EMERGING VECTOR-BORNE DISEASES: YELLOW FEVER AS A PARADIGM

> INTERNATIONAL CONFERENCE ON EMERGING INFECTIOUS DISEASES MARCH, 2002 C. J. PETERS, M.D. UTMB, GALVESTON, TX

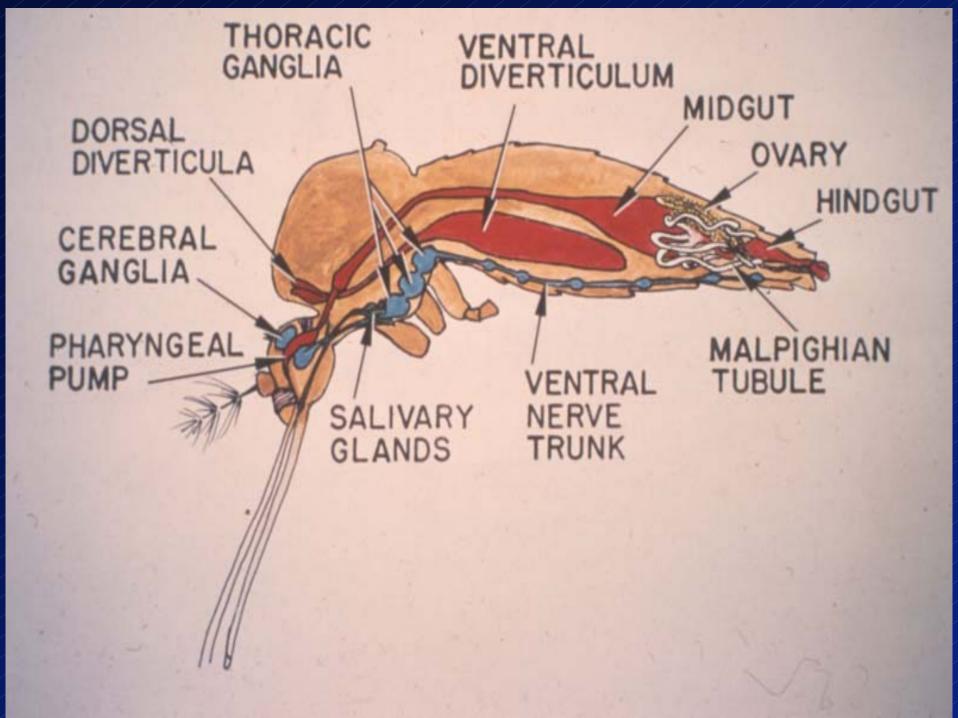

TYPICAL ARTHROPOD-VERTEBRATE CYCLE

INFECTED ARTHROPOD FEEDS ON SUSCEPTIBLE VERTEBRATE

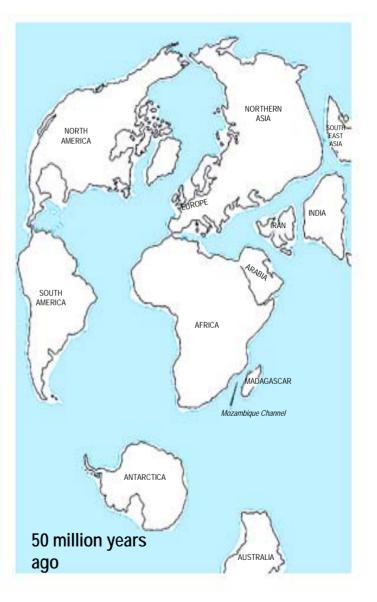

UNINFECTED ARTHROPODS FEED ON VIREMIC VERTEBRATE

INCUBATION PERIOD= ESCAPE FROM MIDGUT, VIRUS IN HEMOLYMPH, INFECTION OF SALIVARY GLANDS

