* Estimates are considered unreliable. Data preceded by an asterisk have a relative standard error (RSE) greater than $30 \%$ and less than or equal to $50 \%$ and should be used with caution. Data not shown have an RSE greater than $50 \%$.
${ }^{1}$ "Had coverage during the past 12 months" and "Did not have coverage during the past 12 months" are based on the question (asked of persons who currently had health insurance), "In the past 12 months, was there any time when [person] did not have any health insurance or coverage?" " 6 months or less without coverage" and " $7-12$ months without coverage" are based on the question (asked of persons who currently had health insurance coverage), "In the past 12 months, about how many months was [person] without coverage?" Number of months without coverage was collapsed into two categories for presentation in this table.
${ }^{2}$ Refers to persons who indicated only a single race group, including those of Hispanic or Latino origin
${ }^{3}$ Refers to persons who indicated more than one race group, including those of Hispanic or Latino origin. Only two combinations of multiple race groups are shown due to small sample sizes for other combinations.
${ }^{4}$ Refers to persons who are of Hispanic or Latino origin and may be of any race or combination of races. "Not Hispanic or Latino" refers to persons who are not of Hispanic or Latino origin, regardless of race.
${ }^{5}$ Shown only for persons aged 25 and over. Estimates are age adjusted using the projected 2000 U.S. population as the standard population and using two age groups: $25-44$ and $45-64$.
${ }^{6}$ GED is General Educational Development high school equivalency diploma.
${ }^{7}$ Includes persons who reported a dollar amount or who would not provide a dollar amount but provided an income interval.
${ }^{8}$ "Poor" persons are defined as having income below the poverty threshold. "Near poor" persons have incomes of $100 \%$ to less than $200 \%$ of the poverty threshold. "Not poor" persons have incomes that are $200 \%$ of the poverty threshold or greater.
${ }^{9}$ MSA is metropolitan statistical area. Large MSAs have a population of 1 million or more; small MSAs have a population of less than 1 million. "Not in MSA" consists of persons not living in a metropolitan statistical area.
NOTES: Estimates are based on household interviews of a sample of the civilian noninstitutionalized population. This table is based on responses about currently insured persons under age 65 in the family. Data came from the Person file and were weighted using the Person weight. Unknowns for the columns were not included in the denominators when calculating percentages. Percentages may not add to totals due to rounding. Persons having any period without health insurance coverage includes persons with unknown duration of period without coverage. "Total" includes other races not shown separately and persons with unknown education, family income, and poverty status. Unless otherwise specified, estimates are age adjusted using the projected 2000 U.S. population as the standard population and using four age groups: 0-11, 12-17, 18-44, and 45-64. Estimates for age groups are not age-adjusted. For more information on the data source, methods, and definitions used for this table, refer to Technical Notes for Summary Health Statistics Tables: National Health Interview Survey (available from http://www.cdc.gov/nchs/nhis/SHS/tables.htm). [^1]
[^0]:    * Estimates are considered unreliable. Data preceded by an asterisk have a relative standard error (RSE) greater than 30\% and less than or equal to $50 \%$ and should be used with caution. Data not shown have an RSE greater than $50 \%$.
    ${ }^{1}$ "Had coverage during the past 12 months" and "Did not have coverage during the past 12 months" are based on the question (asked of persons who currently had health insurance), "In the past 12 months, was there any time when [person] did not have any health insurance or coverage?" " 6 months or less without coverage" and " $7-12$ months without coverage" are based on the question (asked of persons who currently had health insurance coverage), "In the past 12 months, about how many months was [person] without coverage?" Number of months without coverage was collapsed into two categories for presentation in this table.
    ${ }^{2}$ Refers to persons who indicated only a single race group, including those of Hispanic or Latino origin.
    ${ }^{3}$ Refers to persons who indicated more than one race group, including those of Hispanic or Latino origin. Only two combinations of multiple race groups are shown due to small sample sizes for other combinations.
    ${ }^{4}$ Refers to persons who are of Hispanic or Latino origin and may be of any race or combination of races. "Not Hispanic or Latino" refers to persons who are not of Hispanic or Latino origin, regardless of race.
    ${ }^{5}$ Shown only for persons aged 25 and over.
    ${ }^{6}$ GED is General Educational Development high school equivalency diploma.
    ${ }^{7}$ Includes persons who reported a dollar amount or who would not provide a dollar amount but provided an income interval.
    ${ }^{8}$ "Poor" persons are defined as having income below the poverty threshold. "Near poor" persons have incomes of $100 \%$ to less than $200 \%$ of the poverty threshold. "Not poor" persons have incomes that are $200 \%$ of the poverty threshold or greater.
    ${ }^{9}$ MSA is metropolitan statistical area. Large MSAs have a population of 1 million or more; small MSAs have a population of less than 1 million. "Not in MSA" consists of persons not living in a metropolitan statistical area.
    NOTE: Estimates are based on household interviews of a sample of the civilian noninstitutionalized population. This table is based on responses about currently insured persons under age 65 in the family. Data came from the Person file and were weighted using the Person weight. Unknowns for the columns were not included in the frequencies, but they were included in the "All persons currently insured under age 65 " column, and unknowns for duration of noncoverage are included in the "had coverage" column. "Total" includes other races not shown separately and persons with unknown education, family income, and poverty status. For more information on the data source, methods, and definitions used for this table, refer to Technical Notes for Summary Health Statistics Tables: National Health Interview Survey (available from http://www.cdc.gov/nchs/nhis/SHS/tables.htm).
