     race.
    ${ }^{5}$ Shown only for persons aged 25 and over. Estimates are age adjusted using the projected 2000 U.S. population as the standard population and using three age groups: $25-44,45-64$, and $65-69$. ${ }^{6}$ GED is General Educational Development high school equivalency diploma.
    ${ }^{7}$ Includes persons who reported a dollar amount or who would not provide a dollar amount but provided an income interval.
     that are 200\% of the poverty threshold or greater.
    ${ }^{9}$ Based on a hierarchy of mutually exclusive categories. Persons with more than one type of health insurance were assigned to the first appropriate category in the hierarchy. "Uninsured" includes persons who had no coverage as well as those who had only Indian Health Service coverage or had only a private plan that paid for one type of service such as accidents or dental care.
    ${ }^{10}$ MSA is metropolitan statistical area. Large MSAs have a population of 1 million or more; small MSAs have a population of less than 1 million. "Not in MSA" consists of persons not living in a metropolitan statistical area.
