

Table A. Percentage change in death rates and age-adjusted death rates in 2007 from 2006, by age, race, and sex: United States

[Based on death rates on an annual basis per 100,000 population, and age-adjusted rates per 100,000 U.S. standard population; see "Technical Notes." Data for specified races other than white and black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys; see "Technical Notes." Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards]

¹ Multiple-race data were reported by 27 states and the District of Columbia in 2007. The multiple-race data for these reporting areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other reporting areas; see "Technical Notes."

² Includes Aleuts and Eskimos.

³ Includes Chinese, Filipino, Hawaiian, Japanese, and Other Asian or Pacific Islander.

⁴ Death rates for "Under 1 year" (based on population estimates) differ from infant mortality rates (based on live births).
