Table A-20a. Age-adjusted percent distribution (with standard errors) of human immunodeficiency virus testing status among adults aged 18 and over, by selected characteristics: United States, 2013

Selected characteristic	All adults aged 18 and over	Ever tested for HIV ¹	Never tested for HIV ¹
Hispanic or Latino origin ⁴ , race, and sex			
Hispanic or Latino, male	100.0	36.0 (1.31)	64.0 (1.31)
Hispanic or Latina, female	100.0	43.6 (1.10)	56.4 (1.10)
Not Hispanic or Latino:			
White, single race, male	100.0	30.7 (0.67)	69.3 (0.67)
White, single race, female	100.0	39.1 (0.68)	60.9 (0.68)
Black or African American, single race, male	100.0	52.9 (1.47)	47.1 (1.47)
Black or African American, single race, female	100.0	59.3 (1.22)	40.7 (1.22)

* Estimates are considered unreliable. Data preceded by an asterisk have a relative standard error (RSE) greater than 30% and less than or equal to 50% and should be used with caution. Data not shown have an RSE greater than 50%.

- Quantity zero.

¹Based on a survey question that asked respondents, "Except for tests you may have had as part of blood donations, have you ever been tested for HIV?" HIV is human immunodeficiency virus. Estimates of HIV testing for 2013 may not be comparable with estimates based on 1997-2010 NHIS data due to modifications of the location and wording of the question in the 2011 NHIS survey. The weighted percentage of unknown with respect to HIV testing among adults aged 18 and over was 4.6%.

²Refers to persons who indicated only a single race group, including those of Hispanic or Latino origin.

³Refers to persons who indicated more than one race group, including those of Hispanic or Latino origin. Only two combinations of multiple race groups are shown due to small sample sizes for other combinations.

⁴Refers to persons who are of Hispanic or Latino origin and may be of any race or combination of races. "Not Hispanic or Latino" refers to persons who are not of Hispanic or Latino origin, regardless of race.

⁵Shown only for adults aged 25 and over. Estimates are age adjusted to the projected 2000 U.S. population as the standard population using four age groups: 25-44, 45-64, 65-74, and 75 and over.

⁶GED is General Educational Development high school equivalency diploma.

⁷"Full-time" employment is 35 or more hours per week. "Part-time" employment is 34 or fewer hours per week.

⁸Includes persons in families that reported either a dollar amount or would not provide a dollar amount but provided an income interval.

⁹"Poor" persons live in families defined as below the poverty threshold. "Near poor" persons live in families with incomes of 100% to less than 200% of the poverty threshold. "Not poor" persons live in families with incomes that are 200% of the poverty threshold or greater.

¹⁰Based on a hierarchy of mutually exclusive categories. Adults with more than one type of health insurance were assigned to the first appropriate category in the hierarchy. "Uninsured" includes adults who had no coverage as well as those who had only Indian Health Service coverage or had only a private plan that paid for one type of service such as accidents or dental care.

¹¹MSA is metropolitan statistical area. Large MSAs have a population size of 1 million or more; small MSAs have a population size of less than 1 million. "Not in MSA" consists of persons not living in a metropolitan statistical area.

NOTES: Estimates are based on household interviews of a sample of the civilian noninstitutionalized population. This table is based on data from the Sample Adult file and was weighted using the Sample Adult weight. Unknowns for the columns were not included in the denominators when calculating percentages. Percentages may not add to totals due to rounding. "Total" includes other races not shown separately and persons with unknown education, family income, poverty status, and health insurance characteristics. Unless otherwise specified, estimates are age-adjusted using the projected 2000 U.S. population as the standard population and using four age groups: 18-44, 45-64, 65-74, and 75 and over. Estimates for age groups are not age-adjusted. For more information on the data source, methods, and definitions used for this table, refer to Technical Notes for Summary Health Statistics Tables: National Health Interview Survey (available from <http://www.cdc.gov/nchs/nhis/SHS/tables.htm>). Private	100.0	12.3 (0.72)	87.7 (0.72)
Medicare and Medicaid	100.0	22.4 (1.99)	77.6 (1.99)
Medicare only	100.0	14.3 (0.92)	85.7 (0.92)
Other	100.0	27.9 (2.30)	72.1 (2.30)
Uninsured	100.0	22.7 (5.88)	77.3 (5.88)
Marital status			
Married	100.0	34.8 (0.54)	65.2 (0.54)
Widowed	100.0	18.4 (0.98)	81.6 (0.98)
Divorced or separated	100.0	46.2 (0.93)	53.8 (0.93)
Never married	100.0	39.4 (0.81)	60.6 (0.81)
Living with a partner	100.0	51.5 (1.35)	48.5 (1.35)
Place of residence ¹¹			
Large MSA	100.0	40.8 (0.54)	59.2 (0.54)
Small MSA	100.0	35.1 (0.77)	64.9 (0.77)
Not in MSA	100.0	29.4 (1.05)	70.6 (1.05)
Region			
Northeast	100.0	37.6 (0.93)	62.4 (0.93)
Midwest	100.0	32.1 (0.80)	67.9 (0.80)
South	100.0	39.2 (0.73)	60.8 (0.73)
West	100.0	39.1 (0.76)	60.9 (0.76)

