This table is based on data from the Sample Adult file and was weighted using the Sample Adult weight. Unknowns for the columns were not included in the denominators when calculating percentages. Percentages may not add to totals due to rounding. "Total" includes other races not shown separately and persons with unknown education, family income, poverty status, and health insurance characteristics. Unless otherwise specified, estimates are age-adjusted using the projected 2000 U.S. population as the standard population and using four age groups: 18-44, 45-64, 65-74, and 75 and over. Estimates for age groups are not age-adjusted. ¹Based on two survey questions: All respondents were first asked, "Have you smoked at least 100 cigarettes in your entire life?" Respondents answering "yes" were then asked, "Do you now smoke cigarettes every day, some days, or not at all?"

Current smokers have smoked at least 100 cigarettes in their lifetime and still currently smoke; every-day smokers are current smokers who smoke every day; and some-day smokers are current smokers who smoke on some days.

Former smokers have smoked at least 100 cigarettes in their lifetime but currently do not smoke at all.

Non-smokers have never smoked at least 100 cigarettes in their lifetime

^{*} Estimates are considered unreliable. Data preceded by an asterisk have a relative standard error (RSE) greater than 30% and less than or equal to 50% and should be used with caution. Data not shown have an RSE greater than 50%.

NOTES: Estimates are based on household interviews of a sample of the civilian noninstitutionalized population. This table is based on data from the Sample Adult file and was weighted using the Sample Adult weight. Unknowns for the columns were not included in the denominators when calculating percentages. Percentages may not add to totals due to rounding. "Total" includes other races not shown separately and persons with unknown education, family income, poverty status, and health insurance characteristics. ⁻ Quantity zero.

¹Based on two survey questions: All respondents were first asked, "Have you smoked at least 100 cigarettes in your entire life?" Respondents answering "yes" were then asked, "Do you now smoke cigarettes every day, some days, or not at all?"

Current smokers have smoked at least 100 cigarettes in their lifetime and still currently smoke; every-day smokers are current smokers who smoke every day; and some-day smokers are current smokers who smoke on some days.

Former smokers have smoked at least 100 cigarettes in their lifetime but currently do not smoke at all.

Non-smokers have never smoked at least 100 cigarettes in their lifetime

²Refers to persons who indicated only a single race group, including those of Hispanic or Latino origin.

³Refers to persons who indicated more than one race group, including those of Hispanic or Latino origin. Only two combinations of multiple race groups are shown due to small sample sizes for other combinations.

⁴Refers to persons who are of Hispanic or Latino origin and may be of any race or combination of races. "Not Hispanic or Latino" refers to persons who are not of Hispanic or Latino origin, regardless of race.
