1/ Based on operation codes and reason entered hospital.

*Data on hospital discharges (Tape locations 132-141) are based on a 6-month recall. The DHIS estimates the number of discharges from the hospital tape, which has the appropriate weights. Users of the SOA tape who do not want to link to the hospital tape can approximate the DHIS estimates by multiplying the frequencies in Tape locations 132-141 by the semi-annual weight in Tape locations 210-218.
