

User Guide to the 2010 Fetal Death Public Use File

20010 Fetal Death Data Set

User's Guide

ACKNOWLEDGMENTS

Preparation of this user's guide was coordinated by Elizabeth Wilson and Marian MacDorman of the Division of Vital Statistics (DVS) under the general direction of Joyce A. Martin, Lead Statistician, Reproductive Statistics Branch (RSB), DVS, and Amy Branum, Chief of the Reproductive Statistics Branch (DVS). The vital statistics computer file on which it is based was prepared by DVS staff.

The Division of Vital Statistics, Delton Atkinson, Director, manages the Vital Statistics Cooperative Program, through which the vital registration offices of all states, the District of Columbia, New York City, Puerto Rico, Virgin Islands, Guam, American Samoa, and the Commonwealth of the Northern Mariana Islands, provided the data to the National Center for Health Statistics (NCHS). This Division, and its Data Acquisition, Classification, and Evaluation Branch (DACEB), and Systems, Programming, and Statistical Resources Branch (SPSRB), processed computer edits, designed and programmed the tabulations, reviewed the data, prepared documentation for this publication, and were responsible for receipt and processing of the basic data file.

NCHS acknowledges the essential role of the vital registration offices of all states and territories in maintaining the system through which vital statistics data are obtained and their cooperation in providing the information on which this publication is based.

Questions on the documentation or substantive questions concerning the data should be directed to the Reproductive Statistics Branch, Division of Vital Statistics, NCHS, 3311 Toledo Road, Hyattsville, MD 20782-2003 (1-800) 232-4636.

Introduction

Abridged Fetal Death File

In an effort to improve the timeliness of fetal death data, NCHS will be releasing abridged fetal death data files for the next several data years. These files contain only data items that are comparable between the 1989 and the 2003 revisions of the U.S. Standard Report of Fetal Death. The inclusion of only comparable items greatly reduces the complexity of the data file, while still including the most important analytical variables. Reduced file complexity means faster processing time and more years of data produced more quickly. The User Guides for the next few years will also be abridged to include only the most important information needed for data analysis. Please see the 2006 Fetal User Guide for more detailed information, including detailed Technical Notes on the fetal death data:

ftp://ftp.cdc.gov/pub/Health_Statistics/NCHS/Dataset_Documentation/DVS/fetaldeath/2006FetalUserGuide.pdf .

U.S. fetal death data

United States fetal death data represent fetal deaths registered in the 50 states, the District of Columbia, and New York City. The majority of states require reporting fetal deaths of 20 weeks of gestation or more, or 350 grams delivery weight (roughly equivalent to 20 weeks), or some combination of the two. The Centers for Disease Control and Prevention's National Center for Health Statistics (NCHS) receives these data as electronic files, prepared from individual records processed by each registration area, through the Vital Statistics Cooperative Program.

Fetal death data for the U.S. are limited to events occurring within the United States to U.S. residents and nonresidents. Fetal deaths to nonresidents of the United States are excluded from all tabulations by place of residence. Fetal deaths occurring to U.S. citizens outside of the United States are not included in this file. Most of the Documentation Tables included in this User's Guide are restricted to fetal deaths occurring at gestation of 20 weeks or more.

Availability of geographic detail

Beginning with the 2005 data year, the U.S. micro-data fetal death file no longer includes geographic detail (e.g., mother's state of residence). Tabulations of fetal death data by residence of mother for states and for counties with populations of 250,000 or more are available for previous years using the VitalStats online data access tool described below. Certain geographic level data may also be available upon request: See "NCHS Data Release and Access Policy for Micro-data and Compressed Vital Statistics Files", available at: http://www.cdc.gov/nchs/nvss/dvs_data_release.htm.

The 2010 territories file includes data on fetal deaths occurring in American Samoa, Guam, the Northern Marianas, Puerto Rico and the Virgin Islands. It includes limited geographical data such as information identifying individual territories and counties (or their equivalent) with populations of 250,000 or more by place of occurrence and residence.

