# **Current Estimates From the National Health Interview Survey, 1991**

by Patricia F. Adams and Veronica Benson, Division of Health Interview Statistics

## **Introduction**

This report on the 1991 civilian noninstitutionalized population residing in the United States presents estimates of acute conditions, episodes of persons injured, restriction in activity, prevalence of chronic conditions, limitation of activity due to chronic conditions, respondent-assessed health status, and the use of medical services—including physician contacts and short-stay hospitalization.

Estimates of these health characteristics are shown in tables 1–78 for various groups in the population, including those defined by age, sex, race, and family income (each shown for specific age groups), and by geographic region and place of residence. Estimates for other characteristics of special relevance to particular health measures are also included. For example, estimates of physician contacts are shown by the place where the contact occurred.

The text includes a brief definition of each health characteristic included in tables 1–78 and reports the 1991 estimate for each characteristic. Tables A–D include the corresponding 1989 and 1990 estimates for each of the major health characteristics. Various technical matters associated with the National Health Interview Survey (NHIS) data collection procedures and with the presentation of results are also described in the report.

In 1982, the NHIS questionnaire and data preparation procedures of the survey were extensively revised. The basic concepts of NHIS changed in some cases, and in other cases the concepts were measured in a different way. Comparisons with earlier results should not be undertaken without carefully examining these changes. A more complete explanation of these changes is in appendix IV of Series 10, No. 150 (1).

In 1985, a new sample for NHIS and a different method of presenting sampling errors were introduced. Therefore, the technical material is important to readers accustomed to using data from NHIS prior to 1985.

Although published reports are the primary method of disseminating estimates from NHIS, data also are available in the form of standardized microdata tapes that include the regular characteristics of each year's survey from 1969 through 1991. Questions about the cost and availability of these tapes should be directed to the National Technical Information Service, 5285 Port Royal Road, Springfield, VA 22161. Public use tapes also are

available for special topics included in NHIS from 1973 through 1991. The special topics studied in 1991 covered nine areas: (a) hearing (including hearing ability, age at onset and cause of hearing problem, and hearing aid use); (b) unintentional injuries (including falls among persons 65 years of age and over, head injuries in which persons lost consciousness, medical care received, and cause and place of injury); (c) pregnancy and smoking (including breastfeeding status, smoking status, number of attempts to quit smoking, and number of cigarettes smoked each day for women 18–49 years of age with a live birth in the past five years); (d) child health (including childhood immunization, use of seat belts and safety seats, use of headgear and mouth guards during organized athletic activities, and information on functional disabilities); (e) environmental health (including exposure within the home to tobacco smoke, radon gas, and lead paint); (f) health promotion and disease prevention (including environmental health, tobacco, nutrition, immunization and infectious diseases, occupational safety and health, heart disease and stroke, other chronic and disabling conditions, clinical and preventive services, physical activity and fitness, alcohol, mental health (stress), and oral health); (g) AIDS knowledge and attitudes (knowledge and attitudes about acquired immunodeficiency syndrome (AIDS), including sources of AIDS information, self-assessed level of AIDS knowledge, basic facts about the AIDS virus and how it is transmitted, blood donation experience, awareness of and experience with the blood test for the AIDS virus, self-assessed chances of getting the AIDS virus, personal acquaintance with persons with AIDS or the AIDS virus, and a general question on AIDS risk behaviors); (h) income (including health insurance coverage, employment status, type of pension received, public assistance, and other sources of income); and (i) drug and alcohol use (including lifetime and 12-month use of marijuana and cocaine, symptoms of dependence and abuse, and use of alcohol and selected prescription and nonprescription drugs). Information on tapes relating to special topics is available from the National Center for Health Statistics, Division of Health Interview Statistics, Systems and Programming Branch, 6525 Belcrest Road, Hyattsville, MD 20782.

## Source and limitations of data

The information from the National Health Interview Survey (NHIS) in this report is based on data collected in a continuing nationwide survey by household interview. Each week a probability sample of the civilian noninstitutionalized population of the United States is interviewed by personnel of the U.S. Bureau of the Census. Information is obtained about the health and other characteristics of each member of the household.

The 1991 NHIS was conducted with a full sample. The interviewed sample for 1991 consisted of 46,761 households containing 120,032 persons. The total noninterview rate was 4.3 percent: 2.7 percent was the result of respondent refusal and the remainder was primarily the result of failure to locate an eligible respondent at home after repeated calls. A description of the survey design, the methods used in estimation, and general qualifications of the data obtained from the survey are shown in appendix I.

Because the estimates are based on a sample of the population, they are subject to sampling errors. Therefore, readers should pay particular attention to "Reliability of the estimates" in appendix I because it shows formulas for calculating standard errors and instructions for their use.

All information collected in the survey is from reports by responsible family members residing in the household.

When possible, all adult family members participate in the interview. However, proxy responses are accepted for family members who are not at home and are required for all children and for family members who are physically or mentally incapable of responding for themselves. Although considerable effort is made to ensure accurate reporting, the information from both proxy respondents and self-respondents may be inaccurate because the respondent is unaware of relevant information, has forgotten it, does not wish to reveal it to an interviewer, or because the respondent does not understand the intended meaning of a question.

The major concepts for which estimates are shown in this report are defined in appendix II. Appendix III consists of questionnaires and flashcards used in the interview. Illnesses and injuries are coded using a slight modification of the ninth revision of the *International Classification of Diseases* (2). The Division of Health Interview Statistics of NCHS should be contacted for information about coding and editing procedures used to produce the final data file from which the estimates shown are derived.

# Highlights for 1991

In the following sections, each of the health-related characteristics is defined and the 1991 estimate is compared with the 1989 and 1990 estimates (3,4) for the same characteristic. The comparisons are highlighted in tables A-D, which also include the standard error for each of the 1991 estimates. To determine how much difference there must be between the 1991 estimates and the 1989 and 1990 estimates to constitute a statistically significant difference, use the standard errors to calculate a confidence interval or a critical value for the *t*-test. Of these two methods, the *t*-test (with a 95-percent level of significance) has been used in the following discussion as a basis for making statements about the difference or lack of difference between the 1991 estimates and the 1989 and 1990 estimates.

Because the text compares only the overall rates or percents of health-related characteristics between 1989 and 1991, and the age distribution of the civilian noninstitutionalized population does not change substantially over a 3-year period, the possible effect of differing age distributions is not discussed. Tables A-D include age-standardized as well as unstandardized figures and the 3-year trends are similar.

Readers comparing subgroups of the population in tables 1-78 may want to consider the possible effect of age in comparing subgroups. For those sociodemographic characteristics for which the age distribution of the subgroups differs significantly (such as sex, age, and family income), the results are shown for specific age groups. However, for geographic region and place of residence, there is little difference in the age distributions of the subgroups; therefore, these results are not shown for specific age groups.

The detailed results for health characteristics are shown in tables 1-77. The population used to calculate the unstandardized rates are shown in table 78. The age-standardized data in tables A-D use the 1980 civilian noninstitutionalized population of the United States as a standard population. Age-specific rates for six age groups (0-4, 5-17, 18-24, 25-44, 45-64, and 65 years and over) were directly standardized to produce these estimates.

## Acute conditions: Incidence, medical attention, and associated restriction in activity

An acute condition is defined for the National Health Interview Survey (NHIS) as a type of illness or injury that ordinarily lasts less than 3 months, was first noticed less than 3 months before the reference date of the interview, and was serious enough to have had an impact on behavior. Only two types of impact are considered: (a) the illness or injury caused the person to cut down for at least half a day on daily activities, or (b) a physician was contacted regarding the illness or injury.

### Incidence

The incidence rate of acute conditions by type of condition and sociodemographic characteristics is shown in tables 1-5 and the incidence (number) is shown in tables 6-10. The 1991 rate of 191.8 acute conditions per 100 persons per year is significantly higher than the corresponding rates for 1989 and 1990 (181.3 and 171.9, respectively) (table A).

For broad types of acute conditions, the 1991 incidence rates per 100 persons per year rank as follows: respiratory conditions (100.6), injuries (24.0), infective and parasitic diseases (18.5), and digestive system conditions (6.6). The rate for infective and parasitic diseases is lower than the rate for 1990 (21.0) but similar to the rate observed in 1989 (20.1). The rate for digestive system conditions is higher than the 1990 rate of 5.3 but is similar to the 1989 rate of 5.9. The rate for injuries remained about the same from the previous 2 years. The 1991 rate for respiratory conditions (100.6) is considerably higher than the 1990 rate (85.3) primarily due to an increase in the rate of influenza—52.1 in 1991 compared with 43.4 in 1990; no differences were observed from the 1989 rates.

### Medical attention

Estimates of the percent of acute conditions that were medically attended are shown in tables 11-15. The 1991

Table A. Acute conditions measures: United States, 1989–91

Acute condition measure	Unstandardized				Age standardized		
			1991				1991
	1989	1990	Estimate	Standard error	1989	1990	1991

Digestive system conditions . . . . .	5.9	5.3	6.6	0.4	5.9	5.4	6.6
Injuries . . . . .	24.3	24.4	24.0	0.9	24.4	24.7	24.4
Other acute conditions . . . . .	35.8	35.9	42.0	1.3	35.8	35.8	41.8
Acute conditions medically attended							
All acute conditions . . . . .	61.6	63.4	63.0	0.6	60.6	62.4	62.1
Restricted activity associated with acute conditions							
Number of days per 100 persons per year							
All restricted-activity days . . . . .	749.1	704.9	733.3	18.8	748.4	703.5	731.1
Bed days . . . . .	344.1	306.4	313.6	10.1	345.4	307.8	314.6
Work-loss days <sup>2</sup> . . . . .	336.5	317.3	315.3	10.6	343.4	314.5	311.3
School-loss days <sup>3</sup> . . . . .	463.5	378.9	411.1	19.1	—	—	—
Quarterly incidence of acute conditions							
Number per 100 persons per quarter							
January 1–March 31 . . . . .	65.9	56.1	59.8	1.6	—	—	—
April 1–June 30 . . . . .	33.3	34.6	36.6	1.2	—	—	—
July 1–September 30 . . . . .	31.0	32.0	32.3	1.1	—	—	—
October 1–December 31 . . . . .	51.1	49.3	63.1	1.7	—	—	—

<sup>1</sup>Includes other acute respiratory conditions.<sup>2</sup>For currently employed persons 18 years of age and over.<sup>3</sup>For youths 5–17 years of age.

NOTE: Tables 1–78 show the 1991 estimates by age, sex, race, family income, geographic region, and place of residence.

estimate of 63.0 percent (table A) is similar to those for 1989 (61.6) and 1990 (63.4).

### Restricted activity associated with acute conditions

Four types of restricted activity resulting from illness, injury, or impairment are measured in NHIS: days lost from work for currently employed persons 18 years of age and over, school days missed by youths 5–17 years of age, days spent in bed (which may overlap either of the preceding types), and other days on which a person cuts down on the things he or she usually does. Estimates of "cut-down" days are not presented separately but are included in the generic concept of "restricted-activity days." The other three types of restricted activity also included in the generic concept "restricted activity" are usually shown separately in reports from NHIS.

A person may restrict activities on a given day as a result of more than one condition, and these conditions may be acute or chronic. "Restricted activity associated with acute conditions" includes days on which only one or more acute conditions caused the activity restriction; it also includes days on which one or more acute conditions and one or more chronic conditions caused the activity restriction. In the latter case, because the restriction in activity was the result of both acute and chronic conditions, the cause cannot be attributed solely to an acute

condition. Therefore, "associated with" rather than "caused by" are used to describe this type of estimate.

The incidence rate of restricted activity associated with acute conditions by type of condition and sociodemographic characteristics is shown in tables 16–20 and the incidence (number) is shown in tables 21–25. The 1991 rate per 100 persons per year of restricted-activity days (733.3) is similar to the rates observed in 1989 and 1990 (749.1 and 704.9, respectively) (table A). The rate of bed days for 1991 (313.6) is similar to the 1990 rate (306.4) but lower than the rate for 1989 (344.1). The rates of work-loss days for currently employed persons 18 years of age and over (315.3) and school-loss days for youths 5–17 years of age (411.1) do not significantly differ from the corresponding rates for 1989 and 1990. The detailed rates and frequencies for bed days are shown in tables 26–35, for work-loss days in tables 26–45, and for school-loss days (tables 46–49).

### Incidence by quarter

The 1991 incidence rate and incidence of acute conditions by quarter are shown in table 50. As shown in table A, the estimated rate for the first quarter of 1991 (59.8) is similar to the comparable rate for 1990 (56.1) but lower than the 1989 rate (65.9). For the second quarter, the 1991 rate of 36.6 is similar to the rate observed in 1990 (34.6) but higher than the 1989 rate (33.3). For the third

quarter, the 1989, 1990, and 1991 rates are within sampling variation. The rate for the fourth quarter of 1991 (63.1) is significantly different from the rate observed in 1989 (51.1) and 1990 (49.3) primarily due to the result of excess influenza during the fourth quarter of 1991.

## Episodes of persons injured

Injury data may be analyzed in three possible units: (a) the number of injuries sustained in a particular episode involving injury, (b) the number of episodes involving injury during a given period of time, or (c) the number of persons involved in one or more episodes in which injury occurred during a period of time. The estimates of injuries included in tables 1–50 are of the number of injuries that occurred during 1991. This section considers the number of episodes that occurred during 1991 that involved one or more injuries. Because of the short reference period used to collect injury data in NHIS (2 weeks), the data cannot be used to estimate the number of persons involved in one or more episodes during any given year.

The incidence rate of episodes of persons injured is shown in table 51 and the incidence of such episodes by sociodemographic characteristics, by whether a moving motor vehicle was involved (if so, whether this occurred in traffic), by where the episode occurred, and for persons 18 years of age and over, by whether they were working at a job or business at the time the episode occurred is shown in table 52. The 1991 rate of episodes of persons injured per 100 persons per year (23.4) is almost identical to the 1989 and 1990 rates of 23.8 (table B).

## Restricted activity associated with injury and impairment due to injury

An injury may have health-related effects for many years after its occurrence or even for a lifetime, for example, a person who suffered a dislocated back due to an accident. The estimates of activity restriction (tables 53 and 54) and of bed days (tables 55 and 56) are based on the present effects of injuries no matter when they occurred. Thus, these estimates include the days shown in

earlier tables for acute injuries and also include days of restricted activity during 1991 that are attributable to the effects of injuries suffered prior to 1991. In many cases, these old injuries have become impairments and any restricted activity during 1991 that was caused by an injury-related impairment is also included.

The 1991 rates for restricted-activity days and bed days associated with episodes of persons injured (268.7 and 73.0 per 100 persons per year, respectively) do not significantly differ from the corresponding rates for 1989 and 1990 (table B).

## Prevalence of reported chronic conditions

Chronic conditions are defined as conditions that either (a) were first noticed 3 months or more before the reference date of the interview or (b) belong to a group of conditions (including heart disease and diabetes) that are considered chronic regardless of when they began. To estimate the prevalence of reported chronic conditions, the NHIS sample is divided into six representative subsamples; respondents in each subsample are administered one of six checklists of types of chronic conditions. Respondents are asked to indicate the presence or absence of each condition specified on the particular list administered to them. Because the presence or absence of many types of chronic conditions is often difficult to ascertain, several "impact" questions are asked about each condition reported. Information is elicited on whether the person has been hospitalized for the condition and the number of days he or she stayed in bed because of the condition during the 12 months prior to the interview.

Totals for all chronic conditions are not shown because NHIS does not measure the total number of chronic conditions for each person. Because a person may have more than one chronic condition, the sum of conditions that are counted may exceed the sum of persons having those conditions.

The prevalence rate for selected chronic conditions is shown in tables 57–61 and the prevalence (number) is shown in tables 62–66. As shown in table 57, the reported conditions with the highest prevalence rates were sinusitis,

**Table B. Episodes of persons injured and associated restrictions in activity: United States, 1989–91**

Episodes of persons injured and associated restricted activities	Unstandardized		1991		Age standardized		
	1989	1990	Estimate	Standard error	1989	1990	1991
<b>Episodes of persons injured</b>							
All types of injury.....	23.8	23.8	23.4	0.9	23.9	24.1	23.8
<b>Restriction in activity associated with episodes of persons injured</b>							
All restricted-activity days <sup>1</sup> .....	258.7	273.1	268.7	9.1	250.8	267.1	259.5
Bed days.....	78.9	84.2	73.0	4.1	76.3	83.1	71.0

<sup>1</sup>Includes work-loss and school-loss days as well as bed days.

NOTE: Tables 1–78 show the 1991 estimates by age, sex, race, family income, geographic region, and place of residence.

arthritis, deformity or orthopedic impairment, and hypertension (with rates per 1,000 persons of 129.3, 125.2, 115.5, and 111.8, respectively).

## Limitation of activity due to chronic conditions

Limitation of activity refers to long-term reduction in activity resulting from chronic disease or impairment. The NHIS measurement of limitation of activity permits one to distinguish among (a) persons unable to carry on their usual activity, (b) persons limited in the amount or kind of their usual activity, (c) persons limited but not in their usual activity, and (d) persons not limited. The category of persons limited in their major activity includes those in the first two groups, that is, those unable to carry on the usual activity for their age-sex group, whether it is working, keeping house, going to school, or living independently, and those restricted in the amount or kind of usual activity for their age-sex group. Persons limited, but not in their major activity, include persons restricted in other activities such as civic, church, or recreational activities.

The 1991 estimate of the percent of persons limited in activity due to chronic conditions (14.3) is significantly different from the 1990 estimate of 13.7 but similar to the 1989 estimate of 14.1 (table C). The estimates of persons limited in their major activity (categories (a) and (b) discussed in the previous paragraph) are similar for 1989, 1990, and 1991 (9.6, 9.3, and 9.6, respectively).

The percent distributions and frequencies for limitation in activity are shown by sociodemographic characteristics in tables 67-68.

**Table C. Health status measures: United States, 1989-91**

Health care utilization	Unstandardized						Age standardized	
			1991					
	1989	1990	Estimate	Standard error	1989	1990		
<b>Restricted activity due to acute and chronic conditions</b>								
All restricted activity days . . . . .	15.2	14.9	16.1	0.4	14.9	14.6	15.7

Poor . . . . .	2.6	2.6	2.8	0.1	2.5	2.5	2.7	

<sup>1</sup> For currently employed persons 18 years of age and over.

<sup>2</sup> For youths 5-17 years of age.

<sup>3</sup> Excludes a small number with unknown health status.

NOTE: Tables 1-78 show the 1991 estimates by age, sex, race, family income, geographic region, and place of residence.

## Restricted activity due to acute and chronic conditions

Earlier, estimates of restricted-activity days associated with acute conditions (tables 16-49) and the relationship between the types of restricted-activity days was discussed. The estimates shown in table 69 are for person days of restricted activity caused by acute or chronic conditions, or both.

As shown in table C, the 1991 rate per person per year of restricted-activity days (16.1) is higher than the corresponding rate for 1990 of 14.9 but similar to the 1989 rate of 15.2. The differences between the 1991 rates for bed days (6.5), work-loss days for currently employed persons 18 years of age and over (5.6), and school-loss days for youths 5-17 years of age (5.1) and those for 1989 and 1990 are within sampling variation.

The estimates for each type of restricted-activity day are shown by sociodemographic characteristics in table 69.

## Respondent-assessed health status

Data on assessed health status are obtained by asking respondents to assess their own health or that of family members living in the same household as excellent, very good, good, fair, or poor. The percent distribution for these categories according to sociodemographic characteristics is shown in table 70. The health of most persons in the civilian noninstitutionalized population is assessed as "excellent" (38.5 percent) or "very good" (28.5 percent). Only 2.8 percent are assessed as "poor" (table C). The

1991 estimate for respondents assessing their health as "excellent" is lower than in 1989 and 1990 (39.7 and 39.5, respectively), while the estimates for those assessing their health as "poor" rose slightly over the two previous years from 2.6 in 1989 and 1990 to 2.8 in 1991. For respondents who assessed their health as "very good," the estimates for 1989, 1990, and 1991 remained about the same.

### **Physician contacts: Rate and interval since last contact**

A contact is defined as a consultation with a physician, in person or by telephone, for examination, diagnosis, treatment, or advice. The visit is considered a physician contact if the service is provided by the physician or by another person working under the physician's supervision.

#### **Annual rate**

The rates of physician contacts reported for 1989-91 are shown in table D. The 1991 rate of 5.8 doctor visits per person per year is higher than the comparable rates for 1989 and 1990 (5.4 and 5.5, respectively).

Aside from the sociodemographic characteristics, the rates and frequencies also are shown by the place of contact (table 71). The rate is highest for doctor's office (3.3 per person per year) and is less than one contact per person per year for each of the other places mentioned (telephone, hospital, and other).

#### **Interval since last contact**

The percent distribution and number of persons by interval of time since the person last had a physician contact are shown in table 72. Whereas the estimates for the rate of physician contacts do not include contacts while a person was an overnight patient in a hospital, such contacts are included in the definitions of the interval since a person last saw or talked to a physician or a physician's assistant.

During 1991 an estimated 78.5 percent of the civilian noninstitutionalized population had contact with a physician during the year preceding interview (table D). Although this estimate appears similar to those for 1989 and 1990 (77.4 and 77.9, respectively), the difference between the estimates for 1991 and 1990 was found to be statistically significant.

Other estimates of ambulatory medical care services by physicians are provided by data from the National Ambulatory Medical Care Survey, a probability sample survey conducted periodically by the Division of Health Care Statistics of the National Center for Health Statistics. A summary of 1990 survey results, the most recent available, is found in *Advance data from vital and health statistics*, No. 213 (5).

### **Hospitalization: Episodes and days for persons; discharges and average length of stay**

Respondents in NHIS are asked to describe any hospitalizations during the year preceding the interview that involved at least a 1-night stay. Two of the measures obtained through this series of questions are the number of times and the number of days spent in short-stay hospitals in the 12 months prior to the interview. Because persons who died or were institutionalized in a given reference period are not included in NHIS, the rates and frequencies shown will vary from those based on all overnight patients who entered a short-stay hospital during any given period of time. The difference will be especially great for older persons.

Estimates on hospitalization are presented by episode estimates and by discharge estimates. Episode estimates focus on the person's hospital experience during the 12 months preceding the interview. The tables showing these estimates classify people on the basis of whether they were hospitalized during the reference period and, if so, the number of times they were hospitalized. Discharge

**Table D. Health care utilization: United States, 1989-91**

Health care utilization	Unstandardized				Age standardized		
			1991				
	1989	1990	Estimate	Standard error	1989	1990	1991
<b>Physician contact</b>							
Contacts per person per year.....	5.4	5.5	5.8	0.1	5.3	5.4	5.6
<b>Hospitalization</b>							
Persons with 1 contact or more in past year.....	77.4	77.9	78.5	0.2	77.1	77.8	78.3
Persons with 1 hospital episode or more in past year....	8.1	7.9	7.8	0.1	7.9	7.7	7.6
Hospital days per person hospitalized in past year.....	8.0	8.0	7.7	0.2	7.2	7.2	7.0
Discharges per 100 persons per year.....	11.3	11.0	10.8	0.2	11.0	10.8	10.5
Average length of stay per discharge in days.....	6.5	6.3	6.2	0.3	5.9	5.6	5.7

NOTE: Tables 1-78 show the 1991 estimates by age, sex, race, family income, geographic region, and place of residence.

estimates focus on hospital stays as the unit of analysis rather than on persons.

### Hospital episodes and days

The distribution of short-stay hospital episodes including and excluding deliveries by the number of times a person was hospitalized during the year preceding the interview and sociodemographic characteristics are shown by percent distribution (table 73) and frequency (table 74). The category "delivery" is based on the reason the woman entered the hospital or whether surgery related to delivery was performed. The percent of persons in 1991 with one hospital episode or more during the year preceding interview is 7.8 percent (table D). This is similar to the estimates for 1989 (8.1) and 1990 (7.9). The 1991 rate is about 24 percent lower than the 1982 estimate of 10.3 percent (1). Associated with the number of times a person was a patient in a short-stay hospital during the year preceding the interview is the total number of days (strictly speaking, nights) the person spent as a patient in the hospital. In 1991 persons with one hospitalization or more spent an average of 7.7 days in the hospital in the year preceding the interview (table D). This rate is similar for 1989 and 1990. The estimated rate and number of hospital days by the number of times people were hospitalized (including and excluding deliveries) and sociodemographic characteristics are shown in tables 75 and 76.

