03

was quite high. Since it is needed for many policy-related analyses, a special imputation procedure was devised for it.

Initially, many cases which reported receiving food stamps, AFDC, or general assistance had relatively high imputed incomes. To correct for this, the imputation matrix was re-run separately for two groups: (1) those who received income from food stamps, AFDC, or general assistance, and (2) those who did not. The latter group had higher incomes than the former group. The data on income after imputation compare favorably to that for women 16-44 from the 1982 current Population Survey, as reported in Current Population Reports, Series P-60, No. 140, "Money Income and Poverty Status of Families and Persons in the U.S.: 1982," table 17.

Date of First Intercourse

This variable was imputed differently for 3 groups of respondents, as shown in Exhibits 3,4, and 5:

- (1) Never married childless women
- (2) Women with 1 or more births
- (3) Ever married childless women

(1) For never married childless women who were sexually active, age at first intercourse was imputed, and the date was calculated from the age. The imputed date must be later than the date of menarche, before the date of interview and before first conception, if any (See exhibit 3).

(2) For women with 1 or more births, the interval in months from date of first intercourse to date of first birth was imputed, and the date of first intercourse was obtained by subtracting the imputed interval from the date of first birth. The imputed date of first intercourse must be greater than or equal to the date of menarche, and less than or equal to the date of interview, date of first conception, first birth, and first marriage if any (Exhibit 4).

(3) For ever married childless women the interval in months from date of first intercourse to date of first marriage was imputed, and the date of first intercourse was obtained by subtraction. The imputed date must be greater than or equal to the date of menarche and less than or equal to the dates of interview, first marriage, and first conception (Exhibit 5).

Cases that failed these edits were run through the imputation program several more times with different donor cases. If they still failed the edits, they were examined individually and assigned dates that satisfied these conditions.

EXHIBIT 5

Data Quality

As indicated in the previous sections, the FGSB and CAS of DVS have directed considerable effort toward cleaning the data, and producing a consistent data tape. Inconsistencies may remain, especially among data not related to the recodes. For several recodes there are apparent inconsistencies when the marginals are compared with one another, that are the result of using different definitions for similar concepts. For example:

1. A strict, narrow criterion based on question D-7 is used in defining the contraceptive intent of sterilization in VAR 160. As a result, fewer women are classified as sterilized for contraceptive reasons than are categorized as ever having used female sterilization in VAR 136.
2. Variable 136 (TL 1067) and TL 342, Ever-use of female sterilization, include a few hysterectomies that women reported as contraceptive in questions D-7 and D-8. Researchers who wish to limit ever-use of female sterilization to women who had tubal ligations may do so by using TL 388 or 407.
3. Never married and formerly married women whose partners are using vasectomy are classified as contraceptively sterile in VAR 160 and as fecund in VAR 360.
4. Twenty respondents for whom VAR 136=2 (Never used female sterilization) are classified as currently using female sterilization as their current method (VAR 160=01) because they had a hysterectomy and answered yes to question D-7.
5. The definitions of "fecund" in VAR 310 and VAR 360 differ. (See recode specifications, Appendix 1).
6. Throughout, there are 1195 women for whom certain questions are inapplicable because they have never had intercourse, or they are never married and have not had intercourse since menarche. They are classified as follows on VAR 160: 1188 women have never had intercourse; 2 have not had intercourse since menarche, and five (never-married) have never had intercourse and are classified as non-surgically sterile for a total of 1195.
7. In VAR 170, most recent contraceptive method, a total of 1244 women are classified "Never had intercourse, or under 25 and had intercourse only once, or has not had intercourse since first menstrual period." The sum of those three separate categories, including the five sterile women mentioned in point 5, is 1240 for VAR 160. The difference of 4 includes one respondent, younger than 25 who had intercourse only once and who was currently pregnant; and three ever-married women who had never had a menstrual period.

In these cases, as with all the computer generated variables, reference to the detailed specifications (Appendix 1) for clarification is recommended.

Evaluation of selected data items by the FGSB has identified a few items which are of questionable quality and should be analyzed with caution. These include pregnancies ending in induced abortions, income and date of first intercourse (after menarche).

Abortions

As in the past in surveys of this kind, abortions were underreported by NSFG respondents. The number of induced abortions in the 5 years before the survey represents about 47 percent of the number reported during 1977-1981 by the Alan Guttmacher Institute (AGI). The AGI data are based on national surveys of all known providers of abortion services, including public and private hospitals, clinics and private physicians. Underreporting is more severe among non-white women than white women. The number reported by non-white women represents 25 percent of the AGI figure for non-white women, compared with 57 percent when NSFG data are compared to AGI data for white women.

With due allowance for sampling variability, estimates of numbers of live births and of miscarriages and stillbirths correspond fairly well to information from other data sources. It appears that, rather than misreporting pregnancy outcomes, the majority of the underreporting is the result of women not reporting at all the pregnancies that ended in abortions.

Income

The primary problem with this variable is the level of missing data. See section on imputation.

Date of First Intercourse

Data on the timing of first sexual intercourse are located in TL 190-196 and in the computer-generated variable VAR 540. They were also used to compute VAR 965, VAR 510 and VAR 511. This information was missing for 7 percent of cases, and inconsistent with other information for an additional 4 percent of cases. Inconsistencies included dates of first intercourse that were before the first menstrual period (rather than after the first menstrual period, which was the date requested), after the date the first pregnancy began, or after the date of first marriage. Inconsistent cases were examined on a case-by-case basis and one of the following steps was taken:

- o the basic data in TL 190-196 were assigned the not ascertained code and later imputed, when the inconsistency was large (6 or more months). For these cases, TL 190-196 is coded as missing and VAR 540 contains an imputed value (141 cases).
- o the basic data and VAR 540 were adjusted the minimum amount necessary to achieve consistency, and both were flagged as estimates with a 9 in the first position of the field, when the inconsistency was less than 6 months. These adjustments are detailed in the specifications for VAR 540 (150 cases).
- o the basic data and VAR 540 were left as is when other information in the questionnaire corroborated the "inconsistent" data.

Because of these adjustments, these data should not be used to produce estimates of pregnancies resulting from first intercourse. Such estimates will be too high.

Sample Design, Estimation Procedures and Variance Estimation

A complete draft report on sample design, estimation procedures and variance estimation is included in Appendix 2. The following briefly summarizes those topics.

A. Sample Design

Cycle III of the National Survey of Family Growth was designed to represent all women aged 15 to 44 in the noninstitutional population of the conterminous United States. The sample design for Cycle III was a five stage area probability design that incorporated oversamples of black and teenage women and a supplementary sample of women living in college dormitories and sororities.

The counties and independent cities in the conterminous United States were combined to form a frame of primary sampling units (PSU's). During the first stage of the sampling process, which involved extensive stratification, 79 PSU's were chosen from this frame. Census block groups or enumeration districts (ED's) were then identified within each of the selected PSU's during the second stage, ED's were stratified according to the percent of their population that was black, and a systematic sample was drawn. The rate at which ED's were sampled varied from one stratum to the next in order to produce the desired racial composition in the final sample of women.

In the third stage, area segments (groups of houses or apartments) within sample ED's were identified and one segment was selected randomly from each ED. In the fourth stage, households within sample segments were selected. In segments from ED's with a 10-percent or greater black population, black households were selected at a higher rate than other households. In the fifth stage of sampling, women were selected from eligible households. In households containing at least one eligible woman, the selection rate depended on the number of eligible women in the household, stratum, age, race, and marital status; no more than one woman was selected from any household.

B. Estimation Procedures

All analyses undertaken with these data should be "weighted." That is, in order to produce unbiased estimates for the entire population of eligible women in the conterminous United States, the sample data must be inflated to the level of the population from which the sample was drawn. Estimates using unweighted data will be incorrect, because of the oversampling of black and teenage women. The inflation factor, or weight, for each woman is the product of three types of adjustments.

(1) Inflation by the reciprocal of the probabilities of selection.--The weight or probability of selection for each woman is the product of the reciprocals of the probabilities of selecting (1) the primary sampling unit, (2) the enumeration district, (3) the segment, (4) the household, and (5) the eligible sample person.

(2) Nonresponse adjustment.--Each sample weight was adjusted for nonresponse to the Household Screener (screener nonresponse) and nonresponse to the

detailed NSFG questionnaire (interview nonresponse). Adjustment for household screener nonresponse was achieved by imputing to nonresponding households the characteristics of responding households in the same primary sampling unit and stratum. Adjustment for interview nonresponse was achieved by imputing to nonresponding women the characteristics of responding women in the same age-race-marital status class and primary sampling unit. Response to the household screener was 95.1 percent; response to the interview was 83.5 percent, yielding a combined response rate of 79.4 percent.

(3) Poststratification by age and race.--The nonresponse adjusted weight for each respondent was then multiplied by a poststratification adjustment factor determined by the woman's age, race and marital status. Adjustment factors were equal to independent control totals for October 1982, the approximate midpoint of data collection. The control totals were based on data from the Current Population Survey (CPS) conducted by the U.S. Bureau of the Census, interpolated to the midpoint of interviewing.

C. Variance Estimation

Since the weighted statistics computed from these data are based on a sample, they will differ somewhat from the statistics that would result if a complete census had been taken of all 54 million women represented by the NSFG. The differences that might result by chance because only a sample of the full population is surveyed are measured by the standard error. The chances are about 65 out of 100 that a sample estimate would differ from a complete count by less than one standard error, and about 95 out of 100 that a sample estimate would differ by less than two standard errors.

Users are cautioned that tables of standard errors based on assumptions of simple random sampling do not accurately estimate standard errors for the NSFG, given the complex multistage design of the sample.

Standard errors for the NSFG were estimated using the balanced half-sample replication method. Because it would be prohibitively expensive to estimate, and cumbersome to publish a standard error for each percent or other statistic by this technique, standard errors were computed for selected statistics and population sub-groups that were chosen to represent a broad range of demographic characteristics and a wide variation in the size of the estimates themselves. Curves were then fitted to the relative standard error estimates for subgroups according to the model

$$RSE(N') = (A+B/N')^{\frac{1}{2}}$$

where N' is the number of women, and A & B are the parameters whose estimates determine the shape of the curves.

Equations for calculating standard errors and relative errors for aggregates or percents are included in Appendix 2, along with a description of the population subgroups used for curve-fitting, and the resultant parameters.

Inapplicable Questions

Not all questions were applicable to all respondents. If a question was not applicable, the interviewer skipped to the next applicable question. With certain exceptions noted in the tape documentation, tape positions are blank for inapplicable questions. Some computer programs read a blank as a nonnumeric character, but others read it as zero. Users should take care to distinguish between blanks and zeroes in programs used with these data.

The meaning of statistics based on responses to a question will depend, of course, on who was asked the question and who was not. Because of the rather complex skip patterns used in the interview, it is often not apparent who was asked a particular question. In the documentation, however, the description of the inapplicable (blank) code category for a question includes a precise listing of women who were not asked the question. In addition to consulting that list, the sequence of questionnaire items including an item of interest should be examined carefully to determine the implications of skip patterns for interpreting responses.

The documentation for the computer generated variables ("recodes") also provides brief descriptions of inapplicable categories. The more complete definitions of the inapplicable categories contained in the recode specifications also should be examined.

Date Codes

During the interview, dates of events were obtained either as the year alone, as month and year, or as day, month, and year. For this file, year and month were converted to "century months" by multiplying the year by 12 and adding the number of the month, where January = 1, February = 2, and so on. For instance, the century month code for February 1959 is $(59 \times 12) + 2 = 710$. The century month form is more convenient for computing an interval between dates. (Note: All century month dates occupy a four column field.) Days of the month were deleted from the file.

The century month codes from 301 through 1000 are shown in the array in the following pages with the years from 1925 through 1983 on the vertical axis and the months on the horizontal axis. The code for a given month and year can be found by reading across the line for the appropriate year to the column headed by the appropriate month.

In cases where the question was inapplicable the position has four blanks.

In the basic data file, if the date was refused, the code is 9797; if the date of the event was not known, the date code is 9898; other missing values are coded 9999.

In a few instances, 9696 is used to indicate a response other than a date. For example, in question A-8, concerning the date of first menstrual period, respondents whose periods had not yet started are coded 9696. All such cases are clearly indicated in the documentation.

In cases where the year was given but the month was not known, in the basic data, the first digit of the date code is a 9 to indicate that the date is an estimate. The remaining three digits are equal to the century month corresponding to the month of June in the year given. If a year and a season were given, the month was imputed by Westat as indicated in the section on missing data. In those cases, the dates are not flagged as estimates.

With the exception of VAR 540 and VAR 606, estimated century months are not flagged in the computer generated variables. Estimated dates for recodes other than VAR 540 and VAR 606 may be identified by comparing them with the raw data items from which they were constructed.

DATE CODES

Occupational Classification

All occupations are classified according to the 3-digit codes used in the 1980 U.S. Census. A copy of the occupational classification system is attached for reference.

Occupational Classification System

Equivalent numeric codes follow the alphabetic code. Either code may be used, depending on the processing method. Numbers in parentheses following the occupation categories are the 1977 Standard Occupational Classification code equivalents. The abbreviation "pt" means "part" and "n.e.c.:" means "not elsewhere classified."

Occupation code	Occupation category	Occupation code	Occupation category
MANAGERIAL AND PROFESSIONAL SPECIALTY OCCUPATIONS		MANAGERIAL AND PROFESSIONAL SPECIALTY OCCUPATIONS—Con.	
Executive, Administrative, and Managerial Occupations		Professional Specialty Occupations—Con.	
		Engineers, surveyors and mapping scientists—Con.	
003	Legislators (112)	048	Chemical engineers (1626)
004	Chief executives and general administrators, public administration (111)	049	Nuclear engineers (1627)
005	Administrators and officials, public administration (pt 113 and 119, except 1136)	053	Civil engineers (1628)
006	Administrators, protective services (pt 113)	054	Agricultural engineers (1632)
007	Financial managers (122)	055	Electrical and electronic engineers (1633, 1636)
008	Personnel and labor relations managers (123)	056	Industrial engineers (1634)
009	Purchasing managers (124)	057	Mechanical engineers (1635)
013	Managers, marketing, advertising, and public relations (125)	058	Marine engineers and naval architects (1637)
014	Administrators, education and related fields (128)	059	Engineers, n.e.c. (1639)
015	Managers, medicine and health (131)	063	Surveyors and mapping scientists (1642)
016	Managers, properties and real estate (1353)	Mathematical and computer scientists	
017	Postmasters and mail superintendents (1344)	064	Computer systems analysts and scientists (171)
018	Funeral directors (pt 1359)	065	Operations and systems researchers and analysts (172)
019	Managers and administrators, n.e.c. (1136, 121, 126, 127, 132-139, except 1344, 1353, pt 1359)	066	Actuaries (1732)
	Management related occupations	067	Statisticians (1733)
023	Accountants and auditors (1412)	068	Mathematical scientists, n.e.c. (1739)

¹ Code used when not-reported cases are not allocated.

Organization of the Data

The data file consists of 21,737 records, of which 7,969 are respondent records (one record for each sample women) and 13,768 are interval records (one record for each closed pregnancy interval reported by sample women).

The respondent records are arranged in ascending order by identification number. This five digit I.D. number appears in locations 1494-1498 on both respondent and interval records. Following each respondent record are the interval records (if any) pertaining to that respondent, arranged in ascending order by pregnancy number. In tape location 1499-1500 of each record, respondent or interval, is a "record type" code: code 00 identifies a respondent record, and code 01 to 17 identifies the first through the 17th interval record for each respondent.

All records, respondent or interval, are the same length, 1500 positions. Thus, the file consists of fixed length records of two types, hierarchically arranged. The file can be processed by software packages which assume fixed length records of one type (e.g., SPSS) by selecting either respondent or interval records (not both) using the record type code; however, with such a package only records of one type can be processed on each pass over the data. Software packages which can process files with records of two or more types (e.g., Crosstabs or TPL) can process this file and relate data from both interval and respondent records on the same pass. A file of fixed length records of one type containing the information from both the respondent and interval records can be created from this file. Each record would consist of the respondent information, followed by information for each of a woman's intervals, followed by enough blank spaces to make each record as long as that of the respondent who had the largest number of intervals. Each record would be very long but the file could be processed by an SPSS-type system, and interval and respondent data could be related on the same pass.

A. Respondent Record

The tape layout of the respondent file is shown in outline form on page 36. The information in tape locations 11-821 is arranged on the tape as it appears on the interview schedule. The arrangement is generally by topical areas; but to improve the flow of the interview, items on similar topics were sometimes separated. Note also that some questions were skipped for some women, depending on their answers to earlier questions, and that slightly different forms of the interview schedule were used for women age 25 and older and for women under age 25. The user should examine the sequence of questions in which the item of interest occurs to determine which sample women were asked the questions, and in which form the question was asked.

Tape positions 822 to 840, and 847 to 855 are blank; the date of interview is given in positions 841 to 846. The computer generated variables ("recodes") included on the respondent file are located in positions 1001-1295, and 1431-1464. Imputation flags for the respondent recodes are found in locations 1431-1464.

B. Interval Record

As shown in the Interval File Tape Layout outline (p. 37), positions 11-277 contain pregnancy interval information, arranged as it appeared in the interview schedule. Computer generated variables ("recodes") and imputation flags appear in positions 301-325. Except for the final seven positions containing the I.D. number and record type, the remainder of the interval record is blank, so that the interval records are equal in length to the respondent records, a requirement of some software packages.

C. Weight

Because the NSFG sample is complex, and includes oversamples of certain population subgroups, population estimates must be based on weighted data. The public use tape includes two weights.

The nonresponse adjusted weight was calculated by inflating the inverse of the probability of selection for a given case by a factor dependent on the level of nonresponse among sample cases in the same locality and with the same age, race and marital status. This weight should be used only for methodological studies of the effects of post-stratification.

The final post-stratified weight is used in official NCHS reports and its use will allow the user to replicate results in the official reports. It adjusts for (1) the probability of selection, (2) non-response, and (3) post-stratification to independent population estimates by age and race, based on the Census Bureau's Current Population Survey. We recommend that users of this tape use this weight for all their analyses, except when they are studying the effects of post-stratification.

D. Sampling and Variance Estimation Variables

As noted, the NSFG is based on a complex sample design. Therefore, the standard errors of NSFG statistics are larger than those that would be obtained through simple random sampling. Appendix 2 describes the sample design in detail and gives formulae for estimating standard errors for the main types of statistics produced from NSFG data.