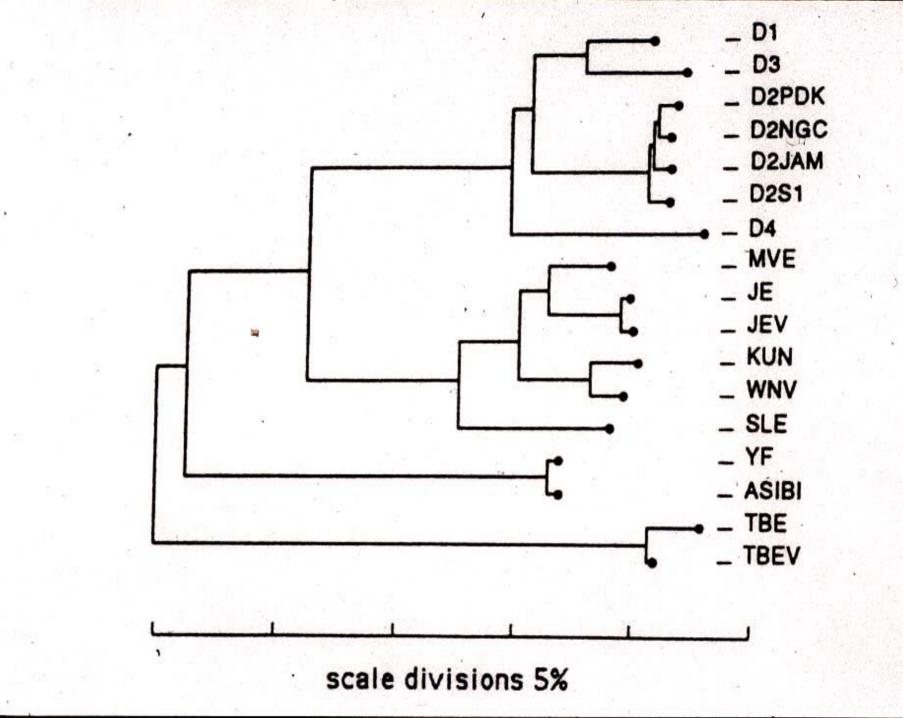

SYLVATIC VIRUSES, 1996

HISTORY OF YELLOW FEVER 1.1 SOME SPECULATIONS

 3,000-4,000 yrs ago YF virus emerged in the African forest as a distinct phylogenetic lineage

 Prototypical YF virus transmitted by *Aedes* (Stegomyia) mosquitoes among canopy dwelling primates, or perhaps prosimians

EXPONENTIAL GROWTH

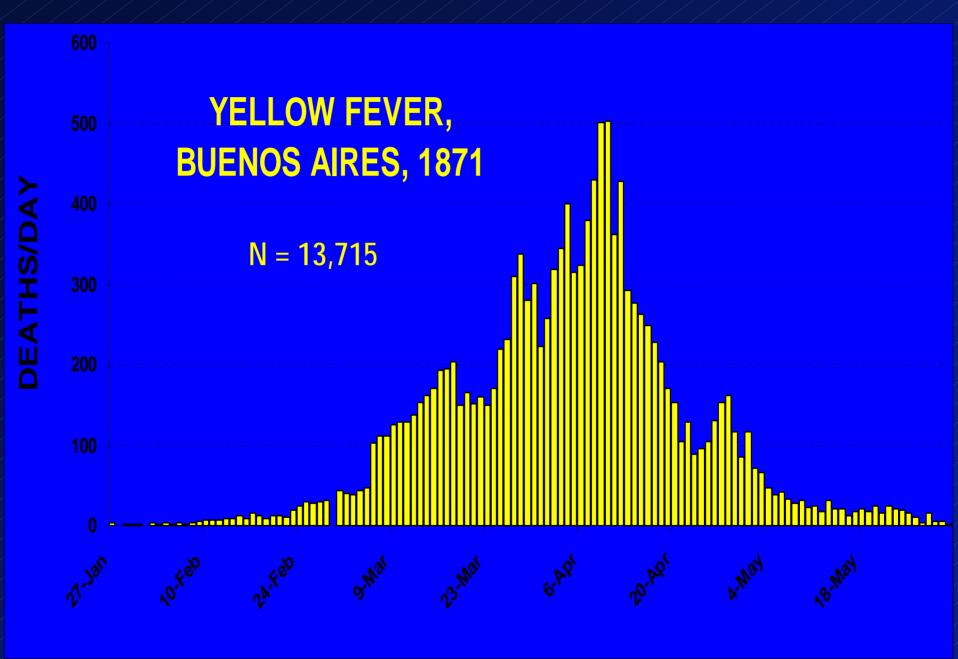

HISTORY OF YELLOW FEVER 1.2

 3,000-4,000 yrs ago YF virus emerged in the African forest as a distinct phylogenetic lineage

