

Monthly VITAL STATISTICS REPORT

(HRA) 74-1T20
VOL. 23, NO. 2
SUPPLEMENT 2
MAY 2, 1974

Summary Report Final Divorce Statistics, 1970

FROM THE
NATIONAL CENTER FOR HEALTH STATISTICS

The upward trend in divorce continued in 1970, and provisional data indicate that it continued through 1973. From 1969 to 1970 the national divorce total increased 10.8 percent, the rate per 1,000 population, 9.4 percent, and the rate per 1,000 married women, 11.2 percent.

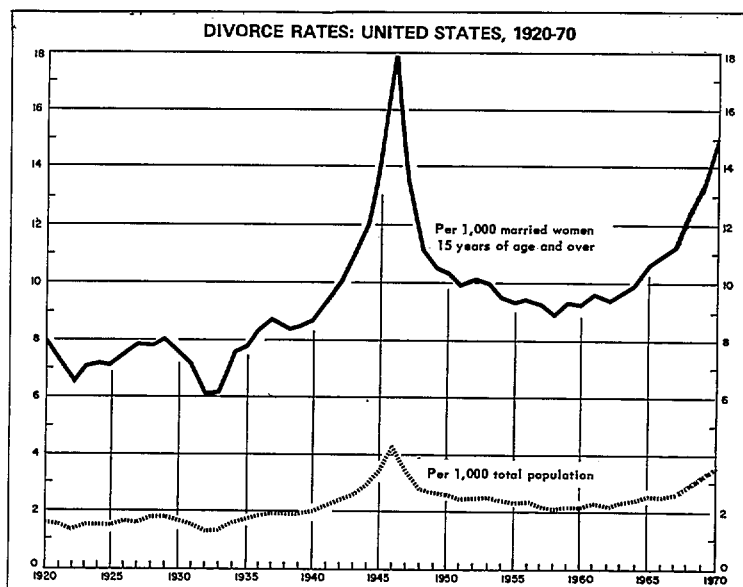

From 1962, the last year before the growth of divorces began, to 1970 national divorce totals increased 71 percent, from 413,000 to 708,000. During the 1962-70 period, divorce increases were observed every year, and the totals for 1969 and 1970 were higher than the previous highest peak, 610,000 in 1946. The rate per 1,000 total population grew from 2.2 to 3.5, and the rate per 1,000 married women increased from 9.4 to 14.9.

Divorce totals and rates increased in a majority of States from 1969 to 1970. Both the total and the rate declined only in one State, Nevada. In several States the changes are connected with the liberalization of divorce laws. The most prominent example of such change is in New York, where a new law became ef-

fective in 1967 and the divorce total increased from 7,136 in 1967 to 26,404 in 1970.

Information about various characteristics of divorces and divorced persons is available only from the States that participate in the divorce-registration area (DRA). In 1970 and 1969, 28 States were included in the DRA, in 1968, 26 States, and in 1963, 22 States.

During the period of divorce increase, 1963-70, the duration of marriage at time of decree and the ages of the divorcing husbands and wives declined consistently in the DRA and in almost all participating States. Both duration and age had shown a tendency to increase in the early 1960's. The median duration of marriage at time of decree declined in the DRA from 7.5 years in 1963 to 6.9 in 1969 and 6.7 in 1970. The median age of husband at time of divorce declined from 34.8 years in 1963 to 33.5 in 1969 and 32.9 in 1970. For divorcing wives comparable medians were 31.3, 30.1, and 29.8. These declines

MONTHLY VITAL STATISTICS REPORT

Table 1. DIVORCES AND RATES: UNITED STATES, EACH REGION, DIVISION, AND STATE, 1968-70

[Data are counts of decrees granted (including reported annulments and dissolutions of marriage) supplied by States except as noted. Figures for the divorce-registration States differ slightly from those based on sample data shown in table 5. Rates per 1,000 population in each area estimated as of July 1, 1969 and 1969 and enumerated as of April 1, 1970]

1950-----	365,000	2.6	10.3

¹Data are based on population enumerated as of April 1 for 1950, 1960 and 1970, estimated as of July 1 for all other years.

occurred in spite of high median ages in most States that were added to the DRA after 1963.