Most researchers using this tape will find it convenient to use the standard error formulae and estimates given in Appendix 2. For tape users who wish to calculate their own standard errors with any of the techniques for estimating variances for complex sample designs, several items are included on the tape. The items are:

1. Pair number (TL 993) and Pseudostratum (TL 991-992): Pseudostratum describes the 37 strata into which the primary sampling units (PSUs) were paired, and pair number indicates the first and second members of each pair. These variables were used by NCHS to estimate variances (see Appendix 2), and should be usable by most researchers calculating their own variances.

2. PSU code (TL 989-990) is a two digit number from 1 to 79. The original 3-digit PSU numbers were recoded to protect the confidentiality of survey respondents. The SSU number (TL 4-6) distinguishes the secondary sampling units (or SSUs) within each PSU. The first digit of the SSU number indicates stratum, as defined in the second stage selection of enumeration districts. Stratum ranges from 1 to 5, with strata 1 to 4 including households in EDs with varying percents black, and stratum 5 including dormitory residents (see Appendix 2). These variables may not be used for small area estimation. We recommend they be used for variance estimation, only if the pair number and pseudostratum are inappropriate to the user's needs.

841-846	Interview Date
847-855	Blank
856-870	Non-response adjusted weight (1 implied decimal place)
885-975	Blank
976-982	Final Post-stratification Weight----rounded at the 7th digit (1 implied decimal place)
983-988	Blank
989-990	Primary Sampling Unit Code
991-992	Pseudostratum Number
993	Pair Number
994-1000	Blank
1001-1295	Computer Generated Variables ("Recodes")
1296-1300	Blank
1301-1430	Imputation Flags
1431-1464	Computer Generated Variables
1465-1493	Blank
1494-1498	Serial Number
1499-1500	Record type: 00 = Respondent

INTERVAL FILE LAYOUT

<u>Tape Location Numbers</u>	<u>Information for One Pregnancy Interval</u>
1-10	Blank
11-34	Date, outcome, order of pregnancy
35-139	<u>Live Births:</u> Birth order, sex, weight, residence, mortality, breastfeeding
35-69	First baby: Single or Multiple birth
70-104	Second baby: Multiple birth
105-139	Third baby: Multiple birth
140-172	Other outcomes
173-277	Periods of non-intercourse, contraceptive methods used, regularity of use, wantedness, timing
173-192	Intervals ending earlier than 1/79
193-277	Intervals ending 1/79 or later
278-300	Blank
301-325	Computer-generated variables & imputation flags
326-1493	Blank
1494-1498	I.D. Number
1499-1500	Record type: Two digit interval number

Key to Documentation

The following two sections document the contents of the respondent and the interval files. The first part of each section consists of an index listing the questionnaire items and the computer generated variables ("recodes") along with the tape location numbers for each item. The list of recodes also shows variable number, the tape location number of the recode imputation flag, and a mnemonic variable label. The index is followed by documentation of the tape contents.

The first part of the documentation for the respondent and interval files is adapted from the documentation of the "raw" data file supplied by Westat, Inc., the fieldwork contractor. The data were originally keypunched in a deck (record) and column format, and the record and column numbers have been retained in the documentation; the record number is shown on each page, and the column numbers are shown next to the item description.

The tape location number shows the physical location of the datum on the data file. Both the column number (from the initial deck and column format) and the tape location appear under the heading "Column Number(s)." The tape location number appears directly above the column number.

For each item the documentation includes the question name or number, the question asked of the respondent, the numerical categories into which responses were coded, and detailed category descriptions.

The documentation also shows the numbers of respondents in each category of the item, separately for black women, white women, other women and women of all races combined. These marginal distributions are raw unweighted counts of sample women or pregnancy intervals; they are not estimates of numbers or distributions for the population represented by the sample. To make such estimates, sample cases must be weighted. The unweighted marginal distributions are provided only as a guide to the analyst, who often wants to know in advance if the number of cases in a particular category is large enough to sustain a particular type of analysis.

The second part of the documentation contains the recodes based on specifications prepared by the Family Growth Survey Branch staff and programmed by the Computer Applications Staff. (Appendix 1 contains the recode specifications.)

The recodes are grouped by topical area, and each set designated by a series number, as follows:

General Characteristics	Series 900
Contraceptive Use	Series 100
Family Planning Services	Series 200
Fecundity & Infertility	Series 300
Fertility	Series 400
Sexual Intercourse & Marriage	Series 500
First Pregnancy	Series 600

Instead of question number, the recode documentation lists a mnemonic variable label. Also, record and column numbers are excluded; only the tape location number is given under "Column Number(s)." Other parts of the recode documentation are the same as that for the basic data.

RESPONDENT FILE INDEX - CYCLE III

A. LIST OF QUESTIONNAIRE ITEMS BY TAPE LOCATION

<u>TAPE LOCATION</u>	<u>QUESTION NUMBER</u>	<u>DESCRIPTION</u>
11		Questionnaire Type
12-15		Century Month of Birth
16-17		Blank
REPRODUCTIVE KNOWLEDGE AND SEX EDUCATION		
18	A1	Respondent assessment of accuracy of reproductive information provided to young people today
19	A2A	Ever talked with parents about female monthly cycle
20	A2B	Ever talked with parents about how pregnancy occurs
21	A2C	Ever talked with parents about venereal disease or vd
22	A2D	Ever talked with parents about methods of birth control
23	A3	With which parent(s) did R discuss
24	A4A	Before age 18, whether any formal instruction on the <u>female monthly cycle</u>
26	*A5A2	Formal instruction from high school
27	*A5A3	Formal instruction from church or religious school
28	*A5A4	Formal instruction from community center or youth organization
29	*A5A5	Formal instruction from family planning clinic
30	*A5A6	Formal instruction from some other place
31	A4B	Before age 18, whether any formal instruction on <u>how pregnancy occurs</u>
32	*A5B1	Formal instruction from elementary school
33	*A5B2	Formal instruction from high school
34	*A5B3	Formal instruction from church or religious school
35	*A5B4	Formal instruction from community center or youth organization
36	*A5B5	Formal instruction from family planning clinic
37	*A5B6	Formal instruction from some other place
38	A4C	Before age 18, whether any formal instruction on <u>venereal disease or VD</u>
39	*A5C1	Formal instruction from elementary school
40	*A5C2	Formal instruction from high school
41	*A5C3	Formal instruction from church or religious school
42	*A5C4	Formal instruction from community center or youth organization
43	*A5C5	Formal instruction from family planning clinic
44	*A5C6	Formal instruction from some other place
45	A4D	Before age 18, whether any formal instruction on <u>methods of birth control</u>
46	*A5D1	Formal instruction from elementary school
47	*A5D2	Formal instruction from high school

* Questions asked on under-25 questionnaire only

48	*A5D3	Formal instruction from church or religious school
49	*A5D4	Formal instruction from community center or youth organization
50	*A5D5	Formal instruction from family planning clinic
51	*A5D6	Formal instruction from some other place
52-53	A6	Age when R first received formal instruction on methods of birth control
54	A7	During Menstrual Cycle, when is average woman most likely to become pregnant
55-58	A8	Month and year of first menstrual period
59-60	A8A	DK probe: Age at First menstrual period
61	A8B	Before nth birthday or after
62	A9	Has R had period in last 30 days

BIRTHS AND PREGNANCIES

63	B1	Whether R currently pregnant
64	B2	DK probe: Does R think pregnant or not
65	B3	Whether R has visited a doctor or clinic for prenatal care
66-67	B4	Number of months pregnant at first prenatal care visit
68-69	B5	Place of first prenatal visit
70	B6	Since first visit, frequency of visits for prenatal care
71	B7	Probable outcome of current pregnancy
72-73	B8,B9	Number of previous pregnancies
74	B10	Ever missed period and thought pregnant
75	B11	Ever had sexual intercourse
76-77	*B12-1	Labor force status at time of (first)pregnancy First mention
78-79	*B12-2	Second mention
80-81	*B13-1	With whom living at time of (first)pregnancy First mention
82-83	*B13-2	Second mention
84-85	*B13-3	Third mention
86	*Box 5	Whether R living with husband
87-88	*B14	Time during pregnancy that R first discussed fact of pregnancy with baby's father
89-90	*B15	Time during pregnancy that R first dicussed fact of pregnancy with her parents
91-92	*B16-1	Who did R talk to about possible pregnancy First mention
93-94	*B16-2	Second mention
95-96	*B16-3	Third mention
97-98	*B17-1	Labor force status six months after first pregnancy ended First mention
99-100	*B17-2	Second mention

With whom was R living six months after pregnancy ended

101-102	*B18-1	First mention
103-104	*B18-2	Second mention
105-106	*B18-3	Third mention

107-108		Number of pregnancies ending in live births
109-110		Number of pregnancies ending in abortion
111-112		Number of pregnancies ending in miscarriage or stillbirth
113		Respondent currently pregnant
114-115		Total number of pregnancies

ADOPTIONS

116	B52	Whether any adopted children
117-118	B53	Number of children adopted
		<u>First adopted child</u>
119-122	B54-1	Date of adopted child's birth
123-124	B55-1	Age of child when R took responsibility
125	B56-1	Child's relationship to R before adoption
126	B57-1	Place of adopted child's birth
		<u>Second adopted child</u>
127-130	B54-2	Date of adopted child's birth
131-132	B55-2	Age of child when R took responsibility
133	B56-2	Child's relationship to R before adoption
134	B57-2	Place of adopted child's birth
		<u>Third adopted child</u>
135-138	B54-3	Date of adopted child's birth
139-140	B55-3	Age of child when R took responsibility
141	B56-3	Child's relationship to R before adoption
142	B57-3	Place of adopted child's birth
		<u>Fourth adopted child</u>
143-146	B54-4	Date of adopted child's birth
147-148	B55-4	Age of child when R took responsibility
149	B56-4	Child's relationship to R before adoption
150	B57-4	Place of adopted child's birth
151-158	B54-5	<u>Fifth adopted child</u>
	to B57-5	
159-166	B54-6	<u>Sixth adopted child</u>
	to B57-6	
167-174	B54-7	<u>Seventh adopted child</u>
	to B57-7	

CONTRACEPTIVE BACKGROUND

Whether R knows how to use:

175	C1A	Pill
176	C1B	Condom
177	C1C	Foam
178	C1D	Jelly, cream
179	C1E	Suppository, insert

180	C1F	Diaphragm, with/without jelly
181	C1G	Douche
182	C1H	IUD,coil,loop
183	C1I	Operation, female sterilization
184	C1J	Operation, male sterilization
185	C1K	Natural family planning, --safe period by temperature or cervical mucous test
186	C1L	Rhythm (calendar) method
187	C1M	Withdrawal
188	C1N	Abstinence
189	C1P	Any other method
190-193	C2	Date of first sexual intercourse--century month
194-195	C2A	DK probe: Age at first intercourse
196	C2B	Before nth birthday or after
197	*C3	How long before next intercourse
198-201	C31 & C33-1B	Beginning date of first period of nonintercourse in open interval (century months)
202-205	C31 & C33-1E	Ending date of first period of nonintercourse in open interval (century months)
206-209	C31 & C33-2B	Beginning date of second period of nonintercourse in open interval (century months)
210-213	C31 & C33-2E	Ending date of second period of nonintercourse in open interval (century months)
214-217	C31 & C33-3B	Beginning date of third period of nonintercourse in open interval (century months)
218-221	C31 & C33-3E	Ending date of third period of nonintercourse in open interval (century months)
222	C34	Since first intercourse/last pregnancy ever used method of birth control for one month or more
223	Box 22- 25	Whether R currently in period of non-intercourse
224-226	C35-M1	<u>First method used</u>
227-230	C36-M1	Beginning date of first method (century month)
231	C37-M1	How often skipped using method
232	C38-M1	Respondent and partner still using
233-236	C39-M1	Ending date of first method (century month)
237-239	C35-M2	<u>Second method used</u>
240-243	C36-M2	Beginning date of second method (century month)
244	C37-M2	How often skipped using method
245	C38-M2	Respondent and partner still using
246-249	C39-M2	Ending date of second method (century month)
250-252	C35-M3	<u>Third method used</u>
253-256	C36-M3	Beginning date of first method (century month)
257	C37-M3	How often skipped using method
258	C38-M3	Respondent and partner still using
259-262	C39-M3	Ending date of third method (century month)
263-265	C35-LM	<u>Last method used</u>
266-269	C36-LM	Beginning date of last method (century month)

270	C37-LM	How often skipped using method
271	C38-LM	Respondent and partner still using
272-275	C39-LM	Ending date of last method (century month)
276	C40	Whether reason for current non-use is wants pregnancy as soon as possible
277	C41	Whether partner wants pregnancy as soon as possible
278	C42	What Respondent would do if became pregnant
279	C43	Frequency of intercourse in last three months in which R having intercourse
280	C45	(In addition to methods mentioned) has Respondent used any (other) method to delay or prevent pregnancy)
281	C46	Have R and partner ever used any method at all even if only one time
282-283	C47-1	Which methods: first mention
284-285	C47-2	Other methods: second mention
286-287	C47-3	Other methods: third mention
288-290	C48	First method ever used
291-292	*C49	Source of first method ever used
293	C50	Timing of use of first method (in relation to first intercourse)
294-296	Box 29	<u>Current Method</u>
297-298	C51	Source of supplies for current method
299-300	C52	First source of supplies for current method
301	Box 31	Whether R has ever used pill
302	C53	When did R get most recent pill prescription
303-304	C54	Pill brand used (currently/most recently)
305-306	C55	Number of months (using/used) brand Other pill brands used for six months or more:
307-308	C56-1	First mention
309-310	C56-2	Second mention
311-312	C56-3	Third mention
313-315	C57	Total number of months R has used pill
316	C58 & C62	Whether Doctor advised R to stop using pill
317-318	C58 & C62-1	Doctor's Advice: First mention
319-320	C58 & C62-2	Second mention
321	C58 & C60	Whether other reasons R stopped using pill
322-323	C58 & C60-1	Other reasons: first mention
324-325	C58 & C60-2	Other reasons: second mention
326-327	C58 & C60-3	Other reasons: third mention
328-329	C63	Average number cigarettes smoked per day during last/current pregnancy
330	C64	Frequency of drinking alcohol during last/current pregnancy

331-333	C65	Method R expects to use to insure no further pregnancies once she has expected number of children.
		METHOD CALENDAR
		Ever used:
334	MC-A	Pill
335	MC-B	Condom, rubber
336	MC-C	Foam
337	MC-D	Jelly, cream alone
338	MC-E	Suppository or insert
339	MC-F	Diaphragm with/without jelly/cream
340	MC-G	Douche
341	MC-H	IUD, coil, loop
342	MC-I	Female sterilization
343	MC-J	Male sterilization, vasectomy
344	MC-K	Safe period: by temperature or cervical mucous test
345	MC-L	Rhythm or safe period by calendar
346	MC-M	Withdrawal
347	MC-N	Abstinence
348	MC-P	"Other" method
		January 1979
349-351	MC-1A	Method used
352	MC-1B	Number of method(s) used and priority group of additional methods used
		July, 1979
353-355	MC-2A	Method used
356	MC-2B	Number of method(s) used and priority group of additional methods used
		January, 1980
357-359	MC-3A	Method used
360	MC-3B	Number of method(s) used and priority group of additional methods used
		July, 1980
361-363	MC-4A	Method used
364	MC-4B	Number of method(s) used and priority group of additional methods used
		January, 1981
365-367	MC-5A	Method used
368	MC-5B	Number of method(s) used and priority group of additional methods used
		July, 1981
369-371	MC-6A	Method used
372	MC-6B	Number of method(s) used and priority group of additional methods used
		January, 1982
373-375	MC-7A	Method used
376	MC-7B	Number of method(s) used and priority group of additional methods used
		July, 1982
377-379	MC-8A	Method used
380	MC-8B	Number of method(s) used and priority group of additional methods used

381-383	MC-9A	Interview month
384	MC-9B	Method used
		Number of methods(s) used and priority group of additional methods used

STERILITY AND SUBFECUNDITY

385	D1	Possible or Impossible to have another baby
386	D2	Whether impossible because of an operation or operations
387	D3	Number of operations
388	D3-1	<u>Type of Operation - #1</u>
389-392	D4-1	Century month operation occurred
393	D5-1	Where operation performed
394-395	D6-1-1	Way in which bill paid: First mention
396-397	D6-1-2	Second mention
398-399	D6-1-3	Third mention
400	D7-1	Operation at least partly for contraceptive reasons
401-402	D8-1-1	Other important reasons: first mention
403-404	D8-1-2	Second mention
405-406	D8-1-3	Third mention
407	D3-2	<u>Type of Operation - #2</u>
408-411	D4-2	Century month operation occurred
412	D5-2	Where operation performed
413-414	D6-2-1	Way in which bill paid: First mention
415-416	D6-2-2	Second mention
417-418	D6-2-3	Third mention
419	D7-2	Operation at least partly for contraceptive reasons
420-421	D8-2-1	Other important reasons: first mention
422-423	D8-2-2	Second mention
424-425	D8-2-3	Third mention
426	D9	Whether R would like to have a baby, if it were possible (R or husband has had sterilizing operation)
427	D10	Whether R would like to have operation reversed
428	D11	Whether husband would like to have operation reversed
429-430	D12-R	Reason physically impossible to have a(nother) baby - Respondent
431-432	D12-H	Reason physically impossible to have a(nother) baby - Husband
433-436	D13	Century month it became impossible to have another baby
437	D14	Whether R would like to have a(nother) baby, if it were possible (R or husband sterile from causes other than operation)
438	D15	Problem or difficulty for R or husband to conceive or deliver a(nother) baby
439	D16	Reason it would be difficult to have another baby
440	D17	Whether Doctor advised never to become pregnant
441	D18	Pregnancy dangerous for R, and/or the baby, or for some other reason
442	D19	Whether R will have operation to avoid pregnancy
443	D20	Whether husband will have operation to avoid pregnancy
444	D21	Will woman have any future pregnancies terminated

