

## Births, Marriages, Divorces, and Deaths: Provisional Data for 2004

**Table A. Provisional vital statistics for the United States**

[Rates for infant deaths are deaths under 1 year per 1,000 live births; fertility rates are live births per 1,000 women aged 15–44 years; all other rates are per 1,000 total population. National data are based on events occurring in the United States, regardless of place of residence. Data are subject to monthly reporting variation; see “Technical Notes”]

Item	December				12 months ending with December				
	Number		Rate		Number		Rate		
	2004	2003	2004	2003	2004	2003	2004	2003	2002
Live births . . . . .	345,000	342,000	13.8	13.8	4,121,000	4,093,000	14.0	14.0	14.0
Fertility rate . . . . .	...	...	65.6	64.7	...	...	66.4	65.8	64.8
Deaths . . . . .	211,000	230,000	8.4	9.3	2,393,000	2,423,000	8.1	8.3	8.5
Infant deaths . . . . .	2,200	2,300	6.4	6.6	27,300	27,500	6.6	6.7	6.9
Natural increase . . . . .	134,000	112,000	5.4	4.5	1,728,000	1,670,000	5.9	5.7	5.5
Marriages <sup>1</sup> . . . . .	154,000	154,000	6.2	6.2	2,279,000	2,245,000	7.8	7.7	7.9
Divorces <sup>2</sup> . . . . .	---	---	---	---	---	---	3.7	3.8	3.9
Population base (in millions) . . . . .	...	...	294.9	292.7	...	...	293.6	291.4	288.4

... Category not applicable.

--- Data not available.

<sup>1</sup>Marriage rates may be underestimated because of incomplete reporting in Oklahoma; see “Technical Notes.”

<sup>2</sup>Divorce rates exclude data for California, Georgia, Hawaii, Indiana, and Louisiana, in 2004; California, Hawaii, Indiana, Louisiana, and Oklahoma in 2003; and California, Indiana, Louisiana, and Oklahoma in 2002. Populations for these rates also exclude these States.

NOTE: Figures include all revisions received from the States and, therefore, may differ from those previously published; see “Technical Notes.”

### Technical Notes

Data shown here are provisional and include only events occurring within the United States (50 States and the District of Columbia). The provisional information in this report is based on a combination of counts of events (some of which may not have occurred in the specified month of this report) and registered vital events. Although monthly provisional data may be updated during the course of a data year, once the provisional data year has ended, updates cease. Thus, provisional data for a given year may not accurately reflect the final number of events registered.

Tables A and B provide monthly, year-to-date, and 12-month ending counts and rates by place of occurrence for births, deaths (excluding fetal deaths), and marriages and 12-month ending rates for divorces. These counts include events occurring in the United States

to nonresidents of the United States. These data differ from the data in preliminary and final reports that are based on place of residence. Birth, death, and infant death figures (death and infant death figures exclude fetal deaths) in tables 1 and 2 for each State are estimates by State of residence. These estimates are derived by applying adjustment ratios to the number of events recorded as occurring in the State during a 1-month period. The adjustment ratios for each data year represent the observed relationship between final State occurrence figures and final State residence figures for the 3 most recent years for which final data were available and are expressed as a single ratio for each State for births, deaths, and infant deaths, respectively. Monthly State marriage and divorce figures shown in table 3 represent the actual count of all events occurring in the State (State of occurrence) that were received in the registration offices during the 1-month period. Divorce figures include reported annulments.

**Table B. Provisional number of live births, marriages, deaths, and infant deaths and rates, by month: United States, January 2003–December 2004**

[National data are based on events occurring in the United States, regardless of place of residence. Data are provisional and are subject to monthly reporting variation; see "Technical Notes"]

Period	Live births				Marriages		Deaths		Infant deaths

<sup>1</sup>The method of seasonal adjustment, developed by the U.S. Census Bureau, is described in *The X-11 Variant of the Census Method II Seasonal Adjustment Program*, Technical Paper No. 15 (1967 revision).

<sup>2</sup>Marriage rates may be underestimated due to incomplete reporting in Oklahoma; see "Technical Notes."