VitalStats

Fetal death public use data, including geographic level detail for states are available at VitalStats. VitalStats is an online data access tool which provides the ability to build tables from many public use fetal death variables. Tabulated data can be exported

to Excel for further analysis. VitalStats for fetal deaths, 2003 – 2009, is available at: <http://www.cdc.gov/nchs/VitalStats.htm>. VitalStats for 2010 will be available in the near future.

Downloadable files

Fetal death public use data files from 1982 to 2010, including User Guides, U.S. Fetal Death Data, and U.S. Territories Fetal Death Data are available for downloading directly from the NCHS website at:

http://www.cdc.gov/nchs/data_access/Vitalstatsonline.htm .

The 1989 and 2003 Revisions of the U.S. Report of Fetal Death

This data file includes data based on both the 1989 revision of the U.S. Standard Report of Fetal Death (unrevised) and the 2003 revision of the U.S. Standard Report of Fetal Death (revised). The 2003 revision is described in detail elsewhere. (See the 2003 Revision website at: http://www.cdc.gov/nchs/vital_certs_rev.htm). Twenty-three states: California, Delaware, Florida, Georgia, Idaho, Indiana, Kansas, Kentucky, Maryland, Michigan, Montana, Nebraska, Nevada, New Hampshire, North Dakota, Oklahoma, Oregon, Pennsylvania, South Carolina, South Dakota, Texas, Utah, and Washington implemented the revised fetal death report as of January 1, 2010. The 23 revised states represent 52.9 percent of all U.S. fetal deaths of 20 weeks and over. Additionally, Wyoming and the District of Columbia implemented the revised fetal death report in 2010, but after January 1. Revised data are combined with unrevised data from the remaining areas to create US data.

Incomplete national reporting: The use of reporting flags

Even with the data file restricted to comparable items, there are some items that are not reported by all states. Reporting flags were developed to help the user more readily identify the correct fetal deaths for items with less than national reporting. Reporting flags are available for many items in the file, and positions for reporting flags are noted along with each data item in the file layout.

Translating “blanks”

In the 2010 fetal death file, for data items which are not reported by all states, fetal deaths to residents of a revised state occurring in an unrevised state, and fetal deaths to residents in an unrevised state occurring in a revised state, are represented by “blanks.” Blanks should be treated as “unknowns” for tabulations. In sum, the correct use of reporting flags and translation of blanks will result in an accurate tally of fetal deaths for items with incomplete national reporting. For an example of SAS code that may be used to incorporate the correct use of reporting flags and the translation of blanks, see below.

Example of SAS code using reporting flags (and translating blanks)

The example below is for the item “hysterotomy/hysterectomy,” which is reported by 45 states, New York City and the District of Columbia in 2010

Sample SAS program

```
01 DATA work;
02     INFILE 'c:fet10us.dat' LRECL=801;
03     INPUT
04         tabflg 9
05         restatus 138
06         hyster 402
07         f_hyster 797;
08
09     /*Include if 20 weeks gestation or more*/
10     IF tabflg EQ 2;
11     /*Exclude foreign residents*/
12     IF restatus NE 4;
13     /*Select reporting area*/
```

```
14         IF f_hyster=1;
15         /*Convert blanks to unknown*/
16         IF hyster=. THEN hyster=9;
17
18     PROC FREQ;
19         TABLE hyster;
20     RUN;
```

In this example, “tabflg” is used to select fetal deaths of 20 weeks gestation or more.

Also, “restatus” is used to exclude fetal deaths to foreign residents (this is standard practice for all NCHS tabulations). As well in this example, blanks are represented by numeric values SAS code = (.). However, for some items in the file, e.g., pregnancy risk factors, blanks are represented by character values for which the SAS code is empty quotes (‘ ’).

Data Issues

Mother’s Race – Puerto Rico does not report data on mother’s race, thus data located in position 143 (Mother’s race recode variable) should be disregarded. This applies to all data years.