445	D22	Whether R would like to have a(nother)baby, if it were possible (not sterile)
BIRTHS INTENDED AND EXPECTED		
446	D23 & D30	Intend to have another baby
447-448	D24 & D31-L	Number of additional babies intended (or low end of range)
449-450	D24 & D31-H	Number of additional babies intended (or high end of range)
451	D25 & D32	How sure of number intended
452-453	D26 & D33	Largest number of (additional) babies expected
454-455	D27 & D34	Smallest number of (additional) babies expected
456	D28 & D35	Number of babies expected in next five years
457-458	D29 & D36	Age at which R expects to have last baby
459-460	D37-L	Number of children would like to have if could choose now (or low end of range)
461-462	D37-H	Number of children would like to have if could choose now (or high end of range)
463-464	D38-L	DK probe: Number if R <u>could</u> choose (or low end of range)
465-466	D38-H	DK probe: Number if R <u>could</u> choose (or high end of range)
467-468	D39	Which single number in range
469	Box 45	Whether R has ever had intercourse

INFERTILITY SERVICES

470	E1	Whether R or husband ever visited doctor or clinic to talk about ways to help R become pregnant
471	E2	Whether R or husband ever visited doctor or clinic to talk about ways to help R prevent miscarriage
472	E3	Whether R and/or husband received treatment or advice
473-474	E3-R1	Medical treatment/advice received by Respondent First mention
475-476	E3-R2	Second mention
477-478	E3-H1	Medical treatment/advice received by husband First mention
479-480	E3-H2	Second mention
481-484	E4	Century month of last visit for infertility treatment or advice
485-486	E-5	Source of last infertility treatment/advice
487	Box 47	Whether R or Husband became sterile or had a sterilizing operation before January 1979

FAMILY PLANNING SERVICES

488	E6	During past three years, has doctor or other trained person talked with R about preventing or delaying a pregnancy
-----	----	--

		In past three years has received advice or counseling about:
489	E7-A	Any problems or worries about sexual intercourse
490	E7-B	An unwanted pregnancy or one that occurred at a bad time
491	E7-C	Having a sterilizing operation
492	E7-D	Whether or not to have an abortion
493	E7-E	Birth control
		In the past three years R had a check-up or medical test to:
494	E8-F	Check for correct use, fit, or position of a birth control method
495	E8-G	Check for health problems from using a birth control method
496	E8-H	A pregnancy test
497	E9-I	Whether R renewed a method of birth control during the last three years
498	E9-J	Whether R got a new method of birth control during the last three years
		Services R received in the last three years which were received in the last 12 months:
499-500	E10-1	First mention
501-502	E10-2	Second mention
503-504	E10-3	Third mention
505-506	E10-4	Fourth mention
		Source of family planning services in the past 12 months:
507-508	E11-1	First mention
509-510	E11-2	Second mention
511	E12	Number of family planning visits in last 12 months
512	E13	Number of visits to clinics in last 12 months
513	E14	Number of visits to private medical services in last 12 months
		Other services received at family planning visit in past 12 months:
514	E15-A	Pap smear
515	E15-B	Pelvic exam
516	E15-C	Breast exam
517	E15-D	Blood pressure test
518	E15-E	Urinalysis
519	E15-F	Test for venereal disease
		Services received at last visit:
520-521	E16-1	First mention
522-523	E16-2	Second mention
524-525	E16-3	Third mention
526-527	E16-4	Fourth mention
528-529	E17	Source of last family planning visit
		Way in which last family planning visit bill paid:
530-531	E18-1	First mention
532-533	E18-2	Second mention

534-535	E18-3	Third mention
536	E19	Whether R has <u>ever</u> had a family planning visit, if not in the past three years
537-540	E20	Century month of first family planning visit
541-542	E20A	DK probe: Age at first family planning visit
543	E20B	Whether before nth birthday or after
544-545	*E21-1	Services received at first visit: First mention
546-547	*E21-2	Second mention
548-549	*E21-3	Third mention
550-551	*E21-4	Fourth mention
552-553	*E22	Source of first family planning visit Referral source for first family planning visit:
554-555	*E23-1	First mention
556-557	*E23-2	Second mention
558	E24	Whether ever treated for PID
559	E25	Number of times hospitalized for PID
560	E26	Whether ever treated for gonorrhea

FAMILY BACKGROUND AND EDUCATION

561	F1	Race of Respondent: interviewer observation
562	F2	Living with own mother and father at age 14
563	F3	Reason not living with one or both
564-565	F4	Age last lived with both parents
566-567	F5	With whom did R live at age 14
568-569	F6	Father's education
570-572	F7	Father's main occupation
573-574	F8	Mother's education
575-576	F9	Mother's main occupation
578-579	F10	Highest grade of regular school attended by Respondent
580	F11	Whether completed highest grade attended
581-584	F12	Century month last attended regular school
585-586	F12A	DK probe: Age when last attended regular school
587	F12B	Whether before nth birthday or after
588-589	F13	Age first started dating

MARITAL HISTORY

590-591	F14	Number of times married (including current)
592-595	F15	Century month of <u>current/only marriage</u>
596-597		Blank
598	F15-I	Whether current/only marriage informal
599-602	F16-1CM	Century month of <u>first marriage</u>
603-604		Blank
605	F16-1I	Whether first marriage informal
606	F18-1	Type of dissolution
607-610	F19-1CM	Century month first husband died
611-612		Blank
613-616	F20-1CM	Century month R and first husband stopped living together (divorced)
617-618		Blank
619-622	F21-1CM	Century month of divorce/annulment
623-624		Blank

625-628	F22-1CM	Century month R and first husband stopped living together (separated)
629-630		Blank
631-634	F16-2CM	Century month of <u>second marriage</u>
635-636		Blank
637	F16-2I	Whether second marriage informal
638	F18-2	Type of dissolution
639-642	F19-2CM	Century month second husband died
643-644		Blank
645-648	F20-2CM	Century month R and second husband stopped living together (divorced)
649-650		Blank
651-654	F21-2	Century month of divorce/annulment
655-656		Blank
657-660	F22-2CM	Century month R and second husband stopped living together (separated)
661-662		Blank
663-666	F17-CM	Century month of <u>most recent marriage</u>
667-668		Blank
669	F17-I	Whether most recent marriage informal
670	F18-3	Type of dissolution
671-674	F19-3CM	Century month most recent husband died
675-676		Blank
677-680	F20-3CM	Century month R and most recent husband stopped living together (divorced)
681-682		Blank
683-686	F21-3CM	Century month of divorce/annulment
687-688		Blank
689-692	F22-3CM	Century month R and most recent husband stopped living together (separated)
693-694		Blank
695-696	F23	Education at first marriage

EMPLOYMENT, OCCUPATION

697	F24	Work for pay before only birth
698	F25	Work for pay before birth of first child
699	F26	Work for pay between first birth and last birth
700-701	F27	How long before birth of last child did Respondent stop working
702	F28	Work for pay since birth of last child
703-706	F29	Century month began work after last child was born
707	F30	Ever worked for pay
707-709	F31-1	Employment status last week: First mention
710-711	F31-2	Second mention
712-714	F32&33	Current or last occupation
715-716	F35	Number of hours worked at current/last job
717	F36	Regular working hours
718-719	F37	Earnings reported

CHILD CARE

720	Box 59	Whether R has own, step, or adopted children aged 0-12 in household
-----	--------	---

721	F38	Whether any regular child care arrangements
722-723		Number of children receiving child care
		<u>Child #1</u>
724-725	CH-1	Age
726-727	F39-1	Average number of hours of child care per week
728	F40-1	Whether child care free or paid
729	F41-1	Location of child care
730	F42-1	Person who provides care of child
		<u>Child #2</u>
731-732	CH-2	Age
733-734	F39-2	Average number of hours of child care per week
735	F40-2	Whether child care free or paid
736	F41-2	Location of child care
737	F42-2	Person who provides care of child
		<u>Child #3</u>
738-739	CH-3	Age
740-741	F39-3	Average number of hours of child care per week
742	F40-3	Whether child care free or paid
743	F41-3	Location of child care
744	F42-3	Person who provides care of child
		<u>Child #4</u>
745-746	CH-4	Age
747-748	F39-4	Average number of hours of child care per week
749	F40-4	Whether child care free or paid
750	F41-4	Location of child care
751	F42-4	Person who provides care of child
		<u>Child #5</u>
752-753	CH-5	Age
754-755	F39-5	Average number of hours of child care per week
756	F40-5	Whether child care free or paid
757	F41-5	Location of child care
758	F42-5	Person who provides care of child

RELIGION

759	F43	Respondent's religion
760-761	F44	Denomination
762-763	F45	Frequency of attendance at services
764-765	F46	Frequency receives communion

RACE AND ETHNIC BACKGROUND

766	F47	Self-reported race
767	F48	Self-reported race: second mention
768-769	F49	National origin or ancestry: first mention
770-771	F50	Second mention

BACKGROUND OF FIRST HUSBAND

772-775	F51-CM	Century month of birth of first husband
776-777		Blank
778-779	F51A	First husband's age at marriage
780-781	F52-FH	Education of first husband
782	F53FH	Whether first marriage for first husband
783	F54-FH	Religion of first husband

BACKGROUND OF CURRENT (OR MOST RECENT) HUSBAND

784-787	F55-CM	Century month of birth of current/most recent husband
788-789		Blank
790-791	F55A	Current/most recent husband's age at marriage
792-793	F56-CL	Education of current/most recent husband
794	F57-CL	Religion of current/most recent husband
795	F58-CH	Whether this is current husband's first marriage
796	F59-CH	Whether husband has children from previous marriage not living in the household
797	F60-CH	Whether contributes regularly to their support
798-		Employment status of husband last week:
799	F61-1	First mention
800-801	F61-2	Second mention
802	F62-CH	Husband ever worked for pay
803-805	F63-64	Husband's occupation
806	F66-CH	Regular working hours
807-808	F67-CH	Husband's earnings reported
809	F68-LF	Whether marriage to last/former husband was his first marriage

SOURCES OF INCOME

		Whether R or member of family received income in past 12 months from:
810	F69A	Dividends, interest, property rental
811	F69B	Workmen's compensation
812	F69C	Social security or retirement
813	F69D	Aid to families with dependant children
814	F69E	Old age assistance
815	F69F	Food stamps
816	F69G	General assistance or other aid
817	F69H	Child support from a former husband
818	F69J	Contributions from other persons not in the household
819-820	F70	Total family income during past 12 months
821	F71	Whether R covered by Medicaid

INTERVIEW DATE

841-844		Century Month
845-846		Blank

WEIGHTS AND SAMPLING VARIABLES

856-870	Nonresponse Adjusted Weight
976-982	Final Post-Stratification Weight
989-990	Primary Sampling Unit Code
991-992	Pseudostratum Number
993	Pair Number
1494-1498	I.D. Number
1499-1500	Record Type

RESPONDENT FILE INDEX - CYCLE III

INTERVAL FILE INDEX - CYCLE III

A. LIST OF QUESTIONNAIRE ITEMS BY TAPE LOCATION

011-012	BP Rec	Pregnancy number
013-014	BP 19- 20A	Pregnancy type
015	BP 19- 20B	Number of live births
016	BP 19- 20C	Primary outcome
017	BP 19- 20D	Secondary outcome
018	BP-19 20E	Tertiary outcome
019	B19	Type of delivery, live birth
020-023	B22A	Century month of pregnancy outcome
024-025		Blank
026	B23	Ever visit doctor/clinic for prenatal care during this pregnancy
027-028	B24	Number of months pregnant at first prenatal care visit
029-030	B25	Source of first prenatal care visit
031	B26	Frequency of prenatal care visits between first visit and end of pregnancy
032	B27	Whether doctor ever advised R to remain in bed for one or more weeks because of some problem related to this pregnancy
033	BP-A	Whether this pregnancy ended in last live birth
034	BP-B	Whether this pregnancy is last pregnancy
		<u>First live birth in pregnancy</u>
035	B20-1	Sex of child
036-037	B28-1A	Weight in pounds
038-039	B28-1B	Weight in ounces
040	B29-1	Weight more or less than 5 1/2 pounds
		Way(s) in which medical bills for pregnancy paid
041-042	B30-1A	First mention
043-044	B30-1B	Second mention
045-046	B30-1C	Third mention
047	B31-1	Whether child went home from hospital at same time as Respondent
048	B32-1	Well-baby or routine checkup during first six months At birth of during first year of life, did child have any of the following health conditions:
049	B33-1A	Pneumonia or flu
050	B33-1B	Allergies, such as hay fever, asthma, allergies to pets, dust or food
051	B33-1C	Respiratory infections, such as bronchitis tonsillitis, croup
052	B33-1D	Ear infections
053	B33-1E	Diarrhea lasting more than one day
054	B33-1F	Vitamin deficiencies or too little weight gain
055	B33-1G	Skin disease such as impetigo, ringworm or scabies
056	B33-1H	Injury, such as broken bones, concussion, or accidental poisonings

057	B33-1I	Health problems child born with, or congenital conditions
058	B33-1J	Any other illnesses or conditions
059	CH-HE1	Whether child listed in household enumeration
060	B34-1	Whether child is still living (if not listed in household enumeration)
061-062	B35-1	Where is child living now
063-066	B36-1	Century month of child's death
067	B37-1	Whether child was breastfed
068-069	B38-1	Age of child in weeks when breast feeding stopped

Second live birth in pregnancy

070	B20-2	Sex of child
071-072	B28-2A	Weight in pounds
073-074	B28-2B	Weight in ounces
075	B29-2	Weight more or less than 5 1/2 pounds
		Way(s) in which medical bills for pregnancy paid
076-077	B30-2A	First mention
078-079	B30-2B	Second mention
080-081	B30-2C	Third mention
082	B31-2	Whether child went home from hospital at same time as Respondent
083	B32-2	Well-baby or routine checkup during first six months At birth of during first year of life, did child have any of the following health conditions:
084	B33-2A	Pneumonia or flu
085	B33-2B	Allergies, such as hay fever, asthma, allergies to pets, dust or food
086	B33-2C	Respiratory infections, such as bronchitis tonsillitis, croup
087	B33-2D	Ear infections
088	B33-2E	Diarrhea lasting more than one day
089	B33-2F	Vitamin deficiencies or too little weight gain
090	B33-2G	Skin disease such as impetigo, ringworm or scabies
091	B33-2H	Injury, such as broken bones, concussion, or accidental poisonings
092	B33-2I	Health problems child born with, or congenital conditions
093	B33-2J	Any other illnesses or conditions
094	CH-HE2	Whether child listed in household enumeration
095	B34-2	Whether child is still living (if not listed in household enumeration)
096-097	B35-2	Where is child living now
098-101	B36-2	Century month of child's death
102	B37-2	Whether child was breastfed
103-104	B38-2	Age of child in weeks when breast feeding stopped

Third live birth in pregnancy

105	B20-3	Sex of child
106-107	B28-3A	Weight in pounds
108-109	B28-3B	Weight in ounces
110	B29-3	Weight more or less than 5 1/2 pounds

111-112	B30-3A	Way(s) in which medical bills for pregnancy paid First mention
113-114	B30-3B	Second mention
115-116	B30-3C	Third mention
117	B31-3	Whether child went home from hospital at same time as Respondent
118	B32-3	Well-baby or routine checkup during first six months At birth of during first year of life, did child have any of the following health conditions:
119	B33-3A	Pneumonia or flu
120	B33-3B	Allergies, such as hay fever, asthma, allergies to pets, dust or food
121	B33-3C	Respiratory infections, such as bronchitis tonsillitis, croup
122	B33-3D	Ear infections
123	B33-3E	Diarrhea lasting more than one day
124	B33-3F	Vitamin deficiencies or too little weight gain
125	B33-3G	Skin disease such as impetigo, ringworm or scabies
126	B33-3H	Injury, such as broken bones, concussion, or accidental poisonings
127	B33-3I	Health problems child born with, or congenital conditions
128	B33-3J	Any other illnesses or conditions
129	CH-HE3	Whether child listed in household enumeration
130	B34-3	Whether child is still living (if not listed in household enumeration
131-132	B35-3	Where is child living now
133-136	B36-3	Century month of child's death
137	B37-3	Whether child was breastfed
138-139	B38-3	Age of child in weeks when breast feeding stopped

ABORTION

140-141	B39	Number of weeks pregnant at abortion
142	B40	DK Probe: Trimester when abortion took place
143-144	B41-1	Ways in which medical bills paid First mention
145-146	B41-2	Second mention
147-148	B41-3	Third mention
149	B42	Type of facility in which pregnancy ended
150	B43	Geographic location of facility Referral source to facility in which pregnancy ended
151-152	B44-1	First mention
153-154	B44-2	Second mention
155	B45	Whether abortion counseling received
156	B46	Whether birth control method or referral received

MISCARRIAGE/STILLBIRTH

157-158	B47	Number of months pregnant at miscarriage/stillbirth
159	B48	DK Probe: Trimester in which miscarriage/stillbirth occurred Medical care received at time of miscarriage/stillbirth

160-161	B49-1	First mention
162-163	B49-2	Second mention
164-165	B49-3	Third mention
166	B50	Place medical care received
		Way(s) in which medical bills paid
167-168	B51-1	First mention
169-170	B51-2	Second mention
171-172	B51-3	Third mention

PREGNANCY

173	C-4	Ever use of any method of contraception
		Methods used for one month or more in order used
174-176	C5-1M	First method
177-179	C5-2M	Second method
180-182	C5-3M	Third method
183-185	C5-LM	Last method
186	C6	Whether had stopped using all methods at time became pregnant
187	C7	Whether reason had stopped/was not using was because R wanted to become pregnant
188	C8	Whether R wanted a(nother)baby at some time at time she became pregnant
189	C9	DK Probe: Probability that R wanted a(nother) baby at some time
190	C10	Timing of pregnancy for respondent
191	C11	Whether partner wanted baby at some time
192	C12	Timing of pregnancy for partner

PERIODS OF NON-INTERCOURSE

193-196	C1416-1B	Beginning date of first period of non-intercourse
197-200	C1416-1E	Ending date of first period of non-intercourse
201-204	C1416-2-B	Beginning date of second period
205-208	C1416-2E	Ending date of second period
209-212	C1416-3B	Beginning date of third period
213-216	C1416-3E	Ending date of third period

PREGNANCY INTERVALS ENDING JANUARY 1979 OR LATER

217	C17	Whether any method of birth control used (between A & B)
		Methods used for one month or more in order used
218-220	C18-1M	<u>First method</u>
221-224	C19-1M	Century month method use began
225	C20-1M	How often skipped using method

226-229	C21-1M	Century month method use ended
230-232	C18-2M	<u>Second method</u>
233-236	C19-2M	Century month method use began
237	C20-2M	How often skipped using method
238-241	C21-2M	Century month method use ended
242-244	C18-3M	<u>Third method</u>
245-248	C19-3M	Century month method use began
249	C20-3M	How often skipped using method
250-253	C21-3M	Century month method use ended
254-256	C18-LM	<u>Last method</u>
257-260	C19-LM	Century month method use began
261	C20-LM	How often skipped using method
262-265	C21-LM	Century month method use ended
266-269	C22	Century month R became pregnant with (B)
270	C23	Whether R had stopped all methods before she became pregnant
271	C24	Whether R had stopped/was not using because she wanted to become pregnant
272	C25	Did R want a(nother) baby at some time
273	C26	DK probe: probability R wanted a(nother) baby at some time
274	C27	Timing of pregnancy for respondent
275	C28	Whether partner wanted a(nother) baby at some time
276	C29	Timing of pregnancy for partner
277	RACE	Self-reported race of respondent

APPENDIX 1

SPECIFICATIONS FOR COMPUTER GENERATED VARIABLES ('RECODES')

APPENDIX 1.