- Prototypical YF virus transmitted by *Aedes* (Stegomyia) mosquitoes among canopy dwelling primates
- A forest mosquito, Ae. (Stegomyia) aegypti adapted to human villages evolving toward a lighter colored, highly anthropophilic race
- YF virus became adapted to *Ae. aegypti* mosquitoes and became a village and later an urban problem
- Travel and transport, particularly the slave trade took the mosquito and the virus to the Americas and Europe

They are a Dieing on our right hand & on our Left, we have it oposit us, in fact, all around us, great are the number that are Calld to the grave. To see the hurst go by, is now so common, that we hardly take notice of it, in fine we live in the midst of death. When I se the Metropolis of the United States depopulated it is too distressing and afecting a sean for a person young in Life to bear.

Isaac Heston, age 22 years, Philadelphia, 1793. Ten days before his death from yellow fever.

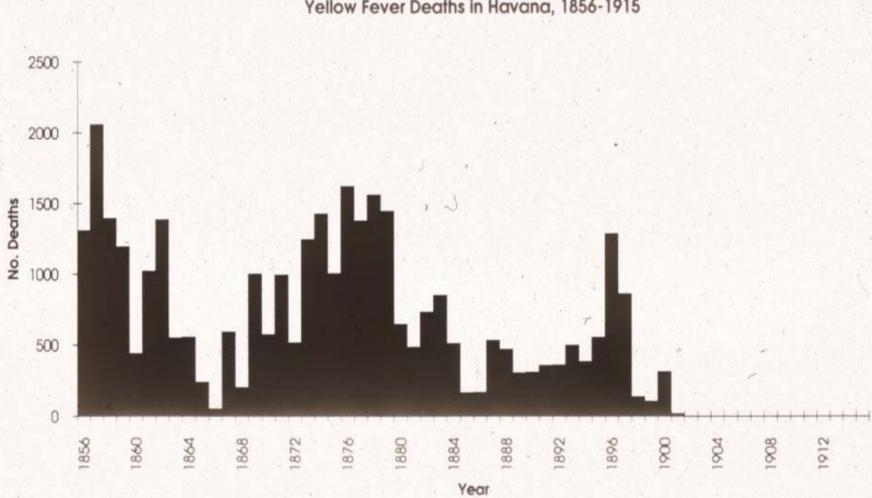

VOMITO NEGRO YELLOW FEVER

HISTORY OF YELLOW FEVER 2

- 1648: first description of *xekik* epidemic in Yucatan
- YF virus adapts to new genus of mosquito and American monkeys in forest
- Major epidemics of YF in cities throughout Americas
- 1793: Philadelphia with 10% of 40,000 population
 Multiple introductions of YF to Europe (but never Asia)
- 1898: Spanish American war and Cuban occupation

