

Quality Assurance for Tuberculosis Surveillance Data

A Guide and Toolkit

2013

These materials are designed to help improve the quality of tuberculosis (TB) surveillance data in the United States by providing healthcare staff with a standardized process and tools for conducting quality assurance.

**Division of Tuberculosis Elimination
National Center for HIV/AIDS, Viral Hepatitis, STD, and TB Prevention
Centers for Disease Control and Prevention, Atlanta, Georgia, USA 30333**

These materials were prepared by

The materials in the Quality Assurance for Tuberculosis Surveillance Data: A Guide and Toolkit were prepared by the following:

Surveillance, Epidemiology, and Outbreak Investigations Branch

Lilia P. Manangan, RN, MPH
Elvin Magee, MPH, MS
Robert Pratt, BS
Kai Young, MPH, CHES
Juliana Grant, MD, MPH
Glenda T. Newell, CSA
Lori Armstrong, PhD
Rachel Yelk-Woodruff, MPH
Carla Jeffries, MPH
Smita Ghosh, MS
Roque Miramontes, PA-C, MPH

Communications, Education, and Behavioral Studies Branch

Cheryl Tryon, MS

Data Management and Statistics Branch

Sandy Price, PMP
Stacey Parker

Laboratory Branch

Angela Starks, PhD
Beverly Metchock, DrPH, D(ABMM)

Field Services and Evaluation Branch

Alstead Forbes, JD, LL.M.
Derrick Felix

CDC Reviewers

Phil LoBue, MD, FACP, FCCP
Thomas R. Navin, MD
Wanda Walton, PhD, MEd
Amera Khan, MPH
Ann Lanner, BA
Jose E. Becerra, MD, MPH
Michael F. Iademarco, MD, MPH
Terence Chorba, MD, DSc, MPH

External Contributors

Jason Cummins (Tennessee), Janice Westenhouse (California), Eyal Oren (Washington), Sheanne Allen (Washington), Sevim Ahmedov (Florida), Jill Fournier (New Hampshire), Gayle Wainwright (Oregon), Maria Rodriguez (Texas), Oralia Escobedo (Texas), Liza King (New York City), Andrea Palmer (Maryland), Karen Fujii (Maryland), Jessica Arner (Maryland), Jacinthe Thomas (New York City), and Jerry Carlile (Utah), Suzanne Keller (Virginia)

Contents

Chapter 1: Introduction to the Guide and Toolkit	Page
Background	1-1
Goal and Objectives	1-3
Target Audience	1-4
About the Guide and Toolkit	1-4
Disclosure Statement	1-8
How to Access the Materials	1-8
Additional Information	1-8

Chapter 2: National Tuberculosis Surveillance System Data Flow	Page
Definitions	2-1
National Tuberculosis Surveillance System (NTSS) Data Flow	2-3
Flow of NTSS Data from Jurisdictions to CDC DTBE	2-3
Flow of NTSS Data within CDC DTBE	2-4
Schedule of Availability of NTSS Data to Jurisdictions	2-7
Additional Information	2-9

Chapter 3: Overview of the Quality Assurance Process	Page
Definitions	3-1
Introduction to the Quality Assurance Process	3-1
Written Quality Assurance Protocol Guide	3-4
Quality Assurance Plan Tools	3-5

Five QA Components

Chapter 4: Case Detection	Page
Definitions	4-1
Quality Assurance Process for Case Detection	4-2
Example: Decline in Reported Tuberculosis Investigation	4-5
Case Detection Tools	4-11

Chapter 5: Data Accuracy	Page
Definitions	5-1
Quality Assurance Process for Data Accuracy	5-4
Example: National Tuberculosis Surveillance System (NTSS)	5-6
Example: Accuracy in Laboratory Data	5-15
Example: Data Validation Pilot Project	5-24
Example: System Quality Assurance Reports	5-27
Data Accuracy Tools	5-31

Chapter 6: Data Completeness	Page
Definitions	6-1
Quality Assurance Process for Data Completeness	6-3
Example: Invalid, Missing, and Unknown (MUNK)	6-5
Example: Completeness and Accuracy of 2009 Data from the National Tuberculosis Surveillance System	6-8
Data Completeness Tools	6-14

Chapter 7: Data Timeliness	Page
Definitions	7-1
Quality Assurance Process for Data Timeliness	7-2
Example: Process for TB Case Count and Final RVCT Data Submission to CDC	7-5
Example: Impact of Timeliness on TB Data Report Availability	7-11
Data Timeliness Tools	7-15

Chapter 8: Data Security and Confidentiality	Page
Definitions	8-1
Quality Assurance Process for Data Security and Confidentiality	8-2
Example: Data Security and Confidentiality Guidelines for HIV, Viral Hepatitis, Sexually Transmitted Disease, and Tuberculosis Programs	8-3
Data Security and Confidentiality Tools	8-6

Chapter 9: Quality Assurance Cross-cutting Systems and Process: NTIP, TB GIMS, and Cohort Review	Page
Definitions	9-1
Overview of Quality Assurance Cross-cutting Systems and Process	9-4
National TB Indicators Project (NTIP)	9-5
TB Genotyping Information Management System (TB GIMS)	9-20
Cohort Review and Quality Assurance for TB Surveillance Data	9-34
Quality Assurance Cross-cutting Tools	9-37

Chapter 10: Toolkit for Quality Assurance	Page
Description and Disclosure	10-1
Chapter 3: Quality Assurance Plan Tools	10-3
Chapter 4: Case Detection Tools	10-26
Chapter 5: Data Accuracy Tools	10-39
Chapter 6: Data Completeness Tools	10-54
Chapter 7: Data Timeliness Tools	10-62
Chapter 8: Data Security and Confidentiality Tools	10-71
Chapter 9: Quality Assurance Cross-cutting Tools	10-77
Source Contact List for Tools	10-87

Appendices

Appendix	Page
A: References	A-1
B: Glossary	B-1
C: Quality Assurance Process PowerPoint Slides	C-1
D: Report of Verified Case of Tuberculosis Questions and Clarifications	D-1
E: Answers to the Exercises	E-1