SPECIFICATIONS FOR COMPUTER GENERATED VARIABLES ("RECODES")

This section contains the detailed specifications used to create the computer generated variables ("recodes"). The basic data are usually referenced by record/column location (e.g., 2/17); data from recodes are referenced by the tape location (TL).

Specifications for most variables relating to age at a particular event are excluded. Unless otherwise specified, age variables are calculated as the century month of the event minus the century month of birth, divided by 12. Four column age variables have an implied decimal after the second column. If an analyst wants to use age in completed years as a variable, the first two columns of the variable should be used. The four column age variable should be used for computing mean ages. Two-column age variables refer to age in completed years.

For certain groups of variables, such as ever-use of various contraceptive methods, specifications differ only in the tape locations from which the raw data were taken. To avoid repetition, the specification for one variable in the group is included, with a list of the other variables which have been created similarly.

In the specifications that follow, a few cases were treated separately because the respondent had never had a menstrual period and was not asked some sections of the questionnaire.

If ever married and TL 55-58 = 9696 or TL 59-60 = 96 (3 cases), and the variable is blank, then the following codes were assigned:

```
var 965=99
var 100=1
var 105=2
var 110 and 115=blank
var 120 to var 150 = 2
var 155 = 3
var 160 = 23
var 165 = blank
var 205 to var 298* = 9 or 99
var 310 =2
var 311 = 2 if currently married
var 312 = 9 if it falls through
var 315 =blank
var 320 =5
var 325 =blank
var 330 to var 340 =0
var 345 = 1
var 350 = 1
var 355 = blank
var 360 =3
var 370-372 = 99
var 510,511=999
```

*If R is 25 or older, leave 205-220 = Blank

var 519,520=9
var 540 = 9

If R is never married, under 18, and TL 55-58=9696 or TL 59-60 =96(4 cases), then the following codes were assigned:

var 100 =2
var 105 to var 155 =blank
var 160 =23
var 205 to var 298 =blank
var 310,315,325 =blank
var 320 =5
var 330 to 340 =zero
var 345 = 1
var 350 = 1
var 355 = blank
var 360 =3

In addition, 9 respondents refused to answer whether they had ever had sexual intercourse, at B-11. If TL 75=7(9 cases), var 100 to var 355 were set =9 or 99, and vars 519,520,540 = 9, if the variable was blank or missing. Values for recodes were imputed for these cases.

GENERAL CHARACTERISTICS

VAR905 "Age at interview" (AGE)

Calculate as the difference between date of interview (TL 841-844) and date of birth (TL 12-15) divided by 12 and truncated to an integer.

If the calculated age = 45, age was changed to 44.

NOTE: Eligibility for the interview was determined by age at the date of the household screener. VAR905 and 906 are age at the date of the extended interview, the 12 respondents who had their 45th birthdays between the screener and interview dates are classified as being 44 years of age.

VAR910 "Race by observation" (RACEOBS)

Transferred from 20/18.

VAR911 "Self-reported race" (SRRACE)

If the respondent reports that:

she is black(25/32=3), SRRACE=1.

she is white(25/32=4), SRRACE=2.

she is some other race(25/32=1,2,5), SRRACE=3.

If 25/32=7,8,or 9, then use race by interviewer observation (20/18).

VAR915 "Marital status" (MARITAL)

Code marital status as reported on household screener. If marital status changed between screener and interview, code marital status as of extended interview. If R is currently not married but living with a partner (informally married), code 2.

VAR916 "Formal Marital Status" (FMARITAL)

If the respondent is currently married, widowed, divorced, or never married (MARITAL EQ 1,3,4,6), then
FMARITAL = MARITAL.

If the respondent is informally married or separated (MARITAL=2 or 5), then:

if she has never been formally married (VAR976 eq blank),
FMARITAL = 6 (never married)

if she has ever been formally married (VAR976 ne blank),
identify the outcome of her most recent formal marriage:
this is in

23/25 if 23/24 eq 2-9 (most recent marriage applicable
and not informal)

22/25 if 23/24 eq 1 or blank and 22/24 eq 2-9

21/25 if 23/24 and 22/24 eq 1 or blank and 21/24 eq 2-9

if the outcome of the most recent formal marriage is death
(code 3), FMARITAL = 3 (widowed)

if the outcome of the most recent formal marriage is divorce
(code 4), FMARITAL = 4 (divorced)

if the outcome of the most recent formal marriage is
separation (code 5) FMARITAL = 5 (separated).

VAR920 "Hispanic origin (old version)" (SPANISH1)

If the respondent mentioned that her ancestry or national origin was Puerto Rican, Cuban, Mexican American, Central or South American, or other Spanish (25/34-35 or 36-37 coded 8,9,10, 11 or 12), then she is Hispanic, code 1.

If the respondent did not mention any Hispanic origin (25/34-35 and 36-37 coded 1,2...7,13,14...18), then she is non-Hispanic, code 2.

VAR922 "Hispanic origin (new version)" (SPANISH2)

If the respondent's only reported national origin, or the national origin which she says best describes her ancestry, is Puerto Rican, Cuban, Mexican American, Central or South American, or other Spanish (25/34-35 coded 8,9,10,11, or 12), then she is Hispanic, code 1.

If the respondent gives a non-Hispanic origin as her only origin or that which best describes her ancestry (25/34-35 coded 1,2,...6,7,13,14,...17, or 18), then she is non-Hispanic, code 2.

VAR925 "Geographic region" (REGION)

If the respondent lives in Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, or Pennsylvania, then she lives in the Northeast, code 1.

If the respondent lives in Ohio, Indiana, Illinois, Michigan, Wisconsin, Minnesota, Iowa, Missouri, North Dakota, South Dakota, Nebraska, or Kansas, then she lives in the north central region, code 2.

If the respondent lives in Delaware, Maryland, D.C., Virginia, West Virginia, North Carolina, South Carolina, Georgia, Florida, Kentucky, Tennessee, Alabama, Mississippi, Arkansas, Louisiana, Oklahoma, or Texas, then she lives in the south, code 3.

If the respondent lives in Montana, Idaho, Wyoming, Colorado, New Mexico, Arizona, Utah, Nevada, Washington, Oregon, California, Alaska, or Hawaii, then she lives in the west, code 4.

VAR930 "Education (completed years of schooling)" (EDUCAT)

If the respondent completed the highest grade she attended (20/41 coded 1), then her education is the highest grade she attended (20/39-40).

If the respondent did not complete the highest grade she attended (20/41 coded 2), her education is the grade below the highest grade she attended (20/39-40 minus 1).

If the respondent had no formal schooling (20/39-40 coded 00), then she completed no years of schooling, code 00.

If the respondent reported the highest grade she attended (20/39-40 coded 1 to 18), but did not report whether or not she had completed that grade (20/41 coded 7,8, or 9), then her education is the highest grade she attended (20/39-40).

VAR935 "Religious affiliation" (RELIGION)

Transferred from 25/25.

VAR940 "Poverty level income" (POVERTY)

Poverty level income is the respondent's family income divided by the official poverty threshold for a family the size of her family, expressed as a percent. If the value is 998 or greater, set = 998.

For this recode an exact family income is estimated by the midpoint of the reported range of family income (26/27-28) as follows: 01=2000, 02=3750, 03=5500, 04=6500, 05=7500, 06=8500, 07=9500, 08=10500, 09=11500, 10=12500, 11=14000, 12=16000, 13=18500, 14=22500, 15=30000, 16=42500, 17=55000.

The poverty thresholds for each family size are:

Family Size	Threshold
1	4,901
2	6,281
3	7,693
4	9,862
5	11,684
6	13,207
7	15,036
8	16,719
9 or more	19,698

The thresholds were published in: U.S. Bureau of the Census, Current Population Reports, Series P-60, No. 140, Money Income and Poverty Status of Families and Persons in the U.S., 1982. Washington, D.C., July 1983.

VAR 945 "Living Arrangements at age 14" (LIVING14)

Transferred from 20/14.

VAR 950 "Labor Force Status" (LABORFOR)

Transferred from 24/31-32.

VAR960 "Father's Education" (EDUCDAD)

The educational attainment of the respondent's father is in 20/25-26, codes 00-18.

If R is under 18 (AGE LE 17), and if 20/25-26=97,98, or 99, then her father's education as reported on the parent questionnaire was used.

VAR962 "Mother's education" (EDUCMOM)

Based on 20/32-33, specifications correspond to VAR 960.

VAR970 "Years since first marriage" (MAR1/NOW)

If the respondent has never been married (02/18 coded 3 or 6), then years since first marriage is not applicable, code blank.

If the respondent has been married once (20/51-52 coded 1) and is currently married (02/18 coded 1 or 4), then the century month of her first marriage is 20/53-56.

If the respondent is formerly married (02/18 coded 2 or 5) or has been married more than once (20/51-52 coded 2,3,...7, or 8), then the century month of her first marriage is 21/18-21.

If the month and year of the first marriage were given (locations above coded 577 through 997), then the number of years since first marriage is the difference between the century month of interview completion (26/49-52) and the century month of first marriage, divided by 12 and truncated to an integer.

Marriage refers to formal or informal marriage.

VAR975 "Century month of first marriage" (MAR1MO)

If the respondent has never been married (02/18 coded 3 or 6), then century month of first marriage is not applicable, code blank.

If the respondent has been married once (20/51-52 coded 1) and is currently married (02/18 coded 1 or 4), then the century month of her first marriage is 20/53-56.

If the respondent is formerly married (02/18 coded 2 or 5) or has been married more than once (20/51-52 coded 2,3,...7, or 8), then the century month of her first marriage is 21/18-21.

Marriage refers to formal or informal marriage.

VAR976 "Century month of first formal marriage" (FMAR1MO)

If the respondent has never been formally married (20/59 and 21/24 and 22/24 and 23/24 all equal blank or 1), then century month at first formal marriage is inapplicable, code BLANK.

If the respondent has ever formally married, code the century month of marriage for the first marriage coded as formal (codes 2-9) in the following positions:

	formal?	cen-month of marriage
1st previous marriage	21/24	21/18-21
2nd previous marriage	22/24	22/18-21
3rd previous marriage	23/24	23/18-21
current marriage	20/59	20/53-56

NOTE: Cases reported as refused or not ascertained on formal status of marriage were treated as formal, since informal status was volunteered information.

VAR977 "Year of first marriage" (MAR1YR)

If the respondent has never been married (02/18 coded 3 or 6), then year of first marriage is not applicable, code blank.

If the respondent has been married once (20/51-52 coded 1) and is currently married (02/18 coded 1 or 4), then the century month of her first marriage is 20/53-56.

If the respondent is formerly married (02/18 coded 2 or 5) or has been married more than once (20/51-52 coded 2,3,...7, or 8), then the century month of her first marriage is 21/18-21.

If the month and year of the first marriage were given (locations above coded 577 through 997), then the year of the first marriage is the century month of the first marriage divided by 12 and truncated to an integer.

Marriage refers to formal or informal marriage.

VAR985 "Intentions for additional births" (INTENT)

If the respondent is sterile, or subfecund and intends an operation or abortion if she does become pregnant again(17/18 coded blank), OR if R says that she does not intend to have a(nother)baby(17/18 coded 2), then she does not intend to have a(nother) baby, so INTENT=2.

If she says she intends to have a(nother) baby, (17/18 coded 1), then she does intend (more) children, so INTENT=1.

If R said that she didn't know, it was up to God, etc(17/18 coded 8), or she and her husband disagree (17/18 coded 3), then her intent is unclear, so INTENT=3.

NOTE: For currently pregnant women INTENT refers to intentions after the current pregnancy.

CONTRACEPTIVE USE

VAR100 "Has R ever had intercourse" (SEXEVER)

If 17/41 is coded 1, then R has had intercourse, so SEXEVER=1.

If 17/41 is coded 2, then R has never had intercourse, so SEXEVER=2.

VAR105 "Did R use contraception at first intercourse" (SEX1CON)

If the respondent never had intercourse(17/41=2), then SEX1CON is inapplicable, or BLANK.

If the respondent has had intercourse and used a method at first intercourse (14/31=1), then SEX1CON=1.

If the respondent has had intercourse and never used a method(14/19=2) or did not use a method at first intercourse(14/31=2-6 or blank), then SEX1CON=2.

VAR110 "Method used at first intercourse" (SEX1MTHD)

If the respondent has never had intercourse(17/41 coded 2), or no method was used at first intercourse(14/31 coded blank or 2-6), or the respondent has never used a method(14/19 coded 2), then SEX1MTHD=BLANK.

If the respondent used a method at first intercourse(14/31 coded 1), then the first method she ever used(14/26-28) was the method she used at her first intercourse.

If the respondent used a method at first intercourse(14/31 coded 1) AND if it was the only method she has ever used

(the sum of the number of methods ever used in 15/18-32 PLUS 14/20-25 is one method), then the only method ever used is the method used at first intercourse.

Convert combination methods(code categories 043 to 920) to single method codes as follows:

043-054,643-654,843-854	=001 (Pill)
076-084,676-684,876-884	=002 (Condom)
085-092,685-692,885-892	=003 (Foam)
093-099,693-699,893-899	=004 (Jelly or cream)
100-105,700-705,900-905	=005 (Suppository or insert)
066-075,666-675,866-875	=006 (Diaphragm)
118-119,718-719,918-919	=007 (douche)
055-065,655-665,855-865	=008 (IUD)
016-029,616-629,816-829	=009 (Female sterilization)
030-042,630-642,830-842	=010 (Male sterilization)
106-110,706-710,906-910	=011 (Natural family planning)
111-114,711-714,911-914	=012 (Calendar rhythm)
115-117,715-717,915-917	=013 (Withdrawal)
120,720,920	=014 (Abstinence)

VAR115 "First method ever used" (METHOD1)

If R has never used a method(14/19 coded 2), or never had intercourse(17/41=2), then METHOD1 is inapplicable, or BLANK.

If R has used 2 or more methods(14/26-28 NE BLANK), then her first method ever used is the method in C-48 (14/26-28).

If R has used only 1 method(14/26-28 = BLANK), then the only method ever used is the first method ever used(either in 14/20-21 or in 15/18-32; OR take the only code "1" in VAR 120 to VAR 148).

Convert combination methods(code categories 043 to 920) to single method codes as in VAR110(SEX1MTHD).

VAR120 "Ever used pill" (PILL)

If the respondent has never had intercourse (17/41=2), then ever-use is inapplicable, so PILL=blank.

If the respondent has ever used the pill for a month or more(15/18 coded 1) or at all(14/20-21 or 14/22-23 or 14/ 24-25 coded 01), or if it was her first method ever (14/26-28 coded 001, 043-054, 643-654, or 843-854), then she has ever used the pill, so PILL=1.

If the respondent has never used the pill(15/18 coded 2 AND 14/20-21 not coded 01 AND 14/22-23 not coded 01 AND 14/24-25 not coded 01), so PILL=2.

If R is under 25 and had intercourse only once(08/40 coded 6) and never used a method(14/19 coded 2), then PILL=2.

NOTE: Variables 122 through 148, regarding ever use of the condom through "Other" method are created similarly. All are based on Card 15/Columns 18-22 and on responses to questions C.47 and C.48.

VAR 149 "Ever used any nonsurgical method" (NONSURG)

If the respondent has never had intercourse (17/41=2), then ever-use is inapplicable, so NONSURG=blank.

If the respondent has ever used any method other than FEMSTER or MALESTER, (PILL or CONDOM or ...OTHER coded 1), then NONSURG=1.

If the respondent has never used a method other than sterilization (PILL AND CONDOM ANDOTHER coded 2), then NONSURG=2.

If R is under 25 and has had intercourse only once (08/40 coded 6) and never used a method (14/19 coded 2), then NONSURG=2.

VAR150 "Ever used any method" (ANYMTHD)

If the respondent has never had intercourse (17/41=2), then ever-use is inapplicable, so ANYMTHD=blank.

If the respondent has ever used any method(PILL or CONDOM or ...OTHER coded 1), then ANYMTHD=1.

If the respondent has never used a method(PILL AND CONDOM AND ...OTHER coded 2), then ANYMTHD =2.

If R is under 25 and has had intercourse only once (08/40 coded 6) and never used a method(14/19 coded 2), then ANYMTHD=2.

VAR155 "Ever, current, past use of pill" (OCUSE)

Transferred from 14/39.

VAR160 "Current Contraceptive Status" (CONSTAT)

Using Contraception

- 01 Sterilization--female
- 02 Sterilization--Male
- 03 Pill
- 04 IUD
- 05 Diaphragm with or without Jelly or cream
- 06 Condom with or without foam
- 07 Foam
- 08 Periodic abstinence: calendar rhythm
- 09 Withdrawal
- 10 Douche
- 11 Suppository or insert

- 12 Other--method known
 13 Other--Method unknown
 14 Periodic abstinence: Natural family planning,
 temperature rhythm

Not using contraception

- 20 Pregnant
 21 Seeking Pregnancy
 22 Postpartum
 23 Sterile--noncontraceptive--female--nonsurgical
 24 Sterile--noncontraceptive--male--nonsurgical
 25 Sterile--noncontraceptive--female--surgical
 26 Sterile--noncontraceptive--male--surgical
 27 Sterile--intent unknown--surgical female
 28 Sterile--intent unknown--surgical--male
 29 Sterile--unknown reasons
 30 Never had intercourse
 31 Had intercourse but not since first menstrual period
 32 Other nonuser(has had intercourse since first period)
 33 No second intercourse and under 25 years of age
 99 User status not ascertained

NOTE: "Periodic abstinence"= codes 8 PLUS 14;
 (calendar rhythm plus natural family planning);

"Other"=codes 11, 12, and 13
 (suppository or insert, plus other-known,
 plus other-unknown).

