VITAL STATISTICS REPORT

Summary Report *Final Divorce Statistics, 1971*

FROM THE
NATIONAL CENTER FOR HEALTH STATISTICS

Divorces increased for the ninth consecutive year in 1971. Provisional data, available through the first 8 months of 1974, indicate that both the number and rate of divorces are continuing to increase. The final national divorce total for 1971 was 773,000. This was 9.2 percent higher than the 708,000 reported in 1970 and 87.2 percent higher than the figure for 1962. The divorce totals for 1969, 1970, and 1971 were all higher than the previous alltime peak of 610,000 divorces in 1946.

The divorce rate also increased from 3.5 per 1,000 population in 1970 to 3.7 in 1971. This was the second highest divorce rate ever observed nationwide; the highest was 4.3 in 1946. The divorce rate per 1,000 married women was 15.8, up from 14.9 in 1970 and 9.4 in 1962; the increases were 6.0 and 73.6 percent, respectively.

From 1970 to 1971 the divorce rate per 1,000 population increased in all regions except the West where it did not change. It also increased in all geographic divisions and States for which rates for both

years are available except the Pacific Division and Alaska, California, Idaho, Maine, Nevada, Oklahoma, and Wisconsin.

Information about characteristics of divorces is available only from States that participate in the divorce-registration area (DRA). In 1971, 29 States participated; South Carolina was included beginning in January of that year. The number of divorces granted in the DRA in 1971 was 466,019, or 60 percent of the national total.

For the DRA in 1971 the median duration of marriage at time of divorce was 6.7 years. The same median was observed in 1970; it declined from 7.5 years in 1963 and 6.9 years in 1969.

The national estimate of children under 18 years of age involved in divorces was 946,000, an increase of 8.7 percent over the estimate for 1970 (870,000). The ratio of children under 18 years of age per divorce was 1.22 in both years. The total number of persons involved in divorce—husbands, wives, and children—was 2,492,000 in 1971 compared with 2,286,000 in 1970.

The number of divorces classified by number of reported children under 18 years of age is shown in table 5 for the DRA and each participating State.

MONTHLY VITAL STATISTICS REPORT

Table 1. DIVORCES AND RATES: UNITED STATES, EACH REGION, DIVISION, AND STATE, 1969-71

[Data are counts of decrees granted (including reported annulments and dissolutions of marriage) supplied by States except as noted. Figures for the divorce-registration States differ slightly from those based on sample data shown in table 5. Rates per 1,000 population in each area estimated as of July 1, 1969 and 1971 and enumerated as of April 1, 1970]

This report presents summary tabulations from the final divorce statistics for 1971. More detailed tabulations for 1971 will be published in *Vital Statistics of the United States, Volume III - Marriage and Divorce*. Prior to the publication of that volume, the National Center for Health Statistics will respond to requests for unpublished data whenever possible.

Table 4. ESTIMATED NUMBER OF CHILDREN INVOLVED IN DIVORCES AND ANNULMENTS: UNITED STATES, 1954-71

[Refers only to events occurring within the United States. For 1960-71 estimated from frequencies based on sample; for all other years estimated from total counts]

Year	Estimated number of children involved	Average number of children per decree	Year	Estimated number of children involved	Average number of children per decree
1971 ¹	946,000	1.22	1962 ²	532,000	1.29
1970 ¹	870,000	1.22	1961 ²	516,000	1.25
1969	840,000	1.31	1960	463,000	1.18
1968	784,000	1.34	1959	468,000	1.18
1967	701,000	1.34	1958	398,000	1.08
1966	669,000	1.34	1957	379,000	0.99
1965	630,000	1.32	1956	361,000	0.95
1964 ²	613,000	1.36	1955	347,000	0.92
1963 ²	562,000	1.31	1954	341,000	0.90

¹Estimates are based on DRA frequencies instead of 16 States previously used.
²Revised.

Table 5. DIVORCES AND ANNULMENTS BY NUMBER OF CHILDREN REPORTED: DIVORCE-REGISTRATION AREA AND EACH REGISTRATION STATE, 1971

[Based on sample data. Data relate to children under 18 years of age except as noted]

Area	All divorces and annulments	Number of children reported						
		None	1	2	3	4	5 or more	Not stated

¹Data are for number of children affected by decree.

TECHNICAL NOTES

Place and Time of Occurrence

Divorces and annulments are shown in all tables by State where decree was granted, which is also the State of legal residence of the plaintiff. The time of divorce or annulment is based on the date the decree was granted.

Sources of Data

Figures in tables 1 and 2 are based on totals of divorce or annulment decrees tabulated and reported by States and counties. Figures in tables 3 and 5 are based on probability samples of divorce and annulment records that were coded and tabulated in this office.

Figures in table 4 were estimated by using several methods. Estimates for 1954-59 were prepared on the assumption that the average number of children per decree for the Nation was identical with that for the reporting States. The figure for 1960 was based on a nationwide sample. Figures for 1961-71 were prepared by multiplying the national divorce total by the average number of children per decree found in the combined States with satisfactory reporting of the number of children. There were 16 such States in 1961-69, all 28 registration States in 1970, and in 29 registration States in 1971.

SAMPLING ERROR OF ESTIMATED FREQUENCY EXPRESSED AS PERCENTAGE OF AREA TOTAL: DIVORCE-REGISTRATION AREA, 1969-71, AND THE 29 REGISTRATION STATES, 1971

[Figures for Alaska, Hawaii, Montana, Rhode Island, South Dakota, Vermont, and Wyoming have no sampling errors because all records were tabulated]

Divorce Samples

Sample data used to estimate the 1971 frequencies in table 5 and the frequencies used to compute median duration of marriage for 1969-71 in table 3 were selected by using four different sampling rates, depending on the size of the annual divorce total for a State. The rates were 10, 20, 50, or 100 percent of the divorces granted in a State. Samples were selected only from the States that participated in the divorce-registration area.

Sampling errors are given in the table for the estimates which constitute 1, 10, 25, 50, 75, 90, and 99 percent of the annual divorce totals. These sampling errors are given for the divorce-registration area and each registration State for 1971 data and only for the divorce-registration area for 1969 and 1970 data.
