

Healthy People 2010 Operational Definition

25-10. Reduce neonatal consequences from maternal sexually transmitted diseases, including chlamydial pneumonia, gonococcal and chlamydial ophthalmia neonatorum, laryngeal papillomatosis (from human papillomavirus infection), neonatal herpes, and preterm birth and low birth weight associated with bacterial vaginosis.

Comments

This objective was deleted at the 2005 Healthy People 2010 Midcourse Review due to the lack of a national data source.

See Appendix A for focus area contact information.