### Hospital discharges and average length of stay

The rate and number of hospital discharges, the average length of stay, and the number of hospital

discharge days by sociodemographic characteristics and by whether a delivery was involved in the hospitalization are shown in table 77. Based on data collected during 1991, there were 10.8 discharges per 100 persons, and the average length of stay per discharge is 6.2 days. Both of these rates are similar to the 1989 and 1990 estimates of discharges per 100 persons (11.3 and 11.0, respectively) and days per discharge (6.5 and 6.3, respectively).

Examining longer term trends, the 1991 hospital discharge rate of 10.8 is 24 percent lower than the rate estimated by NHIS in 1981 (14.2), and the average length of stay is about 16 percent lower than in 1981 (7.4) (6).

This finding probably reflects the following two phenomena: (a) some medical procedures, once performed as inpatient hospital care, are now performed in outpatient medical facilities, and (b) the Health Care Financing Administration (which operates the Medicare program), some States, and some third-party payers now reimburse hospitals for inpatient care using a preestablished payment schedule based on patients' diagnosis-related groups.

Information also is collected on hospital discharges from hospital records through the National Hospital Discharge Survey (NHDS) conducted by the National Center for Health Statistics. Estimates from NHDS, published in Series 13 of *Vital and Health Statistics*, are somewhat higher than those presented here because of differences in collection procedures, population sampled, and definitions used. NHDS has experienced a continuing decline in its hospital discharge rates, and NHDS estimates of average length of stay for all persons also are declining. Thus, the data from the two surveys are consistent. The most recent national estimates of short-stay hospitalization based on NHDS are summarized in Series 13, No. 112 (7).

# List of detailed tables

## Incidence of acute conditions

### Rates

1. Number of acute conditions per 100 persons per year, by age and type of condition: United States, 1991 . . . . .
2. Number of acute conditions per 100 persons per year, by sex, age, and type of condition: United States, 1991 . . . . .
3. Number of acute conditions per 100 persons per year, by race, age, and type of condition: United States, 1991 . . . . .
4. Number of acute conditions per 100 persons per year, by family income, age, and type of condition: United States, 1991 . . . . .
5. Number of acute conditions per 100 persons per year, by geographic region, place of residence, and type of condition: United States, 1991 . . . . .

### Frequencies

6. Number of acute conditions, by age and type of condition: United States, 1991. . . . .
7. Number of acute conditions, by sex, age, and type of condition: United States, 1991. . . . .
8. Number of acute conditions, by race, age, and type of condition: United States, 1991. . . . .
9. Number of acute conditions, by family income, age, and type of condition: United States, 1991 . . . . .
10. Number of acute conditions, by geographic region, place of residence, and type of condition: United States, 1991 . . . . .

## Percent of acute conditions medically attended

11. Percent of acute conditions medically attended, by age and type of condition: United States, 1991 . . . . .
12. Percent of acute conditions medically attended, by sex, age, and type of condition: United States, 1991 . . . . .
13. Percent of acute conditions medically attended, by race, age, and type of condition: United States, 1991 . . . . .
14. Percent of acute conditions medically attended, by family income, age, and type of condition: United States, 1991 . . . . .
15. Percent of acute conditions medically attended, by geographic region, place of residence, and type of condition: United States, 1991. . . . .

## Restricted activity associated with acute conditions

### Restricted-activity days: Rates

13. Number of restricted-activity days associated with acute conditions per 100 persons per year, by age and type of condition: United States, 1991. . . . .
14. Number of restricted-activity days associated with acute conditions per 100 persons per year, by sex, age, and type of condition: United States, 1991 . . . . .
15. Number of restricted-activity days associated with acute conditions per 100 persons per year, by race, age, and type of condition: United States, 1991 . . . . .
16. Number of restricted-activity days associated with acute conditions per 100 persons per year, by family income, age, and type of condition: United States, 1991 . . . . .
18. Number of restricted-activity days associated with acute conditions per 100 persons per year, by geographic region, place of residence, and type of condition: United States, 1991 . . . . .
19. Number of restricted-activity days associated with acute conditions per 100 persons per year, by age and type of condition: United States, 1991. . . . .
20. Number of restricted-activity days associated with acute conditions per 100 persons per year, by sex, age, and type of condition: United States, 1991. . . . .

### Restricted-activity days: Frequencies

21. Number of restricted-activity days associated with acute conditions, by age and type of condition: United States, 1991 . . . . .
22. Number of restricted-activity days associated with acute conditions, by sex, age, and type of condition: United States, 1991 . . . . .
24. Number of restricted-activity days associated with acute conditions, by race, age, and type of condition: United States, 1991 . . . . .
23. Number of restricted-activity days associated with acute conditions, by family income, age, and type of condition: United States, 1991 . . . . .
25. Number of restricted-activity days associated with acute conditions, by geographic region, place of residence, and type of condition: United States, 1991 . . . . .

### Bed days: Rates

28. Number of bed days associated with acute conditions per 100 persons per year, by age and type of condition: United States, 1991 . . . . .

27. Number of bed days associated with acute conditions per 100 persons per year, by sex, age, and type of condition: United States, 1991.....	44	42. Number of work-loss days associated with acute conditions for currently employed persons 18 years of age and over, by sex, age, and type of condition: United States, 1991 .....	61
28. Number of bed days associated with acute conditions per 100 persons per year, by race, age, and type of condition: United States, 1991.....	45	43. Number of work-loss days associated with acute conditions for currently employed persons 18 years of age and over, by race, age, and type of condition: United States, 1991 .....	62
29. Number of bed days associated with acute conditions per 100 persons per year, by family income, age, and type of condition: United States, 1991.....	46	44. Number of work-loss days associated with acute conditions for currently employed persons 18 years of age and over, by family income, age, and type of condition: United States, 1991 .....	63
30. Number of bed days associated with acute conditions per 100 persons per year, by geographic region, place of residence, and type of condition: United States, 1991.....	48	45. Number of work-loss days associated with acute conditions for currently employed persons 18 years of age and over, by geographic region, place of residence, and type of condition: United States, 1991.....	64

### **Bed days: Frequencies**

31. Number of bed days associated with acute conditions, by age and type of condition: United States, 1991 ...	49
32. Number of bed days associated with acute conditions, by sex, age, and type of condition: United States, 1991.....	50

NOTES: Excluded from these estimates are conditions involving neither medical attention nor activity restriction.

The standard errors and relative standard errors (RSE's) can be computed by using parameter sets I and X of table II, the frequencies of tables 9 and 78, and the formula presented in rule 4 of appendix I. Estimates for which the numerator has an RSE of more than 30 percent are indicated with an asterisk.

**Table 5. Number of acute conditions per 100 persons per year, by geographic region, place of residence, and type of condition: United States, 1991**

[Data are based on household interviews of the civilian noninstitutionalized population. The survey design, general qualifications, and information on the reliability of the estimates are given in appendix I. Definitions of terms are given in appendix II]

<sup>1</sup>Totals for white and black do not sum to total acute conditions because other races are not included.

NOTES: Excluded from these estimates are conditions involving neither medical attention nor activity restriction.

The standard errors and relative standard errors (RSE's) can be computed by using parameter set I of table II and the formula presented in rule 1 of appendix I. An estimate of 7.4 million has a 10-percent RSE; of 1.8 million, a 20-percent RSE; and of 793,000, a 30-percent RSE.

<sup>1</sup>MSA is metropolitan statistical area.

NOTES: Excluded from these estimates are conditions involving neither medical attention nor activity restriction.

The standard errors and relative standard errors (RSE's) can be computed by using parameter set I of table II and the formula presented in rule 1 of appendix I. An estimate of 7.4 million has a 10-percent RSE; of 1.8 million, a 20-percent RSE; and of 793,000, a 30-percent RSE.

**Table 11. Percent of acute conditions medically attended, by age and type of condition: United States, 1991**

[Data are based on household interviews of the civilian noninstitutionalized population. The survey design, general qualifications, and information on the reliability of the estimates are given in appendix I. Definitions of terms are given in appendix II.]

Type of acute condition	All ages	Under 5 years	5-17 years	18-24 years	25-44 years	Total	45 years and over	
							45-64 years	65 years and over
Percent								
All acute conditions . . . . .	63.0	82.2	55.1	56.8	58.0	68.0	64.0	75.0
Infective and parasitic diseases . . . . .	65.4	80.0	63.9	58.4	57.8	64.8	62.5	71.5
Common childhood diseases . . . . .	70.5	81.4	58.2	*100.0	*100.0	*58.0	*58.0	*—
Intestinal virus, unspecified . . . . .	36.3	69.7	27.2	*24.2	33.7	*32.3	*31.9	*33.7
Viral infections, unspecified . . . . .	54.1	76.6	50.0	*47.2	44.8	52.1	51.7	*53.3

<sup>1</sup>Totals for white and black do not sum to total restricted-activity days because other races are not included.

NOTES: The standard errors and relative standard errors (RSE's) can be computed by using parameter set II of table II and the formula presented in rule 1 of appendix I. An estimate of 52.9 million has a 10-percent RSE; of 12.9 million, a 20-percent RSE; and of 5.7 million, a 30-percent RSE.

**Table 24. Number of restricted-activity days associated with acute conditions, by family income, age, and type of condition: United States, 1991**

[Data are based on household interviews of the civilian noninstitutionalized population. The survey design, general qualifications, and information on the reliability of the estimates are given in appendix I. Definitions of terms are given in appendix II]

<sup>1</sup>Totals for income categories do not sum to total restricted-activity days because persons with unknown family income are not included.

NOTES: The standard errors and relative standard errors (RSE's) can be computed by using parameter set II of table II and the formula presented in rule 1 of appendix I. An estimate of 52.9 million has a 10-percent RSE; of 12.9 million, a 20-percent RSE; and of 5.7 million, a 30-percent RSE.

**Table 25. Number of restricted-activity days associated with acute conditions, by geographic region, place of residence, and type of condition: United States, 1991**

<sup>1</sup>MSA is metropolitan statistical area.

NOTES: The standard errors and relative standard errors (RSE's) can be computed by using parameter set II of table II and the formula presented in rule 1 of appendix I. An estimate of 52.9 million has a 10-percent RSE; of 12.9 million, a 20-percent RSE; and of 5.7 million, a 30-percent RSE.

**Table 26. Number of bed days associated with acute conditions per 100 persons per year, by age and type of condition: United States, 1991**

[Data are based on household interviews of the civilian noninstitutionalized population. The survey design, general qualifications, and information on the reliability of the estimates are given in appendix I. Definitions of terms are given in appendix II.]

Type of acute condition	All ages	Under 5 years	5-17 years	18-24 years	25-44 years	Total	45 years and over

NOTES: The standard errors and relative standard errors (RSE's) can be computed by using parameter set II of table II and the formula presented in rule 1 of appendix I. An estimate of 52.9 million has a 10-percent RSE; of 12.9 million, a 20-percent RSE; and of 5.7 million, a 30-percent RSE.

**Table 33. Number of bed days associated with acute conditions, by race, age, and type of condition: United States, 1991**

[Data are based on household interviews of the civilian noninstitutionalized population. The survey design, general qualifications, and information on the reliability of the estimates are given in appendix I. Definitions of terms are given in appendix II.]

<sup>1</sup>Totals for income categories do not sum to total bed days because persons with unknown family income are not included.

NOTES: The standard errors and relative standard errors (RSE's) can be computed by using parameter set II of table II and the formula presented in rule 1 of appendix I. An estimate of 52.9 million has a 10-percent RSE; of 12.9 million, a 20-percent RSE; and of 5.7 million, a 30-percent RSE.

**Table 35. Number of bed days associated with acute conditions, by geographic region, place of residence, and type of condition: United States, 1991**

[Data are based on household interviews of the civilian noninstitutionalized population. The survey design, general qualifications, and information on the reliability of the estimates are given in appendix I. Definitions of terms are given in appendix II.]

<sup>1</sup>MSA is metropolitan statistical area.

NOTES: The standard errors and relative standard errors (RSE's) can be computed by using parameter set II of table II and the formula presented in rule 1 of appendix I. An estimate of 52.9 million has a 10-percent RSE; of 12.9 million, a 20-percent RSE; and of 5.7 million, a 30-percent RSE.

**Table 36. Number of work-loss days associated with acute conditions per 100 currently employed persons 18 years of age and over, by age and type of condition: United States, 1991**

[Data are based on household interviews of the civilian noninstitutionalized population. The survey design, general qualifications, and information on the reliability of the estimates are given in appendix I. Definitions of terms are given in appendix II.]

NOTES: The standard errors (SE's) and relative standard errors (RSE's) for columns 1–5 can be computed by using parameter set III of table II, the frequencies of table 48, and the formula presented in rule 2 of appendix I. The SE's and RSE's for columns 6–9 can be computed by using parameter sets III and X of table II, the frequencies of tables 48 and 78, and the formula presented in rule 4 of appendix I. Estimates for which the numerator has an RSE of more than 30 percent are indicated with an asterisk.

NOTES: Excluded from these estimates are conditions involving neither medical attention nor activity restriction.

The standard errors (SE's) and relative standard errors (RSE's) for columns 1-4 can be computed by using parameter set I of table II, the frequencies of table 50, and the formula presented in rule 2 of appendix I. The SE's and RSE's for columns 5-8 can be computed by using parameter set I of table II and the formula presented in rule 1 of appendix I. An estimate of 7.4 million has a 10-percent RSE; of 1.8 million, a 20-percent RSE; and of 793,000, a 30-percent RSE. Rates for which the numerator has an RSE of 30 percent or more are indicated by an asterisk.

**Table 51. Number of episodes of persons injured per 100 persons per year, by whether in moving motor vehicle, whether at work, place of accident, and sociodemographic characteristics: United States, 1991**

[Data are based on household interviews of the civilian noninstitutionalized population. The survey design, general qualifications, and information on the reliability of the estimates are given in appendix I. Definitions of terms are given in appendix II.]

<sup>1</sup>Includes unknowns for each characteristic.

<sup>2</sup>For currently employed persons 18 years of age and over only.

<sup>3</sup>Includes other races and unknown family income.

<sup>4</sup>MSA is metropolitan statistical area.

NOTES: Injuries coded 800–999 in the 9th revision, International Classification of Diseases, and impairments resulting from an accident are included. Injuries involving neither medical attention nor activity restriction are excluded.

The standard errors (SE's) and relative standard errors (RSE's) for age, sex and age, and race and age can be computed by using parameter set IV of table II, the frequencies of table 52, and the formula presented in rule 2 of appendix I. The SE's and RSE's for family income and age, geographic region, and place of residence can be computed by using parameter sets IV and X of table II, the frequencies of tables 52 and 78, and the formula presented in rule 4 of appendix I. Estimates for which the numerator has an RSE of more than 30 percent are indicated with an asterisk.

**Table 52. Number of episodes of persons injured, by whether in moving motor vehicle, whether at work, place of accident, and sociodemographic characteristics: United States, 1991**

[Data are based on household interviews of the civilian noninstitutionalized population. The survey design, general qualifications, and information on the reliability of the estimates are given in appendix I. Definitions of terms are given in appendix II.]

<sup>2</sup>For currently employed persons 18 years of age and over only.

<sup>3</sup>Includes other races and unknown family income.

<sup>4</sup>MSA is metropolitan statistical area.

NOTES: Injuries coded 800–999 in the 9th revision, International Classification of Diseases, and impairments resulting from an accident are included. Injuries involving neither medical attention nor activity restriction are excluded.

The standard errors and relative standard errors (RSE's) can be computed by using parameter set IV of table II and the formula presented in rule 1 of appendix I. An estimate of 6.7 million has a 10-percent RSE; of 1.7 million, a 20-percent RSE; and of 709,000, a 30-percent RSE.

**Table 53. Number of restricted-activity days associated with episodes of persons injured per 100 persons per year, by whether in moving motor vehicle, whether at work, place of accident, and sociodemographic characteristics: United States, 1991**

[Data are based on household interviews of the civilian noninstitutionalized population. The survey design, general qualifications, and information on the reliability of the estimates are given in appendix I. Definitions of terms are given in appendix II]

<sup>1</sup>Includes unknowns for each characteristic.

<sup>2</sup>For currently employed persons 18 years of age and over only.

<sup>3</sup>Includes other races and unknown family income.

<sup>4</sup>MSA is metropolitan statistical area.

NOTES: The standard errors (SE's) and relative standard errors (RSE's) for age, sex and age, and race and age can be computed by using parameter set II of table 54, and the formula presented in rule 2 of appendix I. The SE's and RSE's for family income and age, geographic region, and place of residence can be computed by using parameter sets II and X of table II, the frequencies of tables 54 and 78, and the formula presented in rule 4 of appendix I. Estimates for which the numerator has an RSE of more than 30 percent are indicated with an asterisk.

**Table 54. Number of restricted-activity days associated with episodes of persons injured, by whether in moving motor vehicle, whether at work, place of accident, and sociodemographic characteristics: United States, 1991**

<sup>1</sup>Includes unknowns for each characteristic.

<sup>2</sup>For currently employed persons 18 years of age and over only.

<sup>3</sup>Includes other races and unknown family income.

<sup>4</sup>MSA is metropolitan statistical area.

NOTE: The standard errors and relative standard errors (RSE's) can be computed by using parameter set II of table II and the formula presented in rule 1 of appendix I. An estimate of 52.9 million has a 10-percent RSE; of 12.9 million, a 20-RSE; and of 5.7 million, a 30-percent RSE.

**Table 55. Number of bed days associated with episodes of persons injured per 100 persons per year, by whether in moving motor vehicle, whether at work, place of accident, and sociodemographic characteristics: United States, 1991**

[Data are based on household interviews of the civilian noninstitutionalized population. The survey design, general qualifications, and information on the reliability of the estimates are given in appendix I. Definitions of terms are given in appendix II.]

<sup>1</sup>Includes unknowns for each characteristic.

<sup>2</sup>For currently employed persons 18 years of age and over only.

<sup>3</sup>Includes other races and unknown family income.

<sup>4</sup>MSA is metropolitan statistical area.

NOTES: The standard errors (SE's) and relative standard errors (RSE's) for age, sex and age, and race and age for columns 1–4 and 7–10 can be computed by using parameter set II of table II, the frequencies of table 56, and the formula presented in rule 2 of appendix I. The SE's and RSE's for columns 5 and 6 can be computed by using parameter sets II and X of table II, the frequencies of tables 56 and 78, and the formula presented in rule 4 of appendix I. The SE's and RSE's for family income and age, geographic region, and place of residence can be computed by using parameter sets II and X of table II, the frequencies of tables 56 and 78, and the formula presented in rule 4 of appendix I. Estimates for which the numerator has an RSE of more than 30 percent are indicated with an asterisk.

NOTES: The standard errors and relative standard errors (RSE's) can be computed by using parameter set V of table II, the frequencies of tables 65 and 78, and the formula presented in rule 4 of appendix I. Estimates for which the numerator has an RSE of more than 30 percent are indicated with an asterisk.

<sup>1</sup>MSA is metropolitan statistical area.

NOTES: The standard errors and relative standard errors (RSE's) can be computed by using parameter set V of table II, the frequencies of tables 66 and 78, and the formula presented in rule 4 of appendix I. Estimates for which the numerator has an RSE of more than 30 percent are indicated with an asterisk.

**Table 62. Number of selected reported chronic conditions, by age: United States, 1991**

[Data are based on household interviews of the civilian noninstitutionalized population. The survey design, general qualifications, and information on the reliability of the estimates are given in appendix I. Definitions of terms are given in appendix II.]

<sup>1</sup>Totals for income categories do not sum to total chronic conditions because persons with unknown family income are not included.

NOTES: The standard errors and relative standard errors (RSE's) can be computed by using parameter set V of table II and the formula presented in rule 1 of appendix I. An estimate of 1.5 million has a 10-percent RSE; of 359,000, a 20-percent RSE; and of 160,000, a 30-percent RSE.

<sup>1</sup>MSA is metropolitan statistical area.

NOTES: The standard errors and relative standard errors (RSE's) can be computed by using parameter set V of table II and the formula presented in rule 1 of appendix I. An estimate of 1.5 million has a 10-percent RSE; of 359,000, a 20-percent RSE; and of 160,000, a 30-percent RSE.

**Table 67. Percent distribution of persons by degree of activity limitation due to chronic conditions according to sociodemographic characteristics: United States, 1991**

[Data are based on household interviews of the civilian noninstitutionalized population. The survey design, general qualifications, and information on the reliability of the estimates are given in appendix I. Definitions of terms are given in appendix II]

Not central city . . . . .	14.7	5.7	5.3	1,730,674	675,623	428,058
Not MSA <sup>3</sup> . . . . .	16.7	6.8	5.4	915,331	371,992	187,486

<sup>1</sup>Sum of school-loss days for children 5-17 years of age and work-loss days for currently employed persons 18 years of age and over. School-loss days are shown for the age group 5-17 years; work-loss days are shown for the age group 18 years and over and each older age group.

<sup>2</sup>Includes other races and unknown family income.

<sup>3</sup>MSA is metropolitan statistical area.

NOTES: The standard errors (SE's) and relative standard errors (RSE's) for age, age and sex, and race and age for columns 1 and 2 can be computed by using parameter set II of table II, the frequencies of table 69, and the formula presented in rule 2 of appendix I. The SE's and RSE's for family income and age, geographic region, and place of residence for columns 1 and 2 can be computed by using parameter sets II and X of table II, the frequencies of tables 69 and 78, and the formula presented in rule 4 of appendix I. The SE's and RSE's for column 3 (work-loss) can be computed by using parameter sets III and X of table II, the frequencies of tables 69 and 78, and the formula presented in rule 4 of appendix I. The SE's and RSE's for age, age and sex, and race and age for column 3 (school-loss) can be computed by using parameter set III of table II, the frequencies of table 69, and the formula presented in rule 2 of appendix I. The SE's and RSE's for family income and age, geographic region, and place of residence for column 3 (school-loss) can be computed by using parameter sets III and X of table II, the frequencies of tables 69 and 78, and the formula presented in rule 4 of appendix I. The SE's and RSE's for columns 4 and 5 can be computed by using parameter set II of table II and the formula presented in rule 1 of appendix I. The SE's and RSE's for column 6 can be computed by using parameter set III of table II and the formula presented in rule 1 of appendix I. For restricted-activity and bed-days, an estimate of 52.9 million has an RSE of 10 percent; 12.9 million, of 20 percent; and 5.7 million, of 30 percent. For work- or school-loss days, an estimate of 41.1 million has an RSE of 10 percent; 10.3 million, of 20 percent; and 4.6 million, of 30 percent. Rates for which the numerator has an RSE of more than 30 percent are indicated with an asterisk.

Not MSA <sup>4</sup> . . . . .	54,693	100.0	34.6	28.4	24.9	8.5	3.7

<sup>1</sup>Includes unknown health status.

<sup>2</sup>Excludes unknown health status.

<sup>3</sup>Includes other races and unknown family income.

<sup>4</sup>MSA is metropolitan statistical area.

NOTES: The standard errors (SE's) and relative standard errors (RSE's) for family income and age, geographic region, and place of residence for column 1 can be computed by using parameter set X of table II and the formula presented in rule 1 of appendix I. The SE's and RSE's for age, sex and age, and race and age for columns 3-7 can be computed by using parameter set X of table II, the frequencies of table 70, and the formula presented in rule 2 of appendix I. The SE's and RSE's for family income and age, geographic region, and place of residence for columns 3-7 can be computed by using parameter set X of table II, the frequencies of table 70, and the formula presented in rule 3 of appendix I. An estimate of 350,000 has a 10-percent RSE; of 87,000, a 20-percent RSE; and of 39,000, a 30-percent RSE. Estimates for which the numerator has an RSE of more than 30 percent are indicated with an asterisk.

