

## Healthy People 2010 Operational Definition

---

### **16-1. Reduce fetal and infant deaths.**

#### **16-1e. Postneonatal deaths (between 28 days and 1 year).**

<b>National Data Source</b>	National Vital Statistics System - Mortality and Natality (NVSS-M and NVSS-N), CDC, NCHS.
<b>State Data Source</b>	National Vital Statistics System - Mortality and Natality (NVSS-M and NVSS-N), CDC, NCHS.
<b>Healthy People 2000 Objective</b>	14.1g (Maternal and Infant Health).
<b>Changes since the 2000 Publication</b>	None.
<b>Measure</b>	Rate per 1,000 live births.
<b>Baseline (Year)</b>	2.4 (1998)
<b>Target</b>	1.2
<b>Target-Setting Method</b>	Better than the best racial/ethnic subgroup For a discussion of target-setting methods, see Part A, section 4.
<b>Numerator</b>	Number of deaths of infants aged 28 days to less than 1 year.
<b>Denominator</b>	Number of live births.
<b>Population Targeted</b>	U.S. resident live births.
<b>Questions Used to Obtain the National Baseline Data</b>	Not applicable.
<b>Expected Periodicity</b>	Annual.
<b>Comments</b>	This objective uses a similar measurement protocol as the comparable Healthy People 2000 objective; however, all of the baseline data for this objective come from the period-linked birth and infant death data set (linked file). <sup>1</sup> In the linked file, the information from the death certificate is linked to information on the birth certificate for each infant

under 1 year who died during the calendar year. The purpose of linkage is to use the many variables and improve racial/ethnic reporting available from the birth certificate. The comparable Healthy People 2000 objective was tracked using the annual “unlinked” file<sup>2</sup> for the total and black population, and the cohort (used from 1983–91) or period-(used since 1995) linked file for the American Indian/Alaska Native and Puerto Rican populations.<sup>3</sup>

For some measures, data do not meet the criteria for statistical reliability, data quality, or confidentiality and have been suppressed. Information on suppression of data for the major Healthy People 2010 data systems has been published in a *Healthy People Statistical Note*.<sup>4</sup>

See Part C for a description of NVSS-M and NVSS-N and Appendix A for focus area contact information.