Table A-20c Crude percentages (with standard errors) of human immunodeficiency virus testing status among adults aged 18 and over, by selected characteristics: United States, 2013

Selected characteristic	All adults aged 18 and over	Ever tested for HIV ¹	Never tested for HIV ¹
Hispanic or Latino origin ⁴ , race, and sex			
Hispanic or Latino, male	100.0	37.2 (1.29)	62.8 (1.29)
Hispanic or Latina, female	100.0	46.6 (1.16)	53.4 (1.16)
Not Hispanic or Latino:			
White, single race, male	100.0	30.2 (0.65)	69.8 (0.65)
White, single race, female	100.0	35.6 (0.64)	64.4 (0.64)
Black or African American, single race, male	100.0	54.4 (1.50)	45.6 (1.50)
Black or African American, single race, female	100.0	59.9 (1.36)	40.1 (1.36)

* Estimates are considered unreliable. Data preceded by an asterisk have a relative standard error (RSE) greater than 30% and less than or equal to 50% and should be used with caution. Data not shown have an RSE greater than 50%.

- Quantity zero.

¹Based on a survey question that asked respondents, "Except for tests you may have had as part of blood donations, have you ever been tested for HIV?" HIV is human immunodeficiency virus. Estimates of HIV testing for 2013 may not be comparable with estimates based on 1997-2010 NHIS data due to modifications of the location and wording of the question in the 2011 NHIS survey. The weighted percentage of unknown with respect to HIV testing among adults aged 18 and over was 4.6%.

²Refers to persons who indicated only a single race group, including those of Hispanic or Latino origin.

³Refers to persons who indicated more than one race group, including those of Hispanic or Latino origin. Only two combinations of multiple race groups are shown due to small sample sizes for other combinations.

⁴Refers to persons who are of Hispanic or Latino origin and may be of any race or combination of races. "Not Hispanic or Latino" refers to persons who are not of Hispanic or Latino origin, regardless of race.

⁵Shown only for adults aged 25 and over.

⁶GED is General Educational Development high school equivalency diploma.

⁷"Full-time" employment is 35 or more hours per week. "Part-time" employment is 34 or fewer hours per week.

⁸Includes persons in families that reported either a dollar amount or would not provide a dollar amount but provided an income interval.

⁹"Poor" persons live in families defined as below the poverty threshold. "Near poor" persons live in families with incomes of 100% to less than 200% of the poverty threshold. "Not poor" persons live in families with incomes that are 200% of the poverty threshold or greater.

¹⁰Based on a hierarchy of mutually exclusive categories. Adults with more than one type of health insurance were assigned to the first appropriate category in the hierarchy. "Uninsured" includes adults who had no coverage as well as those who had only Indian Health Service coverage or had only a private plan that paid for one type of service such as accidents or dental care.

¹¹MSA is metropolitan statistical area. Large MSAs have a population size of 1 million or more; small MSAs have a population size of less than 1 million. "Not in MSA" consists of persons not living in a metropolitan statistical area.

NOTES: Estimates are based on household interviews of a sample of the civilian noninstitutionalized population. This table is based on data from the Sample Adult file and was weighted using the Sample Adult weight. Unknowns for the columns were not included in the denominators when calculating percentages. Percentages may not add to totals due to rounding. "Total" includes other races not shown separately and persons with unknown education, family income, poverty status, and health insurance characteristics. For more information on the data source, methods, and definitions used for this table, refer to Technical Notes for Summary Health Statistics Tables: National Health Interview Survey (available from <http://www.cdc.gov/nchs/nhis/SHS/tables.htm>).