Many children are intimately involved in the divorces of their parents. In 1970 in the DRA 60 percent of divorcing couples had children under 18 years of age. The remaining 40 percent either had no children or had children 18 years of age or older. Of the divorcing couples, 25 percent reported one child under 18 years; 19 percent, two children; 10 percent, three children; and 7 percent, four or more children.

The total number of children under 18 years of age involved in divorce in the United States was estimated at 870,000 in 1970. When this number is added to 708,000 husbands and as many wives, a total is obtained of 2,286,000 persons involved in divorce that year, 11.2 persons per 1,000 total population. The number of all persons involved in divorce was 2,118,000 in 1969 and 2,286,000 in 1970. This number increased 7.9 percent from 1969 to 1970 and 61.2 percent from 1963 to 1970.

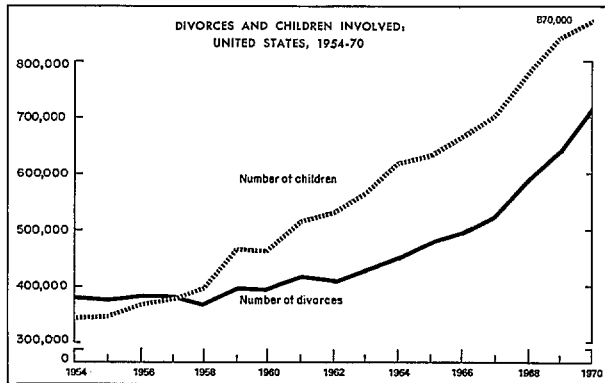

Table 4. ESTIMATED NUMBER OF CHILDREN INVOLVED IN DIVORCES AND ANNULMENTS: UNITED STATES, 1954-70

[Refers only to events occurring within the United States. For 1960-70 estimated from frequencies based on sample; for all other years, estimated from total counts]

Year	Estimated number of children involved	Average number of children per decree	Year	Estimated number of children involved	Average number of children per decree
1970 ¹	870,000	1.22	1961 ²	516,000	1.25
1969	840,000	1.31	1960	463,000	1.18
1968	784,000	1.34	1959	468,000	1.18
1967	701,000	1.34	1958	398,000	1.08
1966	669,000	1.34	1957	379,000	0.99
1965	630,000	1.32	1956	361,000	0.95
1964 ²	613,000	1.36	1955	347,000	0.92
1963 ²	562,000	1.31	1954	341,000	0.90
1962 ²	532,000	1.29			

¹Estimates are based on DRA frequencies instead of the 16 States previously used.
²Revised.

¹Data are for number of living children.

²Data are for number of children affected by decree.

TECHNICAL NOTES

Place and Time of Occurrence

Divorces and annulments are shown in all tables by State where decree was granted, which is also the State of legal residence of the plaintiff. The time of divorce or annulment is based on the date the decree was granted.

Sources of Data

Figures in tables 1 and 2 are based on totals of divorce or annulment decrees tabulated and reported by States and counties. Figures in tables 3 and 5 are based on probability samples of divorce and annulment records that were coded and tabulated in this office.

Figures in table 4 were estimated by using several methods. Estimates for 1954-59 were prepared on the assumption that the average number of children per decree for the Nation was identical with that for the reporting States. The figure for 1960 was based on a nationwide sample. Figures for 1961-70 were prepared by multiplying the national divorce total by the average number of children per decree found in the combined States with satisfactory reporting of the number of children. There were 16 such States in 1961-69, and all 28 registration States in 1970.

Divorce Samples

Sample data used to estimate the 1970 frequencies in table 5 and the frequencies used to compute median duration of marriage for 1967-70 in table 3 were selected by using four different sampling rates, depending on the size of the annual divorce total for a State. The rates were 10, 20, 50, or 100 percent of the divorces granted in a State. Samples were selected only from the States that participated in the divorce-registration area.

Sampling errors are given in the table for the estimates which constitute 1, 10, 25, 50, 75, 90, and 99 percent of the annual divorce totals. These sampling errors are given for the divorce-registration area and each registration State for 1970 data and only for the divorce-registration area for 1968 and 1969 data.
