	1/3			6 / 15	
Percentage of transfers resulting in term, normal weight & singleton live births ^e (%)	1/3			2 / 10	
Percentage of transfers resulting in singleton live births (%)	1/3			4 / 10	
Percentage of transfers resulting in twin live births (%)	0/3			1 / 10	
Percentage of transfers resulting in live births (%)	1/3			5 / 10	
Percentage of transfers resulting in pregnancies (%)	2/3			5 / 10	

^a Reflects features of fresh nondonor cycles. If IVF is less than 100%, the remaining cycles are GIFT, ZIFT, or a combination of these procedures with IVF.

Yes SART member?

Yes

(See Appendix C for details.)

^b Total patient diagnosis percentages may be greater than 100% because more than one diagnosis can be reported for each ART cycle.

^c Fractions are used for rates with denominators less than 20. Multiple-infant births (for example, twins) with at least one live infant are counted as one live birth.

^d Total cycle number includes those using frozen eggs. It excludes 0 cycle(s) evaluating new procedures. Both cycle types are excluded from ART success rates.

^e In this report, births are defined as term if at least 37 full weeks gestation and normal birth weight if at least 2,500 grams (approximately 5 pounds, 8 ounces).

^f All ages are reported together because previous data show that patient age does not materially affect success with donor eggs.

Embryo cryopreservation?

Donor embryos?

Yes