Yellow Fever Deaths in Havana, 1856-1915

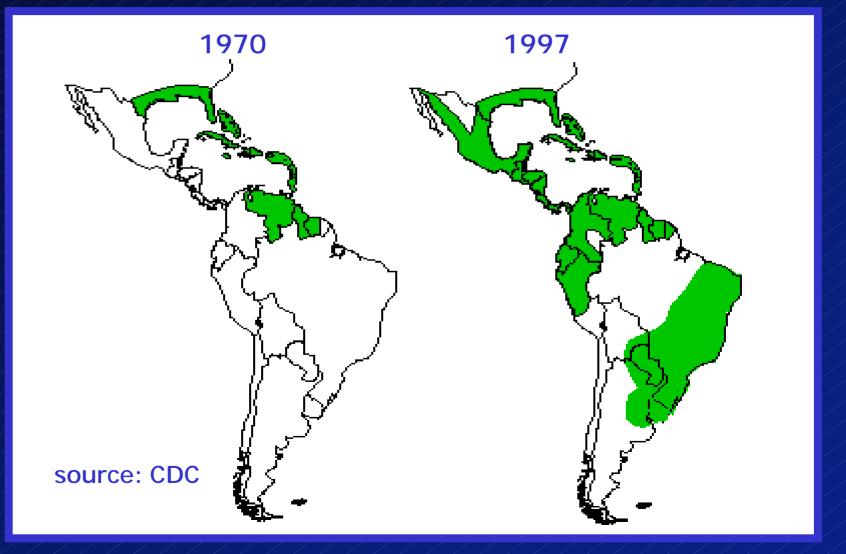

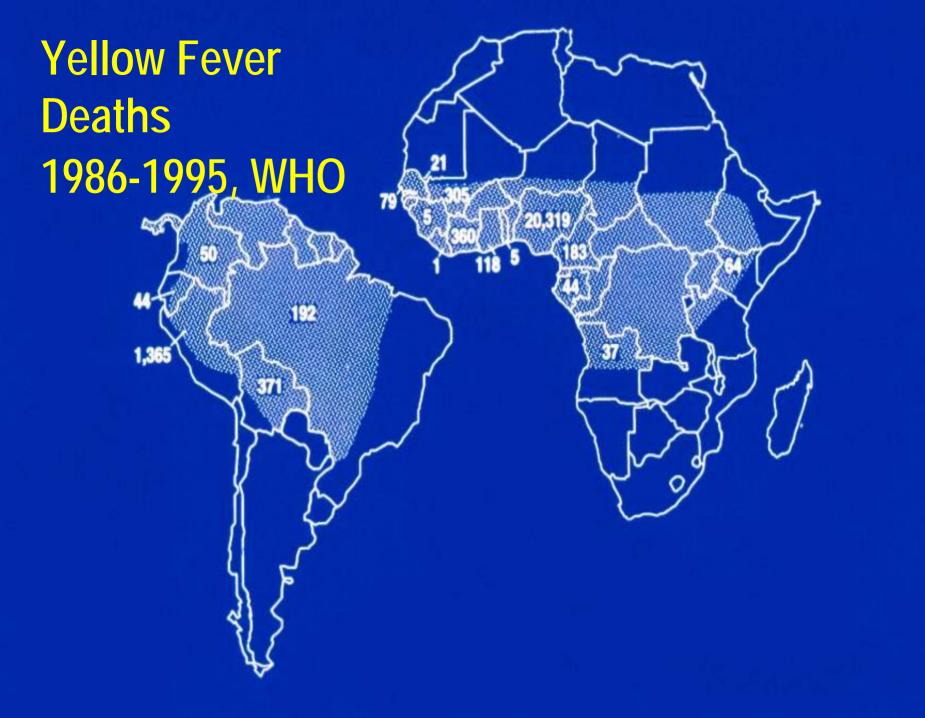

LAB INFECTIONS YF VIRUS: ROCKEFELLER EXPERIENCE

Vaccine	Workers	Cases	Dead
Before	55	16	5
After	189	0	0

After May 1931 the International Health Division used 17D yellow fever vaccine in their staff

Distribution of *Aedes aegypti* in the Americas 1970-1997

YELLOW FEVER Santa Cruz, Bolivia

YELLOW FEVER, 2002

- 47yo petroleum engineer on 5 day fishing trip to Amazon; no YF vaccine, malaria prophylaxis, DEET, mosquito net.
- Mar 10 fever and severe headache. Wbc 3.3; platelets 158,000; SGOT 35; BUN 11
- Mar 12 develops nausea and vomiting and admitted with temp of 104° F. Wbc 2.3; platelets 103,000; BUN 21
- Mar 13 photophobia. Wbc 1.4; BUN 34; SGOT 8598
- Mar 14 progression of liver failure, renal failure, shock
 Mar 16 death after intubation and extensive blood contamination of physician
- Mar 22 Sherif Zaki reports positive IHC and TDOH makes case public

ARBOVIRUS DISEASES THAT MOVE AROUND

DISEASE Yellow fever Dengue Chikungunya West Nile Venezuelan EE **Rift Valley fever**
