FERTILITY CENTER, LLC CHATTANOOGA, TENNESSEE

Comparison of success rates across clinics may not be meaningful. Patient medical characteristics and treatment approaches vary (see pages 11-20).

| 2014 ART CYCLE PROFILE | Data verified by Barry W. Donesky, MD |
|------------------------|---------------------------------------|
| | |

| Type of ART and Procedural Factors ^a | | | | | Patient Diagnosis b | | | | | |
|---|--------------------------|------|-----------|-----|----------------------------|-----|----------------|-----|-----------------------|----|
| | IVF | 100% | With ICSI | 86% | Tubal factor | 12% | Uterine factor | 2% | Multiple Factors: | |
| | Unstimulated | 0% | PGD/PGS | 0% | Ovulatory dysfunction | 11% | Male factor | 37% | Female factors only | 1% |
| | Used gestational carrier | 5% | | | Diminished ovarian reserve | 20% | Other factor | 5% | Female & male factors | 5% |
| | | | | | Endometriosis | 7% | Unknown factor | 12% | | |

| | Endometriosis | 7% L | Jnknown fac | tor 12% | Ď | | | |

8 / 15

a Reflects features of fresh nondonor cycles. If IVF is less than 100%, the remaining cycles are GIFT, ZIFT, or a combination of these procedures with IVF.

^b Total patient diagnosis percentages may be greater than 100% because more than one diagnosis can be reported for each ART cycle.

^c Fractions are used for rates with denominators less than 20. Multiple-infant births (for example, twins) with at least one live infant are counted as one live birth.

d Total cycle number includes those using frozen eggs. It excludes 0 cycle(s) evaluating new procedures. Both cycle types are excluded from ART success rates.

e In this report, births are defined as term if at least 37 full weeks gestation and normal birth weight if at least 2,500 grams (approximately 5 pounds, 8 ounces).

f All ages are reported together because previous data show that patient age does not materially affect success with donor eggs.