Recode procedure: Cases are coded into the above
 categories using the following priority rules:

<u>Category Name</u>	<u>Data Locations</u>	<u>Specified Codes</u>	<u>Then Code</u>
Pregnant	03/75	1	20
Sterile	If 16/20=0 or 1,		
	Noncontraceptive female surgical 16/33=2 AND 16/21=1-3,5,9		25
	Nonsurgical female 16/62-63=02-04		23
	Noncontraceptive male surgical 02/18=1,4 AND 16/33=2 AND 16/21=4		26
	Nonsurgical Male 02/18=1,4 AND(16/ 65=5 or 6)		24
	Contraceptive female surgical 16/33=1 AND 16/21=1,2,3,5,9		01
Contraceptive Male Surgical 02/18=1,4 AND 16/33=1 AND 16/21=4		02	

If 16/18=2 AND 16/19=1 AND 16/20=1 AND 16/33=8 or 9,

and if 16/21=2, then CONSTAT=01
 and if 16/21=3, then CONSTAT=25
 and if 16/21=4, then CONSTAT=02

If the woman or couple has had more than one sterilizing operation(16/20 coded 2-5), then:

if one is a female operation and the other is a male operation, then classify using the FEMALE operation;

if both are female or both are male, then use the EARLIER operation--i.e.:

If 16/20=2-5,

AND 16/21=1-3,5,9, AND 16/40=4,
 then use specifications above

AND 16/21=1-3,5,9 AND 16/40=1-3,5,9,
 then use the earlier of the 2
 operations(compare the dates in
 16/22-25 and 16/41-44)

AND 16/21=4 AND 16/40=1-3,5,9,
 then use the data in 16/40-52

AND 16/21=4 and 16/40=4, then
 use the earlier of the 2 operations
 (compare the dates in 16/22-25 and
 16/41-44).

If R is never married or formerly married, check for use of male sterilization: if TL 11=2,3,5, or 6 and TL 381-383=010 or 030-042 or 610 or 630-642, then CONSTAT=02.

If R is under 25 and has never had intercourse a second time(TL 197=6), then CONSTAT=33, unless she is using the pill (14/39=1, so CONSTAT=03).

If R never used a method in the open interval (13/18=2), but she is currently using the pill (14/39=1), then CONSTAT=03.

Using a Method

Take the code in 13/20-22
 If 13/28=1 or 13/29-32=9696

Take the code in 13/33-35
 If 13/41=1 or 13/42-45=9696

Take the code in 13/46-48
If 13/54=1 or 13/55-58=9696

Take the code in 13/59-61 If
13/67=1.

If more than one method is being used, code the method with the highest priority - i.e. the lowest number in the list of methods (female sterilization, male sterilization, pill, IUD, diaphragm, condom, foam, calendar rhythm, withdrawal, douche, suppository, other, temperature rhythm, in that order).

Seeking Pregnancy		
13/72=1 OR 13/73=1		

Postpartum

Interview date is before the 15th day of month, and difference between interview month and month of last pregnancy termination is less than or equal to 2;

OR

Interview date is on or after 15th day of month and difference between interview month and month of last pregnancy termination is less than or equal to 1.

	22
--	----

Never had intercourse	
03/30-2	30

Had intercourse but not since first menstrual period	
08/33-36=9595	31

Other Nonuser	32
13/72=2 or 3; or	
13/18=2, or	

13/18=1 and 13/19=1 and 13/67=2 or blank and 13/54=2 or blank and 13/41=2 or blank and 13/28=2 or blank

or

(16/75 or 16/76 or 16/77=1 AND 13/67=2 or blank and 13/54=2 or blank and 13/41=2 or blank and 13/28=2 or blank.)

All cases not classified above; these cases must be:

03/30 NE 2 and
 08/33-36 NE 9595 and
 03/75 NE 1 and
 16/21=blank, 7,8,9 and
 13/67 NE 1 and
 13/54 NE 1 and
 13/41 NE 1 and
 13/28 NE 1 and
 16/63 NE 1 and
 13/72 = blank and
 16/73 NE 1 and
 16/74 NE 1 and
 16/75 NE 1.

99

If CONSTAT = 99 and 15/65-68 NE 9999 or Blank, then CONSTAT=15/65-68.
 Use method codes as given above, and:

0000, 5000= code 32
 3000 =code 20
 4000 =code 29

If CONSTAT was still = 99, the case was looked at individually and assigned a value. If there was no useful information, then CONSTAT = 99.

VAR165 "First source of current method" (MTHDSRC1)

If R has never used a method(14/32-34 coded blank), or is not currently using a method(14/32-34 coded 996) or is using a method not requiring supplies(14/32-34 coded 007, 009, 010, 012-015), then MTHDSRC1=BLANK.

If the respondent is currently using a method requiring supplies or visits(14/32-34 coded 001-006,008, or 011), take the code in 14/37-38.

If 14/37-38 is BLANK and R is under 25 (02/18 coded 4-6, and her current and first methods are the same), take the code in 14/29-30.

if she first obtained her current method from a private doctor or medical service(14/29-30 or 14/37-38 coded 01), or hospital (14/29-30 or 14/37-38 coded 09), then MTHDSRC1 was a private doctor, so MTHDSRC1=1.

if she obtained her method from a clinic(14/29-30 or 14/37-38 coded 02), then MTHDSRC1=2.

if she obtained her method from a store(14/29-30 or 14/37-38 coded 03 or 04), then MTHDSRC1=3.

if she obtained her method from some other source (14/29-30 or 14/37-38 coded 05-08 or 10), then MTHDSRC1=4.

If the respondent is currently using the pill, IUD, or diaphragm (14/32-34 coded 001 and CONSTAT eq 03, or 14/32-34 coded 008 and CONSTAT eq 04, or 14/32-34 coded 006 and CONSTAT eq 05), and she first obtained the method from a store (MTHDSRC1 eq 3), MTHDSRC1 is coded 9.

VAR170 "Most Recent Contraceptive Method" (RECENT)

If R is currently using a method(CONSTAT=01-14), then RECENT=CONSTAT.

If R has never had intercourse(17/41 coded 2) or is under 25 and has only had intercourse once(08/40 coded 6) or R has not had intercourse since first menstrual period(08/33-36 coded 9595), then she did not use a method, so RECENT=96.

If R has had intercourse but never used a method (ANYMTHD=2), then RECENT=88.

If R has had intercourse at least twice and has ever used a method(ANYMTHD=1), but is not currently using a method(CONSTAT coded 20-29 or 32), then RECENT is the most recent method in the open interval(13/59-61 or 46-48 or 33-35 or 20-22 if 13/18 coded 1), or closed interval (11/55-57 or 43-45 or 31-33 or 19-21 IF 11/18=1), or (09/28-30 or 25-27 or 22-24 or 19-21 IF 9/18=1).

If the most recent method code is 009, 016-029, 616-629, or 816-829, then RECENT=01.

If the most recent method is 010, 030-042, 630-642, or 830-842, then RECENT=02.

If ANYMTHD=1 but 13/18=2 AND 11/18=2 and 09/18=2 for all intervals, then RECENT is the code with the highest priority in 14/26-28. (Determined according to the same rules as for CONSTAT.)

If there is missing data for a method or interval, go on to the previous interval; if data are missing for all methods or intervals, then RECENT=99.

FAMILY PLANNING SERVICES

NOTE: By definition, non-medical counselors cannot provide medical family planning services (items F. through J. in E.10, E.16, and E.21). Women who reported a counselor as the only source of family planning service, and the receipt of one or more medical services from that source were reviewed individually. Inconsistencies were resolved based on other

information on the types of services received and data on sources of contraceptives (section E and questions C.45-47).

VAR205 "Services used at the first family planning visit: got a method" (FP1MTHD)

If the respondent was 25 years of age or older at interview, or never had a family planning visit, or she never had intercourse (19/42-43 coded blank), then services used at first visit is not applicable, code blank.

If the respondent reported "getting a method of birth control" at the first visit (19/42-43,44-45,46-47, or 48-49 coded 10), then she got a method of birth control at her first visit, code 1.

If she reported getting a service at first visit, but did not mention getting a method of birth control ((19/42-43,44-45,46-47, or 48-49 coded 1,2,3 ... 8, or 9) and (19/42-43,44-45,46-47, and 48-49 not coded 10)), then code 2.

VAR210 "Services used at the first family planning visit: other medical" (FP1OMED)

See VAR 205 for code blank.

If the respondent reported getting a medical service other than getting a method of birth control (19/42-43,44-45,46-47 or 48-49 coded 6,7,8, or 9), then code 1.

If the respondent did not mention getting a medical service other than birth control (19/42-43,44-45,46-47, and 48-49 not coded 6,7,8 and 9) and did mention getting another service (19/42-43,44-45,46-47, or 48-49 coded 1,2,3,4,5 or 10), then code 2.

VAR215 "Services used at the first family planning visit: advice on birth control" (FPIFPADV)

See VAR 205 for code blank.

If the respondent reported getting advice or counseling on birth control (19/42-43,44-45,46-47, or 48-49 coded 5), then code 1.

If the respondent did not mention getting advice or counseling on birth control (19/42-43,44-45,46-47 and 48-49 not coded 5) and did mention getting some other service (19/42-43,44-45,46-47, or 48-49 coded 1,2,3,4,6,7,8,9 or 10), then code 2.

VAR220 "Services used at the first family planning visit: other advice" (FP1OADV)

See VAR 205 for code blank.

If the respondent reported getting advice or counseling other than advice or counseling on birth control (19/42-43,44-45,46-47 or 48-49 coded 1,2,3, or 4), then code 1.

If the respondent did not mention getting other advice or counseling (19/42-43,44-45,46-47 and 48-49 not coded 1,2,3, or 4) and did mention getting another service (19/42-43,44-45,46-47, or 48-49 coded 5,6,7,8, 9, or 10), then code 2.

VAR225 "Age at first use of family planning services" (FP1AGE)

If the respondent has never had a family planning visit or never had intercourse(19/35-38 coded blank), then her age at first visit is not applicable, code blank.

If the respondent gave the month and year of her first family planning visit (19/35-38 coded 577 through 997), then her age at first visit computed like other age variables.

If the respondent gave her age at first visit (19/39-40 coded 10 through 44) and her first visit was after her birthday (19/41 coded 2), then that (19/39-40) is her age at first visit.

If the respondent gave her age at first visit (19/39-40 coded 10 through 44) and her first visit was before her birthday (19/41 coded 1), then her age at first visit is her reported age at first visit (19/39-40) minus 1.

VAR230 "First source of family planning services" (FP1SRC)

If the respondent was 25 years of age or older at interview (02/18 coded 4,5, or 6), then source of first visit is not applicable, code blank.

If the respondent was under 25 (02/18 coded 1,2, or 3), and had not had a family planning visit or had never had intercourse (19/50-51 coded blank), then she has not had a visit while sexually active, code 6.

If the respondent's first family planning visit was to a private doctor, private group practice, co-op or private clinic (19/50-51 coded 14 or 15), then the first source of services was private medical services, code 1.

If the respondent's first family planning visit was to a hospital clinic, family planning clinic, community health center clinic, abortion clinic, public health department clinic, military health clinic, student health clinic, or other clinic (19/50-51 coded 6, 7, ... 12, or 13), then the first source was clinic, code 2.

If the first family planning visit was to a minister, priest, religious counselor, school counselor, family and social services agency, youth center, or other counselor (19/50-51 coded 1,2,3,4, or 5), then the first source was counselors, code 3.

VAR235 "In need of family planning services: has had intercourse and was not sterile in last 3 years" (FPNEED)

If R has never had intercourse (18/35=blank), then FPNEED is not applicable, code blank.

If R or husband were sterilized or became sterile before Jan. 1979 (18/35 coded 1), then FPNEED=1.

If R or husband were not sterilized by Jan. 1979 (18/35 coded 2 or 8 and 16/18 coded 8), then FPNEED=2.

VAR237 "Used family planning services in last 3 years" (SERVICES)

If R had not had intercourse or was sterile in January 1979 (18/35 = blank or 1), then services in the last 3 years were not applicable, so SERVICES=BLANK.

If R reports any family planning services in the last 3 years (18/37 =1 or 18/38 = 1 or 18/39=1 ...18/46=1) then R HAS received family planning services in the last 3 years, so SERVICES=1.

If R reports no services in the last 3 years (18/37-18/46 ALL coded 2), then SERVICES=2.

VAR240 "Services used at the most recent family planning visit: got a method" (FPLSTMTH)

If the respondent was sterile before January 1979, or she has never had intercourse, or she has not had a family planning visit in the last 3 years (18/47-48 coded blank), then the most recent services used is not applicable, code blank.

If the respondent has had one family planning visit in the last 12 months (18/59 coded 1), then the most recent services are in locations 18/47-48,49-50,51-52, and 53-54.

If the respondent has had 2 or more family planning visits in the last 12 months (18/59 coded 2,3,4,5,or 6), or she had a visit in the last 3 years and no visits in the last 12 months (18/47-48 coded 96), then the most recent services are in locations 19/18-19, 20-21,22-23, and 24-25.

If the respondent reported "getting a method of birth control" at her latest visit (18/47-48,49-50,51-52, or 53-54; or 19/18-19,20-21,22-23, or 24-25 coded 10), then she got a method of birth control at her latest visit, code 1.

If she reported getting a service at latest visit, but did not mention getting a method of birth control ((18/47-48,49-50,51-52 or 53-54; or 19/18-19,20-21,22-23,or 24-25 coded 1,2,3 ... 8, or 9) and (18/47-48,49-50,51-52, and 53-54; and 19/18-19,20-21,22-23, and 24-25 not coded 10)), then code 2.

VAR242 "Services used at the most recent family planning visit: renewed a method" (FPLSTNEW)

See VAR 240 for code blank and appropriate tape locations.

If the respondent reported "renewing a method of birth

control" at her latest visit (18/47-48,49-50,51-52, or 53-54; or 19/18-19,20-21,22-23, or 24-25 coded 9), then she renewed a method of birth control at her latest visit, code 1.

If she reported getting a service at latest visit, but did not mention renewing a method of birth control ((18/47-48,49-50,51-52 or 53-54; or 19/18-19,20-21,22-23, or 24-25 coded 1,2,3 ... 8, or 10) and (18/47-48,49-50,51-52, and 53-54; and 19/18-19,20-21,22-23, and 24-25 not coded 09)), then code 2.

VAR245 "Services used at the most recent family planning visit:
other medical (FPLSTMED)

See VAR 240 for code blank and appropriate tape locations.

If the respondent reported getting a medical service other than getting a method of birth control (18/47-48,49-50,51-52, or 53-54; or 19/18-19,20-21,22-23, or 24-25 coded 6,7,8, or 9), then code 1.

If the respondent did not mention getting another medical service (18/47-48,49-50,51-52 and 53-54; and 19/18-19,20-21,22-23, and 24-25 not coded 6,7,8 or 9) and did mention getting another service (18/47-48,49-50,51-52, or 53-54; or 19/18-19,20-21,22-23, or 24-25 coded 1,2,3,4,5 or 10), then code 2.

NOTE: "Other medical" includes RENEWING a method(code 9), pregnancy test(code 8), health problems from using a method(code 7), and correct use or fit of a method(code 6). It does NOT include GETTING a method for the first time(code 10).

VAR250 "Services used at the most recent family planning visit:
advice on birth control" (FPLSTFAD)

See VAR 240 for code blank and appropriate tape locations.

If the respondent reported getting advice or counseling on birth control (18/47-48,49-50,51-52, or 53-54; or 19/18-19,20-21,21-22, or 24-25 coded 5), then code 1.

If the respondent did not mention getting advice or counseling on birth control (18/47-48,49-50,51-52, and 53-54; and 19/18-19,20-21, 22-23, and 24-25 not coded 5), and did mention getting some other service (18/47-48,49-50,51-52, or 53-54 ; or 19/18-19,20-21,22-23, or 24-25 coded 1,2,3,4,6 7,8,9, or 10), then code 2.

VAR255 "Services used at the most recent family planning visit:
other advice" (FPLSTOAD)

See VAR 240 for code blank and appropriate tape locations.

If the respondent reported getting other advice or counseling (18/47-48,49-50,51-52, or 53-54; or 19/18-19,20-21,22-23, or 24-25 coded 1,2,3, or 4), then code 1.

If the respondent did not mention getting other advice or counseling (18/47-48,49-50,51-52, and 53-54; and 19/18-19,20-21,22-23, and 24-25 not coded 1,2,3, or 4) and did mention getting another service (18/47-48,49-50,51-52, or 53-54; or 19/18-19,20-21,22-23, or 24-25 coded 5,6,7,8, 9, or 10), then code 2.

VAR260 "Source of payment for the most recent family planning visit:
self" FPPAYSLF)

If the respondent or her husband was sterile before January 1979, or she never had intercourse, or she had not had a family planning visit in the last 3 years (19/28-29 coded blank), then the source of payment is not applicable, code blank.

If the respondent reported as a source of payment for her latest family planning visit her own income, her boyfriend, parents, or other relatives (19/28-29, 30-31, or 32-33 coded 1,2, or 7), code 1.

If the respondent did not mention any of those sources (19/28-29,30-31, and 32-33 not coded 1,2, or 7), code 2.

VAR262 "Source of payment for the most recent family planning visit:
insurance" (FPPAYINS)

See VAR 260 for code blank.

If the respondent reported insurance as a source of payment for her latest family planning visit (19/28-29,30-31, or 32-33 coded 3), code 1.

If the respondent did not mention "insurance" (19/28-29,30-31, and 32-33 not coded 3), code 2.

VAR264 "Source of payment for the most recent family planning visit:
medicaid" (FPPAYMED)

See VAR 260 for code blank.

If the respondent reported as a source of payment for her latest family planning visit "Medicaid" (19/28-29,30-31, or 32-33 coded 4), code 1.

If she did not mention Medicaid (19/28-29,30-31, and 32-33 not coded 4), code 2.

VAR266 "Most recent source of family planning services
in the last 3 years" (SOURCE)

If R or husband was sterile before January 1979(18/35=1), or she has never had intercourse, or she has not had a

family planning visit in the last 3 years(18/47-48 coded blank), then the most recent source of services is not applicable, so SOURCE=BLANK.

If R had only 1 family planning visit in the last 12 months(18/59=1), use locations 18/55-56.