**Table 71. Number per person per year and number of physician contacts, by place of contact and sociodemographic characteristics: United States, 1991**

[Data are based on household interviews of the civilian noninstitutionalized population. The survey design, general qualifications, and information on the reliability of the estimates are given in appendix I. Definitions of terms are given in appendix II.]

<sup>1</sup>Includes unknown place of contact.

<sup>2</sup>Does not include physician contacts while an overnight patient in a hospital.

<sup>3</sup>Includes other races and unknown family income.

<sup>4</sup>MSA is metropolitan statistical area.

NOTES: The standard errors (SE's) and relative standard errors (RSE's) for age, sex and age, and race and age for columns 1–5 can be computed by using parameter set VI of table II, the frequencies of table 71, and the formula presented in rule 2 of appendix I. The SE's and RSE's for family income and age, geographic region, and place of residence for columns 1–5 can be computed by using parameter sets VI and X of table II, the frequencies of tables 71 and 78, and the formula presented in rule 4 of appendix I. The SE's and RSE's for columns 6–10 can be computed by using parameter set VI of table II and the formula presented in rule 1 of appendix I. An estimate of 16.4 million has a 10-percent RSE; of 4.1 million, a 20-percent RSE; and of 1.9 million, a 30-percent RSE. Rates for which the numerator has an RSE of more than 30 percent are indicated with an asterisk.

**Table 72. Percent distribution and number of persons by interval since last physician contact, according to sociodemographic characteristics: United States, 1991**

[Data are based on household interviews of the civilian noninstitutionalized population. The survey design, general qualifications, and information on the reliability of the estimates are given in appendix I. Definitions of terms are given in appendix II.]

<sup>1</sup>Excludes unknown interval.

<sup>2</sup>Includes unknown interval.

<sup>3</sup>Includes physician contacts while an overnight patient in a hospital.

<sup>4</sup>Includes other races and unknown family income.

<sup>5</sup>MSA is metropolitan statistical area.

NOTES: The standard errors (SE's) and relative standard errors (RSE's) for age, sex and age, and race and age for columns 2–5 can be computed by using parameter set X of table II, the frequencies of table 72, and the formula presented in rule 2 of appendix I. The SE's and RSE's for family income and age, geographic region, and place of residence for columns 2–5 can be computed by using parameter set X of table II, the frequencies of table 72, and the formula presented in rule 3 of appendix I. The SE's and RSE's for columns 6–10 can be computed by using parameter set X of table II and the formula presented in rule 1 of appendix I. An estimate of 350,000 has a 10-percent RSE; of 87,000, a 20-percent RSE; and of 39,000 a 30-percent RSE. Estimates for which the numerator has an RSE of more than 30 percent are indicated with an asterisk.

**Table 73. Percent distribution of living persons by number of short-stay hospital episodes during the year preceding interview for all causes and excluding deliveries, according to sociodemographic characteristics: United States, 1991**

[Data are based on household interviews of the civilian noninstitutionalized population. The survey design, general qualifications, and information on the reliability of the estimates are given in appendix I. Definitions of terms are given in appendix II.]

<sup>1</sup>Based on reason for admission or other indication of delivery.

<sup>2</sup>Includes other races and unknown family income.

<sup>3</sup>MSA is metropolitan statistical area.

NOTES: The standard errors and relative standard errors (RSE's) can be computed by using parameter set X of table II and the formula presented in rule 1 of appendix I. An estimate of 350,000 has a 10-percent RSE; of 87,000, a 20-percent RSE; and of 39,000, a 30-percent RSE.

**Table 75. Number of short-stay hospital days during the year preceding interview per living person hospitalized for all causes and excluding deliveries, by number of episodes and sociodemographic characteristics: United States, 1991**

[Data are based on household interviews of the civilian noninstitutionalized population. The survey design, general qualifications, and information on the reliability of the estimates are given in appendix I. Definitions of terms are given in appendix II.]

<sup>1</sup>Based on reason for admission or other indication of delivery.

<sup>2</sup>Includes other races and unknown family income.

<sup>3</sup>MSA is metropolitan statistical area.

NOTES: The standard errors and relative standard errors (RSE's) can be computed by using parameter set VII of table II and the formula presented in rule 1 of appendix I. An estimate of 6.9 million has a 10-percent RSE; of 1.7 million, a 20-percent RSE; and of 732,000, a 30-percent RSE.

**Table 77. Number per 100 persons per year and annual number of short-stay hospital discharges, average length of stay and annual number of hospital days for living persons hospitalized for all causes and excluding deliveries, by sociodemographic characteristics: United States, 1991**

[Data are based on household interviews of the civilian noninstitutionalized population. The survey design, general qualifications, and information on the reliability of the estimates are given in appendix I. Definitions of terms are given in appendix II.]

<sup>1</sup>Includes unknown cause; based on 6-month reference period.

<sup>2</sup>Based on reason for admission or other indication of delivery.

<sup>3</sup>Includes other races and unknown family income.

<sup>4</sup>MSA is metropolitan statistical area.

NOTES: The standard errors (SE's) and relative standard errors (RSE's) for age, sex and age, and race and age for columns 1 and 5 can be computed by using parameter set VIII of table II, the frequencies of table 77, and the formula presented in rule 2 of appendix I. The SE's and RSE's for family income and age, geographic region, and place of residence for columns 1 and 5 can be computed by using parameter sets VIII and X of table II, the frequencies of tables 77 and 78, and the formula presented in rule 4 of appendix I. The SE's and RSE's for columns 2 and 6 can be computed by using parameter set VII of table II and the formula presented in rule 1 of appendix I. The SE's and RSE's for columns 4 and 8 can be computed by using parameter set IX of table II and the formula presented in rule 4 of appendix I. The SE's and RSE's for columns 3 and 7 can be computed by using parameter sets VIII and IX of table II, the frequencies of table 77, and the formula presented in rule 4 of appendix I. An estimate of 691,000 discharges has a 10-percent RSE; of 172,000, a 20-percent RSE; and of 76,000, a 30-percent RSE. An estimate of 10.9 million days has a 10-percent RSE; of 2.6 million, a 20-percent RSE; and of 1.1 million, a 30-percent RSE.

**Table 78. Number of persons of all ages and number of currently employed persons 18 years of age and over, by sociodemographic characteristics: United States, 1991**

[Data are based on household interviews of the civilian noninstitutionalized population. The survey design, general qualifications, and information on the reliability of the estimates are given in appendix I. Definitions of terms are given in appendix II.]

18 years and over . . . . .	39,492	25,510	18 years and over . . . . .	39,979	24,232

<sup>1</sup>Includes other races and unknown family income.

<sup>2</sup>MSA is metropolitan statistical area.

NOTES: The standard errors and relative standard errors (RSE's) for currently employed persons, family income and age, geographic region and age, and place of residence and age can be computed by using parameter set X of table II and the formula presented in rule 1 of appendix I. An estimate of 350,000 has a 10-percent RSE; of 87,000, a 20-percent RSE; and of 39,000, a 30-percent RSE.

## **Technical notes on methods**

### **Background**

This report is one of a series of statistical reports published by the staff of the National Center for Health Statistics (NCHS). It is based on information collected in a continuing nationwide sample of households included in the National Health Interview Survey (NHIS). Data are obtained on the personal, sociodemographic, and health characteristics of the family members and unrelated individuals living in these households.

Field operations for the survey are conducted by the U.S. Bureau of the Census under specifications established by NCHS. The U.S. Bureau of the Census participates in the survey planning, selects the sample, and conducts the interviews. The data are then transmitted to NCHS for preparation, processing, and analysis.

Summary reports and reports on special topics for each year's data are prepared by the staff of the Division of Health Interview Statistics for publication in Series 10 publications of NCHS. Data are also tabulated for other reports published by NCHS staff and for use by other organizations and by researchers within and outside the Government. Since 1969, public use tapes have been prepared for each year of data collection.

It should be noted that the health characteristics described by NHIS estimates pertain only to the resident, civilian noninstitutionalized population of the United States living at the time of the interview. The sample does not include persons residing in nursing homes, members of the armed forces, institutionalized persons, or U.S. nationals living abroad.

### **Statistical design of NHIS**

#### **General design**

Data from NHIS have been collected continuously since 1957. The sample design of the survey has undergone changes following each decennial census. This periodic redesign of the NHIS sample allows the incorporation of the latest population information and statistical methodology into the survey design. The data presented in this report are from an NHIS sample design first used in 1985. It is anticipated that this design will be used until 1995.

The sample design plan of the NHIS follows a multi-stage probability design that permits a continuous

sampling of the civilian noninstitutionalized population residing in the United States. The survey is designed in such a way that the sample scheduled for each week is representative of the target population, and the weekly samples are additive over time. This design permits estimates for high-frequency measures or for large population groups to be produced from a short period of data collection. Estimates for low-frequency measures or for smaller population subgroups can be obtained from a longer period of data collection. The annual sample is designed so that tabulations can be provided for each of the four major geographic regions. Because interviewing is done throughout the year, there is no seasonal bias for annual estimates.

The continuous data collection also has administrative and operational advantages because fieldwork can be handled on a continuing basis with an experienced, stable staff.

#### **Sample selection**

The target population for NHIS is the civilian noninstitutionalized population residing in the United States. For the first stage of the sample design, the United States is considered to be a universe composed of approximately 1,900 geographically defined primary sampling units (PSU's). A PSU consists of a county, small group of contiguous counties, or a metropolitan statistical area. The PSU's collectively cover the 50 States and the District of Columbia. The 52 largest PSU's are selected into the sample with certainty and are referred to as self-representing PSU's. The other PSU's in the universe are referred to as non-self-representing PSU's. These PSU's are clustered into 73 strata, and 2 sample PSU's are chosen from each stratum with probability proportional to population size. This gives a total of 198 PSU's selected in the first stage.

Within a PSU, two types of second-stage units are used: area segments and permit area segments. Area segments are defined geographically and contain an expected eight households. Permit area segments cover geographical areas containing housing units built after the 1980 census. The permit area segments are defined using updated lists of building permits issued in the PSU since 1980 and contain an expected four households.

Within each segment all occupied households are targeted for interview. On occasion, a sample segment

may contain a large number of households. In this situation the households are subsampled to provide a manageable interviewer workload.

The sample was designed so that a typical NHIS sample for the data collection years 1985 to 1995 will consist of approximately 7,500 segments containing about 59,000 assigned households. Of these households, an expected 10,000 will be vacant, demolished, or occupied by persons not in the target population of the survey. The expected sample of 49,000 occupied households will yield a probability sample of about 127,000 persons.

### Features of the NHIS sample redesign

Starting in 1985, the NHIS design incorporated several new design features (8). The major changes include the following:

1. *The use of an all-area frame.* The NHIS sample is now designed so that it can serve as a sample frame for other NCHS population-based surveys. In previous NHIS designs about two-thirds of the sample was obtained from lists of addresses compiled at the time of the decennial census; that is, a list frame. Due to U.S. Bureau of the Census confidentiality restrictions, these sample addresses could be used for only those surveys being conducted by the U.S. Bureau of the Census. The methodology used to obtain addresses in the 1985 NHIS area frame does not use the census address lists. The sample addresses thus obtained can be used as a sampling frame for other NCHS surveys.
2. *The NHIS as four panels.* Four national subdesigns, or panels, constitute the full NHIS. Each panel contains a representative sample of the U.S. civilian noninstitutionalized population. Each of the four panels has the same sampling properties, and any combination of panels defines a national design. Panels were constructed to facilitate the linkage of NHIS to other surveys, and also to efficiently make large reductions in the size of the sample by eliminating panels from the survey.

In 1991 the sample consisted of 8,526 segments containing 61,215 assigned households. Of the 48,853 households eligible for interview, 46,761 households were actually interviewed, resulting in a sample of 120,032 persons.

3. *The oversampling of black persons.* One of the goals in designing the current NHIS was to improve the precision of estimates for black persons. This was accomplished by the use of differential sampling rates in PSU's with between about 5- and 50-percent black population. Sampling rates for selection of segments were increased in areas known to have the highest concentrations of black persons. Segment sampling rates were decreased in other areas within the PSU to ensure that the total sample in each PSU was the same size as it would have been without oversampling black persons.

4. *The reduction of the number of sampled PSU's.* Interviewer travel to sample PSU's constitutes a large component of the total field costs for the NHIS. The previous NHIS design included 376 PSU's. Research showed that reducing the number of sample PSU's while increasing the sample size within PSU's would reduce travel costs and also maintain the reliability of health estimates. The design now contains 198 PSU's.
5. *The selection of two PSU's per non-self-representing stratum.* In the previous design, one PSU was selected from each non-self-representing stratum. This feature necessitated the use of less efficient variance estimation procedures; the selection of two PSU's allows more efficient variance estimation methodology.

### Collection and processing of data

The NHIS questionnaire contains two major parts: The first consists of topics that remain relatively the same from year to year. Among these topics are the incidence of acute conditions, the prevalence of chronic conditions, persons limited in activity due to chronic conditions, restriction in activity due to impairment or health problems, and utilization of health care services involving physician care and short-stay hospitalization. Occasionally new questions are incorporated into the main questionnaire. Since 1985, questions that ask the household members' city and state of birth, social security number, and father's last name, have been included. In 1989, questions were added that ask the location (city, county, and state) of any physician contact whether by telephone or in person; and for household members born in the United States, how many years they have lived in the state of residence, and for household members born in a foreign country, how many years they have lived in the United States. The second part consists of special topics added as supplements to each year's questionnaire. Beginning in August 1987, a special set of supplemental questions on the adult population's knowledge and attitudes about acquired immunodeficiency syndrome (AIDS) was added to the National Health Interview Survey using Computer Assisted Personal Interview (CAPI). A copy of the most recent questionnaire, not included in Current Estimates prior to 1989, is shown in appendix III.

Careful procedures are followed to assure the quality of data collected in the interview. Most households in the sample are contacted by mail before the interviewers arrive. Potential respondents are informed of the importance of the survey and assured that all information obtained in the interview will be held in strict confidence. Interviewers make repeated trips to a household when a respondent is not immediately found. The success of these procedures is indicated by the response rate for the survey, which has been between 95 and 98 percent over the years.

When contact is made, the interviewer attempts to have all family members of the household 19 years of age

and over present during the interview. When this is not possible, proxy responses for absent adult family members are accepted. In most situations, proxy respondents are used for persons under 19 years of age. Persons 17 and 18 years of age may respond for themselves, however.

Interviewers undergo extensive training and retraining. The quality of their work is checked by means of periodic observation and by reinterview. Their work is also evaluated by statistical studies of the data they obtain in their interviews. A field edit is performed on all completed interviews so that if there are any problems with the information on the questionnaire, respondents may be recontacted to solve the problem.

Completed questionnaires are sent from the U.S. Bureau of the Census field offices to NCHS for coding and editing. To ensure the accuracy of coding, a 5-percent sample of all questionnaires is recoded and keyed by other coders. A 100-percent verification procedure is used if certain error tolerances are exceeded. Staff of the Division of Health Interview Statistics then edit the files to remove impossible and inconsistent codes.

The interview, fieldwork, and data processing procedures summarized above are described in detail in Series 1, No. 18 (9).

## Estimation procedures

Because the design of NHIS is a complex multistage probability sample, it is necessary to reflect these complex procedures in the derivation of estimates (8). The estimates presented in this report are based upon 1991 sample person counts weighted to produce national estimates. The weight for each sample person is the product of four component weights:

- Probability of selection.* The basic weight for each person is obtained by multiplying the reciprocals of the probabilities of selection at each step in the design: PSU, segment, and household.
- Household nonresponse adjustment within segment.* In NHIS, interviews are completed in 96 percent of all eligible households. Because of household nonresponse, a weighting adjustment is required. The non-response adjustment weight is a ratio with the number of households in a sample segment as the numerator and the number of households actually interviewed in that segment as the denominator. This adjustment reduces bias in an estimate to the extent that persons in the noninterviewed households have the same characteristics as the persons in the interviewed households in the same segment.
- First-stage ratio adjustment.* The weight for persons in the non-self-representing PSU's is ratio adjusted to the 1980 population within four race-residence classes of the non-self-representing strata within each geographic region.
- Poststratification by age-sex-race.* Within each of 60 age-sex-race cells (table I), a weight is constructed

**Table I. The 60 poststratification age-sex-race cells in the National Health Interview Survey**

Age	Black		All other	
	Male	Female	Male	Female
Under 1 year . . . . .	X	X	X	X
1-4 years . . . . .	X	X	X	X
5-9 years . . . . .	X	X	X	X
10-14 years . . . . .	X	X	X	X
15-17 years . . . . .	X	X	X	X
18-19 years . . . . .	X	X	X	X
20-24 years . . . . .	X	X	X	X
25-29 years . . . . .	X	X	X	X
30-34 years . . . . .	X	X	X	X
35-44 years . . . . .	X	X	X	X
45-49 years . . . . .	X	X	X	X
50-54 years . . . . .	X	X	X	X
55-64 years . . . . .	X	X	X	X
65-74 years . . . . .	X	X	X	X
75 years and over . . . . .	X	X	X	X

each quarter to ratio-adjust the first-stage population estimate based on the NHIS to an independent estimate of the population of each cell. These independent estimates are prepared by the U.S. Bureau of the Census and are updated quarterly.

The main effect of the ratio-estimating process is to make the sample more closely representative of the target population by age, sex, race, and residence. The poststratification adjustment helps to reduce the component of bias resulting from sampling frame undercoverage; furthermore, this adjustment frequently reduces sampling variance.

## Types of estimates

As noted, NHIS data were collected on a weekly basis, with each week's sample representing the resident, civilian noninstitutionalized population of the United States living during that week. The weekly samples are consolidated to produce quarterly files (each consisting of data for 13 weeks). Weights to adjust the data to represent the U.S. population are assigned to each of the four quarterly files. These quarterly files are later consolidated to produce the annual file, which is the basis of most tabulations of NHIS data.

NHIS uses various reference periods to reduce the amount of bias associated with respondent memory loss. A 2-week reference period is used in collecting data on the incidence of acute conditions, restriction in activity due to a health problem, and physician contacts. Each of these measures health events that may be forgotten soon after they occur. Examples of such events are telephoning a physician about a minor illness, missing a day from work because of a routine health problem, or having a cold. Either a 12- or 6-month (depending on the type of statistic) reference period is used for hospitalization data because hospitalization ordinarily involves a major event in a person's life and is not quickly forgotten. Chronic condition prevalence estimates are based on a 12-month reference period.

Because most NHIS estimates based on a 2-week reference period are designed to represent the number of health events for a 12-month period, these data must be adjusted to an annual basis. Data based on a 2-week reference period are multiplied by 6.5 to produce the 13-week estimate for the quarter. These reference period adjustments are made at the time that the quarterly files are produced. Therefore, the data can be used to produce estimates for each quarter and are used that way to study seasonal variation. The data from the four quarterly files (representing the number of events in each quarter) are summed to produce the annual estimate. Although these data are collected for only 2 weeks for each person included in the survey, any unusual event that may have occurred during a particular 2-week period does not bias the estimate because the quarterly estimate is a sum of the estimates produced for each week's sample during the entire quarter and the annual estimate is the sum of the four quarters.

For prevalence statistics, such as the number of persons limited in activity due to chronic conditions, the annual estimate results from summing the weighted quarterly files and dividing by 4. This division is necessary because, as noted above, each quarterly file has been weighted to produce an estimate of the number of persons in the U.S. population with a given characteristic. Summing the four quarters and dividing by 4 in effect averages these quarterly results for the year. Thus, the type of prevalence estimate ordinarily derived from NHIS data is an annual average prevalence estimate.

For data related to short-stay hospital discharges that are based on a 6-month reference period, cases identified during any quarter of data collection are multiplied by 2 to produce a quarterly estimate of the annual number of characteristics associated with short-stay hospital discharges. The NHIS average annual estimate of hospital discharges is derived by summing the four quarterly estimates and dividing by 4, just as the prevalence estimates are.

## Reliability of the estimates

Because NHIS estimates are based on a sample, they may differ somewhat from the figures that would have been obtained if a complete census had been taken using the same survey and processing procedures. There are two types of errors possible in an estimate based on a sample survey: Sampling and non-sampling errors. To the extent possible, these types of errors are kept to a minimum by methods built into the survey procedures described earlier (10). Although it is very difficult to measure the extent of bias in NHIS, several studies have been conducted to examine this problem. The results have been published in several reports (11-14).

### Nonsampling errors

*Interviewing process*—Information, such as the number of days of restricted activity caused by the condition, can

be obtained more accurately from household members than from any other source because only the persons concerned are in a position to report this information. However, there are limitations to the accuracy of diagnostic and other information collected in household interviews. For example, for diagnostic information, the household respondent can usually pass on to the interviewer only the information the physician has given to the family. For conditions not medically attended, diagnostic information is often no more than a description of symptoms. Further, a respondent may not answer a question in the intended manner because he or she has not properly understood the question, has forgotten the event, does not know, or does not wish to divulge the answer. Regardless of the type of measure, all NHIS data are estimates of known reported morbidity, disability, and so forth.

*Reference period bias*—NHIS estimates do not represent a complete measure of any given topic during the specified calendar period because data are not collected in the interview for persons who died or became institutionalized during the reference period. For many types of statistics collected in the survey, the reference period is the 2 weeks prior to the interview week. For such a short period, the contribution by decedents to a total inventory of conditions or services should be very small. However, the contribution by decedents during a long reference period (such as 1 year) might be significant, especially for older persons.

Underreporting associated with a long reference period is most germane to data on hospitalization. Analysis has shown that there is an increase in underreporting of hospitalizations with an increase in the time interval between the discharge and the interview. Exclusive of the hospital experience of decedents, the net underreporting using a 12-month recall period is in the neighborhood of 10 percent (15). The underreporting of discharges within 6 months of the week of interview is estimated to be about 5 percent (15). For this reason, hospital discharge data are based on hospital discharges reported to have occurred within 6 months of the week of interview.

Because hospitalization is common in the period immediately preceding death or institutionalization and older persons are much more likely to die than younger ones, the data should not be used to estimate the volume of hospitalization of the elderly although the data can be used to measure characteristics of elderly people.

It should further be noted that, although the reported frequencies and rates related to hospital episodes are presented by the year in which the data were collected, the estimates are, in most cases, based on hospitalizations that occurred during the year of data collection and the prior year. Overall, approximately one-half of the reported hospitalizations for the 12-month reference period occurred in the year prior to the year of data collection.

*Population estimates*—Some of the published tables include population figures for specified categories. Except for overall totals for the 60 age, sex, and race groups, which are adjusted to independent estimates, these figures

are based on the sample of households in NHIS. They are given primarily to provide denominators for rate computation, and for this purpose they are more appropriate for use with the accompanying measures of health characteristics than other population data that may be available. With the exception of the overall totals by age, sex, and race mentioned above, the population figures may differ from figures (which are derived from different sources) published in reports of the U.S. Bureau of the Census. Official population estimates are presented in U.S. Bureau of the Census reports in Series P-20, P-25, and P-60.

The population estimates for 1991 are inflated to national population controls by age, race, and sex. The population controls are based on the 1980 census carried forward to 1991. Therefore, the estimates may differ from 1990 census results brought forward to the survey date. Population controls incorporating census results will be used for survey estimation beginning later in the decade.

*Rounding of numbers*—In published tables, the figures are rounded to the nearest thousand, although they are not necessarily accurate to that detail. Derived statistics, such as rates and percent distributions, are computed after the estimates on which these are based have been rounded to the nearest thousand.

*Combining data years*—To reduce sampling error, data for number of years may be combined. However, in so doing, the questionnaire for each of the years should be checked, because even a small change in the questionnaire design may lead to large changes in the derived estimates. This caution also applies to using NHIS data on health measures where changes in other events, such as legislative changes, have occurred over time.

## Sampling errors

The standard error is primarily a measure of sampling error, that is, the variations that might occur by chance because only a sample of the population is surveyed. The chances are about 68 in 100 that an estimate from the sample would differ from a complete census by less than the standard error. The chances are about 95 in 100 that the difference would be less than twice the standard error

and about 99 in 100 that it would be less than 2½ times as large.