Mother’s Hispanic Origin - In the 2007-2010 U.S. fetal death data files, many records for Minnesota were erroneously assigned to the ‘9’ or not stated category for mother’s Hispanic origin (position 148) and mother’s race/Hispanic origin (position 149). This was due to a programming error.

Control Count of Records

File Characteristics: Fetal Public Use File 2010

All files:

Record format: Blocked, Fixed, Format
Code scheme: Numeric/Alphabetic/Blank
Record length: 801

Record counts

U.S. file record count:

Counts of all fetal deaths:

Record count	58,079
By occurrence	58,079
By residence	58,040
To foreign residents	39

Counts of 20 weeks or more:

Record count	24,276
By occurrence	24,276
By residence	24,258
To foreign residents	18

Counts of less than 20 weeks:

Record count	33,803
By occurrence	33,803
By residence	33,782
To foreign residents	21

U.S. territories file record count:

Counts of all fetal deaths:

Record count	510
By occurrence	510
By residence	505
To foreign residents	5

Counts of 20 weeks or more:

Record count	500
By occurrence	500
By residence	495
To foreign residents	5

Counts of less than 20 weeks:

Record count	10
By occurrence	10
By residence	10
To foreign residents	-

DATA ELEMENTS AND LOCATIONS – 2010 FETAL DEATH FILE

<u>Data Items</u>	<u>Locations</u>
1. General	
a) Tabulation flag (gestational age)	9
b) Data year	15-18
c) Resident status	138
d) Place of delivery	42,59
e) Attendant at delivery	410
2. Fetus	
a) Sex	436
b) Plurality	423
c) Weight at delivery	463-473
d) Gestational age	446-455
e) Month/year of delivery	15-20
f) Day of week of delivery	29
3. Mother	
a) Age	89-93
b) Race	143
c) Marital status	153
d) Hispanic Origin	148,149
4. Father	
a) Age	186
5. Pregnancy History	
a) Live birth order	212
b) Total birth order	217
6. Medical and Health Data	
a) Method of delivery	400-403
b) Breech	384
c) Medical risk factors	331,335,336,337
d) Weight gain during pregnancy	276-278
e) Congenital anomalies	504,505,513,518,523
7. Residence reporting flags	573-801

1990	31,386	13,427	17,959	7.49	3.22	4.30
1985	29,661	10,958	18,703	7.83	2.91	4.95

^{\1}Rate is number of fetal deaths in specified group per 1,000 live births and fetal deaths.

^{\2}Fetal deaths with stated or presumed period of gestation of 20 weeks or more.

^{\3}Not stated gestational age proportionally distributed.

^{\4}Rates have been revised from those published previously; see Technical notes.

Table 18. Fetal deaths by method of delivery and age of mother: 49 reporting states and the District of Columbia, 2010

[Fetal deaths include only those with stated or presumed period of gestation of 20 weeks or more.]

Method of delivery	All fetal deaths ¹	Method of Delivery Reported							
		Age of mother (years)							
		All ages	Under 20	20-24	25-29	30-34	35-39	40-54	Not stated ²
Vaginal delivery									
Total vaginal	24,124	19,341	2,201	4,552	4,986	4,199	2,507	896	1,167
Vaginal with forceps	19,341	168	18	32	46	45	23	4	928
Vaginal with vacuum	19,341	129	9	35	37	27	18	3	925
Cesarean delivery	24,124	3,410	213	696	901	837	568	195	1,167
Hysterectomy/hysterotomy ³	22,801	206	11	47	59	51	28	10	2,313

¹ Total for total vaginal, cesarean delivery, and hysterectomy/hysterotomy is the number of fetal deaths to residents of areas reporting respective method of delivery. Total for vaginal with forceps and vaginal with vacuum is the total number of fetal deaths to women delivering vaginally.

² No response reported for method of delivery.

³ Excludes data for Connecticut, New York State (not NYC), Oklahoma, and Wyoming which do not report hysterectomy or hysterotomy.

Note: Hawaii does not report method of delivery.

Fetal Death Documentation Table 19A