If R had 2 or more visits in the last 12 months (18/59=2-6), or no visits(18/47-48=96), use locations 19/26-27.

If R's last visit was to a clinic(18/55-56 or 19/26-27 coded 06-13), then her most recent source was a clinic, so SOURCE=1.

If R's last visit was to a private doctor or private group practice(18/55-56 or 19/26-27 coded 14 or 15), then her most recent source was a private medical service, so SOURCE=2.

If R's visit was to a counselor(18/55-56 or 19/26-27 coded 01-05), then her most recent source was a counselor, so SOURCE=3.

VAR270 "Family planning visits in the last 12 months: private" (FPYRMD)

If the respondent or her husband was sterile before January 1979 (18/35 coded 1), or she never had intercourse (17/41 coded 2), visits in the last 12 months is not applicable, code blank.

If the respondent has not had a family planning visit in the last 3 years (18/37, 38, ... 45, and 46 coded 2), or has not had a visit in the last 12 months (18/47-48 coded 96), then the number of visits in the last 12 months is none, code 0.

If the respondent visited only private medical services in the last 12 months (18/55-56 coded 14 or 15 and 18/57-58 coded 14, 15, or blank), then the number of visits to private medical services is the number of visits reported in 18/59 (codes 1,2,...5, or 6).

If the respondent visited private medical services and other places in the last 12 months, then the number of visits to private medical services is the number of visits reported in 18/61 (codes 1,2,...5, or 6).

See "NOTE" following VAR 276.

VAR272 "Family planning visits in the last 12 months: clinics" (FPYRCLIN)

See VAR 270 for code blank and code 0.

If the respondent visited only clinics in the last 12 months (18/55-56 coded 6,7,...12 or 13 and 18/57-58 coded 6,7,...12,13, or blank), then the number of visits to clinics is the number of visits reported in 18/59 (codes 1,2...5 or 6).

If the respondent visited clinics and other places in the last 12 months (18/55-56 or 57-58 coded 6,7,...12 or 13 and 18/55-56 or 57-58 coded 1,2,...4,5,14, or 15), then the number of visits to clinics is the number of visits reported in 18/60 (codes 1,2,... 5, or 6).

See "NOTE" following VAR 276.

VAR274 "Family planning visits in the last 12 months: counselors" (FPYRCOUN)

See VAR 270 for code blank and code 0.

If the respondent visited only counselors in the last 12 months (18/55-56 coded 1,2,3,4, or 5 and 18/57-58 coded 1,2,3,4,5, or blank), then the number of visits to counselors is the number reported in 18/59 (codes 1,2,...5, or 6).

If the respondent visited counselors and other places in the last 12 months (18/55-56 or 57-58 coded 1,2,3,4, or 5 and 18/55-56 or 57-58 coded 6,7,...14, or 15), then the number of visits to counselors is the total number of visits (18/59 codes 1,2,...5, or 6) minus the sum of the number of visits to clinics (FPYRCLIN) and the number of visits to private doctors (FPYRMD).

See "NOTE" following VAR 276.

VAR276 "Family planning visits in the last 12 months" (FPYRTOT)

See VAR 270 for code blank and code 0.

If the respondent had one or more visits in the last year (18/59 coded 1, 2, ... 5, or 6), then the number of visits is in location 18/59.

NOTE: Space was provided for coding up to two sources of family planning services in 18/55-58. For cases listing more than two sources, clinics were coded before private medical services; and clinics and private medical services were coded before counselors. As a result, the sum of visits to private doctors, clinics and counselors did not always sum to the total number of visits (VAR 276) when more than two sources were reported. If the sum of variables 270,272, and 274 did not equal VAR 276, inconsistencies were resolved by looking at the individual questionnaire.

VARs 280-290 are transferred from 18/62-18/67.

VAR292 "Type of infertility service ever received by respondent" (INFSVCR)

If the respondent has not had intercourse or she and her husband did not ever visit a doctor for infertility services (18/20 coded blank), type of service is not applicable, code blank.

If the respondent or her husband made a visit but only her husband received advice or treatment (18/20 coded 2), then she received no type of service, code 96.

If the respondent reported receiving an infertility service then code in the following priority order:

18/21-24 coded	Description	then code var 292:
01,34,37-38	Drugs to stimulate ovulation	01
02	Surgery or treatment on blocked tubes	02
03,18,29-32	Other surgery	03
08	Infertility tests	04
04,27-28,33, 35-36,39-41	Other treatment	05
05	Advice-timing of intercourse	06
11,13,14, 21,22	Advice-stop or start contraception	07
07,20	Life style or general health advice	08
06,09,12,15-17, 23-26	Other or unspecified advice	09
97-99	Missing data	99.

VAR293 "2nd kind of infertility service" (TREAT2)

See VAR 292 for code blank.

If there is only one 2-digit code in 18/21-28, then the couple received just one type of treatment or advice, so code 96.

If more than one 2-digit field in 18/21-24 is coded, then TREAT2 is the code in 18/21-24 that was NOT coded in Var 292, and is coded according to the specifications for var 292. If there is no code there, but there is one code in 18/25-28, then TREAT2 is the code for var 294. If there are no codes in 18/21-24 but there are two codes in 18/25-28, then TREAT2 is the 2nd code for the husband's treatment--the one that is NOT coded in var 294.

Thus, legal codes are:

Blank, 01-09(from var 292), 20-22(from var 294),96, and 99.

VAR294 "Type of infertility service ever received by husband" (INFSVCH)

See VAR 292 for code blank.

If the respondent or her husband made a visit but he did not receive advice or treatment (18/20 coded 1), then he received no type of service, code 96.

If the respondent reported that her husband received an infertility service(18/25-26 coded 01-17), then code in the following priority order:

18/25-28 coded:	Description	then code var 294:
08	Tests on husband,(eg sperm count)	20
01,02,04,12, 15-17	Other treatment	21
05-07,09-10,14	Advice	22

If 18/25-26 is coded 97-99, then var 294=99.

VAR295 "Treatment for infertility or miscarriage" (INFMISC)

See VAR 292 for code blank.

If the respondent or husband received advice or treatment to help her become pregnant(18/18 coded 1), then INFMISC= 1.

If the respondent received advice or treatment to prevent miscarriage(18/19 coded 1), then INFMISC = 2.

If 18/18 or 18/19 is coded 7,8,or 9, then INFMISC=9, or not ascertained.

VAR298 "Source of most recent infertility services" (INFSRC)

See VAR 292 for code blank.

If the source of the most recent infertility service was any kind of clinic (18/33-34 coded 01-06), then INFSRC = 1.

If the source was a private doctor or private group practice, then INFSRC = 2.

FECUNDITY AND INFERTILITY

VAR304 "Want or intend another birth" (WANTKID1)

Categories were tested in the order listed here.

If the respondent (or husband) is surgically sterile (16/19=1), use 16/59; if the respondent's periods have not started yet (16/62-63=04), use 17/18; if the respondent is nonsurgically sterile for other reasons (16/19=2 and 16/62-63 NE 04), use 16/70; if the respondent intends to have a sterilization operation or abortion for health reasons (16/75=1 or 16/76=1 or 16/77=1), use 16/78; otherwise use 17/18.

"No" responses=1-2
 "Yes" responses=3-5
 Not ascertained=9

If R would NOT like to have another child even though it is unlikely or impossible that she can (16/59 or 16/70 or 16/78=2), WANTKID1=1.

If R does not intend to have another child or disagrees with husband about it (17/18=2 or 3), then WANTKID1=2.

If R would like to have a child or another child even though it is unlikely or impossible that she can (16/59 or 16/70 or 16/78=1), then WANTKID1=3.

If R intends to have a baby or another baby (17/18=1), then WANTKID1=4.

If R says she doesn't know if she intends to have a child or that it is up to God (16/59 or 16/70 or 16/78=8 or 17/18=8), then WANTKID1=5.

If 16/59 or 16/70 or 16/78 or 17/18=9, then WANTKID1=9.

NOTE: This recode is not completely comparable to that in Cycle 2 because of changes in the questionnaire. In Cycle 2, women who were contraceptively sterile were not asked about wanting another baby, because they were assumed NOT to want one. Thus, these women are asked the question in Cycle 3, and this will tend to make the proportions wanting a(nother) baby higher in Cycle 3 than they were in Cycle 2.

In addition, in Cycle 3 there is no question on whether a formerly married R expects to remarry or reunite, as there was in Cycle 2. Formerly married R's who did not expect to remarry or reunite were not asked about wanting a(nother) baby, because they were assumed not to want a baby, in Cycle 2. Thus, the results for formerly married women in Cycle 3 may differ from those in Cycle 2 because all are given the chance to answer 'yes' in Cycle 3. This will also tend to increase the proportions saying yes--that they want a(nother)baby.

VAR305 "Collapsed WANTKID" (WANTKID2)

If WANTKID1=1 or 2, then R does NOT want a baby or another baby, so WANTKID2=1.

If WANTKID1=3,4, or 5, then R DOES want a baby or another baby, so WANTKID2=2.

NOTE: WANTKID1 is not imputed;
 WANTKID2 is.

VAR310 "Infertility status" (INFERT)

If the respondent is never married or formerly married, then infertility is not applicable, so INFERT=BLANK.

If the respondent or her husband is surgically sterile(16/19 coded 1), then the couple is surgically sterile, so INFERT=1.

If R reports that she and/or her husband are sterile for nonsurgical reasons(16/19 coded 2), or she has never had a menstrual period(TL 59-60=96), then the couple is infertile, so INFERT=2.

If R is currently using the pill (TL 301=1) then R is fecund, so INFERT=3.

If the respondent has used a method in the open interval (13/18 coded 1), and if she is still using it (13/29-32 or 13/42-45 or 13/55-58 coded 9696), then R is fecund, so INFERT = 3.

If, during the 12 months or more of continuous marriage the couple did not have a pregnancy and used no contraception, they are classified as infertile--that is,

the interval between the date of her current marriage and the date of interview is 12 months or more(26/49-52 - 20/53-56 GE 12);

and, if she has ever been pregnant(03/76-77 coded 01-30), the interval since her last pregnancy is 12 months or more(04/39 coded 1 AND (26/49-52 MINUS 04/25-28 GE 12));

and one of the following:

if R has never been pregnant (03/76-77 coded 00) and has never used a method (13/18 coded 2), then the date of interview (26/49-52) MINUS date of current marriage(20/53-56) must be GE 12 months;

if R has been pregnant (03/76-77 coded 01-30) and never used a method since her last pregnancy(13/18 coded 2), then date of interview(26/49-52) MINUS date last pregnancy ended must be GE 12 months (04/39 coded 1 AND (26/49-52 MINUS 04/25-28 GE 12));

If R has been pregnant(03/76-77 coded 01-30) and has used a method in the open interval (13/18 coded 1), or has never been pregnant (03/76-77 coded 0) and has used a method since her first intercourse(13/18 coded 1), and she has not use a contraceptive method in the last 12 months or more(26/49-52 MINUS the latest

stop use date in 13/29-32, 13/42-45, 13/55-58, and 13/68-71 GE 12 months),

then the couple is infertile, so INFERT=2.

If R is currently married(TL 1 or 4)and is not surgically sterile(TL 385=1 or 8 or TL 386=2), and is currently using a nonsurgical method(CONSTAT = 03 - 14 or TL 294-296 LE 120 or TL 381-383 NE 000 or 300-500 or 999), then R is fecund, INFERT = 3.

A few respondents were assigned values on INFERT by hand, i.e., after looking at a printout of the entire case. If there was too much missing data to classify the respondent, INFERT was assigned = 9 and imputed.

All other respondents are fecund, INFERT=3.

VAR311 "Detailed Infertility status" (INFERT2)

If the respondent is never married or formerly married then infertility is not applicable, so INFERT2=BLANK.

If R or husband is surgically sterile for contraceptive reasons(CONSTAT coded 01 or 02), then INFERT2=1.

If R or husband is surgically sterile for noncontraceptive reasons(CONSTAT coded 25,26,27,28), then INFERT2=2.

If INFERT=2 and R has been infertile for 36 months or more(during the 36 months of continuous marriage the couple did not have a pregnancy and did not use contraception),then INFERT2=3.

If INFERT=2 and she has been infertile for 24-35 months, then INFERT2=4.

If INFERT=2 and she has been infertile for 12-23 months, then INFERT2=5.

If 16/19 is coded 2 or CONSTAT=23, 24, or 29, and R has not yet been classified infertile on INFERT2, then INFERT2=6.

If there is missing data, INFERT2=9.

All other respondents are fecund, INFERT2=7.

VAR312 "Number of Months Infertile" (NINFERT)

If the respondent is not currently married or not infertile(INFERT not equal to 2), then NINFERT=blank.

If the respondent is currently married and infertile (INFERT coded 2), then NINFERT is the number of months that the couple has been infertile--that is, the number of months they have been continuously married, have not used any contraception, and did not become pregnant.

Thus, NINFERT is calculated by taking - for infertile respondents only - the difference, in months, between:

current marriage and interview,
last method use and interview, and
last pregnancy termination and interview.

The smallest of these values will be the number of months infertile. The range will be 12 to 360.

VAR315 "Age at Menarche" (MENARCHE)

If the respondent's periods have not started yet(02/64-65 coded 96 or 02/66-67 coded 96), then she does not yet have an age at menarche, so MENARCHE=BLANK.

If the respondent is under 25(02/18 coded 1,2,or 3), then her age at her first period is based on the century month of the first period (02/62-65) and the century month of her birth.

If the respondent is 25 or older(02/18 coded 4,5,or 6), or is under 25((02/18 coded 1,2, 3) AND did not report the month and year of her first period(02/64-65 coded 97, 98, or 99)), then her age at her first period is her reported age(02/66-67 IF 02/68 coded 2; or, 02/66-67 minus one if 02/68 is coded 1).

VAR320 "Type of sterilization operation" (STRLOPER)

If the respondent or her current husband has not been surgically sterilized(16/20 coded BLANK), then STRLOPER =5, not surgically sterilized.

If there is only one operation coded(16/20 coded 1), then:

If Tubal ligation(16/21 coded 2), STRLOPER=1.
If Hysterectomy(16/21 coded 3), STRLOPER=2.
If Vasectomy(16/21 coded 4), STRLOPER=3.
If Other or unknown type(16/21 coded 1,5,7,8,9),
STRLOPER=4.

If there are two operations coded(16/20 coded 2-5), then:

If there is a male operation(16/21 coded 4 or 16/40 coded 4) AND a female operation(16/21 NE 4 or 16/40 NE 4)coded, then classify the female operation.

If there are 2 female operations or 2 male operations, then classify the respondent according to the earlier operation (compare the dates in 16/22-25 and 16/41-44).

VAR322 "Postpartum Sterilization--first operation" (PPSTER1)

If R or her husband has not had a sterilizing operation (TL 386 coded blank or 2), then PPSTER1 is inapplicable, or BLANK.

If the respondent had a female operation(TL 388 coded 1,2,3,5)that occurred in the same month as her last pregnancy((TL 390-392) EQ (04/25-28) IF 04/39 is coded 1), it was a postpartum operation, so PPSTER1=1.

If the respondent had a female operation(TL 388 coded 1,2,3,5) that was not postpartum ((TL 390-392 NE 04/26-28) OR (04/39 coded 0)), then she had a female interval sterilization, so PPSTER1=2.

If the respondent's husband or partner had a vasectomy (TL 388 coded 4), then it was a male sterilization, so PPSTER1=3.

VAR323 "Postpartum sterilization--2nd operation" (PPSTER2)

If R or her husband has not had a sterilizing operation or has had only one sterilizing operation(TL 387 coded blank or 1), then there was no second operation, so PPSTER2 is inapplicable, or blank.

If the second operation was a female operation (TL 407 coded 1,2,3,5) in the same month as her last pregnancy((TL 408-411) EQ (04/25-28) IF (04/39 is coded 1)), then it was a postpartum operation, so PPSTER2=1.

If the respondent had a female operation(TL 407 coded 1,2,3,5) that was not postpartum((408-411) NE (04/25-28) IF 04/39 is coded 1), then it was a female interval sterilization, so PPSTER2=2.

If the second operation was a vasectomy(TL 407 coded 4), then it was a male sterilization, so PPSTER2=3.

VAR325 "Age at sterilization operation" (STERLAGE)

If the respondent or her current husband have not had a sterilization operation(16/20 coded BLANK), then the respondent does not have an age at sterilization, so STERLAGE=BLANK.

If the respondent or her husband have had a total of one sterilization operation(16/20 coded 1), then the age at sterilization is the century month of the operation (16/22-25) minus the woman's date of birth(02/19-24), divided by 12.

If there are 2 sterilization operations(16/20 coded 2-5),

and one is female(16/21 coded 1,2,3,5,9 or 16/40 coded 1,2,3,5,9), and the other is male(16/21 coded 4 or 16/40 coded 4), then use the century month of the woman's operation and her date of birth.

and both operations are male or both are female, then use the date of the earlier operation and the woman's date of birth.

NOTE: In 9 cases in which the current husband had a vasectomy before marrying the respondent, STERLAGE reflects the respondent's age at which she began being protected by the vasectomy, rather than her age when the operation was performed.

VAR330 "Number of pregnancies" (PREGNUM)

Transferred from 3/76-77.

VAR331 "Number of completed pregnancies" (COMPREG)

This is the total number of completed pregnancies the respondent has had--i.e., the number in 03/76-77, minus one if the respondent is currently pregnant (03/75=1).

VAR332 "Number of pregnancies excluding induced abortions" (SPONPREG)

SPONPREG is the total number of pregnancies a woman has had that ended in anything other than abortion, and excluding current pregnancies (03/76-77, minus one if 03/75=1), minus the number of pregnancies in which (04/18-19 is coded 2, or 04/21 is coded 2, or 04/22 is coded 2, or 04/23 is coded 2).

VAR333 "Number of pregnancies ending in live birth" (LBPREGS)

Transferred from 3/69-70.

VAR335 "Number of pregnancies ending in spontaneous pregnancy loss" (LOSSNUM)

This is the total number of pregnancies a woman has had that ended in 1 or more pregnancy losses regardless of any other outcomes of those pregnancies (04/18-19 coded 3,4, or 10, or 04/21 coded 3 or 4, OR 04/22 coded 3 or 4, OR 04/23 coded 3 or 4). (This is not the same as 03/73-74 if she had a live birth and a stillbirth from the same pregnancy, because only the primary outcome is coded in the pregnancy totals in deck 3.)