Individual standard errors were not computed for each estimate in this report. Instead, standard errors were computed for a broad spectrum of estimates. Regression techniques were then applied to produce equations from which a standard error for any estimate can be approximated. The regression equations, represented by parameters  $a$  and  $b$ , are presented in table II. Also shown are the cutoff values, the estimated number of persons or events below which the relative standard error is greater than 30 percent, and estimates do not meet NHIS standards of statistical reliability. Rules explaining their use are presented in the section below.

The reader is cautioned that this procedure will give an approximate standard error of an estimate rather than the precise standard error. The reader is further cautioned that particular care should be exercised when the denominator is small.

## General rules for determining standard errors

To produce approximate standard errors for NHIS estimates, the reader must first determine the type of characteristic to be estimated, that is, the parameter set in table II to be used. The reader must then determine the type of estimate for which the standard error is needed. The type of estimate corresponds to one of five general rules for determining standard errors.

**Rule 1. Estimated number of people or events**—For the estimated number of people or events published in this report, there are two cases to consider. For the first case, if the estimated number is any combination of the poststratification age-sex-race cells in table I, then its value has been adjusted to official U.S. Bureau of the Census figures and its standard error is assumed to be 0.0. This corresponds to parameter set XI in table II. As an example, this would be the case for the number of persons in the U.S. target population or the number of black persons in the 18–44 year age

**Table II. Estimated standard error parameters and 30-percent relative standard error (RSE) cutoff points for the National Health Interview Survey, 1991**

Parameter set	Characteristic	Estimated parameters		30-percent RSE cutoff points <sup>1</sup>
		a	b	
I	Number of acute conditions . . . . .	0.00026	71,200	793,000
II	Days of restricted activity or bed days . . . . .	0.000376	509,000	5,700,000
III	Days lost from work or school . . . . .	0.00000559	410,000	4,600,000
IV	Number of episodes of persons injured . . . . .	0.000472	63,500	709,000
V	Prevalence of chronic conditions . . . . .	-0.000158	14,400	160,000
VI	Number of physician contacts based on a 2-week reference period . . . . .	0.0000874	162,000	1,900,000
VII	Hospital days based on a 12-month reference period . . . . .	0.000373	65,600	732,000
VIII	Hospital discharges based on a 6-month reference period . . . . .	0.0000820	6,850	76,000
IX	Hospital discharge days based on a 6-month reference period . . . . .	0.00102	97,700	1,100,000
X	Population estimates for demographic, socioeconomic, and health characteristics . . . . .	-0.0000141	3,500	39,000
XI	Age-sex-race population based on combining the poststratification cells of table I . . . . .	0.0	0.0	39,000

<sup>1</sup>Estimates below the cutoff points have an RSE of more than 30 percent and are considered to be statistically unreliable.

NOTE: The 1991 NHIS was based on a full sample. Therefore, 46,761 households were interviewed, resulting in a sample of 120,032 persons.

group. Although the race class "white" is not specifically adjusted to U.S. Bureau of the Census figures, it dominates the poststratification "all other" race class; consequently, age-sex-"all other" race combinations of table I can be treated as age-sex-white combinations for the purpose of approximating standard errors.

For the second case, the standard errors for all other estimates of numbers of people or events, such as the number of people limited in activity or the number of acute conditions, are approximated by using the parameters provided in table II and formula 1 below.

If the aggregate  $x$  for a characteristic has associated parameters  $a$  and  $b$ , then the approximate standard error for  $x$ ,  $SE(x)$ , can be computed by the formula

$$SE(x) = \sqrt{ax^2 + bx} \quad (1)$$

*Example of rule 1.* As shown in table 7, the estimated number of acute conditions for males is 214,970,000. From table II, parameter set I, the  $a$  and  $b$  parameters for the numbers of acute conditions are 0.00026 and 71,200, respectively. Using formula 1, the estimated standard error is

$$\begin{aligned} & \sqrt{(0.00026)(214,970,000)^2 + (71,200)(214,970,000)} \\ &= 5,226,950 \end{aligned}$$

An approximate 95-percent confidence interval for the number of acute conditions for males is from 204,725,178 to 225,214,822 ( $214,970,000 \pm 1.96(5,226,950)$ ).

**Rule 2. For rates, proportions, and percents when the denominator is generated by the poststratification age-sex-race classes (table I)**—In this case, the denominator has no sampling error. For example, rule 2 would apply to the estimated number of bed days per person for black persons age 65 years and over because the denominator is a combination of the poststratification cells. Approximate standard errors for such estimates can be computed using table II  $a$  and  $b$  parameters associated with the numerator characteristics along with formula 2 below.

If the estimate of rate, proportion, or percent  $p$  is the ratio of two estimated numbers,  $p = x/Y$  (where  $p$  may be inflated by 100 for percents or 1,000 for rates per 1,000 persons), with  $Y$  having no sampling error, then the approximate standard error for  $p$  is given by the formula

$$SE(p) = p \sqrt{a + \frac{b}{x}} \quad (2)$$

In this report, the value of the denominator  $Y$  is always provided, but in a few cases the numerator value  $x$  is not published. For these cases the value of  $x$  may be computed by the formula

$$x = \begin{cases} pY & \text{if } p \text{ is a proportion or rate per unit or} \\ \frac{pY}{100} & \text{if } p \text{ is a percent or rate per 100 units or} \\ \frac{pY}{1,000} & \text{if } p \text{ is a rate per 1,000 units} \end{cases}$$

*Example of rule 2.* From table 18, the rate of restricted-activity days associated with acute conditions for black persons in the 18-44 year age group is estimated to be 867.4 days per 100 persons per year. Here,  $p = 867.4$  and can be expressed as  $(100)x/Y$ . From table 23,  $x = 114,067,000$  restricted-activity days, and from table 78,  $Y = 13,151,000$  persons. From table II, parameter set II, the parameters  $a$  and  $b$  for restricted-activity days are 0.000376 and 509,000, respectively. Using formula 2, the estimated standard error for the rate is

$$867.4 \sqrt{0.000376 + \frac{509,000}{114,067,000}} = 60.3 \text{ days}$$

An approximate 95-percent confidence interval for the number of restricted-activity days associated with acute conditions per 100 persons per year for black persons aged 18-44 years is from 749.2 to 985.6 days. If the value of  $x$  had not been published, it could have been obtained by the computation

$$x = 867.4 \frac{13,151,000}{100} = 114,071,774$$

The small difference between this computed value of  $x$  and the actual estimate can be attributed to rounding and would not significantly affect the computation of the standard error.

**Rule 3. Proportions and percents when the denominator is not generated by the poststratification age-sex-race classes**—If  $p$  represents an estimated percent,  $b$  is the parameter from table II associated with the numerator characteristics, and  $y$  is the number of persons in the denominator upon which  $p$  is based, then the standard error of  $p$  may be approximated by

$$SE(p) = \sqrt{\frac{bp(100 - p)}{y}} \quad (3)$$

(If  $p$  is a proportion, then the above formula can be used but with 100 replaced by 1.0.)

*Example of rule 3.* In table 70, it is estimated that 40.5 percent of persons in the Northeast have excellent health status. This percent is based upon the denominator estimate of 50,300,000 persons

living in the Northeast. From table II, parameter set X, parameter  $b$  associated with health status is 3,500. Using formula 3, the standard error for the percent is

$$\sqrt{\frac{3,500 (40.5) (100.0 - 40.5)}{50,300,000}} = 0.4 \text{ percent}$$

An approximate 95-percent confidence interval for the percent of persons in the Northeast having excellent health status as perceived by the respondent is from 39.7 to 41.3 percent.

**Rule 4. Rates when the denominator is not generated by the poststratification age-sex-race classes**—If the estimated rate  $p$  is expressed as the ratio of two estimates,  $p=x/y$  (inflated by 100 or 1,000 when appropriate), then the estimated standard error for  $p$  is given by the formula

$\text{SE}(p)$

$$= p \sqrt{\frac{\text{SE}(x)^2}{x^2} + \frac{\text{SE}(y)^2}{y^2} - 2r \frac{\text{SE}(x)}{x} \frac{\text{SE}(y)}{y}} \quad (4)$$

where  $\text{SE}(x)$  and  $\text{SE}(y)$  are computed using rule 1 and  $x$  and  $y$  are obtained from the tables. No estimates of  $r$ , the correlation between the numerator and denominator, are presented in this report; therefore, only the first two terms are available. The reader must assume that  $r = 0.0$ . Assuming  $r = 0.0$  will yield an overestimate of the standard error if  $r$  is actually positive and an underestimate if  $r$  is negative.

*Example of rule 4.* Table 75 shows an estimate of 9.2 hospital days per male person hospitalized. From tables 76 and 74 it can be seen that this estimated rate is the ratio of 68,621,000 hospital days for males to 7,462,000 males having one or more hospital episodes. From table II, parameter set VII, the numerator  $a$  and  $b$  parameters are 0.000373 and 65,600, respectively. From parameter set X, the denominator  $a$  and  $b$  values are -0.0000141 and 3,500, respectively. Using rule 1, the standard error for the numerator is approximately 2,501,587 days and the standard error for the denominator is approximately 159,160 persons.

Using formula 4 with  $r = 0.0$ , the standard error of the rate is estimated by

$$9.2 \sqrt{\frac{2,501,587^2}{68,621,000^2} + \frac{159,160^2}{7,462,000}}$$

$$= 0.4 \text{ days per person}$$

An approximate 95-percent confidence interval for the number of hospital days per hospitalized male is from 8.4 to 10.0 days.

**Rule 5. Difference between two statistics (mean, rate, total, and proportion)**—If  $x_1$  and  $x_2$  are two estimates, then the standard error of the difference  $(x_1 - x_2)$  can be computed as follows:

$$\begin{aligned} &\text{SE}(x_1 - x_2) \\ &= \sqrt{\text{SE}(x_1)^2 + \text{SE}(x_2)^2 - 2r \text{SE}(x_1)\text{SE}(x_2)} \end{aligned} \quad (5)$$

where  $\text{SE}(x_1)$  and  $\text{SE}(x_2)$  are computed using rules 1–4 as appropriate and  $r$  is the correlation coefficient between  $x_1$  and  $x_2$ .

Assuming  $r = 0.0$  will result in an accurate standard error if the two estimates are actually uncorrelated and will result in an overestimate of the standard error if the correlation is positive or an underestimate if the correlation is negative.

*Example of rule 5.* Table 70 shows estimates of 40.5 percent of persons in the Northeast and 39.5 percent of persons in the Midwest having excellent health status. In the example of rule 3, it was shown that the standard error of the Northeast percent is approximately 0.4 percent. The standard error for the Midwest percent, computed similarly, is also 0.4 percent. From formula 5, with  $r = 0.0$ , the standard error estimated for the difference  $(40.5 - 39.5) = 1.0$  is

$$\sqrt{(0.4)^2 + (0.4)^2} = 0.6 \text{ percent}$$

An approximate 95-percent confidence interval for this difference is from -0.2 to 2.2 percent. Thus the difference in percent of persons in excellent health between the Northeast and the Midwest is not significant at the 0.05 level.

### Relative standard errors

Prior to 1985, relative standard error (RSE) curves were present in *Current estimates* for approximating relative standard errors. For readers who wish to continue using them, the following provides guidance. The RSE of an estimate is obtained by dividing the standard error (SE) of the estimate by the estimate  $x$  itself. This quantity is expressed as a percent of the estimate:

$$\text{RSE} = 100 \frac{\text{SE}(x)}{x}$$

*Example of a relative standard error.* In the example from rule 2, it was shown that the estimated rate of 867.4 restricted-activity days associated with acute conditions per 100 persons per year for black persons aged 18–44 years had an estimated standard error of 60.3 days. The relative standard error for the rate is

$$100 \frac{60.3}{867.4} = 7.0 \text{ percent}$$

## Appendix II

### Definitions of certain terms used in this report

#### Terms relating to conditions

**Condition**—Condition is a general term that includes any specific illness, injury, or impairment. Condition data are derived from the survey in two ways. First, respondents are asked to identify any conditions that caused certain types of impact associated with health, such as a visit to a doctor or a day spent in bed. Second, respondents are read lists of selected chronic conditions and asked whether they or any family members have any of these conditions.

At a later point in the survey, a series of questions is asked about each of the conditions identified in either of the two ways just described. The information obtained on each condition helps to clarify the nature of the condition and whether medical services have been involved in its diagnosis or treatment. It also aids in the coding of the condition. All conditions except impairments are coded according to the ninth revision of the *International Classification of Diseases* (2), with certain modifications adopted to make the codes more suitable for information derived from a household survey. A special set of codes devised by NHIS is used to code impairments.

**Chronic condition**—A condition is considered chronic if (a) the respondent indicates it was first noticed more than 3 months before the reference date of the interview, or (b) it is a type of condition that ordinarily has a duration of more than 3 months. Examples of conditions that are considered chronic regardless of their time of onset are diabetes, heart conditions, emphysema, and arthritis. A complete list of these conditions may be obtained by contacting the Division of Health Interview Statistics, National Center for Health Statistics.

**Impairment**—An impairment is a chronic or permanent defect, usually static in nature, that results from disease, injury, or congenital malformation. It represents a decrease in or loss of ability to perform various functions, particularly those of the musculoskeletal system and the sense organs. Impairments are grouped according to type of functional impairment and etiology in the special NHIS impairment codes.

**Acute condition**—A condition is considered acute if (a) it was first noticed no longer than 3 months before the reference date of the interview, and (b) it is not one of the conditions considered chronic regardless of the time of onset. (See definition of chronic condition.) However, any

acute condition not associated with either at least one doctor visit or at least one day of restricted activity during the reference period is considered to be of minor consequence and is excluded from the final data produced by the survey.

**Onset of condition**—A condition is considered to have had its onset when it was first noticed. This could be the time the person first felt sick or became injured, or it could be the time the person or family was first told by a physician that the person had a condition of which he or she had been previously unaware.

**Incidence of conditions**—The incidence of a condition is the number of cases that had their onset during a specified period of time. A person may have more than one acute condition during a period of time or may have the same condition, such as a headache, more than once. Ordinarily, however, a chronic condition can begin only one time during a given reference period.

**Prevalence of conditions**—The prevalence of a condition is the number of persons who have the condition at a given point in time. Although the prevalence of acute conditions is a meaningful concept, it is seldom used in health statistics, which generally focus on the incidence of acute conditions. If the prevalence of a chronic condition is measured during a period of time (say, each week during a year), then the resulting estimate of prevalence is an average of 52 weekly prevalence estimates. This is called an average annual point prevalence estimate.

#### Terms relating to disability

**Disability**—Disability is a general term that refers to any long- or short-term reduction of a person's activity as a result of an acute or chronic condition. **Limitation of activity** refers to a long-term reduction in a person's capacity to perform the average kind or amount of activities associated with his or her age group. **Restriction of activity** refers to particular kinds of behavior usually associated with a reduction in activity due to either long- or short-term conditions. Thus limitation of activity refers to what a person is generally capable of doing, but restriction of activity ordinarily refers to a relatively short-term reduction in a person's activities below his or her normal capacity.

**Limitation of activity because of chronic conditions**—Persons are classified in terms of the major activity

usually associated with their particular age group. The major activities for the age groups are (a) ordinary play for children under 5 years of age, (b) attending school for those 5–17 years of age, (c) working or keeping house for persons 18–69 years of age, and (d) capacity for independent living (e.g., the ability to bathe, shop, dress, eat, and so forth, without needing the help of another person) for those 70 years of age and over. People aged 18–69 years who are classified as keeping house are also classified by their ability to work at a job or business. (In this report, the major activity of persons 65–69 years is assumed to be working or keeping house; however, questions were also asked about the capacity for independent living in this age group, which would permit an alternative definition of limitation.)

In regard to these activities, each person is classified into one of four categories: (a) unable to perform the major activity, (b) able to perform the major activity but limited in the kind or amount of this activity, (c) not limited in the major activity but limited in the kind or amount of other activities, and (d) not limited in any way. In regard to these four categories, NHIS publications often classify persons only by whether they are limited (groups a–c) or not limited (group d). Persons are not classified as limited in activity unless one or more chronic conditions are reported as the cause of the activity limitation. If more than one condition is reported, the respondent is asked to identify the condition that is the major cause of the limitation.

**Restriction of activity**—Four types of restricted activity are measured in NHIS: *bed days*, *work-loss days* for currently employed persons 18 years of age and over, *school-loss days* for children 5–17 years of age, and *cut-down days*.

A *bed day* is one during which a person stayed in bed more than half a day because of illness or injury. All hospital days for inpatients are considered bed days even if the patient was not in bed more than half a day.

A *work-loss day* is one on which a currently employed person 18 years of age and over missed more than half a day from a job or business.

A *school-loss day* is one on which a student 5–17 years of age missed more than half a day from the school in which he or she was currently enrolled.

A *cut-down day* is a day on which a person cuts down for more than half a day on the things he or she usually does.

Work-loss, school-loss, and cut-down days refer to the short-term effects of illness or injury. However, bed days are a measure of both long- and short-term disability, because a chronically ill bedridden person and a person with a cold could both report having spent more than half a day in bed due to an illness.

The number of restricted-activity days is the number of days a person experienced at least one of the four types of activity restriction just described. It is the most inclusive measure of disability days and the least descriptive; 4 days of restricted activity may mean 4 bed days associated with

serious illness or 4 days during which a person merely cut down on his or her activities due to a mild illness.

A single restricted-activity day may involve both a bed day and a work-loss or school-loss day. However, a cut-down day cannot overlap with any of these three types of disability days. In calculating the sum of restricted-activity days, each day is counted only once even if more than one type of activity restriction was involved.

Restricted-activity days may be associated with either persons or conditions. *Person days* are the number of days during which a person restricted his or her activity. *Condition days* are the number of days during which a condition caused a person to restrict his or her activity. A person day of restricted activity can be caused by more than one condition. In such a case, each condition causing restriction is associated with that day of restricted activity. Therefore, the number of condition days of restricted activity may exceed the number of person days of restricted activity. This relationship holds for each type of restricted-activity day.

When two or more conditions cause a day of restricted activity, the conditions may be (a) both (all) acute, (b) one (some) acute and the other (some) chronic, or (c) both (all) chronic. The number of restricted-activity days associated with acute conditions includes groups (a) and (b); the number of such days associated with chronic conditions includes groups (b) and (c). The phrase "associated with" rather than "caused by" is used to indicate that some days associated with acute or chronic conditions are not necessarily caused solely by that type of condition.

**Assessed health status**—The categories related to this concept result from asking the respondent, "Would you say \_\_\_\_\_'s health is excellent, very good, good, fair, or poor?" As such, it is based on a respondent's opinion and not directly on any clinical evidence.

## Terms relating to persons injured

**Injury condition**—An injury condition, or simply an injury, is a condition of the type that is classified according to the nature-of-injury code numbers (800–999) in the ninth revision of the *International Classification of Diseases* (2). In addition to fractures, lacerations, contusions, burns, and so forth, which are commonly thought of as injuries, this group of codes includes poisonings and impairments caused by accidents or nonaccidental violence. Unless otherwise specified, the term injury is used to cover all of these.

A person may sustain more than one injury in a single accident (for instance, a broken leg and laceration of the scalp), so the number of injury conditions may exceed the number of persons injured.

Statistics of acute injury conditions include only injuries that involved medical attendance or at least a half day of restricted activity.

**Episodes of persons injured**—Each time a person is involved in an accident or nonaccidental violence causing

injury that results in medical attention or at least a half day of restricted activity, it is counted as a separate episode of a person injured. Therefore, one person may account for more than one episode of a person injured.

The number of episodes of persons injured is not equivalent to the number of accidents for several reasons: (a) the term "accident" as commonly used may not involve injury at all; (b) more than one injured person may be involved in a single accident, so the number of accidents resulting in injury would be less than the number of persons injured in accidents; and (c) the term "accident" ordinarily implies an accidental origin, whereas "persons injured" as used in the NHIS includes persons whose injuries resulted from certain nonaccidental violence.

The number of episodes of persons injured in a specified time interval is equal to or less than the incidence of injury conditions because a person may incur more than one injury in a single accident.

## Terms relating to accidents

*Motor vehicle*—A motor vehicle is any mechanically or electrically powered device, not operated on rails, on which or by which a person or property can be transported or drawn on a land highway. Any object being towed by a motor vehicle (such as a trailer, coaster, sled, or wagon) is considered a part of the motor vehicle. Devices used solely for moving persons or materials within the confines of a building and its premises are not counted as motor vehicles.

*Moving motor vehicle accident*—An accident is classified as "moving motor vehicle" if at least one of the motor vehicles involved in the accident was moving at the time of the accident. This category is divided into "traffic" and "nontraffic" accidents.

*Traffic moving motor vehicle accident*—An accident is in the "traffic" category if it occurred on a public street or highway. It is considered to have occurred on the highway if it occurred wholly on the highway, originated on the highway, terminated on the highway, or involved a vehicle partially on the highway. (See "street or highway.")

*Nontraffic moving motor vehicle accident*—The accident is in the "nontraffic" category if it occurred entirely in any place other than a public street or highway.

*Street or highway*—"Street or highway" means the entire width between property lines of a way or place, any part of which is open for use of the public as a matter of right or custom. This includes more than just the traveled part of the road. "Street or highway" includes the whole right-of-way. Public sidewalks are part of the street, but private driveways, private lanes, private alleys, and private sidewalks are *not* considered part of the street.

*Nonmoving motor vehicle accident*—If the motor vehicle was not moving at the time of the accident, the accident is considered a "nonmoving motor vehicle" accident and is classified in the "other accident" category. (See "other accident.")

*Accident while at work*—An accident is classified as "while at work" if the injured person was 18 years of age

or over and was at work at a job or business at the time the accident happened.

*Home accident*—An accident is classified as "home accident" if the injury occurred either inside or outside the house. "Outside the house" refers to the yard, building, and sidewalks on the property. "Home" includes not only the person's own home but also any other home in which the person may have been injured.

*Industrial place*—This category includes factory buildings, railway yards, warehouses, workshops, loading platforms of factories or stores, construction projects (houses, buildings, bridges, new roads, and the like), as well as buildings undergoing remodeling. However, accidents in private homes undergoing remodeling are classified as home accidents.

*Other accident*—This category includes injuries in public places (such as tripping and falling in a store or on a public sidewalk) and also nonaccidental injuries such as homicidal and suicidal attempts. The survey does not cover the military population, but current disability of various types resulting from prior injury that occurred while the person was in the armed forces is covered and is included in this class.

## Terms relating to physician contacts

*Physician contact*—A physician contact is defined as consultation with a physician, in person or by telephone, for examination, diagnosis, treatment, or advice. (Physician contacts with hospital inpatients are not included.) The contact is considered to be a physician contact if the service is provided directly by the physician or by a nurse or other person acting under a physician's supervision. For the purpose of this definition, "physician" includes doctors of medicine and osteopathic physicians. The term "doctor" is used in the interview rather than "physician" because of popular usage. However, the concept toward which all instructions are directed is that which is described here.

Physician contacts for services provided on a mass basis are not included in the tabulations. A service received on a mass basis is defined as any service involving only a single test (such as a test for diabetes) or a single procedure (such as a measles inoculation) when this single service is administered identically to all persons who are at the place for this purpose. Hence obtaining a chest x ray in a tuberculosis chest x-ray trailer is not included as a physician contact. However, a special chest x ray given in a physician's office or in an outpatient clinic is considered a physician contact.

If a physician is called to a house to see more than one person, the call is considered a separate physician contact for each person about whom the physician is consulted.

A physician contact is associated with the person about whom the advice is sought, even if that person does not actually see or consult the physician. For example, if a mother consults a physician about one of her children, the physician contact is ascribed to the child.

*Place of contact*—The place of contact is a classification of the type of place at which a physician contact took place. The definitions of the various categories are as follows:

*Telephone.* Refers to medically related matters discussed in a telephone call with a physician or physician's assistant. Calls for nonmedically related matters (such as for an appointment) are not included.

*Office.* Refers to physician offices that are not located in a hospital.

*Hospital.* Involves three types of places in a hospital: emergency room, clinic, and doctor's office.

