LEXINGTON FERTILITY CENTER LEXINGTON, KENTUCKY

Comparison of success rates across clinics may not be meaningful. Patient medical characteristics and treatment approaches vary (see pages 11-20).

2014 ART CYCLE PROFILE

Data verified by George M. Veloudis, DO

Type of ART and Procedural Factors ^a				Patient Diagnosis b				
IVF	100%	With ICSI	100%	Tubal factor	39%	Uterine factor	0%	Multiple Factors:
Unstimulated	0%	PGD/PGS	0%	Ovulatory dysfunction	28%	Male factor	61%	Female factors only 0%
Used gestational carrier	0%			Diminished ovarian reserve	11%	Other factor	6%	Female & male factors 44%
				Endometriosis	0%	Unknown factor	0%

CURRENT SERVICES & PROFILE

Current Name: Lexington Fertility Center

Donor eggs?	No	Gestational carriers?	Yes	Single women?	Yes	Verified lab accreditation?	No
Donor embryos?	Yes	Embryo cryopreservation?	Yes	SART member?	No	(See Appendix C for details.)	

a Reflects features of fresh nondonor cycles. If IVF is less than 100%, the remaining cycles are GIFT, ZIFT, or a combination of these procedures with IVF.

^b Total patient diagnosis percentages may be greater than 100% because more than one diagnosis can be reported for each ART cycle.

^c Fractions are used for rates with denominators less than 20. Multiple-infant births (for example, twins) with at least one live infant are counted as one live birth.

d Total cycle number includes those using frozen eggs. It excludes 0 cycle(s) evaluating new procedures. Both cycle types are excluded from ART success rates.

e In this report, births are defined as term if at least 37 full weeks gestation and normal birth weight if at least 2,500 grams (approximately 5 pounds, 8 ounces).

f All ages are reported together because previous data show that patient age does not materially affect success with donor eggs.