VAR340 "Children ever born by C-section" (C-SECNUM)

This is the count of the number of live births by Cesarean Section each respondent has had (04/24 coded 4). It is applicable for every respondent; i.e., respondents with no live births will have a value of zero.

VAR345 "Treated and/or hospitalized for PID?" (PIDTREAT)

If the respondent has never had intercourse or never been treated (19/56 coded 2 or BLANK), then she has never been treated, so PID=1.

If the respondent has been treated but not hospitalized (19/56 coded 1 AND 19/57 coded 1), then PID=2.

If the respondent has been both treated and hospitalized (19/56 coded 1 AND 19/57 coded 2, 3, or 4), then PID=3.

If there is missing data on hospitalization (19/57 coded 9) but R was treated (19/56 coded 1), then PID = 2.

VAR355 "Smoking and Drinking during last preg" (SMOKPREG)

If the respondent has never been pregnant(03/76-77 coded 00), then PREGSMOK is inapplicable, so PREGSMOK=BLANK.

If the respondent neither smoked nor drank during her last pregnancy(14/66-67 coded 96 AND 14/68 coded 6), then PREGSMOK=1.

If the respondent smoked but did not drink(14/66-67 coded 01-07 AND 14/68 coded 6), then PREGSMOK=2.

If the respondent drank but did not smoke(14/66-67 coded 96 AND 14/68 coded 1-5), then PREGSMOK=3.

If the respondent both smoked and drank during her last pregnancy(14/66-67 coded 01-07 AND 14/68 coded 1-5), then PREGSMOK=4.

If there was missing data (codes 7, 8, or 9) in either 14/67 or 14/68, then PREGSMOK=9.

VAR360 "Fecundity Status" (FECUND)

If it is impossible for the respondent or her current husband to have a(nother) baby because of a sterilizing operation that was done because she had all the children she wanted(16/21 coded 1,2,3,5,9 AND 16/33 coded 1) or: (16/40 coded 1,2,3,5,9 AND 16/52=1) or (02/18 coded 1 or 4 AND 16/21 coded 4 AND 16/33 coded 1) or (02/18 coded 1 or 4 AND 16/40 coded 4 AND 16/52 coded 1), then she is contraceptively sterile, so FECUND=1.

NOTE: As in the specs for Var 160, if the woman or couple have had more than one sterilizing operation(16/20 coded 2-5):

if one is a female and the other is a male operation, classify using the female operation;

if both are female, or both are male, classify using the earlier operation.

If it is impossible for the respondent or her current husband to have a(nother) baby because of a sterilizing operation that was done for noncontraceptive reasons((16/21 coded

1,2,3, 5, 9 AND 16/33 coded 2) or 16/40 coded 1,2,3,5,9 AND 16/52 coded 2) or (02/18 coded 1 or 4 AND 16/21 coded 4 AND 16/33 coded 2) or (02/18 coded 1 or 4 AND 16/40 coded 4 AND 16/52 coded 2), then she is surgically sterile for noncontraceptive reasons, so FECUND=2.

If 16/33=8 or 9, AND 16/18=2 AND 16/19=1 AND 16/20=1:

and if 16/21=2 or 4, then FECUND=1
and if 16/21=3, then FECUND=2

If it is impossible for the respondent to have a(nother) baby for reasons other than surgical sterilization (16/19 coded 2), then she is nonsurgically sterile, so FECUND=3.

If she reports that it is difficult for her, and/or her current husband, to conceive or deliver a(nother) baby (16/71 coded 1), or a medical doctor advised her never to become pregnant(again) and said it would be dangerous for her and/or the baby and she will have an operation to be sure she won't become pregnant(16/75 coded 1), or her husband will have an operation(16/76 coded 1), or if she becomes pregnant (again) she will have the pregnancy ended (16/77 coded 1), then she is subfecund, so FECUND =4.

If R is currently using the pill (TL 301=1), then R is fecund, so FECUND=6.

If the respondent has used a method in the open interval (13/18 coded 1), and if she is still using it (13/29-32 or 13/42-45 or 13/55-58 coded 9696), then R is fecund, so FECUND = 6.

If, during the 3 years of continuous marriage before the interview, she did not conceive and used no contraception--that is,

she is currently married(02/18 coded 1 or 4)and the interval between the date of her current marriage and the date of interview is 3 years or more(century month in 26/49-54 minus century month in 20/53-58 GE 36);

and she has not become pregnant within the last 36 months or more((04/39 coded 1 AND(26/49-54 minus 04/25-30 GE 36));

(IF SHE HAS NEVER BEEN PREGNANT(03/76-77 coded 00), then skip the above test)

and she has not used a contraceptive method in the last 36 months or more(13/28 coded 2 AND 13/41 EQ 2 AND 13/54 EQ 2 AND 13/67 EQ 2) AND (take the last nonblank entry from 13/29-32, 13/42-45, 13/55-58, 13/68-71, and subtract it from 26/49-54; the difference must be GE 36 months).

If R has never been pregnant(03/76-77 coded 00) and has never used a method(13/18 coded 2), then the date of interview (26/49-52) minus date of current marriage(20/53-56) must be GE 36 months.

If R has been pregnant(03/76-77 coded 01-30) and never used a method since her last pregnancy(13/18 coded 2), then date of interview(26/49-54) minus date last pregnancy ended must be GE 36 months(04/39 coded 1 AND ((26/49-54 minus 04/25-30 GE 36));

If R has been pregnant(03/76-77 coded 01-30) and has used a method in the open interval(13/18 coded 1), or if R has never been pregnant(03/76-77 coded 00) and has used a method since her first intercourse(13/18=1),

AND she has not used a contraceptive method in the last 36 months or more(13/28 EQ 2 AND 13/41 EQ 2 AND 13/54 EQ 2 AND 13/67 EQ 2) AND (take the last nonblank entry from 13/29-32, 13/42-45, 13/55-58, 13/68-71, and subtract it from 26/49-54; the difference must be GE 36 months), then she has a long interval, so FECUND=5.

If R is not surgically sterile(TL 385= 1 or 8 or TL 386=2), and is currently using a nonsurgical method of contraception (CONSTAT=03-14 or TL 294-296 LE 120 or TL 381-383 NE 000 or 300-500 or 999), and , is not subfecund(TL 438=2), then FECUND=6.

All other respondents who have no missing data are fertile or fecund, so FECUND=6.

If R had missing data, then the case was assigned a value after looking at a printout of the entire case. If there was no useful information, then FECUND was assigned = 9 and imputed.

VAR370 "Nonintercourse in the open interval in last 12 months"
(NOSEX12)

- (1) If R never had intercourse, or never had intercourse since first menstrual period(17/41 coded 2 or 08/33-37 coded 9595), then NOSEX12=96.

If R is currently pregnant(CONSTAT coded 20), then she doesn't have an open interval, so NOSEX12=95.

- (2) If R has not had any periods of nonintercourse (12/19-22 coded 9696) in the open interval, then NOSEX12=0.
- (3) For women reporting one or more periods of non-intercourse in the open interval(12/19-22 not equal to 9696,9797,9898, or 9999):

- (4) if any of the months of nonintercourse (12/19-26; 12/27-34; 12/35-42) fall within the last 12 months--that is, date of interview (26/49-52) MINUS ending date(12/23-26, or 12/31-34, or 12/39-42) is less than or equal to 12 months--

then NOSEX12 is the NUMBER OF MONTHS within the last 12 that the respondent did not have intercourse at all.

If R has had intercourse only once (08/40 = 6), then NOSEX12 equals the date of interview minus the date of first intercourse, or 12, whichever is less.

NOTE: Analysts may wish, in studying currently married women, to limit this to those married at least 12 months before the interview date--that is, (25/49-52) MINUS 20/53-56 GE 12 months. Looking at the 'infertile' category of INFERT (var 310) does this.

VAR371 "Nonintercourse in open interval in last 24 months" (NOSEX24)

Repeat parts 1 through 3 of the specifications for VAR370.

In part 4 of the specifications for VAR370, use the last 24 months, rather than the last 12 months.

VAR372 "Nonintercourse in open interval in last 36 months" (NOSEX36)

Repeat parts 1 through 3 of the specifications for VAR370.

In part 4 of the specifications for VAR370, use the last 36 months, rather than the last 12 months.

FERTILITY

VAR405 "Timing of first birth" (MARBABY1)

If the respondent has not had a live birth (03/69-70 coded zero), MARBABY1 is coded BLANK.

If the respondent has had a live birth (03/69-70 coded 01-30) and has been married(02/18 coded 1,2,4,5),

and the date of the first live birth (BABY1MO, VAR 410) and the first marriage (MAR1MO), VAR 975) are known, then

if the date (century month) of first live birth is equal to or later than the date of first marriage(BABY1MO GE MAR1MO), then MARBABY1 is the number of completed months in the interval between BABY1MO and MAR1MO:

If the interval from
 MAR1MO to BABY1MO is then MARBABY1 is

000 months	000
001 months	001
002 months	002
• • •	• • •
360 months	360

if the date of first live birth is earlier than the date of first marriage (BABY1MO LT MAR1MO), then the first birth occurred before the first marriage, so MARBABY1=888.

If the respondent has had a live birth and has never been married (2/18 coded 3 or 6), the birth occurred before marriage, so MARBABY1 = 888.

Marriage refers to formal or informal marriage.

VAR406 "Timing of first birth and first formal marriage" (FMARBABY1)

If the respondent has not had a live birth (03/69-70 coded zero), FMARBABY1 is coded BLANK.

If the respondent has had a live birth (03/69-70 coded 01-30) and has been formally married (VAR976, FMAR1MO ne blank),

and the date of the first live birth (BABY1MO, recode 410) and the first formal marriage (VAR976) are known, then

if the date (century month) of first live birth is equal to or later than the date of first marriage (BABY1MO GE FMAR1MO), then FMARBABY1 is the number of completed months in the interval between BABY1MO and FMAR1MO:

If the interval from
 FMAR1MO to BABY1MO is then FMARBABY1 is

000 months	000
001 months	001
002 months	002
• • •	• • •
360 months	360

if the date of first live birth is earlier than the date of first formal marriage (BABY1MO LT FMAR1MO), then the first birth occurred before the first formal marriage, so FMARBABY1=888.

If the respondent has had a live birth and has never been formally married (VAR976 coded blank), the birth occurred before marriage, so FMARBABY1 = 888.

VAR410 "Century Month of first live birth" (BABY1MO)

If the respondent has not had a live birth (03/69-70 coded 00), then there is no date of first live birth, so BABY1MO=BLANK.

If the respondent has had one or more live births (03/69-70 coded 01-30), then the date of first live birth is the earliest reported date(04/25-30), of a live birth (04/18-19 coded 01,05,07).

VAR415 "Interval between first and second live birth" (BABY12)

If the respondent has never had a live birth(03/69-70 coded 00), then there is no interval from first to second live birth, so BABY12=BLANK.

If the respondent had at least two pregnancies ending in live birth(03/69-70 coded 02-30), then the interval between the first and second live birth is the century month of the second pregnancy ending in live birth (BABY2MO) minus the century month of the first pregnancy ending in live birth (BABY1MO).

If the respondent has had only one pregnancy ending in live birth(03/69-70 coded 01), then the interval is the century month of interview (26/49-54) minus the century month of the first pregnancy ending in live birth(BABY1MO).

VAR420 "Central number of additional births expected" (ADDEXP)

If R is currently pregnant intending live birth (03/75 coded 1 AND 03/26 coded 3 or 9), add 1 child (times 10) to her additional number expected.

If the respondent does not intend to have more children (17/18 coded 2), or if the questions are inapplicable, (17/18 coded blank), then her additional number expected is zero, so ADDEXP=00.

If she intends more(17/18 coded 1), and she knows her additional intended number(17/19-22 NE 9797,9898, or 9999), then her central additional number expected is the average of her intended range, so ADDEXP= 10 times (17/19-20)+(17/21-22) divided by 2.

If she disagrees with her husband about whether she intends more children, or doesn't know or thinks it's up to God (17/18 coded 3 or 8, or 17/19-22 coded 9797,9898, or 9999), then her central additional number expected is the average of her largest and smallest (17/24-25 and 17/26-27) additional number expected, so ADDEXP=10 times((17/24-25) + 17/26-27) divided by 2.

VAR425 "Total Births Expected" (TOTEXP)

TOTEXP is the sum of ADDEXP (VAR 420) and PARITY (VAR 980)*10.

VAR428 "Number of wanted Pregnancies" (WTPREG)

WTPREG is the count of the number of pregnancies a respondent has had that were wanted (the sum of codes 1,2,3, and 4 in (VAR 426, WANTWIFE)).

VAR429 "Number of unwanted pregnancies" (UNWPREG)

UNWPREG is the count of the number of pregnancies a respondent has had that were unwanted (the count of code 5 in VAR 426, WANTWIFE).

VAR430 "Number of wanted births" (WANTED)

WANTED is the count of the number of pregnancies a respondent has had that ended in live birth (04/18-19=01,05,07) AND that were wanted by the woman (VAR 426, WANTWIFE=1,2,3,4).

VAR431 "Number of timed births"(TIMED)

TIMED is the count of the number of pregnancies a respondent has had that ended in live birth (04/18-19=01,05, 07) AND that she wanted then, sooner, or didn't care (VAR 426, WANTWIFE=1,2, or 4).

VAR432 "Number of mistimed births" (MISTIMED)

MISTIMED is the count of the number of pregnancies a woman has had that ended in live birth (04/18-19=01,05,07) AND that she wanted eventually, but later than they occurred (VAR 426, WANTWIFE=3).

VAR433 "Number of unwanted births" (UNWANTED)

UNWANTED is the count of the number of pregnancies a woman has had that ended in live birth (04/18-19=01,05,07) AND that she did not want ever (WANTWIFE=5).

NOTE: VARS 434-443 are computed similarly, based on VAR 426, WANTWIFE. VARS 444-452 are based on both WANTWIFE and VAR 994 OUTCOME.

SEXUAL INTERCOURSE AND MARRIAGE

VAR505 "Age began dating" (DATE1AGE)

Transferred from 20/49-50.

VAR510 "Interval between first intercourse and marriage" (SEX1-MAR)

Marriage refers to formal or informal marriage.

If the respondent never had intercourse or never had intercourse after her first menstrual period (17/41 coded 2), then the interval between first intercourse and marriage is not applicable, code blank.

If the respondent has never been married (02/18 coded 3 or 6), then the end of the interval between first intercourse and "marriage" is the century month of interview completion (26/49-52).

If the respondent has been married once (20/51-52 coded 1) and is currently married (02/18 coded 1 or 4), then the century month of her first marriage is in 20/53-56.

If the respondent is formerly married (02/18 coded 2 or 5) or has been married more than once (20/51-52 coded 2, 3, ... 7, or 8), then the century month of her first marriage is in 21/18-21.

If century months (codes 577 though 997) are reported for date of first intercourse (08/33-36), and date of first marriage (locations above) or interview completion date (for never married women; see above), then the interval between first intercourse and marriage is the century month of marriage or interview completion minus the century month of first intercourse.

If date of first intercourse is missing (08/33-36 coded 9797, or 9898, or 9999), and age at first intercourse is given (08/37-38 coded 10-44), then estimate date of first intercourse as:

(century month of birth) plus (age times 12) plus (6).

Use the age given in 08/37-38 if it was after her birthday (08/39 coded 2) and use the age minus one if it was before her birthday (08/39 coded 1).

Code the difference between date of first intercourse and date of first marriage as follows:

blank=	Not applicable (never had intercourse or never had intercourse after first menstrual period)
00-360=	Number of months between first intercourse and marriage or interview (note: 0 is valid only for never married respondents)
996=	first intercourse was after, or in the same month as, first marriage (zero or negative differences, for ever married only)

The estimated date of first intercourse was used in VAR540. For each date calculated from an age, a 9 was placed in the first digit of the century month. If the resulting date = 9797, or 9898, one month was added; if the resulting date = 9999 or more, 9998 was coded. These adjusted dates were used in calculating VAR510.

VAR511 "Interval between first intercourse and formal marriage" (SEX1-FOR)

If the respondent never had intercourse or never had intercourse after her first menstrual period (17/41 coded 2), then the interval between first intercourse and marriage is not applicable, code blank.

If the respondent has never been formally married (VAR976 coded blank), then the end of the interval between first intercourse and marriage is the century month of interview (26/49-52).

If the respondent has ever been formally married, the century month of first formal marriage is in VAR976 (FMAR1MO).

If century months (codes 577 though 997) are reported for date of first intercourse (08/33-36), and date of first formal marriage or interview completion date, then the interval between first intercourse and marriage is the century month of formal marriage or interview completion minus the century month of first intercourse.

If date of first intercourse is missing estimation specifications from VAR 510 were used.

See VAR 510 for codes for the difference between date of first intercourse and date of first formal marriage.

VAR518 "Number of Formal Marriages" (FMARNO)

Count the number of times the respondent has been informally married by summing the code 1's in 20/59, 21/24, 22/24, and 23/24. Subtract this number from VAR 517, MARNO to derive FMARNO.

VAR519 "Intercourse in last 3 months" (SEXL3MO)

If R has never had intercourse, SEXL3MO=Blank.

If R is currently pregnant(3/75 EQ 1), dates of periods of nonintercourse are in 10/19-42, for the last interval.

If R is not currently pregnant(3/75 NE 1), dates of periods of nonintercourse are in 12/19-42.

If the respondent has had no periods of nonintercourse (10/19-22=9696 or 12/19-22=9696) then she has had intercourse in the last 3 months, so SEXL3MO=1.

If the ending date of the last period of nonintercourse (10/23-26 or 31-34 or 39-42 or 12/23-26 or 31-34 or 39-42) equals the date of interview(26/49-52), then

if the length of that period(ending date minus beginning date)=1 to 3 months, then respondent has had intercourse in the last 3 months, so SEXL3MO=1.

if the length of that period is GT 3 months, then she has not had intercourse in the last 3 months, so SEXL3MO=2.

If the ending date of the last period of nonintercourse (see locations above), is not equal to the date of interview (26/49-52), then the respondent has had intercourse in the last 3 months and SEXL3MO=1.

NOTE: Code 1 includes R's who had intercourse in any of the 3 months preceding--and not including--the month of interview.

If R has not had a second intercourse (8/40=6),

if interview date minus date of first intercourse (VAR540) LE 3, code 1;

if interview date minus date of first intercourse GT 3, code 2.