*Other.* Any place not classified into one of the three categories specified above, including clinics and HMO's not located in hospitals.

*Interval since last physician contact*—The interval since the last physician contact is the length of time prior to the week of interview since a physician was last consulted in person or by telephone for treatment or advice of any type whatever. A physician contact with a hospital inpatient can be counted as the last time a physician was seen even though it is not included in the "physician contact" category.

## Terms relating to hospitalization

*Hospital*—For this survey, a hospital is defined as any institution either (a) named in the listing of hospitals in the current *American Hospital Association Guide to the Health Care Field* or (b) found on the Master Facility Inventory List maintained by the National Center for Health Statistics.

*Short-stay hospital*—A short-stay hospital is one in which the type of service provided is general; maternity; eye, ear, nose, and throat; children's; or osteopathic; or it may be the hospital department of an institution.

*Hospital day*—A hospital day is a day on which a person is confined to a hospital. It is counted as a hospital day only if the patient stays overnight. Thus a patient who enters the hospital on Monday afternoon and leaves Wednesday noon is considered to have had two hospital days.

*Hospital days during the year*—The number of hospital days during the year is the total number for all hospital episodes in the 12-month period prior to the interview week. For the purposes of this estimate, episodes overlapping the beginning or end of the 12-month period are subdivided so that only those days falling within the period are included.

*Hospital episode*—A hospital episode is any continuous period of stay of 1 night or more in a hospital as an inpatient except the period of stay of a well newborn infant. A hospital episode is recorded for a family member whenever any part of his hospital stay is included in the 12-month period prior to the interview week.

*Hospital discharge*—A hospital discharge is the completion of any continuous period of stay of 1 night or more in a hospital as an inpatient except the period of stay of a

well newborn infant. A hospital discharge is recorded whenever a present member of the household is reported to have been discharged from a hospital in the 12-month period prior to the interview week. (Estimates were based on discharges that occurred during the 6-month period prior to the interview.)

*Length of hospital stay*—The length of hospital stay is the duration in days, exclusive of the day of discharge, of a hospital discharge. (See "hospital discharge.")

*Average length of stay*—The average length of stay per discharged patient is computed by dividing the total number of hospital days for a specified group by the total number of discharges for that group.

## Demographic terms

*Age*—The age recorded for each person is the age at last birthday. Age is recorded in single years and grouped in a variety of distributions depending on the purpose of the table.

*Geographic region*—For the purpose of classifying the population by geographic area, the States are grouped into four regions. These regions, which correspond to those used by the U.S. Bureau of the Census, are as follows:

<i>Region</i>	<i>States included</i>
Northeast	Maine, Vermont, New Hampshire, Massachusetts, Connecticut, Rhode Island, New York, New Jersey, and Pennsylvania.
Midwest	Ohio, Illinois, Indiana, Michigan, Wisconsin, Minnesota, Iowa, Missouri, North Dakota, South Dakota, Kansas, and Nebraska.
South	Delaware, Maryland, District of Columbia, West Virginia, Virginia, Kentucky, Tennessee, North Carolina, South Carolina, Georgia, Florida, Alabama, Mississippi, Louisiana, Oklahoma, Arkansas, and Texas.
West	Washington, Oregon, California, Nevada, New Mexico, Arizona, Idaho, Utah, Colorado, Montana, Wyoming, Alaska, and Hawaii.

*Place of residence*—The place of residence of a member of the civilian noninstitutionalized population is classified as inside a metropolitan statistical area (MSA) or outside an MSA. Place of residence inside an MSA is further classified as either central city or not central city.

*Metropolitan statistical area*—The definition and titles of MSA's are established by the U.S. Office of Management and Budget with the advice of the Federal Committee on Metropolitan Statistical Areas. Generally speaking, an MSA consists of a county or group of counties containing at least one city (or twin cities) having a population of 50,000 or more plus adjacent counties that are metropolitan in character and are economically and socially

integrated with the central city. In New England, towns and cities rather than counties are the units used in defining MSA's. There is no limit to the number of adjacent counties included in the MSA as long as they are integrated with the central city, nor is an MSA limited to a single State; boundaries may cross State lines. The metropolitan population in this report is based on MSA's as defined in the 1980 census and does not include any subsequent additions or changes.

*Central city of an MSA*—The largest city in an MSA is always a central city. One or two additional cities may be secondary central cities in the MSA on the basis of either of the following criteria:

1. The additional city or cities must have a population one-third or more of that of the largest city and a minimum population of 25,000.
2. The additional city or cities must have at least 250,000 inhabitants.

*Not central city of an MSA*—This includes all of the MSA that is not part of the central city itself.

*Not in MSA*—This includes all other places in the country.

*Race*—The population is divided into three racial groups: "white," "black," and "all other." "All other" included Aleut, Eskimo or American Indian, Asian, or Pacific Islander, and any other races. Race characterization is based on the respondent's description of his or her racial background.

*Income of family or of unrelated individuals*—Each member of a family is classified according to the total income of the family of which he or she is a member. Within the household, all persons related to each other by blood, marriage, or adoption constitute a family. Unrelated individuals are classified according to their own incomes.

The income recorded is the total of all income received by members of the family (or by an unrelated individual) in the 12-month period preceding the week of interview. Income from all sources—for example, wages, salaries, rents from property, pensions, government payments, and help from relatives—is included.

*Currently employed*—Persons 18 years of age and over who reported that at any time during the 2-week period

covered by the interview they either worked at or had a job or business are currently employed. Current employment includes paid work as an employee of someone else; self-employment in business, farming, or professional practice; and unpaid work in a family business or farm. Persons who were temporarily absent from a job or business because of a temporary illness, vacation, strike, or bad weather are considered as currently employed if they expected to work as soon as the particular event causing the absence no longer existed.

Freelance workers are considered currently employed if they had a definite arrangement with one employer or more to work for pay according to a weekly or monthly schedule, either full time or part time.

Excluded from the currently employed population are persons who have no definite employment schedule but work only when their services are needed. Also excluded from the currently employed population are (a) persons receiving revenue from an enterprise but not participating in its operation, (b) persons doing housework or charity work for which they received no pay, (c) seasonal workers during the portion of the year they were not working, and (d) persons who were not working, even though having a job or business, but were on layoff and looking for work.

The number of currently employed persons estimated from the NHIS will differ from the estimates prepared from the Current Population Survey (CPS) of the U.S. Bureau of the Census for several reasons. In addition to sampling variability they include three primary conceptual differences, namely:

1. NHIS estimates are for persons 18 years of age and over; CPS estimates are for persons 16 years of age and over.
2. NHIS uses a 2-week reference period, while CPS uses a 1-week reference period.
3. NHIS is a continuing survey with separate samples taken weekly; CPS is a monthly sample taken for the survey week which includes the 12th of the month.

The most detailed operational definitions of all of these terms are found in the *NHIS Interviewer's Manual* (16). Instructions are given in the manual on how problem cases associated with each concept are to be handled.

A. HOUSEHOLD COMPOSITION PAGE

1a. What are the names of all persons living or staying here? Start with the name of the person or one of the persons who owns or rents this home. Enter name in REFERENCE PERSON column.

b. What are the names of all other persons living or staying here? Enter names in columns.

c. I have listed (read names). Have I missed:

- any babies or small children? .....
- any lodgers, boarders, or persons you employ who live here? .....
- anyone who USUALLY lives here but is now away from home traveling or in a hospital? .....
- anyone else staying here? .....

If "Yes," enter names in columns	
Yes	No
<input type="checkbox"/>	<input type="checkbox"/>

d. Do all of the persons you have named usually live here?

Yes (2)

No (APPLY HOUSEHOLD MEMBERSHIP RULES. Delete nonhousehold members by an "X" from 1-C2 and enter reason.)

Probe if necessary:

Does -- usually live somewhere else?

Ask for all persons beginning with column 2:

2. What is -- relationship to (reference person)?

3. What is -- date of birth? (Enter date and age and mark sex.)

REFERENCE PERIODS

A1 2-WEEK PERIOD

A1 12-MONTH DATE

A1 13-MONTH HOSPITAL DATE

A2 ASK CONDITION LIST \_\_\_\_\_.

A3 Refer to ages of all related HH members.

1.	First name	Mid. init.	Age
	Last name	Sex	1 <input type="checkbox"/> M 2 <input type="checkbox"/> F

2. Relationship REFERENCE PERSON

3.	Date of birth	Month	Date	Year
C1	HOSP.	WORK	RD	2-WK. DV
	00 <input type="checkbox"/> None	1 <input type="checkbox"/> Wa	1 <input type="checkbox"/> Yes	00 <input type="checkbox"/> None
	2 <input type="checkbox"/> Wb	2 <input type="checkbox"/> No		Number

C2 LA - IRA - DV INJ. CL LTR HS COND.

LA - IRA - DV INJ. CL LTR HS COND.

LA - IRA - DV INJ. CL LTR HS COND.

LA - IRA - DV INJ. CL LTR HS COND.

LA - IRA - DV INJ. CL LTR HS COND.

A3  All persons 65 and over (5)  
 Other (4)

4a. Are any of the persons in this family now on full-time active duty with the armed forces?  Yes  No (5)

b. Who is this? Delete column number(s) \_\_\_\_\_ by an "X" from 1-C2.

c. Anyone else?  Yes (Reask 4b and c)  No

Ask for each person in armed forces:

d. Where does -- usually live and sleep, here or somewhere else? Mark box in person's column.

4d.  Living at home  
 Not living at home

If related persons 17 and over are listed in addition to the respondent and are not present, say:  
5. We would like to have all adult family members who are at home take part in the interview. Are (names of persons 17 and over) at home now? If "Yes," ask: Could they join us? (Allow time)

Read to respondent(s):

This survey is being conducted to collect information on the nation's health. I will ask about hospitalizations, disability, visits to doctors, illness in the family, and other health related items.

HOSPITAL PROBE

6a. Since (13-month hospital date) a year ago, was -- a patient in a hospital OVERNIGHT?

6a. 1  Yes  
2  No (Mark "HOSP." box, THEN NP)

b. How many different times did -- stay in any hospital overnight or longer since (13-month hospital date) a year ago?

b. Number of times } (Make entry in "HOSP." box THEN NP)

Ask for each child under one:

7a. Was -- born in a hospital?

7a. 1  Yes  
2  No (NP)

Ask for mother and child:

b. Have you included this hospitalization in the number you gave me for --?

b.  Yes (NP)  
 No (Correct 6 and "HOSP." box)

FORM HIS-1 (1991) (8-27-90)

**D. RESTRICTED ACTIVITY PAGE PERSON 1**

Hand calendar.

{The next questions refer to the 2 weeks outlined in red on that calendar, beginning Monday, (date) and ending this past Sunday (date).}

**D1**

Refer to age.

Under 5 (4)     5-17 (3)     18 and over (1)

**1a.** DURING THOSE 2 WEEKS, did — work at any time at a job or business not counting work around the house? (Include unpaid work in the family [farm/business].)

1  Yes (Mark "Wa" box, THEN 2)    2  No

**b.** Even though — did not work during those 2 weeks, did — have a job or business?

1  Yes (Mark "Wb" box, THEN 2)    2  No (4)

**2a.** During those 2 weeks, did — miss any time from a job or business because of illness or injury?

Yes     No (4)

**b.** During that 2-week period, how many days did — miss more than half of the day from — job or business because of illness or injury?

None (4)    No. of work-loss days (4)

**3a.** During those 2 weeks, did — miss any time from school because of illness or injury?

Yes     No (4)

**b.** During that 2-week period, how many days did — miss more than half of the day from school because of illness or injury?

None    No. of school-loss days

**4a.** During those 2 weeks, did — stay in bed because of illness or injury?

Yes     No (6)

**b.** During that 2-week period, how many days did — stay in bed more than half of the day because of illness or injury?

None (6)    No. of bed days (D2)

**D2**

Refer to 2b and 3b.

No days in 2b or 3b (6)  
 1 or more days in 2b or 3b (5)

**5.** On how many of the (number in 2b or 3b) days missed from [work/school] did — stay in bed more than half of the day because of illness or injury?

None

No. of days

Refer to 2b, 3b, and 4b.

**6a.** (Not counting the day(s) missed from work missed from school (and) in bed ),

Was there any (OTHER) time during those 2 weeks that — cut down on the things — usually does because of illness or injury?

Yes

No (D3)

**b.** (Again, not counting the day(s) missed from work missed from school (and) in bed ),

During that period, how many (OTHER) days did — cut down for more than half of the day because of illness or injury?

None

No. of cut-down days

**D3**

Refer to 2-6.

No days in 2-6 (Mark "No" in RD, THEN NP)  
 1 or more days in 2-6 (Mark "Yes" in RD, THEN 7)

Refer to 2b, 3b, 4b, and 6b.

**7a.** What (other) condition caused — to miss work miss school (or) stay in bed (or) cut down during those 2 weeks?

(Enter condition in C2, THEN 7b)

**b.** Did any other condition cause — to miss work miss school (or) stay in bed (or) cut down during that period?

1  Yes (Reask 7a and b)

2  No

FOOTNOTES

**E. 2-WEEK DOCTOR VISITS PROBE PAGE**

*Read to respondent(s):*

**These next questions are about health care received during the 2 weeks outlined in red on that calendar.**

**E1** Refer to age.

**E1**  Under 14 (1b)  
 14 and over (1a)

**1a.** During those 2 weeks, how many times did —— see or talk to a medical doctor? {Include all types of doctors, such as dermatologists, psychiatrists, and ophthalmologists, as well as general practitioners and osteopaths.} (Do not count times while an overnight patient in a hospital.)

**1a. and b.**  None  
Number of times } (NP)

**b.** During those 2 weeks, how many times did anyone see or talk to a medical doctor about ——? (Do not count times while an overnight patient in a hospital.)

**2a.** (Besides the time(s) you just told me about) During those 2 weeks, did anyone in the family receive health care at home or go to a doctor's office, clinic, hospital or some other place? Include care from a nurse or anyone working with or for a medical doctor. Do not count times while an overnight patient in a hospital.

Yes       No (3a)

**b. Who received this care?** Mark "DR Visit" box in person's column.

**2b.**  DR Visit

**c. Anyone else?**

Yes (Reask 2b and c)     No

Ask for each person with "DR Visit" in 2b:

**d. How many times did —— receive this care during that period?**

**d.** Number of times

**3a.** (Besides the time(s) you already told me about) During those 2 weeks, did anyone in the family get any medical advice, prescriptions or test results over the PHONE from a doctor, nurse, or anyone working with or for a medical doctor?

Yes       No (E2)

**b. Who was the phone call about?** Mark "Phone call" box in person's column.

**3b.**  Phone call

**c. Were there any calls about anyone else?**

Yes (Reask 3b and c)     No

Ask for each person with "Phone call" in 3b:

**d. How many telephone calls were made about ——?**

**d.** Number of calls

**E2** Add numbers in 1, 2d, and 3d for each person. Record total number of visits and calls in "2-WK. DV" box in item C1.

FOOTNOTES

**F. 2-WEEK DOCTOR VISITS PAGE**

Refer to C1, "2-WK. DV" box.

**F1** Refer to age.

- 1 a. On what (other) date(s) during those 2 weeks did — see or talk to a medical doctor, nurse, or doctor's assistant?  
 b. On what (other) date(s) during those 2 weeks did anyone see or talk to a medical doctor, nurse, or doctor's assistant about —? Ask after last DR visit column for this person:  
 c. Were there any other visits or calls for — during that period? Make necessary correction to 2-Wk. DV box in C1.

2. Where did — receive health care on (*date in 1*), at a doctor's office, clinic, hospital, some other place, or was this a telephone call?

If doctor's office: Was this office in a hospital?

If hospital: Was it the outpatient clinic or the emergency room?

If clinic: Was it a hospital outpatient clinic, a company clinic, a public health clinic, or some other kind of clinic?

If lab: Was this lab in a hospital?

What was done during this visit? (Footnote)

Ask 3b if under 14.

- 3a. Did — actually talk to a medical doctor?  
 b. Did anyone actually talk to a medical doctor about —?  
 c. What type of medical person or assistant was talked to?

- d. Does the (*entry in 3c*) work with or for ONE doctor or MORE than one doctor?

- e. For this [visit/call] what kind of doctor was the (*entry in 3c*) working with or for — a general practitioner or a specialist?

- f. Is that doctor a general practitioner or a specialist?

- g. What kind of specialist?

Ask 4b if under 14.

- 4a. For what condition did — see or talk to the [doctor]/(*entry in 3c*)/on (*date in 1*)? Mark first appropriate box.  
 b. For what condition did anyone see or talk to the [doctor]/(*entry in 3c*) about — on (*date in 1*)? Mark first appropriate box.

- c. Was a condition found as a result of the [test(s)/examination]?

- d. Was this [test/examination] because of a specific condition — had?

- e. During the past 2 weeks was — sick because of her pregnancy?

- f. What was the matter?

- g. During this [visit/call] was the [doctor]/(*entry in 3c*) talked to about any (other) condition?

- h. What was the condition?

Mark box if "Telephone" in 2.

- 5a. Did — have any kind of surgery or operation during this visit, including bone settings and stitches?  
 b. What was the name of the surgery or operation? If name of operation not known, describe what was done.  
 c. Was there any other surgery or operation during this visit?

Go to next DV if "Home" in 2.

6. In what city (town), county, and State is the (*place in 2*) located?

**DR VISIT 1**

**PERSON NUMBER** \_\_\_\_\_

**F1**  Under 14 (1b)  
 14 and over (1a)

FORM HIS-1 (1991) 8-27-80

### G. HEALTH INDICATOR PAGE

**1a.** During the 2-week period outlined in red on that calendar, has anyone in the family had an injury from an accident or other cause that you have not yet told me about?

Yes       No (2)

**b.** Who was this? Mark "Injury" box in person's column.

**1b.**  Injury

**c.** What was —— injury?

**c.**

Enter injury(ies) in person's column.

Injury

**d.** Did anyone have any other injuries during that period?

Yes (Reask 1b, c, and d)       No

Ask for each injury in 1c:

**e.**  Yes (Enter injury in C2, THEN 1e for next injury)  
 No (1e for next injury)

**2.** During the past 12 months, {that is, since (12-month date) a year ago} ABOUT how many days did illness or injury keep —— in bed more than half of the day? (Include days while an overnight patient in a hospital.)

**2.** 000  None

No. of days

**3a.** During the past 12 months, ABOUT how many times did [—/anyone] see or talk to a medical doctor or assistant (about ——)? (Do not count doctors seen while an overnight patient in a hospital.) (Include the (number in 2-WK DV box) visit(s) you already told me about.)

**3a.** 000  None (3b)  
000  Only when overnight patient in hospital } (NP)

No. of visits

**b.** About how long has it been since [—/anyone] last saw or talked to a medical doctor or assistant (about ——)? Include doctors seen while a patient in a hospital.

- 1  Interview week (Reask 3b)  
2  Less than 1 yr. (Reask 3a)  
3  1 yr., less than 2 yrs.  
4  2 yrs., less than 5 yrs.  
5  5 yrs. or more  
0  Never

**4.** Would you say —— health in general is excellent, very good, good, fair, or poor?

**4.** 1  Excellent      4  Fair  
2  Very good      5  Poor  
3  Good

Mark box if under 18.

**5a.** About how tall is —— without shoes?

**5a.**  Under 18 (NP)

Feet      Inches

**b.** About how much does —— weigh without shoes?

**b.** Pounds

Refer to the first part of the sample person selection label and circle as applicable. THEN, mark the "SP" box in the column above for the selected sample person 18+. NEXT, mark the "SP" box on the HIS-1 for this person, THEN, go to 12.

#### SAMPLE CHILD LIST

12. Are there any nondelated persons under 18 years old in this family?  Yes (List by age, oldest to youngest)  
 No (Section A)

Line No.	Person No.	3-4	5-6	7	Sex	Last name	First name	8	9
								SC	List No.
1					1 <input type="checkbox"/> M 2 <input type="checkbox"/> F			1 <input type="checkbox"/>	2
2					1 <input type="checkbox"/> M 2 <input type="checkbox"/> F			1 <input type="checkbox"/>	2
3					1 <input type="checkbox"/> M 2 <input type="checkbox"/> F			1 <input type="checkbox"/>	2
4					1 <input type="checkbox"/> M 2 <input type="checkbox"/> F			1 <input type="checkbox"/>	2
5					1 <input type="checkbox"/> M 2 <input type="checkbox"/> F			1 <input type="checkbox"/>	2
6					1 <input type="checkbox"/> M 2 <input type="checkbox"/> F			1 <input type="checkbox"/>	2
7					1 <input type="checkbox"/> M 2 <input type="checkbox"/> F			1 <input type="checkbox"/>	2
8					1 <input type="checkbox"/> M 2 <input type="checkbox"/> F			1 <input type="checkbox"/>	2
9					1 <input type="checkbox"/> M 2 <input type="checkbox"/> F			1 <input type="checkbox"/>	2

Refer to the second part of the sample person selection label and circle as applicable. THEN, mark the "SC" box in the column above for the selected sample child under 18. NEXT, mark the "SP" box on the HIS-1 for this person, THEN, go to Section A.

Notes

Complete final status and transcription items on back pages

**Section A -- HEARING****PERSON 1**

5

Now I'm going to ask some questions about hearing problems. Please tell me if anyone has these problems, even if you have mentioned them before.

- 1a.** Does anyone in the family NOW have deafness in one or both ears?

- 1  Yes  
2  No  
9  DK } (2)

- b.** Who is this?  
Mark "Deafness" box in person's column.

- 1  Deafness

- c.** Anyone else?

- 1  Yes (Reask 1b and c)  
2  No

- 2a.** Does anyone in the family NOW have any other trouble hearing with one or both ears?

- 1  Yes  
2  No  
9  DK } (3)

- b.** Who is this?  
Mark "Trouble hearing" box in person's column.

- 1  Trouble hearing  
1  Yes (Reask 2b and c)  
2  No

- c.** Anyone else?

- 3a.** Does anyone in the family NOW use a hearing aid?

- 1  Yes  
2  No  
9  DK } (A1)

- b.** Who is this?  
Mark "Hearing aid" box in person's column.

- 1  Hearing aid  
1  Yes (Reask 3b and c)  
2  No

- c.** Does anyone else NOW use a hearing aid?

11

9

10

12

13

14

**ITEM A1**

Mark first appropriate box:

- A1 1  1b, 2b, OR 3b marked for one or more people in family (A2)  
2  Others (Section B)

**ITEM A2**

Refer to 1-3. Mark first appropriate box.

- A2 1  "Deafness" in 1b  
2  "Trouble hearing" in 2b  
3  "Hearing aid" in 3b  
4  All three blank (NP)

Include parenthetical if "Hearing aid" marked in 3b.

- 4a.** Which statement best describes -- hearing in -- LEFT ear (without a hearing aid) -- good, a little trouble, a lot of trouble, or deaf?

- 4a. 1  Good  
2  Little trouble  
3  Lot of trouble  
4  Deaf  
9  DK

- b.** Which statement best describes -- hearing in -- RIGHT ear (without a hearing aid) -- good, a little trouble, a lot of trouble, or deaf?

- b. 1  Good  
2  Little trouble  
3  Lot of trouble  
4  Deaf  
9  DK

Mark box or ask:

- 5a.** (Without a hearing aid) Can -- usually HEAR AND UNDERSTAND what a person says without seeing his face if that person WHISPERS to -- from across a quiet room?

- 5a. 0  Under 3 (7)  
1  Yes (6a)  
2  No  
9  DK

- b.** (Without a hearing aid) Can -- usually HEAR AND UNDERSTAND what a person says without seeing his face if that person TALKS IN A NORMAL VOICE to -- from across a quiet room?

- b. 1  Yes (6a)  
2  No  
9  DK

- c.** (Without a hearing aid) Can -- usually HEAR AND UNDERSTAND what a person says without seeing his face if that person SHOUTS to -- from across a quiet room?

- c. 1  Yes (6b)  
2  No  
9  DK

- d.** (Without a hearing aid) Can -- usually HEAR AND UNDERSTAND what a person says without seeing his face if that person SPEAKS LOUDLY into -- better ear?