NOTE: Figures include all revisions received from the States and, therefore, may differ from those previously published; see "Technical Notes."

Delay in the receipt of certificates in a registration office may result in a low figure for a given month followed by a high figure for the month(s) in which the delayed records were received. Data for previous months include revisions States might have provided to correct for delayed reporting; therefore, figures may differ from those previously published.

Until 1998, provisional totals for births, marriages, and divorces for the entire United States included corrections for observed differences between provisional and final figures. These corrections compensated for delays in reporting. Beginning with data for January 1998, these monthly corrections for births, marriages, and divorces have been dropped. Further information on these changes has been provided in the *National Vital Statistics Reports* presenting provisional data for January, February, and March 1999 (vol. 48, nos. 1, 2, and 4, respectively) available at <http://www.cdc.gov/nchs>.

Moreover, the National Center for Health Statistics (NCHS) ceased publishing divorce counts and rates based on provisional data from the combined 50 States because it is no longer statistically feasible to calculate estimates of monthly divorce counts for nonreporting States (California, Georgia, Hawaii, Indiana, Louisiana, and Oklahoma). Instead, NCHS publishes only the 12-month divorce rates shown in [table A](#), based solely on the combined counts and populations for

reporting States and the District of Columbia. Aggregate 1-month, cumulative counts and rates, and 12-month counts for divorces have been dropped because of their very limited usefulness when based on less than the full complement of States. Monthly marriage and divorce counts as reported by each State will continue to be shown in [table 3](#).

Because of incomplete reporting, marriage and divorce counts for Oklahoma are not included in [table 3](#) showing provisional data by State. For the purpose of calculating 12-month divorce rates shown in [table A](#), Oklahoma is treated as a nonreporting State (see earlier discussion). Because all other States report marriages, marriage rates shown in [tables A](#) and [B](#) include Oklahoma data. The impact of the missing marriages on the national rate is negligible (estimated at less than 1 percent).

Population estimates used for computing rates originate from the U.S. Census Bureau and are based on the 2000 census. Monthly rates are based on populations estimated for the specific month. Year-to-date rates are averages of monthly rates that have been weighted by the number of days in the corresponding months. Rates for 12-month periods are the sum of events for the period per population estimated at the midpoint of the period. Populations have been estimated by NCHS for the 12-month divorce rates based on the 45 reporting States and the District of Columbia. Because monthly infant mortality rates are

based on relatively few events, they are highly variable, and comparisons of monthly infant mortality rates should be interpreted cautiously.

## List of Detailed Tables

1. Provisional number of live births and deaths: Each State, December 2003 and 2004, and cumulative figures, 2002–04 . . . . . 4
2. Provisional number of deaths under 1 year and infant mortality rates: Each State, 12 months ending with December 2003 and 2004 . . . . . 5
3. Provisional number of marriages and divorces: Each State, December 2003 and 2004, and cumulative figures, 2002–04 . . . . . 6

**Table 1. Provisional number of live births and deaths: Each State, December 2003 and 2004, and cumulative figures, 2002–04**

### Acknowledgments

This report was prepared by Martha L. Munson and Paul D. Sutton, both in the Reproductive Statistics Branch (RSB) of the Division of Vital Statistics (DVS) under the general direction of Stephanie J. Ventura, Chief, RSB, and Charles J. Rothwell, Director, DVS. Betty L. Smith of the Mortality Statistics Branch assisted with review of the mortality data. Connie Gentry, Chrissy Jarman, Millie Johnson, Susan McBroom, and Pam Stephenson of the Data Acquisition and Evaluation Branch (DAEB) were responsible for acquisition of the provisional data. Brenda Green, David Justice, Jenny Justice, Kryn Krautheim, Adrienne Rouse, and Charles E. Sirc, also of DAEB, evaluated the quality of the provisional data. The report was edited by NOVA contractor Kathy Sedgwick under the direction of NCHS senior editor Demarius V. Miller and typeset by Jacqueline M. Davis of the Office of Information Services, Information Design and Publishing Staff.