VAR520 "Frequency of intercourse" (SEXFREQ)

No recode needed. (13/75)

If R has never had second intercourse (8/40 eq 6), code 1.

If R refused whether she ever had intercourse (TL75 =7) assigned code = 9 and imputed.

VAR524 "Date of dissolution of first formal marriage" (DISFIRST)

See specifications for VAR525.

VAR525 "Interval between first formal marriage and dissolution of marriage"(MAR1DIS)

The century months and legal status of possible marriages in order of occurrence are in these locations:

	Date	Status
1st former marriage	21/18-21	21/24
2nd former marriage	22/18-21	22/24
Most recent former marriage	23/18-21	23/24
Current marriage	20/53-56	20/59

If the respondent has never been married (02/18 coded 3 or 6) or has never been formally married (21/24, 22/24, 23/24, and 20/59 not coded 2), then the interval between marriage and dissolution is not applicable, code blank.

If the respondent has been formally married (21/24, 22/24, 23/24, or 20/59 coded 2), then the century month of the first formal marriage is the date (21/18-21, 22/18-21, 23/18-21, or 20/53-56) corresponding to the first formal marriage (code 2) in the list of legal status locations above (21/24, 22/24, 23/24, or 20/59).

The types and dates of possible marriage dissolutions in order of occurrence are in these locations:

	Type	Death	Date Separation	Divorce
1st former marriage	21/25	21/26-29	21/44-47	21/32-35
2nd former marriage	22/25	22/26-29	22/44-47	22/32-35
Most recent former marriage	23/25	23/26-29	23/44-47	23/32-35

If the first formal marriage (see above) is the current marriage, then the first formal marriage is intact, code 996.

If the first formal marriage is the first, second, or most recent former marriage (see above), then the first formal marriage was dissolved. The date of the dissolution is in the location corresponding to the type of dissolution (21/25, 22/25, or 23/25 coded 3 for death, 4 for divorce, or 5 for separation) for the first formal marriage.

If century months were reported (codes 577 through 997) for the dates of first formal marriage and its dissolution, then the interval between the first formal marriage and dissolution of the marriage is the date of dissolution minus the date of marriage.

VAR529 "Date of second formal marriage" (MAR2MO)

See specifications for VAR 530.

VAR530 "Interval between dissolution of first formal marriage and formal remarriage" (DISIMAR)

The century months and legal status of possible marriages in order of occurrence are in these locations:

	<u>Date</u>	<u>Status</u>
1st former marriage	21/18-21	21/24
2nd former marriage	22/18-21	22/24
Most recent former marriage	23/18-21	23/24
Current marriage	20/53-56	20/59

If the respondent has never been married (02/18 coded 3 or 6) or has never been formally married (20/59 and 21/24 and 22/24 and 23/24 are all blank or 1), or has never had a formal marriage dissolved (21/24, 22/24, and 23/24 not coded 2), or first formal marriage dissolved by separation only (21/25 or 22/25 or 23/25 coded 5), then the interval from dissolution to remarriage is not applicable, code blank.

If the respondent has had a formal marriage dissolved (21/24, 22/24, or 23/24 coded 2), then the first dissolution is that for which code 2 appears first in the list of legal status locations (21/24, 22/24, and 23/24).

The date of the dissolution is in one of three locations, depending on the type of dissolution. The type of dissolution is given in 21/25, 22/25, or 23/25 (coded 3 for death, 4 for divorce, or 5 for separation), depending on which was the first formal marriage dissolution.

The types and dates of possible marriage dissolutions in order of occurrence are in these locations:

	Type	Death	Date	
			Separation	Divorce
1st former marriage	21/25	21/26-29	N.Applic.	21/32-35
2nd former marriage	22/25	22/26-29	N.Applic.	22/32-35
Most recent former marriage	23/25	23/26-29	N.Applic.	23/32-35

If there is no marriage date (code blank) in the location for the date of the marriage which would follow the first dissolved formal marriage (see list of marriage date locations above), then the respondent was not remarried, code 996.

If there is a marriage date in the locations for the date of the marriage which would follow the first dissolved formal marriage (see list of marriage date locations above), and that marriage is formal (status ne 1), then the respondent was remarried, and the length of the interval between dissolution and remarriage (in months) is the century month of the remarriage minus the century month of the dissolution.

If the marriage following the first dissolved formal marriage was informal (status eq 1), the century month of remarriage is that for the next formal marriage (status ne 1). If none of the subsequent marriages were formal, respondent was not remarried, code 996.

VAR540 "Century month of first intercourse" (DATESEX1)

If date of first intercourse is given, this requires no recode (08/33-36).

NOTE: VAR540 is a 4-digit field (TL 1292-1295). If TL 1292=9, this indicates that the date was estimated. For purposes of analysis, use the last 3 digits (TL 1293-1295). VAR540 and VAR606 are the only recoded dates that contain a "9" (flag) in the first digit to show that the date was estimated.

If date of first intercourse is missing(08/33-36 coded 9797,9898,9999), and age of first intercourse is given(08/37-38), then use the date of first intercourse as estimated and flagged in Var 510(SEX1MAR).

NOTE: To determine whether Var 410 is estimated or not, you must check TL 20 of the first interval file record that ends in live birth.

If neither Var 410 nor Var 540 are blank or missing, and Var 410 is not estimated, but Var 540 is estimated (TL 1292=9):

and Var 410 - Var 540 = 3-5 months,

if the birthweight of the first birth(05/19-22 or 05/23) was more than 5.5 pounds, then re-estimate Var 540 as (TL 194-195)*12 plus 1 month.

if the birthweight of the first birth was 5.5 pounds or less, then re-estimate Var 540 as (TL 194-5)*12 plus 4 months.

and Var 410 - Var 540 = 6-8 months,

if the birthweight of the first birth was more than 5.5 pounds, then re-estimate Var 540 as (TL 194-195)*12 plus 4 months.

if the birthweight of the first birth was less than 5.5 pounds, leave Var 540 as it is.

If MAR1MO (VAR 975) is not estimated and VAR 540 is estimated, and neither MAR1MO nor VAR 540 are blank or missing,

and VAR 540 - MAR1MO = 1-3 months, re-estimate VAR 540 as (TL 194-195) *12 plus 4 months.

and VAR 540 - MAR1MO = 4-6 months, re-estimate VAR 540 as (TL 194-195) *12 plus 1 month.

If VAR 540 is greater than VAR 606, the date of first conception, and if the outcome of the first pregnancy is not a live birth and is not a blank or missing (VAR611, PREGOUT1, = 2, 3, 4, or 5) and VAR 540 is estimated, re-estimate VAR 540 as equal to the date of first conception (VAR 606).

If var 540 (DATESEX1) is greater than or equal to the century month of first birth(VAR 410), or if Var 410 - Var 540 LE 2, and Var 410 is not estimated, and neither Var 540 nor Var 410 were missing or blank, then set VAR 540=9999 and impute.

If VAR 540 is an estimate; and VAR 540-VAR 606 (date of first conception) is greater than six months; and pregnancy outcome is not a live birth; set VAR 540=9999 and impute.

FIRST PREGNANCY

VAR603 "Interval between first marriage and first conception" (FMARICON)

If R has never been pregnant (TL 114-115=0), then FMARICON is coded BLANK.

If R has had one or more pregnancies (TL114-115=1 to 30), and is never formally married (VAR 976 eq blank), then FMARICON=995.

If R has had 1 or more pregnancies (TL 114-115 = 1 to 30), and is ever formally married (VAR 976 ne blank), then calculate FMARICON as the date of conception of first pregnancy (which must be calculated as described below), minus the date of first formal marriage (VAR 976).

To calculate the date of first conception, use interval file data for the first pregnancy (TL 11-12=01):

If there is a date of conception in TL 266-269 (i.e. the pregnancy ended in the last 3 years and date of conception is not missing or estimated), use it. If not,

If the pregnancy ended in a live birth (TL 13-14=01 or TL 16=1), then date of conception = date pregnancy ended (TL 20-23) minus 9.

If the pregnancy ended in an abortion (TL 13-14=02 or TL 16=2), then date of conception = date pregnancy ended (TL 20-23) minus duration of pregnancy, where duration is:

= TL 140-141 divided by 4.3 and rounded if TL 140-141
=00-42
= 2 if TL 142=1
= 4 if TL 142=2
= 7 if TL 142=3

If the pregnancy ended in a miscarriage or stillbirth (TL 13-14 = 03,04,10 or TL16=3 or 4), then date of conception = date pregnancy ended (TL 20-23) minus duration of pregnancy, where duration is:

= TL 157-158 (if known)
= 2 if TL 159 =1
= 4 if TL 159 =2
= 7 if TL 159 =3

If the calculated date of first conception is less than the date of first intercourse, and, either the date of first intercourse (VAR 540) is not estimated or the pregnancy ended in a live birth (TL 13-14 = 01 or TL 16 = 1), then set date of first conception equal to date of first intercourse.

If the interval is a negative number, the first conception occurred before marriage and FMARICON is coded 995.

VAR604 "Interval between first conception and first formal marriage" (CON1FMAR)

If R has never been pregnant (TL 114-115=0), then CON1FMAR is coded BLANK.

If R has had 1 or more pregnancies (TL 114-115 = 1 to 30), and is ever formally married (VAR 976 ne blank), then calculate CON1FMAR as the date of first marriage (VAR 976, FMAR1MO) minus the date of first conception, which is calculated as in VAR603, FMAR1CON.

If the interval is a zero or negative number, the first conception occurred after or in the same month as first formal marriage, and CON1FMAR is coded 995.

If R has had one or more pregnancies (TL114-115=1 to 30), and is never formally married (VAR 976 eq blank), then CON1FMAR = date of interview (TL 841-844) minus date of first conception.

VAR606 "Date of first conception" (DATE1CON)

If R has never been pregnant (TL 114-115 eq 0), DATE1CON is blank.

If R has ever been pregnant (TL 114-115 eq 1-30), DATE1CON is the date of first conception as calculated in VAR603, FMAR1CON.

NOTE: VAR606 is a 4-column field (1461-1464). If TL 1461=9, the date was based on an estimated date of first intercourse. For purposes of analysis, use the last 3 digits (1462-1462). VAR540 and VAR606 are the only recoded dates that contain a "9" ("flag") in the first digit to show that the date was estimated.

VAR611 "Outcome of first pregnancy" (PREGOUT1)

If R has never been pregnant (TL 114-115 = 0), then PREGOUT1 is coded BLANK.

If R has ever been pregnant (TL 114-115 = 1 to 30), then PREGOUT1 is the outcome of the first pregnancy (TL 11-12=01), as indicated in TL 13-14 and TL 16 of the first interval file record for each respondent.

See VAR 994 for codes 1-9.

VAR613 "Living arrangements of first live birth" (LIV1CHILD)

If R has never had a live birth (TL 107-108=0), code BLANK.

If R has ever had a live birth (TL 107-108 =1-30), code LIV1CHILD as follows, from TL 47, 59-62 on first interval record that includes a live birth (TL 13-14=01,05 or 07). If more than one live birth in pregnancy, use tape locations for first child.

If the child is no longer living (TL47=5 or TL 60=2), code 1.

If the child is still living with mother (TL59=1) and the mother is never formally married (VAR 976 eq blank), code 2.

If the child is still living with mother (TL 59=1) and the mother is ever formally married (VAR 976 ne blank), code 3.

If the child is living with other relatives (TL 61-62 =04,05), code 4.

If the child is living with adoptive parents (TL 47=3 or TL 61-62=06,07 or TL 60=3), code 5.

If the child has other living arrangements (TL 61-62=01,02,03,08), code 6.

Code 9=missing only if TL 59, 60, or 61-62 is missing.

INTERVAL FILE

VAR990 "Birth Order" (ORDER1)

If the pregnancy did not end in any live births (04/18-19=02,03,04,06,08,09,10), then ORDER is not applicable, Code =Blank.

For live births, ORDER1=01 for the earliest live birth (the first live birth record), 02 for the second, and so on.

VAR987 "Birth order" - 2nd birth (ORDER2)

If the pregnancy ended in no live births (04/20=blank) or 1 live birth (04/20=1), then ORDER2 is inapplicable, Code=BLANK.

Add "1" to the birth order indicated in 04/21-23.

VAR986 "Birth order" - 3rd birth (ORDER3)

If the pregnancy ended in no live births (04/20=blank) or 1 or 2 live births (04/20=1 or 2), then ORDER 3 is inapplicable, Code=BLANK.

Add "2" to the birth order indicated in 04/21-23.

VAR992 "Year pregnancy ended" (YRPREG)

Specifications are identical to the specifications for VAR342 (YRBIRTH). The only difference is that YRPREG is computed for all pregnancies, regardless of outcome.

Current pregnancies should be coded blank.

VAR994 "Pregnancy Outcome" (OUTCOME)

This recode assigns a single outcome code to each pregnancy, even if the pregnancy had multiple outcomes.

If the pregnancy outcomes included a live birth (TL 13-14 coded 01,05,07), it is a live birth, so OUTCOME=1.

If the pregnancy outcomes included an induced abortion but not live birth (TL 13-14 coded 02 or TL 16 coded 2), it is an induced abortion, so OUTCOME=2.

If the pregnancy outcomes included a miscarriage but no live births or induced abortions (TL 13-14 coded 03 or 10 or TL 16 coded 3), then the pregnancy was a miscarriage, so OUTCOME=3.

If the pregnancy outcomes, included only stillbirths (TL 13-14 coded 04 or TL 16 coded 4), then the pregnancy was a stillbirth, so OUTCOME=4.

If the pregnancy is a current pregnancy (TL 13-14 coded 09), OUTCOME=5.

Missing data: TL 13-14 coded 97,98, or 99.

VAR342 "Year of birth" (YRBIRTH)

If the pregnancy did not end in at least one live birth(04/18-19 coded 02,03,04,06,08,09, or 10), then the pregnancy was not a live birth, so YRBIRTH=Blank.

This is a 2-digit code. Century month of birth (4/25-28) is assigned a year code as follows:

Century month codes	Year	Code value
0400-0840, 9726, 9738, 9750, 9762, 9774, 9786, 9798, 9810, 9822, 9834	Before 1970	=60
0841-0852, 9846	1970	=70
0853-0864, 9858	1971	=71
0865-0876, 9876	1972	=72
0877-0888, 9882	1973	=73
0889-0900, 9894	1974	=74
0901-0912, 9906	1975	=75
0913-0924, 9918	1976	=76
0925-0936, 9930	1977	=77
0937-0948, 9942	1978	=78
0949-0960, 9954	1979	=79
0961-0972, 9966	1980	=80
0973-0984, 9978	1981	=81
0985-0996, 9990	1982	=82
0997-0999	1983	=83
9797, 9898, 9999	Year not ascertained	=99.

VAR426 "Wantedness of pregnancy--Wife" (WANTWIFE)

If the pregnancy ended before January 1979(04/25-28 LE 948), the relevant locations are 09/32-35.

If the pregnancy ended in Jan 1979 or later or is a current pregnancy, (04/25-28=949-996) the relevant locations are 11/72-75.

This recode is written assuming that the pregnancy ended in Jan 1979 or later. If the pregnancy ended before Jan 1979, use the analogous locations in 09/31-35.

If the respondent wanted the pregnancy sooner than it occurred(11/75=2), then the pregnancy was overdue, so WANTWIFE=1.

If the respondent wanted the pregnancy at about the time it occurred(11/75=3), then the pregnancy was on time, so WANTWIFE=2.

If the respondent wanted the pregnancy eventually, but later than it occurred(11/75=1), then the pregnancy was mistimed, so WANTWIFE=3.

If the respondent wanted the pregnancy and didn't care when it occurred(11/75=4), then the respondent was indifferent, so WANTWIFE=4.

If the respondent did not want to have that pregnancy ever (11/73=2 or 11/74=2), then the pregnancy was unwanted, so WANTWIFE=5.

If the respondent didn't know or didn't remember and probably didn't care about whether she wanted the pregnancy (11/74=3 or 8), then wantedness is undetermined, so WANTWIFE=6.

VAR427 "Wantedness of pregnancy--partner" (WANTMAN)

If the pregnancy ended before Jan 1979 (04/25-28 LE 948), the relevant locations are 09/36-37.

If the pregnancy ended in Jan. 1979 or later or is a current pregnancy, (04/25-28=949-996), the relevant locations are 11/76-77.

See specifications for VAR 426.

VAR614 "Living arrangements of first or only baby" (LIVBABY1)

For each pregnancy not ending in a live birth (TL 13-14 NE 01,05,07), code inapplicable=BLANK.

For each pregnancy ending in a live birth (TL 13-14 EQ 01,05,07), code LIVBABY1 for the first or only baby in the pregnancy using the specifications for VAR 613 (LIV1CHILD).

Computation of VAR 615 and VAR 616 repeats specifications for VAR 614. Blanks assigned if no second or third baby in pregnancy.

VAR620 "Marital status at pregnancy outcome" (MAROUT)

If R is never married (R file TL 11 = 3 or 6), then she was never married at this pregnancy outcome, code 1.

If R is ever married (R file TL 11=1,2,4,5),
if the date the pregnancy ended (TL 20-23) is LT the date of first marriage (MAR1MO,VAR975), she was never married at this pregnancy outcome, code 1.

if the date the pregnancy ended (TL 20-23) is GE the date of first marriage (MAR1MO,VAR975), she was ever married at this pregnancy outcome, code 2.

If the pregnancy is a current pregnancy, code blank.

VAR621 "Formal marital status at pregnancy outcome" (FMAROUT)

If R has never formally married (VAR976 eq blank), then she was never formally married at this pregnancy outcome, code 1.

If R has ever formally married (VAR976 ne blank),
if the date the pregnancy ended (TL 20-23) is LT the date of first formal marriage (VAR976), she was never married at this pregnancy outcome, code 1.

if the date the pregnancy ended (TL 20-23) is GE the date of first formal marriage (VAR976), she was ever married at this pregnancy outcome, code 2.

If the pregnancy is a current pregnancy, code blank.

APPENDIX 2

SAMPLE DESIGN, WEIGHTING AND VARIANCE ESTIMATION

The following report was published by the National Center for Health Statistics in September, 1985:

National Survey of Family Growth, Cycle III: Sample Design, Weighting, and Variance Estimation, Vital and Health Statistics, Series 2, Number 98. By Christine Bachrach, Marjorie Horn, William Mosher, and Iris Shimizu.

It is available on the NCHS web site at:

http://www.cdc.gov/nchs/data/series/sr_02/sr02_098.pdf