- d. 1  Yes  
2  No  
9  DK } (6b)

Section B -- UNINTENTIONAL INJURIES -- Continued		PERSON 1
3a. Where did --- head injury happen? <span style="float: right;">19</span>		
<p>3a.</p> <p>1 <input type="checkbox"/> At home (inside house or adjacent premises)      2 <input type="checkbox"/> Street or highway (includes roadway and public sidewalks)      3 <input type="checkbox"/> Industrial place (includes premises)      4 <input type="checkbox"/> School (includes premises)      5 <input type="checkbox"/> Place of recreation and sports, except at school      8 <input type="checkbox"/> Other      9 <input type="checkbox"/> DK</p>		
b. Was --- at work at --- job or business when this head injury occurred? <span style="float: right;">20</span>		
<p>b.</p> <p>1 <input type="checkbox"/> Yes      2 <input type="checkbox"/> No      9 <input type="checkbox"/> DK</p>		
c. What was the cause of this head injury? <span style="float: right;">21</span>		
<p>c.</p> <p>1 <input type="checkbox"/> Motor vehicle accident      2 <input type="checkbox"/> Other accident - <i>Specify</i> ↓      _____      3 <input type="checkbox"/> Assault (Item B2)      4 <input type="checkbox"/> Other non-accident - <i>Specify</i> ↓      _____      9 <input type="checkbox"/> DK</p>		
d. At the time of the head injury, was --- playing sports or engaged in some other physical activity or exercise? <span style="float: right;">22</span>		
<p>d.</p> <p>1 <input type="checkbox"/> Playing sports      2 <input type="checkbox"/> Other physical activity - <i>Specify</i> ↓      _____      3 <input type="checkbox"/> Not playing sports or other physical activity      9 <input type="checkbox"/> DK</p>		
<b>ITEM B2</b>	Refer to age	B2. <span style="float: right;">23</span>
<p>4a. During the past 12 months, has --- fallen? <span style="float: right;">24</span></p>		
<p>4a.</p> <p>1 <input type="checkbox"/> Yes (4b)      2 <input type="checkbox"/> No } (Item B1 for NP)      9 <input type="checkbox"/> DK }</p>		
b. How many times? <span style="float: right;">25</span>		
<p>b.</p> <p>_____ Times (Number)      9 <input type="checkbox"/> DK</p>		
c. Did --- break --- hip as a result of [this/any of these] fall(s)? <span style="float: right;">26</span>		
<p>c.</p> <p>1 <input type="checkbox"/> Yes (Item B1 for NP)      2 <input type="checkbox"/> No } (4d)      9 <input type="checkbox"/> DK }</p>		
d. [Did this fall result/how many of these falls resulted] in an injury where --- had to cut down for more than half of the day on the things --- usually does? <span style="float: right;">27</span>		
<p>d.</p> <p>0 <input type="checkbox"/> No/None      _____ Fall(s) (Number)      9 <input type="checkbox"/> DK</p>		
e. (For how many of these falls) Did --- receive medical care? <span style="float: right;">28</span>		
<p>e.</p> <p>0 <input type="checkbox"/> No/None } (Item B1 for NP)      _____ Fall(s) (Number)      9 <input type="checkbox"/> DK }</p>		

## Section C – PREGNANCY AND SMOKING

<b>ITEM C1</b>	a. Refer to age and sex on Household Composition Page.	<b>C1</b>	1 <input type="checkbox"/> Female(s) 18–49 in family (C1b)	5
	b. Mark appropriate box in each person's column.		2 <input type="checkbox"/> No female 18–49 in family (Section D)	
	c. Enter name of eligible female.		b. <input type="checkbox"/> Female 18–49 (C1c) <input type="checkbox"/> Other (NP)	
	d. Enter person number of respondent.		c. Enter name, then C1b for NP	
The next questions refer to pregnancy, breastfeeding, and smoking and are asked of women aged 18–49. In this family, the questions refer to (read names).		<b>1a.</b>	Person No. of Resp. _____	6-7
1a. Have any of these women given birth to a live born infant in the past 5 years?			1 <input type="checkbox"/> Yes 2 <input type="checkbox"/> No 9 <input type="checkbox"/> Dk } (Section D)	8
b. Who is this? Mark box in person's column.		<b>b.</b>	1 <input type="checkbox"/> Child in the past 5 years	9
c. Anyone else? <input type="checkbox"/> Yes (Reask 1b and c) <input type="checkbox"/> No (Item C2)				
<b>ITEM C2</b>	a. Refer to 1b.	<b>C2</b>	1 <input type="checkbox"/> Box marked in 1b (C2b) 2 <input type="checkbox"/> Other (NP or Section D)	10
	b. Mark first appropriate box.		b. 1 <input type="checkbox"/> Available (2) 2 <input type="checkbox"/> Callback required (Arrange, THEN NP or Section D) 3 <input type="checkbox"/> Noninterview (Back Cover, THEN NP or Section D)	11
(Earlier I was told that you have had a baby in the past 5 years.) These questions are about breastfeeding, pregnancy, and smoking.		<b>2a.</b>	_____/19 ____ Month Year	12-15
2a. In what month and year was your last child born?		<b>b.</b>	1 <input type="checkbox"/> Yes (2c) 2 <input type="checkbox"/> No } (3) 9 <input type="checkbox"/> DK } (2e)	16
b. Did you ever breastfeed this child?		<b>c.</b>	1 <input type="checkbox"/> Yes (2d) 2 <input type="checkbox"/> No } (2e)	17
c. Was there a period of one day or more when your breast milk was the child's ONLY food?		<b>d.</b>	ooo <input type="checkbox"/> Still only breast milk (3)  (Number)      { 1 <input type="checkbox"/> Days 999 <input type="checkbox"/> DK      2 <input type="checkbox"/> Weeks 3 <input type="checkbox"/> Months 4 <input type="checkbox"/> Years	18-20
d. For how long was this child fed ONLY breast milk?		<b>e.</b>	ooo <input type="checkbox"/> Still breastfeeding  (Number)      { 1 <input type="checkbox"/> Days 999 <input type="checkbox"/> DK      2 <input type="checkbox"/> Weeks 3 <input type="checkbox"/> Months 4 <input type="checkbox"/> Years	21-23
e. How old was this child when he or she COMPLETELY stopped breastfeeding?				
3. Have you smoked at least 100 cigarettes in your entire life?		<b>3.</b>	1 <input type="checkbox"/> Yes (Mark "Sm" box, THEN 4) 2 <input type="checkbox"/> No } (Mark "Sm" box, THEN 3 <input type="checkbox"/> DK } C2 for NP or Section D)	24
4. Around this time LAST YEAR, were you smoking cigarettes every day, some days, or not at all?		<b>4.</b>	1 <input type="checkbox"/> Every day 2 <input type="checkbox"/> Some days 3 <input type="checkbox"/> Not at all 9 <input type="checkbox"/> DK	25
5. Do you smoke cigarettes now?		<b>5.</b>	1 <input type="checkbox"/> Yes (6) 2 <input type="checkbox"/> No (7)	26
6. Do you now smoke cigarettes every day or some days?		<b>6.</b>	1 <input type="checkbox"/> Every day (8) 2 <input type="checkbox"/> Some days (15)	27
7. Do you now smoke cigarettes some days or not at all?		<b>7.</b>	1 <input type="checkbox"/> Some days (15) 2 <input type="checkbox"/> Not at all (C3)	28
8. On the average, how many cigarettes do you now smoke a day?		<b>8.</b>	Cigarettes a day (Number)      } (9) 99 <input type="checkbox"/> DK	29-30

Section C — PREGNANCY AND SMOKING — Continued			PERSON 1
<b>ITEM C3</b>	Refer to question 4.	C3	31 1 <input type="checkbox"/> "Every day" in 4 (11) 8 <input type="checkbox"/> Other in 4 (17)
9. Have you EVER quit smoking for one day or longer?		9.	32 1 <input type="checkbox"/> Yes (10) 2 <input type="checkbox"/> No } (20) 9 <input type="checkbox"/> DK }
10. During the past 12 months, have you quit smoking for one day or longer?		10.	33 1 <input type="checkbox"/> Yes (11) 2 <input type="checkbox"/> No } (12) 9 <input type="checkbox"/> DK }
11. How many times during the past 12 months have you quit smoking for one day or longer?		11.	34-35 ____ Times (Number) 99 <input type="checkbox"/> DK
Hand Card C1. Read answer categories if telephone interview.			
12. Thinking about the most recent time you stopped smoking, which of the following describes why you stopped?  Mark all that apply.		12.	36 1 <input type="checkbox"/> I quit on purpose 2 <input type="checkbox"/> I could not smoke because I was sick 3 <input type="checkbox"/> I could not smoke for some other reason 9 <input type="checkbox"/> DK
<b>ITEM C4</b>	Refer to questions 6 and 7.	C4	37 1 <input type="checkbox"/> "Every day" in 6 (13) 2 <input type="checkbox"/> "Not at all" in 7 (18)
13a. How long ago was the START of your MOST RECENT quit attempt that lasted for one day or longer?		13a.	41-44 ____/19____ (14) Month Year 45-47 OR (Number) { 1 <input type="checkbox"/> Days ago (14) 2 <input type="checkbox"/> Weeks ago (14) 3 <input type="checkbox"/> Months ago 4 <input type="checkbox"/> Years ago }  If one year or 12 months ago, go to 13b, otherwise go to 14  999 <input type="checkbox"/> DK (13b)
b. Was it within the past year or a year or more ago?		b.	48 1 <input type="checkbox"/> Within the past year 2 <input type="checkbox"/> 1 year or more 9 <input type="checkbox"/> DK
14. How long did you actually stay off cigarettes that time before you started smoking again?		14.	49-51 ____ (Number) { 1 <input type="checkbox"/> Days 2 <input type="checkbox"/> Weeks 3 <input type="checkbox"/> Months 4 <input type="checkbox"/> Years } (20)  999 <input type="checkbox"/> DK (20)
15. On how many of the past 30 days did you smoke cigarettes?		15.	52-53 00 <input type="checkbox"/> None (C5) ____ Days (Number) } (16) 99 <input type="checkbox"/> DK
16. On the average, when you smoked, how many cigarettes did you smoke a day?		16.	54-55 Cigarettes a day ____ (Number) 99 <input type="checkbox"/> DK
<b>ITEM C5</b>	Refer to question 4.	C5	56 1 <input type="checkbox"/> "Every day" in 4 (18) 8 <input type="checkbox"/> Other in 4 (17)
17. Have you EVER smoked cigarettes every day?		17.	57 1 <input type="checkbox"/> Yes (18) 2 <input type="checkbox"/> No } (20) 9 <input type="checkbox"/> DK }

Section C — PREGNANCY AND SMOKING — Continued		PERSON 1
18a. About how long has it been since you last smoked cigarettes every day?	18a.	<p style="text-align: right;">58–60</p> <p>(Number) <math>\left\{ \begin{array}{l} 1 \square \text{Days} \\ 2 \square \text{Weeks} \\ 3 \square \text{Months} \\ 4 \square \text{Years} \end{array} \right\} (19)</math></p> <p>If 1 year or 12 months ago go to 18b, otherwise go to 19</p> <p>999 <input type="checkbox"/> DK</p>
b. Was it within the past year or a year or more ago?	b.	<p style="text-align: right;">61</p> <p><input type="checkbox"/> Within the past year  <input type="checkbox"/> 1 year or more  <input type="checkbox"/> DK</p>
19. On the average, how many cigarettes did you smoke a day when you last smoked every day?	19.	<p style="text-align: right;">62–63</p> <p>Cigarettes a day (Number) 99 <input type="checkbox"/> DK</p>
<p>Now, I will ask you some questions about smoking during your last pregnancy.</p> <p>20. Were you smoking cigarettes when you became pregnant with your last child?</p>		
21. Did you smoke cigarettes at any time during your pregnancy with your last child?	21.	<p style="text-align: right;">65</p> <p><input type="checkbox"/> Yes (C6)  <input type="checkbox"/> No (C7)  <input type="checkbox"/> DK</p>
<b>ITEM C6</b>	Refer to question 9.	
22. Did you quit smoking for 7 days or longer during your pregnancy with your last child?	22.	<p style="text-align: right;">67</p> <p><input type="checkbox"/> Yes (23)  <input type="checkbox"/> No (C7)  <input type="checkbox"/> DK</p>
23. In what month of your pregnancy did you FIRST quit for 7 days or longer?	23.	<p style="text-align: right;">68–69</p> <p>Month (Number) 99 <input type="checkbox"/> DK</p>
24. Did you start smoking again during that pregnancy or did you stay off cigarettes for the rest of the pregnancy?	24.	<p style="text-align: right;">70</p> <p><input type="checkbox"/> Stayed off rest of pregnancy (30)  <input type="checkbox"/> Started again (25)  <input type="checkbox"/> Never started again (C7)  <input type="checkbox"/> DK (30)</p>
25. How long did you actually stay off cigarettes that time before you started smoking again?	25.	<p style="text-align: right;">71–73</p> <p>(Number) <math>\left\{ \begin{array}{l} 1 \square \text{Days} \\ 2 \square \text{Weeks} \\ 3 \square \text{Months} \\ 4 \square \text{Years} \end{array} \right\}</math> 999 <input type="checkbox"/> DK</p>
26. Did you quit smoking for 7 days or longer at any other time during that pregnancy?	26.	<p style="text-align: right;">74</p> <p><input type="checkbox"/> Yes (27)  <input type="checkbox"/> No (C7)  <input type="checkbox"/> DK</p>
27. Did you START smoking again during that pregnancy or did you stay off cigarettes for the rest of the pregnancy?	27.	<p style="text-align: right;">75</p> <p><input type="checkbox"/> Stayed off rest of pregnancy (30)  <input type="checkbox"/> Started again (28)  <input type="checkbox"/> Never started again (C7)  <input type="checkbox"/> DK (30)</p>
28. In what month of that pregnancy did your MOST RECENT quit attempt begin?	28.	<p style="text-align: right;">76–77</p> <p>Month (Number) 99 <input type="checkbox"/> DK</p>
29. How long did you actually stay off cigarettes that time before you started smoking again?	29.	<p style="text-align: right;">78–80</p> <p>(Number) <math>\left\{ \begin{array}{l} 1 \square \text{Days} \\ 2 \square \text{Weeks} \\ 3 \square \text{Months} \\ 4 \square \text{Years} \end{array} \right\} (C7)</math> 999 <input type="checkbox"/> DK (C7)</p>
30. Did you start smoking cigarettes again at any time after your baby was born?	30.	<p style="text-align: right;">81</p> <p><input type="checkbox"/> Yes (31)  <input type="checkbox"/> No (C7)  <input type="checkbox"/> DK</p>

---

## Notes

## Section D – CHILD HEALTH

<b>ITEM D1</b>	Refer to household composition.	<input type="checkbox"/> Child under 18 in family (D2) <input type="checkbox"/> No child under 18 in family (Section E)																																																	
<b>ITEM D2</b>	Enter person number, first name, and age of sample child under 18.	Person number _____ First name _____ Age _____	3-4																																																
<b>ITEM D3</b>	Enter person number of respondent.	Person number _____	5-6																																																
<b>ITEM D3</b>	Refer to age.	1 <input type="checkbox"/> Under 6 (Intro above D4) 2 <input type="checkbox"/> 6-17 (D5)	7

<b>41. Do you now use chewing tobacco "not at all" or "some days"?</b>	76 1 <input type="checkbox"/> Not at all 2 <input type="checkbox"/> Some days

Notes

## Section G — NUTRITION

These next questions are about weight control and nutrition.

- 1. Do you consider yourself overweight, underweight, or just about right?**

- 1  Overweight  
2  Underweight  
3  Just about right

- 2. Are you now trying to lose weight, gain weight, stay about the same, or are you not trying to do anything about your weight?**

- 1  Lose weight (3)  
2  Gain weight (4)  
3  Stay about the same (3)  
4  Not trying to do anything (4)

- Hand Card G1. Read each category if telephone interview.*  
**3. Are you currently doing any of these things to control your weight?**

*Mark each that applies.*

- 01  Joined a weight loss program  
02  Eating fewer calories  
03  Eating special products, such as canned or powdered food supplements  
04  Exercising more  
05  Fasting for 24 hours or longer  
06  Skipping meals  
07  Taking diet pills  
08  Taking laxatives  
09  Taking water pills or diuretics  
10  Vomiting  
98  Something else — *Specify* \_\_\_\_\_  
00  Nothing

- 4a. About how tall are you without shoes?**

(Feet) (Inches)

- b. About how much do you weigh without shoes?**

(Pounds)

- 5a. How often do you or the person who shops for your food buy items that are labelled "low salt" or "low sodium" — would you say always, often, sometimes, rarely or never?**

- 1  Always  
2  Often  
3  Sometimes  
4  Rarely  
5  Never  
9  DK

- b. How often do you add salt to your food at the table — would you say always, often, sometimes, rarely or never? Do not include salt substitutes.**

- 1  Always  
2  Often  
3  Sometimes  
4  Rarely  
5  Never  
9  DK

- 6a. When you buy a food item for the first time, how often would you say you read the INGREDIENT list on the package — would you say always, often, sometimes, rarely, or never?**

- 0  Don't buy food (G1)  
1  Always  
2  Often  
3  Sometimes  
4  Rarely  
5  Never  
9  DK

- b. When you buy a food item for the first time, how often would you say you read the information about calorie, fat and/or cholesterol content sometimes listed on the label — would you say always, often, sometimes, rarely or never?**

- 1  Always  
2  Often  
3  Sometimes  
4  Rarely  
5  Never  
9  DK

**ITEM  
G1**

Refer to age.

- 1  65+ (7)  
2  Under 65 (Section H)

- 7a. Do you have meals delivered to your home by an agency or organization like Meals on Wheels?**

- 1  Yes (Section H)  
2  No } (7b)  
9  DK

- b. Do you NEED to have meals delivered to your home by an agency or organization like Meals on Wheels?**

- 1  Yes  
2  No  
9  DK

**Section H – IMMUNIZATION AND INFECTIOUS DISEASES**

The next questions are about foreign travel and the prevention of communicable diseases.

- 1a. During the past 5 years, did you travel outside the U.S. or Canada?**

1  Yes (1b)  
2  No } (Section I)  
9  DK }

- b. During the past 5 years, how many trips did you make outside the U.S. or Canada?**

Trips  
(Number)

99  DK

6-7

- c. In which year(s) did you take the(se) trip(s)?**

Mark all that apply.

1  1991  
2  1990  
3  1989  
4  1988  
5  1987  
6  1986

<b>19.</b> Has a doctor EVER told you that you had cataracts?	1 <input type="checkbox"/> Yes 2 <input type="checkbox"/> No 9 <input type="checkbox"/> DK	36
<b>20a.</b> During the past 12 months, have you had asthma?	1 <input type="checkbox"/> Yes (20b) 2 <input type="checkbox"/> No } (21) 9 <input type="checkbox"/> DK	37
<b>b.</b> Have you ever taken a course or class in how to manage your asthma yourself?	1 <input type="checkbox"/> Yes 2 <input type="checkbox"/> No 9 <input type="checkbox"/> DK	38

Notes

**Section K – OTHER CHRONIC AND DISABLING CONDITIONS – Continued**

Ask all of 21a BEFORE GOING TO 21b.

**The next questions are about how well you are able to do certain activities.**

**21a. Because of any physical or mental condition, do you have difficulty —**

If "Doesn't do," ask before marking a box:  
Is this because of a **PHYSICAL OR MENTAL HEALTH condition?**  
If "Yes," mark "Yes."  
If "No," mark "Doesn't do."

Ask 21b for each activity marked "Yes" in 21a.

**b. Do you need help from another person (activity in 21a)?**

	YES	NO	DOESN'T DO		YES	NO	
(1) Lifting and carrying something as heavy as 10 lbs., such as a full bag of groceries?	1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	39	1 <input type="checkbox"/>	2 <input type="checkbox"/>	40
(2) Climbing a flight of stairs without resting?	1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	41	1 <input type="checkbox"/>	2 <input type="checkbox"/>	42
(3) Walking a quarter of a mile — about 3 city blocks?	1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	43	1 <input type="checkbox"/>	2 <input type="checkbox"/>	44
(4) Doing heavy work around the house, such as scrubbing floors or washing windows?	1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	45	1 <input type="checkbox"/>	2 <input type="checkbox"/>	46
(5) Shopping for personal items, such as food or medication?	1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	47	1 <input type="checkbox"/>	2 <input type="checkbox"/>	48
(6) Going OUTSIDE the home ALONE, such as to shop or visit a doctor's office?	1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	49	1 <input type="checkbox"/>	2 <input type="checkbox"/>	50
(7) Doing light work around the house, such as washing dishes or doing light yard work?	1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	51	1 <input type="checkbox"/>	2 <input type="checkbox"/>	52
(8) Preparing your meals?	1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	53	1 <input type="checkbox"/>	2 <input type="checkbox"/>	54
Because of any physical or mental condition, do you have difficulty —							
(9) Managing your money, such as keeping track of expenses or paying bills?	1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	55	1 <input type="checkbox"/>	2 <input type="checkbox"/>	56
(10) Using a telephone?	1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	57	1 <input type="checkbox"/>	2 <input type="checkbox"/>	58
(11) Getting around INSIDE the home?	1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	59	1 <input type="checkbox"/>	2 <input type="checkbox"/>	60
(12) Walking?	1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	61	1 <input type="checkbox"/>	2 <input type="checkbox"/>	62
(13) Getting in and out of bed or chairs?	1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	63	1 <input type="checkbox"/>	2 <input type="checkbox"/>	64
(14) Eating?	1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	65	1 <input type="checkbox"/>	2 <input type="checkbox"/>	66
(15) Using the toilet, including getting to and from the toilet?	1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	67	1 <input type="checkbox"/>	2 <input type="checkbox"/>	68
(16) Bathing or showering?	1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	69	1 <input type="checkbox"/>	2 <input type="checkbox"/>	70
(17) Dressing?	1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	71	1 <input type="checkbox"/>	2 <input type="checkbox"/>	72

Notes

**Section L — CLINICAL AND PREVENTIVE SERVICES**

**The next questions are about prevention of injury and illness.**

- 1a. When driving or riding in the front seat of a car, do you wear a seat belt all or most of the time, some of the time, once in awhile, or never?**

- 1  All or most of the time  
 2  Some of the time  
 3  Once in awhile  
 4  Never  
 5  Don't ride in front seat  
 6  Don't ride in a car (2)  
 9  DK

- b. When riding in the back seat of a car, do you wear a seat belt all or most of the time, some of the time, once in awhile, or never?**

- 1  All or most of the time  
 2  Some of the time  
 3  Once in awhile  
 4  Never  
 5  Don't ride in back seat  
 6  Don't ride in a car  
 9  DK

- 2a. Is there a particular clinic, health center, doctor's office, or other place that you usually go to if you are sick or need advice about your health?**

- 1  Yes  
 2  No (3)

- b. What kind of place is it — a clinic, a health center, a hospital, a doctor's office, or some other place?**

**IF HOSPITAL:** Is this an outpatient clinic or the emergency room?

**IF CLINIC:** Is this a hospital outpatient clinic, a company clinic, or some other kind of clinic?

- 1  Doctor's office (group practice, doctor's clinic or HMO)  
 2  Hospital outpatient clinic  
 3  Sample person's home  
 4  Hospital emergency room  
 5  Company or industry clinic  
 6  Health center  
 8  Other

**These next questions are about medical check-ups and routine tests.**

- 3. About how long has it been since your last routine check-up by a medical doctor or other health professional?**

- 1  Less than 1 year  
 2  1 year, less than 2 years  
 3  2 years, less than 3 years  
 4  3 years, less than 4 years  
 5  4+ years  
 6  Never (8)  
 9  DK

- 4. During this last check-up, were you asked about —**

- a. Your diet and eating habits? .....  
 b. The amount of physical activity or exercise you get? .....  
 c. Whether you smoke cigarettes or use other forms of tobacco? ..  
 d. How much and how often you drink alcohol? .....  
 e. Whether you use marijuana, cocaine, or other drugs? .....  
 f. Sexually transmitted diseases? .....

