Numerator	Number of State public health systems that use the National Public Health Performance Standards Program.
Denominator	Not applicable.
Population Targeted	State public health systems.
Questions Used To Obtain the National Baseline Data	Not applicable.
Expected Periodicity	Annual.

Comments

The National Public Health Performance Standards Program (NPHPSP) is a collaborative effort to enhance the Nation's public health systems. Seven national public health organizations have partnered to develop national performance standards for State and local public health systems.

The State Public Health System Assessment Instrument can be found at http://www.cdc.gov/od/nphppsp/Documents/State_v_1_OMB_0920-0557.pdf.

Objective 23-11 moved from developmental to measurable during the Healthy People 2010 Midcourse Review. Four subobjectives were created, addressing state and local public health systems that use the National Public Health Performance Standards, and meet national public health standards.

See Appendix A for focus area contact information.