Yes      No      DK

- 1     2     9   
 1     2     9   
 1     2     9   
 1     2     9   
 1     2     9   
 1     2     9

**Ask ONLY IF SP is less than 50 otherwise, skip to 5.**

- g. The use of contraceptives? .....

Yes      No      DK

- 1     2     9

- 5. During this last check-up, did you have any of the following things checked —**

- a. Your blood pressure? .....  
 b. Your cholesterol level? .....  
 c. Your height? .....  
 d. Your weight? .....

Yes      No      DK

- 1     2     9   
 1     2     9   
 1     2     9   
 1     2     9

<i>Hand card Q2.</i>		
<b>6. After I read each statement, tell me if you think it is very likely, somewhat likely, somewhat unlikely, very unlikely, definitely not possible, or if you don't know how likely it is that a person will get AIDS or the AIDS virus infection that way.</b>	VERY LIKELY      SOMEWHAT LIKELY      SOMEWHAT UNLIKELY      VERY UNLIKELY      DEFINITELY NOT POSSIBLE      DK	
How likely do you think it is that a person will get AIDS or the AIDS virus infection from —		
a. working near someone with the AIDS virus? ....	1 <input type="checkbox"/> 2 <input type="checkbox"/> 3 <input type="checkbox"/> 4 <input type="checkbox"/> 5 <input type="checkbox"/> 9 <input type="checkbox"/>	38
b. eating in a restaurant where the cook has the AIDS virus? ....	1 <input type="checkbox"/> 2 <input type="checkbox"/> 3 <input type="checkbox"/> 4 <input type="checkbox"/> 5 <input type="checkbox"/> 9 <input type="checkbox"/>	39
c. sharing plates, forks, or glasses with someone who has the AIDS virus? ....	1 <input type="checkbox"/> 2 <input type="checkbox"/> 3 <input type="checkbox"/> 4 <input type="checkbox"/> 5 <input type="checkbox"/> 9 <input type="checkbox"/>	40
d. using public toilets? ....	1 <input type="checkbox"/> 2 <input type="checkbox"/> 3 <input type="checkbox"/> 4 <input type="checkbox"/> 5 <input type="checkbox"/> 9 <input type="checkbox"/>	41
e. sharing needles for drug use with someone who has the AIDS virus? ....	1 <input type="checkbox"/> 2 <input type="checkbox"/> 3 <input type="checkbox"/> 4 <input type="checkbox"/> 5 <input type="checkbox"/> 9 <input type="checkbox"/>	42
f. being coughed or sneezed on by someone who has the AIDS virus? ....	1 <input type="checkbox"/> 2 <input type="checkbox"/> 3 <input type="checkbox"/> 4 <input type="checkbox"/> 5 <input type="checkbox"/> 9 <input type="checkbox"/>	43
g. attending school with a child who has the AIDS virus? ....	1 <input type="checkbox"/> 2 <input type="checkbox"/> 3 <input type="checkbox"/> 4 <input type="checkbox"/> 5 <input type="checkbox"/> 9 <input type="checkbox"/>	44
h. mosquitoes or other insects? ....	1 <input type="checkbox"/> 2 <input type="checkbox"/> 3 <input type="checkbox"/> 4 <input type="checkbox"/> 5 <input type="checkbox"/> 9 <input type="checkbox"/>	45
i. being cared for by a nurse, doctor, dentist, or other health-care worker who has the AIDS virus? ....	1 <input type="checkbox"/> 2 <input type="checkbox"/> 3 <input type="checkbox"/> 4 <input type="checkbox"/> 5 <input type="checkbox"/> 9 <input type="checkbox"/>	46
j. getting a blood transfusion, that is, receiving blood donated by someone else? ....	1 <input type="checkbox"/> 2 <input type="checkbox"/> 3 <input type="checkbox"/> 4 <input type="checkbox"/> 5 <input type="checkbox"/> 9 <input type="checkbox"/>	47
<b>7. Can a person get AIDS or the AIDS virus infection WHILE GIVING OR DONATING BLOOD for use by others?</b>	1 <input type="checkbox"/> Yes    2 <input type="checkbox"/> No    9 <input type="checkbox"/> DK	48
<b>8. Do you have any children aged 10 through 17?</b>	1 <input type="checkbox"/> Yes 2 <input type="checkbox"/> No (12)	49
<b>9. How many do you have?</b>	_____ Children (Number)	50-51
<b>10. Have you ever discussed AIDS with [this child/any of your children aged 10 through 17]?</b>	1 <input type="checkbox"/> Yes 2 <input type="checkbox"/> No	52
<b>11. [Has this child/Have any of your children aged 10 through 17] had instruction at school about AIDS?</b>	1 <input type="checkbox"/> Yes 2 <input type="checkbox"/> No 9 <input type="checkbox"/> DK	53

**Section Q — AIDS KNOWLEDGE AND ATTITUDES — Continued**

<b>12. Have you ever given or donated blood?</b>	54		
<p>1 <input type="checkbox"/> Yes (13)      2 <input type="checkbox"/> No } (15)      9 <input type="checkbox"/> DK }</p>			
<b>13. Have you donated blood —</b>	55		
<b>a. since March 1985?</b>	<p>1 <input type="checkbox"/> Yes (13b)      2 <input type="checkbox"/> No } (15)</p>		
<b>b. In the past 12 months?</b>	56	<p>1 <input type="checkbox"/> Yes (14)      2 <input type="checkbox"/> No } (15)      9 <input type="checkbox"/> DK }</p>	
<b>14. How many times IN THE PAST 12 MONTHS have you donated blood?</b>	57-58	<p>00 <input type="checkbox"/> None in past 12 months      _____ Times      (Number)      97 <input type="checkbox"/> Refused      99 <input type="checkbox"/> DK</p>	
<p><b>The next questions are about the blood test for the AIDS virus infection. No question will ask what the results are of any tests you may have had.</b></p>			
<b>15. To the best of your knowledge, are blood donations routinely tested for the AIDS virus infection?</b>	59	<p>1 <input type="checkbox"/> Yes      2 <input type="checkbox"/> No      9 <input type="checkbox"/> DK</p>	
<b>ITEM Q1</b>	<p>Refer to question 13a.</p>		
<b>16. Was one of your reasons for donating blood because you wanted to be tested for the AIDS virus infection?</b>	60	<p>1 <input type="checkbox"/> "Yes" in question 13a (16)      8 <input type="checkbox"/> Other (17)</p>	
<b>17a. (Except for blood donations since March 1985), Have you had your blood tested for the AIDS virus infection?</b>	61	<p>1 <input type="checkbox"/> Yes      2 <input type="checkbox"/> No</p>	
<b>b. Why haven't you been tested?</b> <i>Mark each that applies.</i>	62	<p>1 <input type="checkbox"/> Yes (18)      2 <input type="checkbox"/> No (17b)      9 <input type="checkbox"/> DK (31)</p>	
	63	<p>1 <input type="checkbox"/> Don't consider myself at risk of AIDS</p>	
	64	<p>1 <input type="checkbox"/> Don't believe anything can be done if I am positive</p>	
	65	<p>1 <input type="checkbox"/> Don't like needles</p>	
	66	<p>1 <input type="checkbox"/> Afraid of losing job, insurance, housing, friends, family if people knew I was positive for AIDS infection</p>	
	67	<p>1 <input type="checkbox"/> Don't trust medical clinics/hospitals to keep test results confidential</p>	
	68	<p>1 <input type="checkbox"/> Already know whether I have the AIDS virus infection</p>	
	69	<p>1 <input type="checkbox"/> Don't know where to go for a test</p>	
	70	<p>8 <input type="checkbox"/> Other — <i>Specify</i> ↴</p>	
	71	<p>_____</p>	
<b>18. How many times have you had your blood tested for the AIDS virus infection, NOT including blood donations?</b>	72-73	<p>_____ Times      (Number)      99 <input type="checkbox"/> DK</p>	
<b>19. How many times IN THE PAST 12 MONTHS have you had your blood tested for the AIDS virus infection, NOT including blood donations?</b>	74-75	<p>00 <input type="checkbox"/> None in past 12 months      _____ Times      (Number)      99 <input type="checkbox"/> DK</p>	
<b>ITEM Q2</b>	<p>Refer to question 18.</p>		
	76	<p>1 <input type="checkbox"/> "1 time" (21)      8 <input type="checkbox"/> Other (20)</p>

**Section Q — AIDS KNOWLEDGE AND ATTITUDES — Continued**

The next questions concern COUNSELING about the AIDS virus infection, that is, discussing transmission, prevention or treatment of AIDS virus infection.		71
24. Did you receive any counseling AT THE TIME of your (last) blood test for the AIDS virus infection?		1 <input type="checkbox"/> Yes 2 <input type="checkbox"/> No 9 <input type="checkbox"/> DK
25. Did you get the results of your (last) blood test?		72
		1 <input type="checkbox"/> Yes (27) 2 <input type="checkbox"/> No 9 <input type="checkbox"/> DK
26. Was this because you decided you didn't want the results or was it because you were unable to GET the results?  Mark only one.		73
		1 <input type="checkbox"/> Didn't want results 2 <input type="checkbox"/> Unable to get results 3 <input type="checkbox"/> Both 8 <input type="checkbox"/> Other — <i>Specify</i> ↓ 9 <input type="checkbox"/> DK
27. Did you also receive any counseling about the AIDS virus when you received the results of your (last) test?		74
		1 <input type="checkbox"/> Yes 2 <input type="checkbox"/> No 9 <input type="checkbox"/> DK
28. Were the results given in person, by telephone, by mail or in some other way?  Mark only one.		75
		1 <input type="checkbox"/> In person 2 <input type="checkbox"/> By telephone 3 <input type="checkbox"/> By mail 8 <input type="checkbox"/> In some other way
29. Do you believe the results of your (last) test were accurate?		76
		1 <input type="checkbox"/> Yes 2 <input type="checkbox"/> No 9 <input type="checkbox"/> DK
30. Do you feel that the confidentiality of the results of your (last) test for the AIDS virus infection was handled properly?		77
		1 <input type="checkbox"/> Yes 2 <input type="checkbox"/> No 9 <input type="checkbox"/> DK
31. Do you expect to have a blood test for the AIDS virus infection in the next 12 months?		78
		1 <input type="checkbox"/> Yes (32) 2 <input type="checkbox"/> No } (34) 9 <input type="checkbox"/> DK }
32. I am going to read some reasons people might have the blood test. Tell me if each statement explains WHY YOU expect to have the blood test in the next 12 months.		79
a. Because it will be part of a blood donation. ....		YES      NO      DK
		1 <input type="checkbox"/> 2 <input type="checkbox"/> 9 <input type="checkbox"/>
b. Because it will be part of hospitalization or surgery you expect to have. ....		80
		1 <input type="checkbox"/> 2 <input type="checkbox"/> 9 <input type="checkbox"/>
c. Because you expect to apply for life or health insurance. ....		81
		1 <input type="checkbox"/> 2 <input type="checkbox"/> 9 <input type="checkbox"/>
d. Because you expect to apply for a job. ....		82
		1 <input type="checkbox"/> 2 <input type="checkbox"/> 9 <input type="checkbox"/>
e. Because you expect to join the military. ....		83
		1 <input type="checkbox"/> 2 <input type="checkbox"/> 9 <input type="checkbox"/>
f. Because you expect to apply for a marriage license. ....		84
		1 <input type="checkbox"/> 2 <input type="checkbox"/> 9 <input type="checkbox"/>
g. Because you want to know the results. ....		85
		1 <input type="checkbox"/> 2 <input type="checkbox"/> 9 <input type="checkbox"/>
h. Because it will be a required part of some other activity that includes automatic AIDS testing. ....		86
33. Where will you go to have a blood test for the AIDS virus infection?  Mark only one.		87-88
		01 <input type="checkbox"/> AIDS clinic/counseling/testing site 02 <input type="checkbox"/> Community Health Clinic 03 <input type="checkbox"/> Clinic run by employer 04 <input type="checkbox"/> Doctor/HMO 05 <input type="checkbox"/> Hospital/emergency room/outpatient clinic 06 <input type="checkbox"/> STD clinic 07 <input type="checkbox"/> Family planning clinic 08 <input type="checkbox"/> Prenatal clinic 09 <input type="checkbox"/> Tuberculosis clinic 10 <input type="checkbox"/> Public clinic 11 <input type="checkbox"/> Other Clinic 12 <input type="checkbox"/> Drug treatment facility 13 <input type="checkbox"/> Military induction or military service site 14 <input type="checkbox"/> Immigration site 15 <input type="checkbox"/> Home collection/testing kit 98 <input type="checkbox"/> Other location — <i>Specify</i> _____ 99 <input type="checkbox"/> DK

**Section Q. — AIDS KNOWLEDGE AND ATTITUDES — Continued**

<p><b>34. Tell me whether you think the following statements about the blood test for the AIDS virus infection are true or false or if you do not know whether they are true or false.</b></p> <p>a. Sometimes the results of a blood test for the AIDS virus infection can be wrong. ....</p> <p>b. After a person becomes infected with the AIDS virus, there can be a period of time before the test shows the infection. ....</p>	<p align="center">TRUE      FALSE      DK</p> <p>1 <input type="checkbox"/>      2 <input type="checkbox"/>      9 <input type="checkbox"/> <span style="float: right;">99</span></p> <p>1 <input type="checkbox"/>      2 <input type="checkbox"/>      9 <input type="checkbox"/> <span style="float: right;">90</span></p>
<p><b>35. A new and accurate method for learning your HIV status is being considered. To use this method, you would take a blood sample from your finger and send it to a laboratory for testing. You would receive the results confidentially in the mail or by telephone.</b></p> <p>If this test were available, how likely would you be to use it — very likely, somewhat likely, somewhat unlikely, very unlikely, or don't you know how likely you would be to use it?</p>	<p align="center">1 <input type="checkbox"/> Very likely 2 <input type="checkbox"/> Somewhat likely 3 <input type="checkbox"/> Somewhat unlikely 4 <input type="checkbox"/> Very unlikely 9 <input type="checkbox"/> DK <span style="float: right;">91</span></p>
<p><b>36. If such a test were available, would you be more likely to use the new method, to go to a doctor's office or clinic, or not to be tested? Mark only one.</b></p>	<p align="center">1 <input type="checkbox"/> To use the new method 2 <input type="checkbox"/> To go to a doctor's office or clinic 3 <input type="checkbox"/> Not be tested <span style="float: right;">92</span></p>
<p><b>37. Have you ever heard of a drug called AZT, also known as Zidovudine (Zi-doo-view-deen) (ZDV) or Retrovir?</b></p>	<p align="center">1 <input type="checkbox"/> Yes (38) 2 <input type="checkbox"/> No } (39) 9 <input type="checkbox"/> DK } <span style="float: right;">93</span></p>
<p><i>Hand card Q3. Read all categories.</i></p>	
<p><b>38. Tell me whether you think the following statements about AZT are true or false or if you don't know whether they are true or false.</b></p> <p>a. AZT can delay or slow down the symptoms of AIDS virus infection. ....</p> <p>b. AZT cures people with AIDS. ....</p> <p>c. AZT has no known side effects. ....</p> <p>d. AZT is appropriate for a person with the AIDS virus infection ONLY at certain times during the illness. ....</p> <p>e. There are other drugs available to treat AIDS related illnesses. ....</p>	<p align="center">TRUE      FALSE      DK</p> <p>1 <input type="checkbox"/>      2 <input type="checkbox"/>      9 <input type="checkbox"/> <span style="float: right;">94</span></p> <p>1 <input type="checkbox"/>      2 <input type="checkbox"/>      9 <input type="checkbox"/> <span style="float: right;">95</span></p> <p>1 <input type="checkbox"/>      2 <input type="checkbox"/>      9 <input type="checkbox"/> <span style="float: right;">96</span></p> <p>1 <input type="checkbox"/>      2 <input type="checkbox"/>      9 <input type="checkbox"/> <span style="float: right;">97</span></p> <p>1 <input type="checkbox"/>      2 <input type="checkbox"/>      9 <input type="checkbox"/> <span style="float: right;">98</span></p>
<p><b>39. Did you have a blood transfusion at any time between 1977 and 1985?</b></p>	<p align="center">1 <input type="checkbox"/> Yes 2 <input type="checkbox"/> No 9 <input type="checkbox"/> DK <span style="float: right;">99</span></p>
<p><b>40. Do you have frequent blood transfusions because of Sickle Cell or Chronic Anemia?</b></p>	<p align="center">1 <input type="checkbox"/> Yes 2 <input type="checkbox"/> No 9 <input type="checkbox"/> DK <span style="float: right;">100</span></p>
<p><i>Some people use condoms to keep from getting the AIDS virus through sexual activity.</i></p>	
<p><b>41. How effective do you think the use of a condom is to prevent getting the AIDS virus through sexual activity? Would you say very effective, somewhat effective, not at all effective, or you don't know how effective it is?</b></p>	<p align="center">1 <input type="checkbox"/> Very effective 2 <input type="checkbox"/> Somewhat effective 3 <input type="checkbox"/> Not at all effective 4 <input type="checkbox"/> Don't know how effective 9 <input type="checkbox"/> Don't know method (43) <span style="float: right;">101</span></p>
<p><b>42. Tell me whether you think the following statements are true or false or whether you don't know if they are true or false.</b></p> <p>a. Latex condoms and natural membrane condoms are equally good at preventing transmission of the AIDS virus. ....</p> <p>b. Oil-based lubricants can cause latex condoms to break. ....</p>	<p align="center">TRUE      FALSE      DK</p> <p>1 <input type="checkbox"/>      2 <input type="checkbox"/>      9 <input type="checkbox"/> <span style="float: right;">102</span></p> <p>1 <input type="checkbox"/>      2 <input type="checkbox"/>      9 <input type="checkbox"/> <span style="float: right;">103</span></p>
<p><b>43. What are your chances of HAVING the AIDS virus; would you say high, medium, low, or none?</b></p>	<p align="center">1 <input type="checkbox"/> High (45) 2 <input type="checkbox"/> Medium 3 <input type="checkbox"/> Low 4 <input type="checkbox"/> None 7 <input type="checkbox"/> Refused 9 <input type="checkbox"/> DK <span style="float: right;">104</span></p>
<p><b>44. Section R — INCOME		PERSON 1	
<b>ITEM R1</b>	Refer to Household Composition.	R1	RT 90 3-4 5 1 <input type="checkbox"/> Civilian 2 <input type="checkbox"/> AF member Living at home 3 <input type="checkbox"/> Deleted
<p><b>The next questions are about health insurance coverage and the kinds and amounts of income that people receive. For this family, that includes <u>(read names, including Armed Forces members living at home)</u>.</b></p> <p><b>Read if necessary:</b> The answers to these questions will add greatly to our knowledge about the health problems of the American people, the types of health care they receive, and whether they can afford the care that they need. The information will help in planning health care services and finding ways to lower costs of care.</p>			
<p>There are several government programs which provide medical care or help pay medical bills.</p> <p>People covered by Medicare have a card that looks like this. Show Medicare Card.</p> <p><b>1a. In <u>(month)</u>, was anyone in the family covered by Medicare?</b></p> <p><b>Read if necessary:</b> Medicare is a health insurance program for persons 65 or over and certain disabled persons.</p> <p><b>b. Who was this?</b> Mark "Medicare" box in person's column.</p> <p><b>c. Anyone else?</b> <input type="checkbox"/> Yes (Reask 1b and c) <input type="checkbox"/> No</p>			
<p><b>2a. (In <u>(month)</u>, was anyone in the family covered by) Medicaid or <u>(local name)</u>?</b></p> <p><b>Read if necessary:</b> Medicaid or <u>(local name)</u> is a public assistance program that pays for medical care.</p> <p><b>b. Who was this?</b> Mark "Medicaid" box in person's column.</p> <p><b>c. Anyone else?</b> <input type="checkbox"/> Yes (Reask 2b and c) <input type="checkbox"/> No</p>			
<p><b>3a. (In <u>(month)</u>, was anyone in the family covered by) CHAMPUS, CHAMPVA, the VA, or military health care?</b></p> <p><b>Read if necessary:</b> These programs cover active duty and retired career military personnel and their dependents and survivors and also disabled veterans and their dependents and survivors.</p> <p><b>b. Who was this?</b> Mark "Military" box in person's column.</p> <p><b>c. Anyone else?</b> <input type="checkbox"/> Yes (Reask 3b and c) <input type="checkbox"/> No</p>			
<p><b>4a. Health insurance can also be obtained privately or through a current or former employer or union. Was anyone in the family covered by private health insurance or by membership in a health maintenance organization in <u>(month)</u>?</b></p> <p><b>b. Who was this?</b> Mark "HI Plan" box in person's column.</p> <p><b>c. Anyone else?</b> <input type="checkbox"/> Yes (Reask 4b and c) <input type="checkbox"/> No</p> <p><b>d. Was —— health insurance coverage from a plan in —— own name?</b></p> <p><b>e. Was any of —— health insurance obtained through an employer or union?</b></p> <p><b>f. Did the employer or union pay for all, part, or none of the cost of this plan?</b></p>			

Section R – INCOME – Continued		PERSON 1

### **INTRODUCTION**

This questionnaire obtains information that will be extremely useful in understanding one of the country's major health issues. However, some of the questions may be considered personal; for that reason we are asking that you complete this questionnaire yourself. If you need any assistance, please ask me for help.

<b>FOR OFFICE USE ONLY</b>			
FS	32	IM	33

<b>The first few questions are about drinking alcoholic beverages. Included are beer, wine, and liquor such as whiskey or gin, and any other type of alcoholic beverage. Please put an "X" in the box next to the answer that fits you best or write in your answer on the line.</b>		RT 92 3-4
<b>1. Have you had at least one drink of beer, wine, or liquor in your entire life?</b>		5
<p>1 <input type="checkbox"/> Yes      2 <input type="checkbox"/> No</p>		
<b>2. In how many months out of the past 12 months did you drink beer, wine, or liquor?</b>		6-7
<p>Number of months I drank beer, wine, or liquor in the past 12 months: _____ Months</p> <p>00 <input type="checkbox"/> I did not drink beer, wine, or liquor in the past 12 months.      98 <input type="checkbox"/> I HAVE NEVER drunk beer, wine, or liquor; not even once.</p>		
<b>3. During the months that you drank beer, wine, or liquor in the past 12 months, about how often did you drink on average?</b>		8
<p>1 <input type="checkbox"/> Every day      2 <input type="checkbox"/> 5 or 6 days each week      3 <input type="checkbox"/> 3 or 4 days each week      4 <input type="checkbox"/> 1 or 2 days each week      5 <input type="checkbox"/> 1 to 3 days a MONTH      6 <input type="checkbox"/> I did not drink beer, wine, or liquor in the past 12 months      8 <input type="checkbox"/> I HAVE NEVER drunk beer, wine, or liquor; not even once</p>		
<b>4. On the days that you drank beer, wine, or liquor in the past 12 months, about how many drinks per day did you drink?</b>		9-10
<p>Number of drinks per day in the past 12 months: _____ Drinks per day</p> <p>00 <input type="checkbox"/> I did not drink beer, wine, or liquor in the past 12 months      98 <input type="checkbox"/> I HAVE NEVER drunk beer, wine, or liquor; not even once</p>		
<b>5. During the past 12 months, what is the largest number of drinks of beer, wine, or liquor that you drank in a single day?</b>		11-12
<p>Number of drinks: _____</p> <p>00 <input type="checkbox"/> I did not drink beer, wine, or liquor in the past 12 months      98 <input type="checkbox"/> I HAVE NEVER drunk beer, wine, or liquor; not even once</p>		
<b>6. About how often did you drink that amount in the past 12 months?</b>		13-14
<p>01 <input type="checkbox"/> Every day      02 <input type="checkbox"/> Nearly every day      03 <input type="checkbox"/> 3-4 days per week      04 <input type="checkbox"/> 1-2 days per week      05 <input type="checkbox"/> 2-3 days per month      06 <input type="checkbox"/> Once a month      07 <input type="checkbox"/> 7-11 days in the past 12 months      08 <input type="checkbox"/> 3-6 days in the past 12 months      09 <input type="checkbox"/> 2 days in the past 12 months      10 <input type="checkbox"/> 1 day in the past 12 months      11 <input type="checkbox"/> None in the past 12 months      98 <input type="checkbox"/> I HAVE NEVER drunk beer, wine, or liquor; not even once.</p>		
<p><b>Notes</b></p> <hr/>		

**The next few questions are about your use of some drugs and medications. Please mark the "Yes" or "No" boxes to indicate if you have or have not used the drugs in the lists.**

**IN YOUR ENTIRE LIFE, have you ever used —**

- |  |                                |    |
|--|--------------------------------|----|
| 7. Sedatives, such as barbiturates, sleeping pills, and Seconal ("downers")?                                   | 1 <input type="checkbox"/> Yes | 15 |
|  | 2 <input type="checkbox"/> No  |    |
| 8. Sedatives, such as barbiturates, sleeping pills, and Seconal ("downers") WITHOUT a doctor telling you to?   | 1 <input type="checkbox"/> Yes | 16 |
|  | 2 <input type="checkbox"/> No  |    |

|  | 2 <input type="checkbox"/> No  |    |
| 10. Tranquilizers, such as Librium, Valium, and Xanax WITHOUT a doctor telling you to?                         | 1 <input type="checkbox"/> Yes | 18 |
|  | 2 <input type="checkbox"/> No  |    |
| 11. Stimulants, such as amphetamines, Preludin, uppers, and speed?   | 1 <input type="checkbox"/> Yes | 19 |
|  | 2 <input type="checkbox"/> No  |    |
| 12. Stimulants, such as amphetamines, Preludin, uppers, and speed WITHOUT a doctor telling you to?             | 1 <input type="checkbox"/> Yes | 20 |
|  | 2 <input type="checkbox"/> No  |    |
| 13. Pain killers, such as Darvon, Demerol, Percodan, and Tylenol with codeine?                                 | 1 <input type="checkbox"/> Yes | 21 |
|  | 2 <input type="checkbox"/> No  |    |
| 14. Pain killers, such as Darvon, Demerol, Percodan, and Tylenol with codeine WITHOUT a doctor telling you to? | 1 <input type="checkbox"/> Yes | 22 |
|  | 2 <input type="checkbox"/> No  |    |

**NOW THINK ABOUT THE PAST 12 MONTHS.**

**DURING THOSE 12 MONTHS, have you used —**

- |  |                                |    |
|--|--------------------------------|----|
| 15. Sedatives, such as barbiturates, sleeping pills, and Seconal ("downers")?                                  | 1 <input type="checkbox"/> Yes | 23 |
|  | 2 <input type="checkbox"/> No  |    |
| 16. Sedatives, such as barbiturates, sleeping pills, and Seconal ("downers") WITHOUT a doctor telling you to?  | 1 <input type="checkbox"/> Yes | 24 |
|  | 2 <input type="checkbox"/> No  |    |
| 17. Tranquilizers, such as Librium, Valium, and Xanax?   | 1 <input type="checkbox"/> Yes | 25 |
|  | 2 <input type="checkbox"/> No  |    |
| 18. Tranquilizers, such as Librium, Valium, and Xanax WITHOUT a doctor telling you to?                         | 1 <input type="checkbox"/> Yes | 26 |
|  | 2 <input type="checkbox"/> No  |    |
| 19. Stimulants, such as amphetamines, Preludin, uppers, and speed?   | 1 <input type="checkbox"/> Yes | 27 |
|  | 2 <input type="checkbox"/> No  |    |
| 20. Stimulants, such as amphetamines, Preludin, uppers, and speed WITHOUT a doctor telling you to?             | 1 <input type="checkbox"/> Yes | 28 |
|  | 2 <input type="checkbox"/> No  |    |
| 21. Pain killers, such as Darvon, Demerol, Percodan, and Tylenol with codeine?                                 | 1 <input type="checkbox"/> Yes | 29 |
|  | 2 <input type="checkbox"/> No  |    |
| 22. Pain killers, such as Darvon, Demerol, Percodan, and Tylenol with codeine WITHOUT a doctor telling you to? | 1 <input type="checkbox"/> Yes | 30 |
|  | 2 <input type="checkbox"/> No  |    |

**IN YOUR ENTIRE LIFE, have you ever used —**

- |   |                                |    |
|---|--------------------------------|----|
| 23. Inhalants, such as glue, amyl nitrite, poppers, and aerosol sprays? | 1 <input type="checkbox"/> Yes | 31 |
|   | 2 <input type="checkbox"/> No  |    |
| 24. Hallucinogens, such as LSD, PCP, peyote, and mescaline?             | 1 <input type="checkbox"/> Yes | 32 |
|   | 2 <input type="checkbox"/> No  |    |
| 25. Heroin?   | 1 <input type="checkbox"/> Yes | 33 |
|   | 2 <input type="checkbox"/> No  |    |

**NOW, THINK ABOUT THE PAST 12 MONTHS.**

**DURING THOSE 12 MONTHS, have you used —**

- 26. Inhalants, such as glue, amyl nitrite, poppers, and aerosol sprays? .....**
- 1  Yes      34  
2  No
- 27. Hallucinogens, such as LSD, PCP, peyote, and mescaline? .....**
- 1  Yes      35  
2  No
- 28. Heroin? .....**
- 1  Yes      36  
2  No

**In the following set of questions, "marijuana" refers to both marijuana and hashish (hash). Hashish is a concentrated form of marijuana. Please put an "X" in the box next to the answer that fits you best or write in your answer on the line.**

- 29. About how old were you the first time you used marijuana, even once?**      37-38

Age when I first used marijuana: \_\_\_\_\_ Years

00  I HAVE NEVER used marijuana, not even once

- 30. About how many times in your life have you used marijuana?**      39
- 0  1 or 2 times  
1  3 to 5 times  
2  6 to 10 times  
3  11 to 49 times  
4  50 to 99 times  
5  100 to 199 times  
6  200 or more times  
8  I HAVE NEVER used marijuana, not even once

- 31. When was the most recent time that you used marijuana?**      40
- 1  Within the past week (7 days)  
2  More than 1 week but less than 1 month (30 days) ago  
3  1 or more months ago but less than 1 year ago  
4  1 or more years ago  
8  I HAVE NEVER used marijuana, not even once

- 32. In how many months out of the past 12 months did you use marijuana?**      41-42
- Number of months I have used marijuana in the past 12 months: \_\_\_\_\_ Months
- 00  I did not use marijuana in the past 12 months.  
98  I HAVE NEVER used marijuana, not even once

- 33. During the months that you used marijuana in the past 12 months, about how often did you use it on average?**      43
- 1  Every day  
2  5 or 6 days each week  
3  3 or 4 days each week  
4  1 or 2 days each week  
5  1 to 3 days a MONTH  
6  I did not use marijuana in the past 12 months  
8  I HAVE NEVER used marijuana, not even once

- 34. On the days that you used marijuana in the past 12 months, about how many times per day did you use it?**      44-55
- Number of times per day I used marijuana in the past 12 months: \_\_\_\_\_ Times
- 00  I did not use marijuana in the past 12 months  
98  I HAVE NEVER used marijuana, not even once

**IF YOU HAVE NEVER USED  
MARIJUANA,  
NOT EVEN ONCE,  
GO TO QUESTION 73  
ON PAGE 9.**

**IF YOU HAVE USED MARIJUANA  
AT LEAST ONE TIME IN YOUR LIFE,

**IF YOU HAVE NOT USED MARIJUANA  
DURING THE PAST 12 MONTHS,  
NOT EVEN ONCE,  
GO TO QUESTION 73 ON PAGE 9.**

**IF YOU HAVE USED MARIJUANA  
AT LEAST ONE TIME DURING  
THE PAST 12 MONTHS,  
CONTINUE WITH QUESTION 54  
ON THE NEXT PAGE.**

In the next set of questions, please mark the "Yes" or "No" boxes to indicate if the following things have or have not happened to you DURING THE PAST 12 MONTHS. Mark "Yes" even if something only happened once during the past 12 months.

<b>DURING THE PAST 12 MONTHS, have you —</b>		
<b>54. Ended up using marijuana more often than you thought you would?</b>	<b>1 <input type="checkbox"/> Yes</b>	<b>65</b>
	<b>2 <input type="checkbox"/> No</b>	
<b>55. Tried to cut down or stop using marijuana but found that you couldn't?</b>	<b>1 <input type="checkbox"/> Yes</b>	<b>66</b>
	<b>2 <input type="checkbox"/> No</b>	
<b>56. Used marijuana every day for two weeks or more?</b>	<b>1 <input type="checkbox"/> Yes</b>	<b>67</b>
	<b>2 <input type="checkbox"/> No</b>	
<b>57. Been high on marijuana while you were at work or at school?</b>	<b>1 <input type="checkbox"/> Yes</b>	<b>68</b>
	<b>2 <input type="checkbox"/> No</b>	
<b>58. Been high on marijuana while you were at home taking care of your home or family?</b>	<b>1 <input type="checkbox"/> Yes</b>	<b>69</b>
	<b>2 <input type="checkbox"/> No</b>	
<b>59. Skipped going to work or school because you were high on marijuana?</b>	<b>1 <input type="checkbox"/> Yes</b>	<b>70</b>
	<b>2 <input type="checkbox"/> No</b>	
<b>60. Had problems with work, school, or with the police because of using marijuana?</b>	<b>1 <input type="checkbox"/> Yes</b>	<b>71</b>
	<b>2 <input type="checkbox"/> No</b>	
<b>61. Continued to use marijuana even when you knew it was causing you problems with work, school, or with the police?</b>	<b>1 <input type="checkbox"/> Yes</b>	<b>72</b>
	<b>2 <input type="checkbox"/> No</b>	
<b>62. Failed to take care of your home or family because you were high on marijuana?</b>	<b>1 <input type="checkbox"/> Yes</b>	<b>73</b>
	<b>2 <input type="checkbox"/> No</b>	
<b>63. Had problems with your family or friends because of using marijuana?</b>	<b>1 <input type="checkbox"/> Yes</b>	<b>74</b>
	<b>2 <input type="checkbox"/> No</b>	
<b>64. Continued to use marijuana even when you knew it was causing you problems with your family or friends?</b>	<b>1 <input type="checkbox"/> Yes</b>	<b>75</b>
	<b>2 <input type="checkbox"/> No</b>	
<b>65. Driven a car or other vehicle within 3 hours after using marijuana?</b>	<b>1 <input type="checkbox"/> Yes</b>	<b>76</b>
	<b>2 <input type="checkbox"/> No</b>	
<b>66. Spent less time on activities that used to be important to you — like playing sports, hobbies, or other interests — so that you could use marijuana?</b>	<b>1 <input type="checkbox"/> Yes</b>	<b>77</b>
	<b>2 <input type="checkbox"/> No</b>	
<b>67. Felt depressed, anxious, or uninterested in things because of using marijuana?</b>	<b>1 <input type="checkbox"/> Yes</b>	<b>78</b>
	<b>2 <input type="checkbox"/> No</b>	
<b>68. Continued to use marijuana even though you knew it made you feel depressed, anxious, or uninterested in things?</b>	<b>1 <input type="checkbox"/> Yes</b>	<b>79</b>
	<b>2 <input type="checkbox"/> No</b>	
<b>69. Built up a tolerance to marijuana so that the same amount of marijuana had less effect than before?</b>	<b>1 <input type="checkbox"/> Yes</b>	<b>80</b>
	<b>2 <input type="checkbox"/> No</b>	
<b>70. Felt sick or irritable because you stopped or cut down on your marijuana use?</b>	<b>1 <input type="checkbox"/> Yes</b>	<b>81</b>
	<b>2 <input type="checkbox"/> No</b>	
<b>71. Used alcohol or drugs because you felt sick or irritable when you stopped or cut down on your marijuana use?</b>	<b>1 <input type="checkbox"/> Yes</b>	<b>82</b>
	<b>2 <input type="checkbox"/> No</b>	
<b>72. Gone to a self-help group, counselor, doctor, or other professional to get help because of your marijuana use?</b>	<b>1 <input type="checkbox"/> Yes</b>	<b>83</b>
	<b>2 <input type="checkbox"/> No</b>	

The next set of questions are about cocaine. This includes powder cocaine, crack cocaine, free base, and coca paste. Again, please answer every question — even if you've never used cocaine. Please put an "X" in the box next to the answer that fits you best or write in your answer on the line.

RT 93  
3-4

5-6

**73. About how old were you the first time you used cocaine, even once?**

Age when I first used cocaine: \_\_\_\_\_ Years

00  I HAVE NEVER used cocaine, not even once

**74. About how many times in your life have you used cocaine?**

7

- 0  1 or 2 times
- 1  3 to 5 times
- 2  6 to 10 times
- 3  11 to 49 times
- 4  50 to 99 times
- 5  100 to 199 times
- 6  200 or more times
- 8  I HAVE NEVER used cocaine, not even once

**75. When was the most recent time that you used cocaine?**

8

- 1  Within the past week (7 days)
- 2  More than 1 week but less than 1 month (30 days) ago
- 3  1 or more months ago but less than 1 year ago
- 4  1 or more years ago
- 8  I HAVE NEVER used cocaine, not even once

**76. In how many months out of the past 12 months did you use cocaine?**

9-10

Number of months I have used cocaine in the past 12 months: \_\_\_\_\_ Months

00  I did not use cocaine in the past 12 months  
98  I HAVE NEVER used cocaine, not even once

**77. During the months that you used cocaine in the past 12 months, about how often did you use it on average?**

11

- 1  Every day
- 2  5 or 6 days each week
- 3  3 or 4 days each week
- 4  1 or 2 days each week
- 5  1 to 3 days a MONTH
- 6  I did not use cocaine in the past 12 months
- 8  I HAVE NEVER used cocaine, not even once

**78. On the days that you used cocaine in the past 12 months, about how many times per day did you use it?**

12-13

Number of times per day I used cocaine in the past 12 months: \_\_\_\_\_ Times

00  I did not use cocaine in the past 12 months  
98  I HAVE NEVER used cocaine, not even once

**79. Please put an "X" in the box next to each of the ways you have used cocaine in the past 12 months.**

14

- 1  Sniffing through the nose (snorting)
- 2  Swallowing or drinking
- 3  Injecting in a vein or muscle with a needle
- 4  Smoking or free basing
- 5  Some other way — Specify \_\_\_\_\_
- 6  I did not use cocaine in the past 12 months
- 8  I HAVE NEVER used cocaine, not even once

**80. When was the most recent time you used the form of cocaine known as "crack"?**

15

- Within the past week (7 days)
- More than 1 week but less than 1 month (30 days) ago
- 1 or more months ago but less than 1 year ago
- 1 or more years ago
- I HAVE NEVER used crack, not even once
- I HAVE NEVER used cocaine, not even once

Notes

**IF YOU HAVE NOT USED COCAINE  
DURING THE PAST 12 MONTHS,  
NOT EVEN ONCE,  
PLEASE TURN TO QUESTION 123  
ON PAGE 15.**

**IF YOU HAVE USED COCAINE  
AT LEAST ONE TIME  
DURING THE PAST 12 MONTHS,  
CONTINUE WITH QUESTION 102  
ON THE NEXT PAGE.**

In the next set of questions, please mark the "Yes" or "No" boxes to indicate if the following things have or have not happened to you DURING THE PAST 12 MONTHS. Mark "Yes" even if something only happened once during the past 12 months.

**DURING THE PAST 12 MONTHS, have you —**

- |  |                                |    |
|--|--------------------------------|----|
| 102. Ended up using cocaine more often than you thought you would? . . . . .   | 1 <input type="checkbox"/> Yes | 37 |
|  | 2 <input type="checkbox"/> No  |    |
| 103. Tried to cut down or stop using cocaine but found that you couldn't? . . . . .  | 1 <input type="checkbox"/> Yes | 38 |
|  | 2 <input type="checkbox"/> No  |    |
| 104. Used cocaine every day for two weeks or more? . . . . .   | 1 <input type="checkbox"/> Yes | 39 |
|  | 2 <input type="checkbox"/> No  |    |
| 105. Been high on cocaine or feeling its after effects while you were at work or at school? . . . . .  | 1 <input type="checkbox"/> Yes | 40 |
|  | 2 <input type="checkbox"/> No  |    |
| 106. Been high on cocaine or feeling its after effects while you were at home taking care of your home or family? . . . . .  | 1 <input type="checkbox"/> Yes | 41 |
|  | 2 <input type="checkbox"/> No  |    |
| 107. Skipped going to work or school because you were high on cocaine or feeling its after effects? . . . . .  | 1 <input type="checkbox"/> Yes | 42 |
|  | 2 <input type="checkbox"/> No  |    |
| 108. Had problems with work, school, or with the police because of using cocaine? . . . . .  | 1 <input type="checkbox"/> Yes | 43 |
|  | 2 <input type="checkbox"/> No  |    |
| 109. Continued to use cocaine even when you knew it was causing you problems with work, school, or with the police? . . . . .  | 1 <input type="checkbox"/> Yes | 44 |
|  | 2 <input type="checkbox"/> No  |    |
| 110. Failed to take care of your home or family because you were high on cocaine or feeling its after effects? . . . . .   | 1 <input type="checkbox"/> Yes | 45 |
|  | 2 <input type="checkbox"/> No  |    |
| 111. Had problems with your family or friends because of using cocaine? . . . . .  | 1 <input type="checkbox"/> Yes | 46 |
|  | 2 <input type="checkbox"/> No  |    |
| 112. Continued to use cocaine even when you knew it was causing you problems with your family or friends? . . . . .  | 1 <input type="checkbox"/> Yes | 47 |
|  | 2 <input type="checkbox"/> No  |    |
| 113. Driven a car or other vehicle within 1 hour after using cocaine? . . . . .  | 1 <input type="checkbox"/> Yes | 48 |
|  | 2 <input type="checkbox"/> No  |    |
| 114. Spent less time on activities that used to be important to you — like playing sports, hobbies, or other interests — so that you could use cocaine? . . . . .    | 1 <input type="checkbox"/> Yes | 49 |
|  | 2 <input type="checkbox"/> No  |    |
| 115. Had health problems caused by using cocaine? . . . . .  | 1 <input type="checkbox"/> Yes | 50 |
|  | 2 <input type="checkbox"/> No  |    |
| 116. Continued to use cocaine even when you knew it was causing you health problems? . . . . .   | 1 <input type="checkbox"/> Yes | 51 |
|  | 2 <input type="checkbox"/> No  |    |
| 117. Felt depressed, anxious, or uninterested in things, or suspicious or distrustful of people because of using cocaine? . . . . .                                  | 1 <input type="checkbox"/> Yes | 52 |
|  | 2 <input type="checkbox"/> No  |    |
| 118. Continued to use cocaine even though you knew it made you feel depressed, anxious, or uninterested in things, or suspicious or distrustful of people? . . . . . | 1 <input type="checkbox"/> Yes | 53 |
|  | 2 <input type="checkbox"/> No  |    |
| 119. Built up a tolerance to cocaine so that the same amount of cocaine had less effect than before? . . . . .   | 1 <input type="checkbox"/> Yes | 54 |
|  | 2 <input type="checkbox"/> No  |    |
| 120. Felt sick or irritable because you stopped or cut down on your cocaine use? . . . . .   | 1 <input type="checkbox"/> Yes | 55 |
|  | 2 <input type="checkbox"/> No  |    |
| 121. Used alcohol or drugs because you felt sick or irritable when you stopped or cut down on your cocaine use? . . . . .  | 1 <input type="checkbox"/> Yes | 56 |
|  | 2 <input type="checkbox"/> No  |    |
| 122. Gone to a self-help group, counselor, doctor, or other professional to get help because of your cocaine use? . . . . .  | 1 <input type="checkbox"/> Yes | 57 |
|  | 2 <input type="checkbox"/> No  |    |

# Vital and Health Statistics series descriptions

- SERIES 1.** **Programs and Collection Procedures** – These reports describe the data collection programs of the National Center for Health Statistics. They include descriptions of the methods used to collect and process the data, definitions, and other material necessary for understanding the data.
- SERIES 2.** **Data Evaluation and Methods Research** – These reports are studies of new statistical methods and include analytical techniques, objective evaluations of reliability of collected data, and contributions to statistical theory. These studies also include experimental tests of new survey methods and comparisons of U.S. methodology with those of other countries.
- SERIES 3.** **Analytical and Epidemiological Studies** – These reports present analytical or interpretive studies based on vital and health statistics. These reports carry the analyses further than the expository types of reports in the other series.
- SERIES 4.** **Documents and Committee Reports** – These are final reports of major committees concerned with vital and health statistics and documents such as recommended model vital registration laws and revised birth and death certificates.
- SERIES 5.** **International Vital and Health Statistics Reports** – These reports are analytical or descriptive reports that compare U.S. vital and health statistics with those of other countries or present other international data of relevance to the health statistics system of the United States.
- SERIES 6.** **Cognition and Survey Measurement** – These reports are from the National Laboratory for Collaborative Research in Cognition and Survey Measurement. They use methods of cognitive science to design, evaluate, and test survey instruments.
- SERIES 10.** **Data From the National Health Interview Survey** – These reports contain statistics on illness; unintentional injuries; disability; use of hospital, medical, and other health services; and a wide range of special current health topics covering many aspects of health behaviors, health status, and health care utilization. They are based on data collected in a continuing national household interview survey.
- SERIES 11.** **Data From the National Health Examination Survey, the National Health and Nutrition Examination Surveys, and the Hispanic Health and Nutrition Examination Survey** – Data from direct examination, testing, and measurement on representative samples of the civilian noninstitutionalized population provide the basis for (1) medically defined total prevalence of specific diseases or conditions in the United States and the distributions of the population with respect to physical, physiological, and psychological characteristics, and (2) analyses of trends and relationships among various measurements and between survey periods.
- SERIES 12.** **Data From the Institutionalized Population Surveys** – Discontinued in 1975. Reports from these surveys are included in Series 13.
- SERIES 13.** **Data From the National Health Care Survey** – These reports contain statistics on health resources and the public's use of health care resources including ambulatory, hospital, and long-term care services based on data collected directly from health care providers and provider records.
- SERIES 14.** **Data on Health Resources: Manpower and Facilities** – Discontinued in 1990. Reports on the numbers, geographic distribution, and characteristics of health resources are now included in Series 13.
- SERIES 15.** **Data From Special Surveys** – These reports contain statistics on health and health-related topics collected in special surveys that are not part of the continuing data systems of the National Center for Health Statistics.
- SERIES 16.** **Compilations of Advance Data From Vital and Health Statistics** – Advance Data Reports provide early release of information from the National Center for Health Statistics' health and demographic surveys. They are compiled in the order in which they are published. Some of these releases may be followed by detailed reports in Series 10–13.
- SERIES 20.** **Data on Mortality** – These reports contain statistics on mortality that are not included in regular, annual, or monthly reports. Special analyses by cause of death, age, other demographic variables, and geographic and trend analyses are included.
- SERIES 21.** **Data on Natality, Marriage, and Divorce** – These reports contain statistics on natality, marriage, and divorce that are not included in regular, annual, or monthly reports. Special analyses by health and demographic variables and geographic and trend analyses are included.
- SERIES 22.** **Data From the National Mortality and Natality Surveys** – Discontinued in 1975. Reports from these sample surveys, based on vital records, are now published in Series 20 or 21.
- SERIES 23.** **Data From the National Survey of Family Growth** – These reports contain statistics on factors that affect birth rates, including contraception, infertility, cohabitation, marriage, divorce, and remarriage; adoption; use of medical care for family planning and infertility; and related maternal and infant health topics. These statistics are based on national surveys of childbearing age.
- SERIES 24.** **Compilations of Data on Natality, Mortality, Marriage, Divorce, and Induced Terminations of Pregnancy** – These include advance reports of births, deaths, marriages, and divorces based on final data from the National Vital Statistics System that were published as supplements to the *Monthly Vital Statistics Report* (MVS). These reports provide highlights and summaries of detailed data subsequently published in *Vital Statistics of the United States*. Other supplements to the MVS published here provide selected findings based on final data from the National Vital Statistics System and may be followed by detailed reports in Series 20 or 21.
